PREFACE.

THE DAILY NEWS ALMANAC AND POLITICAL REGISTER for 1896 is compiled with special reference to the political campaign of the year. The very general and widespread interest that has been excited by the discussion of the silver question and the action of political organizations regarding it makes it reasonably certain that it will play an important part in the pending presidential campaign. A very generous amount of space has been given in the present issue to a perfectly impartial statement of the various phases of the silver question and to invaluable statistics bearing upon the subject. Most that is of permanent value on the subject that has been brought out by the year's discussion is condensed into a popular form in these pages.

The tariff is quite likely to be an important issue in the coming political struggle and large additions have been made to what has usually been published in the ALMANAC on that subject. The table giving our exports to and imports from every foreign country shows the trend of our trade and commerce. The history of the government's dealings with the bond syndicate outlines one of the most peculiar monetary operations in the history of national finances in this or any other country.

The elections in fourteen states of the union—full returns of which are given—show the tendency of political thought and will serve as a basis for future calculations.

Unusual efforts have been put forth, by large additions of new and fresh material, to make THE DAILY NEWS ALMANAC AND POLITICAL REGISTER for 1896 not only popular with but a necessity to all thinking American citizens who desire to acquaint themselves with political issues and measures with the view to casting an intelligent ballot in the next presidential election.

Chicago Daily News Almanac 1896.

NOTE.—The time given in this Almanac is local mean time, except when otherwise indicated.

ECLIPSES.

In the year 1896 there will be four eclipses, two of the Sun and two of the Moon.

I. An Annular Eclipse of the Sun, February 13. Invisible to North America. Visible to the south-eastern coast of South America, Southern Africa and the South Atlantic and Antarctic Oceans. The line of Annulus passing through the Antarctic Ocean.

II. A Partial Eclipse of the Moon, February 28. Invisible to North America. Visible entire to Europe, Asia and Africa, and in part to Australia, the eastern extremity of South America and the Atlantic Ocean.

III. A Total Eclipse of the Sun, August 9. Invisible to North America, exclusive of Alaska. Visible to the Arctic regions, eastern Europe, the northern half of Asia, including China and Japan, and the western portion of the North Pacific Ocean. The line of totality running through Nova Zembla and Yesso, Japan. At Sitka the eclipse will begin at 7 h. 37 m. P. M., the Sun setting slightly eclipsed at 7 h. 53 m.

IV. A Partial Eclipse of the Moon, August 22-23. Visible entire to North and South America and the Sandwich Islands, and in part to the western extremities of Europe and Africa, to eastern Australia, and the Atlantic and Pacific Oceans. Occurring as follows:

	CHICAGO.	ST. LOUIS.	ST. PAUL.
	D. H. M.	D. H. M.	D. H. M.
Moon enters Penumbra	22 10 7 A.	22 10 7 A.	22 10 7 A.
Moon enters Shadow	11 25 A.	11 25 A.	11 25 A.
Middle of Eclipse	23 0 58 M.	23 0 58 M.	23 0 58 M.
Moon leaves Shadow	2 30 M.	2 30 M.	2 30 M.
Moon leaves Penumbra	3 48 M.	3 48 M.	3 48 M.

First contact of shadow, 79 degrees from south point of the Moon's limb toward the east.
Magnitude of Eclipse = 0.735. (Moon's diameter = 1.)

THE FOUR SEASONS.

SEASON.	Begins.	Lasts.
		D. H. M.
Winter	December 21, 1895, 7:38 P.M.	89 0 04

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:* To know on what day of the week July 4 was in the year 1895. In the table of years look for 1895, and in a parallel line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—*This Calendar is from Whitaker's London Almanack, with some revisions.*

IMPORTS OF MERCHANDISE, WITH RATE OF DUTY,

For the fiscal year ended June 30, 1895, compared with the corresponding period of 1894.
[Abbreviation: n. e. s., not elsewhere specified.]

NOTE.—The new arrangement, combining free and dutiable is made to conform to the tariff classification which took effect August 28, 1894.

Dentists	17,498	17,161	337
Designers, draughtsmen, and inventors	9,392	9,086	306
Engineers (civil, mechanical, electrical, and mining) and surveyors	43,242	43,115	127
Journalists	21,849	20,961	888
Lawyers	89,630	89,422	208
Musicians and teachers of music	62,155	27,636	34,519
Officers of United States army and navy	2,926	2,926	.....
Officials (government) (5)	79,664	74,789	4,875
Physicians and surgeons	104,803	100,248	4,555
Professors in colleges and universities	5,432	4,697	735
Teachers	341,811	96,581	245,230
Theatrical managers, showmen, etc	18,055	17,421	634
Veterinary surgeons	6,494	6,492	2
Other professional service	1,569	1,090	479
Domestic and personal service	4,360,506	2,692,820	1,667,686
Barbers and hairdressers	84,976	82,151	2,825
Bartenders	55,807	55,660	147
Boarding and lodging house keepers	44,349	11,756	32,593
Engineers and firemen (not locomotive)	139,765	139,718	47
Hotelkeepers	44,140	38,825	5,315
Housekeepers and stewards (6)	92,810	6,008	86,802
Hunters, trappers, guides, and scouts	2,552	2,531	21
Janitors	21,556	18,776	2,780
Laborers (not specified) (1)	1,913,317	1,858,504	54,813

(1) In agricultural districts "agricultural laborers" are often reported simply as "laborers."

(2) Farmers' wives, sons and daughters, working in common and without stated remuneration, especially in the southern states, are often reported as "farmers" and so tabulated.

(3) Frequently returned as "sailors." In many cases where the avocation is followed for only a portion of the year they are reported under some other branch of industry.

(4) Includes "turpentine farmers and laborers," principally found in a few of the southern states.

(5) Includes national, state, county, city and town governments.

(6) Includes paid housekeepers in private families, hotels, etc., matrons in public and private institutions and stewards and stewardesses.

(1) "Sailors" at sea are liable to be omitted unless they are actual members of families which are enumerated.

(2) Includes bookkeepers and accountants of all kinds, irrespective of where they may happen to be employed.

(3) Includes clerks and copyists of all kinds, irrespective of where they may happen to be employed. See "Stenographers and typewriters."

(4) See "Steam railroad employes (not otherwise specified)."

(5) Includes officials of mining and quarrying companies, classified in 1880 with officials of manufacturing companies.

(6) See "Locomotive engineers and firemen."

(7) Generally reported as blacksmiths, carpenters, iron and steel workers, machinists, painters, wood workers, etc.

WAGES IN FOREIGN COUNTRIES.

The following statement, showing the rates of wages in the general trades in various countries, has been prepared by the department of state.

The rates given for foreign countries have been compiled from United States Consular Reports, with the exception of the rates in New South Wales, which have been compiled from the Statistical Register of New South Wales for 1891.

In some cases, where no general rates of later date were available, the statistics are taken from a Special United States Consular Report, entitled Labor in Foreign Countries, printed in 1884. In nearly all the cases, however, the rates for 1884 are supplemented by later statistics, which will be found immediately following the tabular statements. These subsidiary figures will aid in arriving at a close approximation of the present rates of wages prevailing in those countries. They will, also, serve to show that only slight changes in the rates of wages have occurred during the decade, and that the rates for 1884 are substantially the same as those which now prevail in foreign countries, the former being, if anything, higher than the present rates.

It was considered necessary, for comparative purposes, to give a column to the United States, but as there is no department compilation showing the average wages prevailing in this country the figures were taken from the report to the United States senate (LIId congress, second session), upon transportation, wages and prices for fifty-two years, ended July, 1891, in certain localities in Connecticut, Delaware, Illinois, Kentucky, Maryland, Massachusetts, New Hampshire, New York, Pennsylvania and Tennessee. The rates for the several trades, as stated in that report, were collated, and the averages are the rates given in this statement. It is deemed necessary to add, however, that as there is no uniformity in the number of times the several trades are mentioned in the reports—the tables being separately printed and in great detail—the rates given cannot be called a true average of the rates which prevailed in the states mentioned. For instance, some trades are mentioned once or twice—that is, in one or two reports, representing only as many places (cities)—while others are mentioned in six, ten or fifteen, or more, reports; and while the oft-mentioned trades may be accepted as comparatively true averages, the trades mentioned in only a few reports represent only the districts for which they are given. In the absence of all other statistics, this is the best that could be done in regard to the United States, and the rates as a rule should be taken as only comparatively those which prevailed in 1891.

The weekly hours of labor—that is, the actual working hours—in the several countries, as well as can be ascertained from the foregoing sources, are:

COUNTRIES WITH CURRENCIES ON GOLD BASIS.

Australasia—New South Wales, not stated; New Zealand, 48 hours; Victoria, 48 hours.

Brazil, 60 hours.

Belgium, 54, 60, 72 and 78 hours, 60 hours being the most general.

Canada, 60 hours.

Denmark (Copenhagen), 60 hours.

France, 60, 66 and 72 hours, 60 hours being the most general.

Germany, 60, 63, 66 and 72 hours, 60 and 66 hours being the most general.

Holland, 60 and 63 hours.

Italy, 60, 66 and 72 hours, 60 hours being the most general.

Spain, 60, 63 and 72 hours, 60 hours being the most general.

Switzerland, 60 and 66 hours, the latter being the most general.

United States, 60 hours.

COUNTRIES WITH CURRENCIES ON SILVER BASIS.

Austria, 60, 66 and 72 hours, the latter being the most general.

China—In Amoy the general trades labor 60 hours, but in southern China, and generally throughout China, the working hours are from "daylight to dark," with an hour for the noonday meal and a few minutes in the forenoon and afternoon for tea and refreshments.

Colombia, 60 to 72 hours.

Ecuador (Guayaquil), 60 hours.

Japan—Consular reports do not give the hours of labor, but it may be assumed that they are somewhat like those prevailing in China.

Mexico, 60 hours.

Persia—From sunrise to sunset. In winter, an hour at noon for eating; in summer, workmen have two intermissions, first at 11 o'clock for breakfast and a few minutes in the afternoon for lunch. Generally speaking there is no labor performed on Fridays.

Russia, 60, 69 and 72 hours, the latter being most prevalent.

Venezuela, 60 hours.

Austria-Hungary and Russia have been omitted from the fixed-currency table for the reason that while a gold basis has been recently adopted in the former and is being gradually established in the latter, they were on a silver basis at the time the rates of wages given were in force. They are, therefore, included in the table of countries having a fluctuating currency, with explanatory notes as to the present condition of their finances.

The following supplementary statements give such later information as was obtainable concerning the rates of wages in gold-standard countries:

Germany, 1889.—Annual wages earned in the various industries in 1889: Building trades (not otherwise designated), $124; potters, $157; machine shops and iron and steel works, $200; gas works and water works, $194; chemical industries, $138; leather industries, $187; paper mills, $162; potteries, $158; glass works, $155; silk mills, $146; textile industries, $123; rolling mills, $238; quarries, $63. (Consular Reports No. 148, p. 97.)

Germany, 1890.—The British consul at Munich, July 9, 1890, reports: In the country the price of skilled labor is lowest in the textile industries and highest in parquetry and in stove and glue factories, etc.—male skilled labor, 48 cents to $1.20; ordinary male labor, 42 to 66 cents; female skilled labor, 34 to 72 cents; ordinary female labor, 26 to 34 cents. Men's average wages in the industries—Textile, 72 cents; iron industries, $1.28. Printers in Munich, 82 cents; ordinary labor in Munich, 54 to 66 cents; ordinary labor in the country, 48 cents. Wages of skilled female labor in Munich, under 72 cents.

Germany, 1892.—A Berlin machine maker by constant work earns $250.60 per annum; a Berlin bricklayer or carpenter, less the rainy and frosty days, earns $253 per annum; an Erlanger first workman in a stone quarry, $232.53; ordinary workman, $187.95. (Consular Reports No. 145, p. 302.)

England, 1892.—Telegraph service, government operators: Men, first class, $9.73 per week; second class, $2.92, $3.40 and $4.38 per week, for first, second and third years respectively. Women, first class, $6.80 per week; sec-

*The gold standard prevails in Brazil, but the actual currency is paper, which is now valued at about 18 cents per milreis, while the gold milreis is worth 54.6 cents. As the rates given are based upon a gold standard, and as it is now most likely that labor is paid in paper currency, it follows that the purchasing power of the paper-currency wage is only about one-third the purchasing power of the rates given in the table, and that labor has suffered to that extent, unless wages have been trebled in the meantime.

ond class, $2.43, $2.92 and $3.65 per week for first, second and third years respectively. The second class operators are as two to one as compared with the first class. The number of women employed as operators is one-third of the total force. Midland railway operators are paid from $97.33 for first year to $389.32 for the tenth year, the increase taking place year after year, higher salaries being dealt with according to the special circumstances of each case. Great Western railway operators are paid from $340.65 to $729 per annum. Lancashire and Yorkshire railway operators are paid $4.86 to $6.32 per week. (Consular Reports No. 144, p. 47.)

England, 1894.—Weekly wages in Liverpool shipyards: Pattern makers, $8.51; machinists, $8; boiler makers, $8.63; pipe fitters, $8.51; carpenters, $9.11; drillers, $6.30; joiners, $8.51; fitters, $5.59; riveters, $7.90; calkers, $7.90; painters, $8; smiths, $9.36; laborers, $4.86. (Consular Reports No. 170, p. 302.)

Ireland, 1894.—Weekly wages paid in Belfast shipyards: Platers, $8.26; helpers, $3.89; riveters and calkers, $7.53; drillers, $3.77; joiners, $8; smiths, $7.78; finishers, $7.05; bolt makers,

$7.90; strikers, $4.74; pattern makers, $8; fitters, $7.78; shipwrights, $8.14; laborers, $3.77; riggers and sawyers, $7.17; sailmakers, $6.96; plumbers, $8.75: assistants, $2.67: polishers, $7.30; upholsterers, $8.26. (Consular Reports No. 170, p. 304.)

Scotland, 1894.—Weekly wages in the Clyde shipyards: Pattern makers, $9.35; machinists, $6.48; boiler makers and plumbers, $8.64; pipe fitters, $7.29; shipwrights, $8.10; joiners, $7.84; drillers, $9.18; riveters, $10.80; calkers, $9.72; painters, $8.10; furnace men, $6.48; sheet-iron workers, $7.02; coppersmiths, $8.37; iron molders, $8.10; brass molders, $6.60; blacksmiths, $8.10; laborers, $5.40; frame setters, $9.18. (Consular Reports No. 170, p. 307.)

Holland, 1892.—Any statement respecting the earnings of the various laborers can only be approximative, on account of the great difference and fluctuations in both hours of labor and wages. One witness stated that a good workman (on the docks) at Rotterdam ought easily to make $4 to $4.80 per week the year round, but the rate of wages per hour may be put at from 8 to 10 cents. Laborers employed on railways and at the depots average from 36 to 70 cents per day, with a bonus of from $1.25 to $1.60 per month. Drivers on tramway cars receive from $4.05 to $5.68 per week, and conductors $5.25. Smiths and other workmen employed in the carriage factories of the tramway companies earn $6.08 per week. Engine drivers on steam tramways earn from $4.86 to $6.85 per week, besides a bonus. These at first sight may appear substantial earnings, but it must be borne in mind that the purchasing price of the florin (40.2 cents) scarcely exceeds that of a shilling (24 cents) in England.

Holland, 1894.—Weekly wages in shipyards: Pattern and boiler makers, $6.24; machinists, $6.72; plumbers and pipe fitters, $5.28; carpenters and painters, $4.80; joiners, calkers, furnace men and molders, $6; drillers, $4.88; fitters-up and riveters, $7; sheet-iron workers, $5.08; coppersmiths, $5.64; laborers, $4.20. (Consular Reports No. 170, p. 300.)

Italy, 1889.—Per diem wages in Florence: Machine and molding shops—Cabinet makers, 48 to 68 cents; wood carvers, 39 to 68 cents; carpenters, 48 to 59 cents; carriage builders, ordinary hands, 58 cents, first class hands, 96 cents to $1.15. Pottery and porcelain works—Painters, 10 cents to $1.15; turners, 58 to 96 cents; firemen, 23 to 49 cents; laborers, 28 to 49 cents; potters, 58 to 68 cents. Glassworks—Blowers, 96 cents to $2.30; cutters, 58 to 96 cents; mechanics, 58 to 76 cents; laborers, 20 to 76 cents; founders, 48 cents to $1.15. Goldsmiths and jewelers, 49 to 96 cents. Paper mills—Machine tenders, 39 to 49 cents; ordinary hands, 29 to 45 cents. Printers, 58 to 96 cents; lithographers, ordinary hands, 34 to 69 cents; skilled hands, 59 to 78 cents.

Italy, 1890.—Weekly wages in Genoa: Carpenters, $3.60 to $6 for first class hands and $3 to $3.60 for second class; masons, $3 to $3.60; plasterers, $3 to $4.25; stone cutters, $3 to $3.60; house painters, $2.40 to $3; blacksmiths, $2 to $4.80; tailors, $2.40 to $4.20; shoemakers, $1.80 to $2.40; hatters, $2.40 to $4.80; machinists, $3.60 to $6; fitters, $3 to $6.90; ship carpenters, $6. Stevedores throughout Italy, $7.44, about the highest wages earned in the general trades and callings.

Switzerland, 1892.—The Swiss workingman is satisfied with a rate of remuneration which is 33 to 40 per cent below that of the English and 10 to 15 per cent below that of the French workingman, the rates varying in different parts, being higher in the French than in the German cantons. Swiss official estimates of the average wage of a Swiss male worker fixes it at 50 to 60 cents per diem, but the consul considers this estimate too low. Non-contract laborers earn from 48 to 72 cents. (British Consular Reports.)

Switzerland, 1895.—The following figures are taken from a report by Consul Germain of Zurich, dated July 11, 1895: The average wages paid in cotton mills vary between 29 and 50 cents per diem. A day's wage of 80 cents for ordinary factory hands is an exception. Among the reelers the wages are lowest, one-eighth of these not receiving more than 20 cents per day. Silk mills: Dyers and finishers, 30 per cent receive less than 30 cents and only 15 per cent receive over 40 cents; winders and twisters, 40 to 50 cents; spinners, 33 to 35 cents; warpers, 50 to 60 cents; weavers, 40 to 60 cents —all per diem. Iron foundries and machine works: Unskilled laborers (20 per cent of the whole), 60 cents; skilled workers (57 per cent of the whole), 50 cents to $1; and the remaining skilled workers (23 per cent of the whole), $1 to $2—per diem.

Austria, 1889.—From a British consular report dealing with labor in the several districts of Austria-Hungary, the following daily wage rates are taken: Budapest—Factory hands, 10 cents (lowest) to $1.05 (highest); women factory hands, 8 to 40 cents; boiler makers, 80 cents; wheelwrights, 90 cents; tinsmiths, 70 cents; coppersmiths, 84 cents; turners, 80 cents; machinists, 66 cents; locksmiths, 76 cents; instrument makers, 88 cents; carriage builders, 68 cents; woodworkers, 83 cents; saddlers and upholsterers, 81 cents; painters, 69 cents; molders, 65 cents; day workmen, 50 cents; other laborers, 46 cents; iron miners, 32 to 40 cents. Various districts—Chemical factories, 24 to 92 cents; flour mills and sugar factories, 20 to 80 cents; tobacco factories, 24 to 40 cents; distilleries, 20 to 72 cents; glass factories, 32 to 40 cents; iron works, 20 to 80 cents; sawmills, 16 to 60 cents; foundries, 40 to 92 cents; forges, machine shops and rolling mills, 40 to 96 cents; nail factories, 20 to 24 cents; women, 16 to 18 cents; day laborers, 20 to 30 cents.

Austria, 1894.—Weekly wages (60 hours) in the Trieste shipyards: Pattern makers, $4.20 to $7.80; boiler makers, plumbers, pipe fitters, coppersmiths and molders, $3.60 to $5.40; carpenters, joiners, drillers, fitters-up, riveters, calkers, painters, and furnace men, $3 to $4.50; iron and brass workers, $2.40 to $3. (Consular Reports No. 170, p. 290.) Weekly wages in hemp mills in the Budapest district: Laborers, $2,50; breakers, $3.50; hacklers, $4.14. (Consular Reports No. 168, p. 140.)

Mexico, 1885.—Mining—In the San Antonio mine (near Monterey), Mexican labor under an American superintendent speaking Spanish, work two shifts of twelve hours each. Good smelters are paid $1 per day of twelve hours; assistant smelters, 75 cents, and yard hands, 36 to 50 cents (Consular Reports No. 67, p. 491.) La Paz mines—Wages per day of twelve hours: Miners, $1,50; furnace men. $1; general workmen, $1.25; teamsters, 75 cents; machinists, $2.50; carpenters, $2; watchmen, 75 cents. (Consular Reports No. 67, p. 504.)

Mexico, 1895.—In an article in Rhodes' Journal of Banking, for July, 1895, Mr. Worthington C. Ford, Chief of the United States Treasury Bureau of Statistics, quotes a statement from Mr. C. A. Browne, treasurer of the Mexican Central Railway, as to the wages paid by that company. Mr. Browne writes:

"In the first part of 1890 we were paying Mexican laborers from 50 to 75 cents per day, according to the location upon the road; brakemen, from $45 to $50 a month; machinists, from $1 to $5 a day; masons, from $1 to $3, and carpenters, $1 to $3. At the present time laborers are receiving the same rates; carpenters, from $1.50 to $3.50 per day, and some as high as $4.75; machinists, from $1 to $5 a day, according to their skill."

AVERAGE WEEKLY WAGES PAID TO THE GENERAL TRADES IN COUNTRIES WITH CURRENCIES ON SILVER BASIS.

*Although the gold standard now prevails in Austria-Hungary, the silver standard prevailed up to August, 1892. As will be noted in the tables printed in Consular Reports showing the value of foreign coins, the Austrian silver florin, the old money unit of the empire, fluctuated in value from 47.6 cents in 1874 to 32 cents in July, 1892, when it was superseded by the gold crown, with a fixed value of 20.3 cents. The downward course of the old silver florin must be taken into account in the Austrian wage rate, thus scaling still further the very low rate which prevailed in that country.

†A week of seven days.

‡Tailors employed on native clothes.

§Employed in making foreign clothes.

Russia.—While silver is the normal currency of Russia, paper is the actual currency in which all general business and other commercial values are estimated throughout the Empire. Consul-General Karel of St. Petersburg, in a report upon this subject, says: "The paper ruble—officially called 'credit ruble'—is the actual currency of Russia." Silver, being very little in circulation, plays only a small part in Russian currency.

Gold is the standard by which the values of both the paper and silver ruble are determined. The Consul-General says that, at the date of his writing (July 16, 1895), the silver ruble passed at par with the paper ruble, which was then quoted at 52.1 cents American. According to the United States Treasury valuations, the silver ruble on that date was valued at only 38.9 cents. The Russian gold ruble has a fixed value of 77.2 cents. In 1884, the date on which the foregoing Russian wage rates were obtained, the silver ruble was valued by the United States Treasury at 64.5 cents; on July 1, 1895, at 38.9 cents.

FOREIGN MEASURES.

The metrical system is used in Europe, but the following are employed during harvest season:

THE "QUARTER" IN ENGLAND CONSISTS IN:

	Lbs.
American Atlantic coast business in all United Kingdom markets	480
Russian wheat in London	492
California wheat in all United Kingdom markets	500
English home-grown wheat in all United Kingdom markets	504
English and Scotch barley in all United Kingdom markets	448
Russian barley in London	420
Russian oats in London	504
Prince Edward Island oats in Liverpool and London	320
English and Scotch oats in all United Kingdom markets	336

OTHER MEASURES IN DIFFERENT COUNTRIES EQUAL IN:

One hundred kilos wheat	bu. 3.67
One hundred kilos corn	bu. 3.93
One hundred kilos oats	bu. 6.87
One hundred kilos rye	bu. 3.93
One hundred kilos barley	bu. 4.58
One hectolitre wheat	bu. 2.83
One centner, Austria, wheat	bu. 2.05
One fanega, Argentina, wheat	bu. 1.59
One cahiz, Argentina, wheat	bu. 19.17
One chetwerk, Russian, wheat	bu. 5.92
One pood, Russian, wheat	bu. 0.60
One candy, Bengal, wheat	bu. 9.22
One candy, Bombay, wheat	bu. 9.33
One candy, Madras, wheat	bu. 8.32
One candy, Mysore, wheat	bu. 9.33

a. Includes 6 parks of 857¼ acres, and 20 squares of 60 acres. *b.* This does not include the Coney Island Concourse, 70 acres, and the Parade Ground, 40 acres, recently brought within the city limits; nor the Ocean Parkway, 5½ miles long, and the Eastern Parkway, 2⅛ miles long, each road being 210 feet wide. The area of the city given is the old area before the annexation. *c*, "Besides a number of places." *d*. "Including park approaches." *e*. "Cleveland has recently purchased six parcels of land in different sections of the city for parks, aggregating about 700 acres." *f*. The street car company has a park of 166 acres near the city. Armstrong Park, 156 acres, lies near the city. *g*. "Several of these are very small, nothing more than small triangles. About 18 fair-sized parks." *h*. "Most of the parks of the city are very small." *i*. Pelham Park (1,700 acres) and one-half of Bronx Park (653 acres) lie outside the city limits. Total area of parks belonging to the city, 5,174 acres. *j*. "Thirteen small, three large." *k*. "Besides these there are Rock Creek Park, 1,500 acres, and the Zoological Park, containing 16 acres. Of the 413.52 acres in the city, 341.83 are improved." *l*. "The area of Athens is too large for its population. Besides the two parks there are several squares." *n*. "The corporation also possesses two hills called Redual and Bilberry Hills, containing 82 acres, and situated ten miles without the city." *o*. "And several small open spaces." *p*. "245,000 of the population reside on an area containing 64 persons to the acre." *r*. "Includes Queen's Park and Arboreum, which are under government control and contain about 614 and 58 acres respectively." *t*. "Includes Botanic Gardens, 21½ acres, and adjoining highlands of 9½ acres, also 7 disused graveyards open to the public, with an area of 12 acres, and 11 minor open spaces, with an area of 11 acres." *u*. "The area of the lakes within the parks is not included in the total area of park ground." Dr. Benkerman, Chief of Statistics of the State of Hamburg. *v*. "Several are very small, being disused churchyards, etc., laid out as ornamental grounds. Largest public park, 382 acres." *w*. "916,500 in the city and the rest in the suburbs." *x*. "Of which 1,147.26 acres contain houses and 1,258.11 acres are water." *y*. "The two great parks, of 272 and 54 acres respectively, are situated outside the area of buildings. Inside, the six largest contain, respectively, 29, 25, 22, 9¼, 6¼ and 5¾ acres."

OUR MILITARY STRENGTH.

Secretary of War Lamont sent to the last congress an abstract of the military force of the United States for the year 1894, compiled from the latest returns received by the adjutant-general of the army.

The statement shows the organized strength by states, gives the number of commissioned officers, non-commissioned officers, musicians and privates and the number of men available for military duty unorganized. A grand aggregate shows 9,505 commissioned officers, 20,410 non-commissioned officers, 4,047 musicians, 107,394 privates, and places the number of men available for military duty unorganized at 9,582,806.

Given by states, the aggregate organized strength (commissioned and non-commissioned) and unorganized men available is as follows:

States.	Organized.	Available.
Alabama	2,982	165,000
Arkansas	1,079	205,000
California	4,948	188,072
Colorado	1,621	85,000

FICTITIOUS NAMES OF CITIES.

Aberdeen, Scotland	Granite City.
Alexandria, Egypt	Delta City.
Alton, Ill	Tusselburgh.
Akron, O	Summit City.
Baltimore, Md	Monumental City.
Birmingham, O	Bran Town.
Boston, Mass	Athens of America, The Hub.
Brooklyn, N. Y	City of Churches.
Buffalo, N. Y	Windy City, Queen City of the Lakes.
Cairo, Egypt	City of Victory.
Cincinnati, O	Queen City, Porkopolis, Queen of the West.
Chicago, Ill	Garden City.
Cleveland, O	Forest City.
Dayton, O	Gem City of Ohio.
Detroit, Mich	City of the Straits.
Duluth, Minn	Zenith City.
Edinburgh, Scotland	Maiden Town, Northern Athens, Modern Athens, Athens of the North.
Gibraltar	Key of the Mediterranean.
Hannibal, Mo	Bluff City.
Havana, Cuba	Pearl of the Antilles.
Holyoke, Mass	Paper City.
Indianapolis, Ind	Railroad City.
Jerusalem, Palestine	City of Peace, City of the Great King.
Kansas City, Mo	Mushroomopolis.
Keokuk, Iowa	Gate City.
Lafayette, Ind	Star City.
Limerick, Ireland	City of the Violated Treaty.
London, England	City of Masts, Modern Babylon.
Lowell, Mass	City of Spindles, Manchester of America.
Louisville, Ky	Falls City.
Madison, Wis	Lake City.
Milan, Italy	Little Paris.
Milwaukee, Wis	Cream City.
Minneapolis, Minn	Flour City.
Nashville, Tenn	City of Rocks.
New Haven, Conn	City of Elms.
New Orleans, La	Crescent City.
New York, N. Y	Gotham, Empire City, Metropolitan City.
Pekin, Ill	Celestial City.
Philadelphia, Pa	Quaker City, City of Brotherly Love, City of Homes.
Pittsburg, Pa	Iron City, Smoky City.
Portland, Me	Forest City.
Paterson, N. J	Lyons of America.
Peoria, Ill	Whisky Town.
Quebec, Canada	Gibraltar of America.
Quincy, Ill	Gem City.
Racine, Wis	Belle City.
Richmond, Va	City of Seven Hills.
Rome, Italy	Eternal City, Nameless City, Queen of Cities, Seven-Hilled City, Mistress of the World.
Rochester, N. Y	Flour City.
St. Louis, Mo	Mound City.
St. Paul, Minn	Gem City.
San Francisco, Cal	Golden City.
Salem, Mass	City of Peace.
Salt Lake City, Utah	City of the Saints.
Springfield, Ill	Flower City.
Streator, Ill	City of the Woods.
Toledo, O	Corn City.
Venice, Italy	Bride of the Sea.
Washington, D. C	City of Magnificent Distances.
Winnipeg, Manitoba	Gate City of the Northwest.

9.....	147.484	.25485	6.881	3.17154

1 Gunter's chain = 20.1168 metres.
1 sq. statute mile = 259.000 hectares.
1 fathom = 1.829 metres.
1 nautical mile = 1853.25 metres.
1 foot = .304801 metre, 9.4840158 log.
1 avoir. pound = 453.5924277 gram.
15432.35639 grains = 1 kilogramme.

The only authorized material standard of customary length is the Troughton scale belonging to this office, whose length at 59°.62 Fahr. conforms to the British standard. The yard in use in the United States is therefore equal to the British yard.

The only authorized material standard of customary weight is the troy pound of the Mint. It is of brass of unknown density, and therefore not suitable for a standard of mass. It was derived from the British standard troy pound of 1758 by direct comparison. The British avoirdupois pound was also derived from the latter, and contains 7,000 grains troy.

The grain troy is therefore the same as the grain avoirdupois, and the pound avoirdupois in use in the United States is equal to the British pound avoirdupois.

The British gallon= 4.54346 litres.

The British bushel=36.3477 litres.

The length of the nautical mile given above and adopted by the United States Coast and Geodetic Survey many years ago is defined as that of a minute of arc of a great circle of a sphere whose surface equals that of the earth (Clarke's Spheroid of 1866).

By the concurrent action of the principal governments of the world an International Bureau of Weights and Measures has been established near Paris. Under the direction of the International Committee two ingots were cast of pure platinum-iridium in the proportion of 9 parts of the former to 1 of the latter metal. From one of these a certain number of kilogrammes were prepared, from the other a definite number of metre bars. These standards of weight and length were inter-compared, without preference, and certain ones were selected as International prototype standards. The others were distributed by lot, in September, 1889, to the different governments and are called national prototype standards. Those apportioned to the United States were received in 1890 and are in the keeping of this office.

The metric system was legalized in the United States in 1866.

The international standard metre is derived from the metre des archives, and its length is defined by the distance between two lines at 0° centigrade, on a platinum-iridium bar deposited at the International Bureau of Weights and Measures.

The international standard kilogramme is a mass of platinum-iridium deposited at the same place, and its weight in vacuo is the same as that of the kilogramme des archives.

The litre is equal to a cubic decimetre, and it is measured by the quantity of distilled water which, at its maximum density, will counterpoise the standard kilogramme in a vacuum, the volume of such a quantity of water being, as nearly as has been ascertained, equal to a cubic decimetre.

FARM CROPS.

[From Clapp & Co.'s Annual Record.]

HEALTH OF CHIEF AMERICAN CITIES.

Official figures showing the percentage of mortality for the year 1894.

A report showing the percentage of mortality in 200 cities of the United States for the year 1894 has been published under the auspices of the Surgeon-General of the Marine Hospital service. The following figures show the number of deaths in each 1,000 of the estimated population in the larger cities mentioned:

Augusta, Ga.	18.26	Council Bluffs, Iowa	9.63	Scranton, Pa.	17.28
Baltimore	19.11	Crawfordsville, Ind	11.85	Sioux Falls, S. D.	4.49
Boston	22.98	Danville, Ill.	12.85	Springfield, Mass.	15.73
Bridgeport, Conn.	15.44	Dayton, O.	13.24	Syracuse, N. Y.	16.94
Brooklyn	20.93	East St. Louis, Ill.	11.12	Toledo, O.	8.05
Brownsville, Tex.	44.33	Flint, Mich.	13.72	Washington, D. C.	19.89
Cambridge, Mass.	19.28	Fort Smith, Ark.	8.68	Wilmington, Del.	16.58
Charleston, S. C.	27.29	Fort Worth, Tex.	9.59	Worcester, Mass.	17.20
Chattanooga, Tenn.	11.45	Fresno, Cal.	13.00	Manitowoc, Wis.	12.35
Chicago	14.93	Greenville, Miss.	17.43	Marinette, Wis	20.27
Cincinnati	18.29	Kalamazoo, Mich.	12.61	Massillon, O.	11.68
Cleveland	17.42	Keokuk, Iowa	10.20	Middletown, O.	9.00
Columbus, O.	13.09	Laredo, Tex.	40.00	Muskegon, Mich.	14.09
Dedham, Mass.	17.73	Ludington, Mich.	12.40	Ogden, Utah	9.83
Detroit	14.30	Memphis, Tenn.	23.06	Ottumwa, Iowa	12.11
Dubuque, Iowa	10.57	Milwaukee	15.71	Pensacola, Fla.	17.06
Evansville, Ind.	15.45	Minneapolis	9.24	Racine, Wis.	10.84
Grand Rapids, Mich.	13.00	Newark, N. J.	23.07	Sault Ste. Marie, Mich.	10.29
Hartford, Conn.	15.85	New Orleans	24.88	Spokane, Wash.	7.83
Jersey City	24.19	New York city	21.38	Sterling, Ill.	11.86
Knoxville, Tenn.	16.62	Philadelphia	18.28	Stockton, Cal.	10.82
Lowell, Mass.	19.58	Portland, Me.	20.12	Superior, Wis	5.90
Manchester, N. H.	19.54	Reading, Pa.	17.95	Tiffin, O.	12.71
Alameda, Cal.	11.57	Richmond, Va.	20.23	Urbana, O	10.12
Battle Creek, Mich.	9.93	Rochester, N. Y.	14.54	Warren, O.	8.57
Belleville, Ill.	10.45	St. Louis	16.12	West Bay City, Mich.	14.28
Bloomington, Ill.	13.40	Salt Lake City	8.10	Winona, Minn	12.31
Brunswick, Ga.	19.26	San Diego, Cal	12.50	Youngstown, O.	14.34
Butte, Mont.	14.73	San Francisco	18.84	Zanesville, O.	15.30
Columbus, Ind.	9.52				

In some of the southern cities the report shows the comparative death rates between white persons and colored, as follows:

Augusta, white 11.36, colored 28.41; Charleston, S. C., white 16.58, colored 35.80; Knoxville, Tenn., white 12.4, colored 29.63; New Orleans, white 21.91, colored 32.14.

Where the names of cities are not given in this list, it is because their health officials have failed to respond to the requests of the Surgeon-General for the data upon which the list is prepared.

STATES AND TERRITORIES.

The following table gives the capitals, governors, their salaries and terms of office and data regarding the state legislatures:

STATES AND TERRITORIES.	*Capitals.*	*Governors.*	*Term Yrs.*	*Salaries.*	*Term Expires.*	*Next Session Legislature.*	*Limit of Session.*
Alabama	Montgomery	W. C. Oates, *D.*	2	$3,000	Nov. 1896	*Nov. 1896	50 days
Alaska Territory	Sitka	†J. A. Sheakley, *D.*	4	3,000			
Arizona Territory	Phœnix	†L. C. Hughes, *D.*	4	2,600	Jan. 1897	*Jan. 1897	60 days
Arkansas	Little Rock	J. P. Clarke, *D.*	2	3,500	Jan. 1897	*Jan. 1897	60 days
California	Sacramento	J. H. Budd, *D.*	4	6,000	Jan. 1899	*Jan. 1897	60 days
Colorado	Denver	A. W. McIntire, *R.*	2	5,000	Jan. 1897	*Jan. 1897	90 days
Connecticut	Hartford	O. V. Coffin, *R.*	2	4,000	Jan. 1897	Jan. 1897	None.
Delaware	Dover	W. T. Watson, *D.*	4	2,000	Jan. 1899	*Jan. 1897	None.
Dist. of Columbia.	Washington						
Florida	Tallahassee	H. L. Mitchell, *D.*	4	3,500	Jan. 1897	*Apr. 1897	60 days
Georgia	Atlanta	W. Y. Atkinson, *D.*	2	3,000	Nov. 1896	*Nov. 1896	50 days

*In converting currency prices into gold we have used the value of $100 gold in currency as given for January of each year in the American Almanac for 1878, as follows: 1862, $102.5; 1863, $145.1; 1864, $155.5; 1865, $216.2; 1866, $140.1; 1867, $134.6; 1868, $138.5; 1869, $135.6; 1870, $121.3; 1871, $110.7; 1872, $109.1; 1873, $112.7; 1874, $111.4; 1875, $112.5; 1876, $112.8; 1877, $106.2, and 1878, $101.4.

THE MONROE DOCTRINE--ITS ORIGIN AND MEANING.

[By Prof. John Bassett Moore of Columbia College, New York.]

The great diversity of view which has characterized discussions of the Monroe doctrine may be ascribed to several causes, among which are the different mental attitudes of those who have discussed it, a neglect to consider the circumstances in which it originated, and a divergence of opinion or of assumption as to the precise passages in which it is to be found. In order that nothing essential to an understanding of the subject may be lacking, I will quote all the passages in President Monroe's message that have been cited as containing the expression of his doctrine:

I.

"At the proposal of the Russian imperial government, made through the minister of the emperor residing here, a full power and instructions have been transmitted to the minister of the United States at St. Petersburg, to arrange by amicable negotiation the respective rights and interests of the two nations on the northwest coast of this continent. A similar proposal has been made by his imperial majesty to the government of Great Britain, which has likewise been acceded to. * * * In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been judged proper for asserting as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers."—Paragraph 7, Message of Dec. 2, 1823.

II.

"In the wars of the European powers in matters relating to themselves we have never taken any part, nor does it comport with our policy to do so. It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are, of necessity, more immediately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. This difference proceeds from that which exists in their respective governments. And to the defense of our own, which has been achieved by the loss of so much blood and treasure, and matured by the wisdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted. We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers, to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States. * * * Our policy in regard to Europe, which was adopted at an early stage of the wars which have so long agitated that quarter of the globe, nevertheless remains the same, which is, not to interfere in the internal concerns of any of its powers; to consider the government de facto as the legitimate government for us; to cultivate friendly relations with it and to preserve those relations by a frank, firm and manly policy, meeting in all instances the just claims of every power, submitting to injuries from none. But in regard to these continents, circumstances are eminently and conspicuously different. It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can any one believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition, in any form, with indifference."—Paragraphs 48 and 49, Message of Dec. 2 1823.

It will be observed that the two passages above quoted, which are sometimes printed together—among other places, in Wharton's "International Law Digest"—as if they formed one continuous passage and were intended to convey one idea, are widely separated in President Monroe's message. In reality, they relate to two distinct subjects. I will discuss them in their order.

MEANING OF PASSAGE I.

This passage has by more than one writer been said to mean: "No more European colonies on these continents." In a proper sense this interpretation is correct. But it is not correct if it is intended to ascribe to President Monroe the declaration that the United States would resist any acquisition whatsoever of territory on either of the American continents by a European power. That question was not before him. The history of the passage shows that it related solely to the question of colonization or original settlement; that it did not refer to the acquisition of territory by gift, purchase or other form of voluntary transfer, or even by conquest; and that it was not designed to commit the government to any course of action in respect of any territory but that which it claimed as its own.

In 1821 the emperor of Russia issued a ukase by which he assumed as owner of the shore to exclude foreigners from carrying on commerce and from navigating and fishing within 100 Italian miles of the northwest coast of America from Bering straits down to the 51st parallel of north latitude. As this assertion of title embraced territory which was claimed by the United States as well as by Great Britain, both these governments protested against it. In consequence the Russian government proposed to adjust the matter by amicable negotiation at St. Petersburg; and instructions to that end were prepared for Mr. Middleton, then our minister to Russia, in the summer of 1823. John Quincy Adams was then secretary of state. At a meeting of the cabinet on June 28 the subject of Mr. Middleton's instructions was discussed, and Mr. Adams expressed the opinion that the claim of the Russians could not be admitted, because they appeared to have no "settlement" upon the territory in dispute. On July 17 he informed Baron Tuyl, the Russian minister, at a conference at the department of state, "that we [the United States] should contest the right of Russia to any territorial establishment on this continent, and that we should assume distinctly the principle that the American continents are no longer subjects for any new European colonial establishments." When

the principle was announced in the message of Dec. 2, President Monroe spoke of "future colonization."

Now, what was meant by the term "colonization"? The answer is, simply what was meant by the terms "settlement" and "colonial establishments" previously employed by Mr. Adams. The word "colonization" has a definite meaning. It signifies the settlement by emigrants of a region not under the control of any civilized power, unless that of the parent country. Indeed, Mr. Adams in his instructions to Mr. Middleton clearly expressed himself in that sense. "Occupied," he says, "by civilized nations, they [the American continents] will be accessible to Europeans and each other on that footing alone." It was in this sense that Mr. Adams and President Monroe used the term colonization. They used it to describe a method of acquiring title to unoccupied territory. They denied the existence of Russian settlements in the territory in dispute, and, claiming the territory as our own, they necessarily denied the right of Russia or any other European power to colonize it.

While the announcement as to future colonization was made in general terms, applicable to the whole of the American continents, it related, in the message of President Monroe, solely to our territorial claims on the northwest coast. It was put forth with a view to protect those claims against encroachment, and, as an argument invented for the purpose, it did not become the subject of cabinet deliberation. This could not have been the case if there had been an intention to announce a new policy which the United States was to maintain in behalf of all the Americas.

But all doubt as to what was intended in this regard has been precluded by Mr. Adams himself, who was the author of the argument. In his special message to congress of Dec. 26, 1825, touching the Panama congress, he suggested as one of the subjects that might be discussed, "an agreement among all the parties represented at the meeting that each will guard, by its own means, against the establishment of any European colony within its borders. * * * This was," he said, "more than two years since announced by my predecessor to the world as a principle resulting from the emancipation of both the American continents." It may be said that if Mr. Adams intended to do no more than announce that territory already occupied by civilized powers was not subject to future colonization, he merely stated a truism. But in its application to the American continents at that time the announcement was far from being a truism. It was by no means generally admitted that the American continents were then wholly occupied by civilized nations. There were vast regions of territory not actually settled by the subjects of civilized powers. Neither Russia nor Great Britain admitted the claim put forth by Mr. Adams.

It is often said that the Monroe doctrine would forbid the transfer by a European power of a colony in America to another European power This is another example of the danger in indulging in loose interpretations. If Spain should transfer Cuba to Denmark, or if Great Britain should transfer Canada and Jamaica to Greece, would we consider either of these acts as "unfriendly" to us, or as "dangerous to our peace and safety"?

THE POLK DOCTRINE.

In his annual message of Dec. 2, 1845, President Polk, referring to our dispute with Great Britain as to the Oregon territory and to the possible intervention of European powers in consequence of our annexation of Texas and possibly of other territory southward, sought to give to President Monroe's announcement on the subject of colonization the meaning often erroneously conveyed by the expression "no more European colonies on this continent." But, in so doing, he restricted its application to North America, saying that "it should be distinctly announced to the world as our settled policy that no future European colony or dominion shall, with our consent, be planted or established on any part of the North American continent." It is obvious that President Polk in pronouncing against the establishment of any "dominion" by a European power—a term which includes the acquisition by voluntary transfer or by conquest of territory already occupied—asserted something quite different from Monroe's declaration against "colonization." He asserted something which should be called the Polk doctrine rather than the Monroe doctrine; and it was, perhaps, the consciousness of this fact that led him to restrict the new doctrine, which was to be maintained by us without regard to other American powers, and not merely by each of those powers "by its own means," to the North American continent.

President Polk reasserted his doctrine in a special message to congress of April 29, 1848, in relation to Yucatan. An Indian outbreak having occurred in that country, the authorities offered to transfer "the dominion and sovereignty" to the United States, and at the same time made a similar offer to Great Britain and Spain. President Polk recommended the occupation of the territory by the United States, and in so doing declared that "we could not consent to a transfer of this 'dominion and sovereignty' to either Spain, Great Britain or any other European power." This pronouncement went beyond the Monroe doctrine in any of its parts. The Monroe doctrine, in all its parts, was based upon the right of American states, whose independence we had acknowledged, to dispose of themselves as they saw fit. It was directed against the interposition of European powers to control their destiny against their will. Mr. Adams expressed this idea in his diary thus: "Considering the South Americans as independent nations, they themselves, and no other nation, had the right to dispose of their condition. We have no right to dispose of them, either alone or in conjunction with other nations. Neither have any other nations the right of disposing of them without their consent." The Polk doctrine, on the other hand, would forbid the acquisition of dominion by a European power in North America even by voluntary transfer or cession. The project of occupying Yucatan was abandoned before any vote on the subject was reached in congress, in consequence of the reception of news that a treaty between the whites and the Indians had been concluded.

It is obvious that President Polk, in invoking the Monroe doctrine in the sense in which he sought to apply it, was endeavoring to strengthen his position in respect to his policy of annexation, to which many persons were strenuously opposed. That he had an eye chiefly to this feature of his administration is shown by the fact that he abandoned in 1846 his claim to the Oregon territory and settled the boundary at forty-nine instead of at the line of "fifty-four-forty or fight," to which he had previously pronounced our title to be unquestionable.

MEANING OF PASSAGE II.

This passage, which was anxiously considered by President Monroe and his cabinet, related to the threatened interference of a combination of European powers in the political affairs of the independent American states. On Sept. 26, 1815, the emperors of Austria and Russia and the king of Prussia concluded at Paris a treaty which was known as the holy alliance. The object of this league

was declared to be the administration of government, in matters both internal and external, according to the precepts of justice, charity and peace; and to this end the allied monarchs, "looking upon themselves as delegated by Providence" to rule over their respective countries, engaged to "lend one another, on every occasion and in every place, assistance, aid and support." In the course of time, as revolt against the arrangements of the treaty of Vienna became more widespread and more pronounced, the alliance ceased to wear its originally benevolent aspect and came more and more to assume the form of a league for the protection of the principle of legitimacy—the principle of the divine right of kings as opposed to the rights of the people—against the encroachments of liberal ideas. Congresses were held at Aix-la-Chapelle, Troppau and Laybach for the purpose of maturing a programme to that end. The league was joined by the king of France, but England, whose prince regent had originally given it his informal adhesion, began to grow hostile. In the circular issued at Troppau, the allies associated "revolt and crime," and declared that the European powers had "had an undoubted right to take a hostile attitude in regard to those states in which the overthrow of the government might operate as an example." In the circular issued at Laybach they denounced "as equally null, and disallowed by the public law of Europe, any pretended reform effected by revolt and open force." Popular movements were forcibly suppressed in Piedmont and Naples. In October, 1822, representatives of the allies assembled at Verona, especially for the purpose of concerting measures against the revolutionary government in Spain. As the result of their deliberations they issued a circular in which they announced their determination "to repel the maxim of rebellion, in whatever place and under whatever form it might show itself"; and they adjourned with the secret understanding that France should intervene to suppress the constitutional government in Spain. Their ultimate object was more explicitly expressed in a secret treaty in which they engaged mutually "to put an end to the system of representative governments" in Europe and to adopt measures to destroy "the liberty of the press."

In April, 1823, France proceeded to execute the plans of the allies by invading Spain for the purpose of restoring the absolute monarch, Ferdinand VII. Before the close of the ensuing summer such progress had been made in the execution of that design that notice was given to the British government that, as soon as the military objects of the allies in Spain were achieved, they would propose a congress with a view to the termination of the revolutionary governments in Spanish America. At this time Lord Castlereagh, who had always been favorably disposed toward the alliance, had been succeeded in the conduct of the foreign affairs of England by George Canning, who reflected the popular sentiment as to the policy of the allied powers. The independence of the Spanish-American governments, which had now been acknowledged by the United States, had not as yet been recognized by Great Britain. But English merchants, like those of the United States, had developed a large trade with the Spanish-American countries, a trade which their restoration to a colonial condition, whether under Spain or any of the allies, would, under the commercial system then in vogue, have cut off and destroyed.

As the interests of the United States and of England were thus to a great extent identical, Canning, toward the close of the summer of 1823, began to sound Mr. Rush, our minister at London, as to the possibility of a joint declaration by the two governments against the intervention of the allies in Spanish America. When Mr. Rush reported these conversations to his government, President Monroe lost no time in taking counsel upon them. Jefferson, whose opinion was sought, replied: "Our first and fundamental maxim should be never to entangle ourselves in the broils of Europe; our second, never to suffer Europe to intermeddle with cis-Atlantic affairs, * * * While the last [Europe] is laboring to become the domicile of despotism, our endeavor should surely be to make our hemisphere that of freedom. One nation [Great Britain], most of all, could disturb us in this pursuit; she now offers to lead, aid and accompany us in it. By acceding to her proposition we detach her from the bands, bring her mighty weight into the scale of free government and emancipate a continent at one stroke. * * * Great Britain is the nation which can do us the most harm of any one or all on earth, and with her on our side we need not fear the whole world. With her, then, we should most sedulously cherish a cordial friendship, and nothing would tend more to knit our affections than to be fighting once more side by side in the same cause." Mr. Madison viewed the suggestion of Canning with favor. In the cabinet of Monroe, Mr. Calhoun inclined to invest Mr. Rush with power to join England in a declaration, even if it should pledge the United States not to take either Cuba or Texas. He believed that the holy alliance "had an ultimate eye to us; that they would, if not resisted, subdue South America. * * * Violent parties would arise in this country, one for and one against them, and we should have to fight upon our own shores for our own institutions." The president at first inclined to Calhoun's idea of giving Mr. Rush discretionary powers, but this was opposed by Mr. Adams, who maintained that we could act with England only on the basis of the acknowledged independence of the Spanish-American states. He thought that we should let England make her own declaration. He did not believe that the holy alliance meant to establish monarchy among us. But if they should subdue the Spanish provinces, the ultimate result would, said Mr. Adams, be to recolonize them, partitioned out among themselves. Russia might take California, Peru and Chile; France might take Mexico, and Great Britain, if she could not resist the course of things, would take at least the island of Cuba as her share of the scramble. What, then, would be the situation of the United States—England holding Cuba, and France Mexico? We should therefore make a declaration for ourselves. The act of the executive could not, after all, commit the nation to a pledge of war, and congress would be left free to act or not, as circumstances might arise.

On Oct. 9, 1823, Canning, in an interview with Prince de Polignac, the French ambassador, declared that while Great Britain would remain "neutral" in any war between Spain and her colonies, the "junction" of any foreign power with Spain against the colonies would be viewed as constituting "entirely a new question, upon which Great Britain must take such decision as her interests required." This declaration, followed by that of President Monroe for the United States, shattered the plans of the holy alliance with reference to Spanish America. Against the two great maritime powers of the world the allies were, in respect to any transatlantic project, utterly helpless.

The motive of England was chiefly commercial. But the motive of the United States was largely political. The holy alliance rep-

resented a force avowedly and aggressively hostile to the form of popular government of which the United States furnished the most shining example. It was for this reason that President Monroe declared that any attempt on their part to extend "their system" to any portion of this hemisphere would be considered as "dangerous to our peace and safety." The further declaration that we could not view any interposition by any European power in the affairs of the governments whose independence we had acknowledged, for the purpose of oppressing them or controlling in any other manner their destiny, in any other light than as "the manifestation of an unfriendly disposition toward the United States," grew out of the same circumstances as the preceding declaration, and may, as Mr. Calhoun has said, be considered as an appendage to it. Those governments, said Mr. Calhoun, who spoke with peculiar authority on the subject, "had just emerged from their protracted revolutionary struggles. They had hardly yet reached a point of solidity, and in that tender stage the administration of President Monroe thought it proper not only to make that general declaration in reference to the holy alliance but to make a more specific one against the interference of any European power, in order to countenance these young republics as far as we could with propriety." Mr. Webster, in 1826, said that the "amount" of President Monroe's declarations was "that this government could not look with indifference on any combination to assist Spain in her war against the South American states; that we could not but consider any such combination as dangerous or unfriendly to us, and that if it should be formed it would be for the competent authorities of this government to decide when the case arose what course our duty and interest should require us to pursue."

On Jan. 20, 1824, Mr. Clay offered in the house of representatives a joint resolution, by which it was declared that the people of the United States "would not see, without serious inquietude, any forcible intervention by the allied powers of Europe in behalf of Spain," to reduce her colonies to subjection. Upon this resolution no action was taken. Regarding the danger as probably passed, congress was unwilling to commit the government to general declarations by which its freedom of action might in the future be hampered. Indeed, the house of representatives adopted a resolution declaring that the United States ought not to form any alliances with South American republics or enter into any joint declarations on the subject of President Monroe's pronouncement, but that the people should be "left free to act, in any crisis, in such manner as their feelings of friendship toward those republics and as their own honor and policy may at the time dictate."

In this view there is certainly great wisdom. To attempt to anticipate particular cases would be a futile experiment; while, if an effort were made to employ terms so general as to cover all future cases, contingencies might arise in which the government would find itself seriously embarrassed by its own unadvised declarations.

Attempts have frequently been made to trace back the declarations of President Monroe to utterances of other statesmen made long previously. It has even been said that their germs are to be found in Washington's proclamation of neutrality in the war between England and France, and in his farewell address. But, as all the territory of the American continents, except that occupied by the United States, belonged at that time to European powers and was more or less involved in their contests, it is difficult to understand how the policy of non-intervention, which Washington adopted and inculcated, involved the policy which Monroe, thirty years later, advocated, of intervention in behalf of independent American states against the aims of the holy alliance.

LATTER-DAY FALLACIES.

At the present time an idea seems to prevail that the Monroe doctrine committed us to a kind of protectorate over the independent states of this hemisphere, in consequence of which we are required to espouse their quarrels, though we cannot control their conduct. To state this theory is to refute it. Like other independent nations, we are at liberty to act with some regard to our own interests. Our position is not that of an involuntary military force, at the beck and call of any American state that may stand in need of it. When it became apparent that the French sought to establish a monarchy in Mexico, we did not hesitate to declare our opposition; and in 1866 we notified the Austrian government that, if it sent any troops to the support of Maximilian, we could not engage longer to remain neutral in the contest. This was a correct assertion of the Monroe doctrine. But we have not assumed to forbid European powers to settle their quarrels with American states by the use of force any more than we have hesitated to do so ourselves. In 1861 we admitted the right of France, Spain and Great Britain to proceed jointly by force against Mexico for the satisfaction of claims. Indeed, Mr. Seward, in an instruction to our minister to France of June 21, 1862, said: "France has a right to make war against Mexico, and to determine for herself the cause. We have a right and interest to insist that France shall not improve the war she makes to raise up in Mexico an anti-republican or anti-American government, or to maintain such a government there. France has disclaimed such designs, and we, besides reposing faith in the assurances given in a frank, honorable manner, would, in any case, be bound to wait for, and not anticipate, a violation of them." It was not till they were subsequently violated that Mr. Seward protested.

In 1842 and again in 1844 Great Britain blockaded the port of San Juan de Nicaragua. In 1851 the same power laid an embargo on traffic at the port of La Union, in Salvador, and blockaded the whole coast of that country. In 1862 and 1863 the same power seized Brazilian vessels in Brazilian waters in reprisal for the plundering of the bark Prince of Wales on the Brazilian coast. In 1838 France blockaded the ports of Mexico as an act of redress for unsatisfied demands. In 1845 France and Great Britain blockaded the ports and coasts of Buenos Ayres for the purpose of securing the independence of Uruguay. From 1865 till some scarcely defined date Spain was at war with the republics on the west coast of South America. The bombardment of Valparaiso by a Spanish fleet was a prominent incident of the conflict. In 1831 a United States man-of-war dispersed the Buenos Ayrean colony on the Malvinas, or Falkland islands, and released some of our citizens who had been arrested there for killing seals on the coast. In 1846 we went to war with Mexico. In 1854 the commander of one of our men-of-war, having failed to obtain from the town of Greytown an indemnity of $24,000 for the seizure and destruction of property, and an apology for an affront to the American minister by some of the inhabitants of the place, bombarded it, and afterward, "in order to inculcate a lesson never to be forgotten," burned such buildings as were left standing. In 1859 we sent an expedition to

obtain redress from Paraguay. In 1890, while the Pan-American conference was in session, congress passed an act to authorize the president to use force to collect a claim from Venezuela. In 1892 we sent an ultimatum to Chile, with which she had the wisdom to comply.

The suggestion has lately been made in various quarters that it is a violation of the Monroe doctrine for a European power to employ force against an American republic for the purpose of collecting a debt or satisfying a pecuniary demand, whatever may have been its origin. As has been seen, there is nothing in President Monroe's declarations even remotely touching this subject; and the examples I have given of the employment of force by the United States as well as by other powers for such objects show that the American republics have not heretofore been supposed to enjoy so desirable an exemption. But I think I can trace the idea to its origin. In Wharton's "International Law Digest," under the section entitled "Monroe Doctrine," there is the following sentence: "The government of the United States would regard with grave anxiety an attempt on the part of France to force by hostile pressure the payment by Venezuela of her debt to French citizens." The authorities cited for this statement are two alleged manuscript instructions of Mr. Blaine's to our minister to France, of July 23 and Dec. 16, 1881. The whole matter is, however, erroneously stated. The instructions are both published in the volume of "Foreign Relations for 1881." They refer not to "hostile pressure," but to a rumored design on the part of France of "taking forcible possession of some of the harbors and a portion of the territory of Venezuela in compensation for debts due to citizens of the French republic." They nowhere express any "grave anxiety." They do not mention the Monroe doctrine. They merely argue that such a proceeding as that reported to be in contemplation would be unjust to other creditors of Venezuela, including the United States, since it would deprive them of a part of their security. And they express the "solicitude" of the government of the United States "for the higher object of averting hostilities between two republics, for each of which it feels the most sincere and enduring friendship." It is plain that this latest development of the Monroe doctrine, based upon the erroneous passage in "Wharton's Digest," has no actual foundation whatever.

The recent proceedings of the British at Corinto have in nowise involved either the Monroe doctrine or the Polk doctrine. On the 16th of August last the Nicaraguan commissioner at Bluefields, Senor Madriz, invited a number of persons, including two citizens of the United States and twelve British subjects, one of whom was the British pro-consul, to call upon him. Each one of the persons so invited laid aside his business and proceeded to the commissioner's office. When they arrived there they were ushered in, but not into the presence of the commissioner. On the contrary, they were arrested and forcibly deported from the country. No information as to the cause of their arrest was given them. They were denied all opportunity to arrange their business or to visit their families before their forcible expulsion. The two American citizens were, in the following October, permitted to return to the country under circumstances tending to soothe their feelings. Some of the British subjects were "pardoned" and permitted to return toward the close of December. Among those not "pardoned" was the British pro-consul, Mr. Hatch. For the violent treatment of her consular representative Great Britain exacted a fine of $75,000 as punitive damages or "smart money." The amount of the fine may seem somewhat large. But it is not so large as to involve the independence of the country, and its payment would not entail so great a general loss, to say nothing of individual suffering, as the bombardment and destruction of a commercial town. The question of the private losses of her subjects Great Britain offered to leave to arbitration.

It has been suggested that the seizure of the custom house at Corinto, with a view to obtain the amount of the fine by the collection of customs duties at that port, was a violation of the Clayton-Bulwer treaty, which forbids the United States and Great Britain to "occupy" any part of Central America. But the occupation referred to in the treaty is occupation as an exercise of dominion or sovereignty, and not merely as an act of war. The treaty says that neither party shall "occupy, or fortify, or colonize, or assume or exercise any dominion" over Nicaragua or any part of Central America, The saving clause as to the assumption or exercise of "dominion" colors the whole passage and clearly discloses its meaning. The seizure of a custom house and the collection of duties by a foreign power, while it involves the doing of things that properly belong to the sovereign of the country, cannot, when done as an act of war, and therefore adversely and in avowed hostility to the sovereign, be considered as an assumption or exercise of dominion or sovereignty. Every hostile force exercises dominion, in the sense of actual control, over the territory which it physically holds. But it does not thereby acquire dominion in the legal sense of absolute ownership or sovereign control.

[The foregoing on the Monroe doctrine was written for and published in the New York Evening Post and is reprinted by permission.]

THE UNEXPLORED GLOBE.

Leaving out of account the very imperfectly known regions of central Asia and the interior of the northern parts of both North and South America, as well as the similar areas of Africa and Australia, there is an aggregate area of about 20,000,000 of square miles of the surface of the globe as yet quite unexplored. This aggregate is made up as follows:

	Sq. miles.
Africa	6,500,000
Australia	2,250,000
North America	1,500,000
South America	500,000
Asia	250,000
Islands	500,000
Arctic regions	3,500,000
Antarctic regions	5,000,000
Total	20,000,000

When we add to this great total not merely the enormous areas of only partially explored regions, but also those that, though explored, are not yet accurately surveyed, it will be seen that the field for further geographical exploration and research is abundantly wide; for the globe cannot be said to be geographically conquered until all its physical features are accurately known and mapped, and all its habitable lands, at least, have been covered with the network of a complete geodetic triangulation.

CHINA, JAPAN AND KOREA.

Our record of the war in Asia in the Daily News Almanac for 1895 closed Dec. 15, 1894. At the end of the year 1894 the Japanese armies were distributed as follows: The first army, which, after the fall of Port Arthur, had moved northward in the direction of Moukden, finding the region wasted and deserted except by roaming guerrilla bands which annoyed the troops greatly, abandoned the expedition and joined the second army under Gen. Oyama, which was in the vicinity of Kai-Pheng. The third army, under Count Saigo, was reported at Sha-ho, to the west of Chefoo. The Chinese were totally discouraged and desirous of peace. Toward the end of December it was officially announced from Washington that John W. Foster, who succeeded Mr. Blaine as secretary of state in Mr. Harrison's administration, had been appointed by the Chinese government as legal adviser to two peace plenipotentiaries who were to be sent to Japan for the purpose of arranging a treaty of peace between the two countries.

The new year (1895) opened with great activity on the part of the Japanese forces. The capture of Kai-Pheng on the 10th of January gave them complete mastery over the Liao-Tung peninsula, at the extreme end of which Port Arthur is situated. The capture of Kai-Pheng was one of the most brilliant maneuvers of the war and gave the Japanese the control of the whole province of Shun-King. During January and February four attempts were made by the Chinese to retake Haicheng, but they were disastrous failures in which the Chinese losses were heavy. Feb. 12 Ning-Hai-Chu was occupied, and a few days later the Japanese army at Kai-Pheng defeated a Chinese army of 13,000 men, driving them northward to Ying-Chow. March 1 the Japanese captured Koushino. On the 4th of March a still greater defeat for the Chinese followed in the capture of Niu-Chwang on the Leaho river. In this battle the Chinese lost 1,880 in killed and wounded and 500 prisoners. The two armies of the Japanese having formed a junction at Ying-Chow, they crossed the river and in a desperate battle at Thien-Chwang-thai defeated the Chinese after a three hours' engagement. At this battle the Chinese loss was 2,000 men, 600 prisoners, and 18 large guns and a large quantity of military stores. A few days later the invaders took Niu-Chwang and three months' supply of stores which were to be sent to the northern Chinese army. Pekin, the capital of China, was now exposed to the victors.

On the 19th of January the Japanese fleet began the movement against Wei-Hai-Wei The movement against this place continued until its capitulation, Feb. 15, when all the Chinese ships, arms, forts, guns, ammunition and other Chinese property fell into the hands of the Japanese. No battle or series of battles in the entire war equals the capture of the Chinese stronghold at Wei-Hai-Wei. The capture of the place is regarded by American and British naval authorities as one of the most remarkable events in the history of war. Its capture made Japan mistress of the gulf of Pe-Chi-Li and the northern portion of the Yellow sea, while it opened another route to the Chinese capital. The Japanese pressed their advantages, seized Fisher island, captured Makong and Yen-Tung.

These successes of their enemy made China still more anxious for a cessation of hostilities. Preliminary negotiations for peace were made through Mr. Denby, United States minister to China, and Mr. Dun, United States minister to Japan. Through the instrumentality of these diplomats Japan expressed her willingness to receive the envoy of China, provided he came with plenipotentiary powers to make and ratify a treaty of peace. The reason for Japan's exacting these terms was that twice during the war China had made overtures of peace to Japan, the first after the fall of Port Arthur in November, 1894, and the second in January, 1895. In neither instance had the Chinese envoys the power to carry out the terms of peace that might be agreed upon. As a result of the failure of these efforts to secure peace China resolved to make overtures of peace in a manner acceptable to Japan and her leading statesmen. Li Hung Chang was delegated to visit and treat with Japan for peace. He was given full power to negotiate upon four subjects—(1) the independence of Korea, (2) a money indemnity from China to Japan. (3) a cession of Chinese territory, and (4) the negotiation of a new treaty regarding commercial relations and other matters rendered necessary by the war. The Chinese ambassador arrived in Japan on the 19th of March. The first proposal of China was an armistice during the negotiations, to which Japan assented upon condition that the approaches to Pekin be surrendered. To this China objected and it appeared as if the negotiations were at an end. Such would have been the case but for an event which rather compelled Japan to grant an armistice. On the 24th of March Li Hung Chang was leaving the conference chamber and proceeding to his hotel with his attendants, when he was shot by a Japanese named Koyama, the bullet entering his cheek just below the eye. This assault on the Chinese envoy produced the most profound sympathy for him in Japan. The emperor sent him his own physicians and expressed his regret at the act. The imperial diet passed resolutions expressing its regret at the crime. The would-be assassin, who had lost two brothers in the war, whose death he desired to revenge, was arrested and sent to penal servitude for life. A three weeks' armistice was granted by Japan, to end April 30. During the armistice the Japanese, while abstaining from making war in China, pushed supplies of all kinds forward for her armies, prepared reenforcements for marching to the front at a moment's notice, and hurried forward preparations for a great naval attack on Canton. On the other hand, negotiations for peace were hurried with equal celerity, with the result that on the 17th of April the war was ended by the formal signing of a treaty of peace.

The following is the full text of the treaty:

1. China recognizes Korea as a perfectly independent nation.

2. China cedes to Japan in perpetuity and full sovereignty the following territories, together with all fortifications, arsenals and public property thereon:

(a) The southern portion of the province of Feng-Tien within the following boundaries: The line of demarkation begins at the mouth of the River Yalu and ascends that stream to the mouth of the River An-ping; thence the line runs to Feng Huang; thence to Haicheng; thence to Ying Kow, forming a line which describes the southern portion of the territory. The places above named are included in the ceded territory. When the line reaches the River Liao at Ying Kow it follows the course of that stream to its mouth, where it terminates. The mid-channel of the River Liao shall be taken as the line of demarkation.

This cession also includes all islands appertaining or belonging to the province of Feng-Tien situated in the eastern portion of the bay of Liao-Tung and in the northern part of the Yellow sea.

(b) The island of Formosa, together with all islands appertaining or belonging to the said island of Formosa.

(c) The Pescadores group—that is to say, all islands lying between the 119th and 120th degrees of longitude east of Greenwich and the 23d and 24th degrees of north latitude.

3. The alignments of the frontiers described in the preceding article shall be subject to verification and demarkation on the spot by a joint commission of delimitation consisting of two or more Japanese and two or more Chinese delegates, to be appointed immediately after the exchange of the ratifications of this act. In case the boundaries laid down in this act are found to be defective in any point, either on account of topography or in consideration of good administration, it shall also be the duty of the delimitation commission to rectify the same.

The delimitation commission will enter upon its duties as soon as possible, and will bring its labors to a conclusion within the period of one year after appointment.

The alignments laid down in this act shall, however, be maintained until the rectifications of the delimitation commission, if any are made, shall have received the approval of the governments of Japan and China.

4. China agrees to pay to Japan as a war indemnity the sum of 200,000,000 kuping taels, the said sum to be paid in eight installments. The first installment of 50,000,000 taels to be paid within six months and the second installment of 50,000,000 taels to be paid within twelve months after the exchange of the ratifications of this act. The remaining sum to be paid in six equal annual installments, as follows: The first of such equal annual installments to be paid within two years; the second within three years; the third within four years; the fourth within five years; the fifth within six years, and the sixth within seven years after the exchange of the ratifications of this act. Interest at the rate of 5 per centum per annum shall begin to run on all unpaid portions of the said indemnity from the date the first installment falls due.

China, however, shall have the right to pay by anticipation at any time any or all of said installments. In case the whole amount of the said indemnity is paid within three years after the exchange of the ratifications of the present act, all interest shall be waived and the interest for two years and a half or for any less period, if then already paid, shall be included as a part of the principal amount of the indemnity.

5. The inhabitants of the territories ceded to Japan who wish to take up their residence outside the ceded districts shall be at liberty to sell their real property and retire. For this purpose a period of two years from the date of the exchange of the ratifications of the present act shall be granted. At the expiration of that period those of the inhabitants who shall not have left such territories shall, at the option of Japan, be deemed to be Japanese subjects. Each of the two governments shall, immediately upon the exchange of the ratifications of the present act, send one or more commissioners to Formosa to effect a final transfer of that province, and within the space of two months after the exchange of the ratifications of this act such transfer shall be completed.

6. All treaties between Japan and China having come to an end in consequence of war, China engages, immediately upon the exchange of the ratifications of this act, to appoint plenipotentiaries to conclude, with the Japanese plenipotentiaries, a treaty of commerce and navigation and a convention to regulate frontier intercourse and trade. The treaties, conventions and regulations now subsisting between China and European powers shall serve as a basis for the said treaty and convention between Japan and China. From the date of the exchange of the ratifications of this act until the said treaty and convention are brought into actual operation the Japanese government, its officials, commerce, navigation, frontier intercourse and trade, industries, ships and subjects shall in every respect be accorded by China most-favored-nation treatment.

China makes in addition the following concessions, to take effect six months after the date of the present act:

1. The following cities, towns and ports, in addition to those already opened, shall be opened to the trade, residence, industries and manufactures of Japanese subjects, under the same conditions and with the same privileges and facilities as exist at the present open cities, towns and ports of China:

1. Shashih, in the province of Hupeh.
2. Chung King, in the province of Szechuan.
3. Suchow, in the province of Kiang Su.
4. Hangchow, in the province of Chekiang.

The Japanese government shall have the right to station consuls at any or all of the above-named places.

2. Steam navigation for vessels under the Japanese flag for the conveyance of passengers and cargo shall be extended to the following places:

1. On the upper Yang-tse river, from Ichang to Chung King.

2. On the Woosung river and the canal, from Shanghai to Suchow and Hangchow.

The rules and regulations which now govern the navigation of the inland waters of China by foreign vesseis shall, so far as applicable, be enforced in respect of the above-named routes, until new rules and regulations are conjointly agreed to.

3. Japanese subjects purchasing goods or produce in the interior of China or transporting imported merchandise into the interior of China shall have the right temporarily to rent or hire warehouses for the storage of the articles so purchased or transported without the payment of any taxes or exactions whatever.

4. Japanese subjects shall be free to engage in all kinds of manufacturing industries in all the open cities, towns and ports of China, and shall be at liberty to import into China all kinds of machinery, paying only the stipulated import duties thereon.

5. All articles manufactured by Japanese subjects in China shall in respect of inland transit and internal taxes, duties, charges and exactions of all kinds, and also in respect of warehousing and storage facilities in the interior of China, stand upon the same footing and enjoy the same privileges and exemptions as merchandise imported by Japanese subjects into China.

6. In the event additional rules and regulations are necessary in connection with these concessions they shall be embodied in the treaty of commerce and navigation provided for by this article.

7. Subject to the provisions of the next succeeding article, the evacuation of China by the armies of Japan shall be completely effected within three months after the exchange of the ratifications of the present act.

8. As a guaranty of the faithful performance of the stipulations of this act China consents to the temporary occupation by the military forces of Japan of Wei-Hai-Wei, in the province of Shantung.

Upon the payment of the first two installments of the war indemnity herein stipulated for and the exchange of the ratifications of the treaty of commerce and navigation, the said place shall be evacuated by the Japanese

forces, provided the Chinese government consents to pledge, under suitable and sufficient arrangements, the customs and revenue of China as security for the payment of the final installments of said indemnity. It is, however, expressly understood that no such evacuation shall take place until after the exchange of the ratifications of the treaty of commerce and navigation.

9. Immediately upon the exchange of the ratifications of this act all prisoners of war then held shall be restored, and China undertakes not to ill-treat or punish prisoners of war so restored to her by Japan. China also engages to at once release all Japanese subjects accused of being military spies or charged with any other military offenses. China further engages not to punish in any manner, nor allow to be punished, those Chinese subjects who have in any manner been compromised in their relations with the Japanese army during the war.

10. All offensive military operations shall cease upon the exchange of the ratifications of this act.

11. The present act shall be ratified by their majesties the emperor of Japan and the emperor of China, and the ratifications shall be exchanged at Chefoo on the 8th day of the 5th month of the 28th year of Meiji, corresponding to the 14th day of the 4th month of the 21st year of Kuang Hsu.

In witness whereof the respective plenipotentiaries have signed the same and have affixed thereto the seal of their arms.

Done at Shimonoseki in duplicate this 17th day of the 4th month of the 28th year of Meiji, corresponding to the 23d day of the 3d month of the 21st year of Kuang Hsu.

COUNT ITO HIROBUMI (L. S.),
Junii, Grand Cross of the Imperial Order of Paullownia, Minister President of State, Plenipotentiary of His Majesty the Emperor of Japan.

VISCOUNT MUTSU MUNEMITSU (L. S.),
Junii, First Class of the Imperial Order of the Sacred Treasure, Minister of State for Foreign Affairs, Plenipotentiary of His Majesty the Emperor of Japan.

LI HUNG CHANG (L. S.),
Plenipotentiary of His Majesty the Emperor of China, Senior Tutor to the Heir Apparent, Senior Grand Secretary of State, Minister Superintendent of Trade for the Northern Ports of China, Viceroy of the Province of Chihli, and Earl of the First Rank.

LI CHING FONG (L. S.),
Plenipotentiary of His Majesty the Emperor of China, ex-Minister of the Diplomatic Service, of the Second Official Rank.

SEPARATE ARTICLES.

1. The Japanese military forces which are, under article 8 of the treaty of peace signed this day, to temporarily occupy Wei-Hai-Wei, shall not exceed one brigade, and from the date of the exchange of the ratifications of the said treaty of peace China shall pay annually one-fourth of the amount of the expenses of such temporary occupation; that is to say, at the rate of 500,000 kuping taels per annum.

2. The territory temporarily occupied at Wei-Hai-Wei shall comprise the island of Liu Kung and a belt of land five Japanese ri wide, along the entire coast line of the bay of Wei-Hai-Wei. No Chinese troops shall be permitted to approach or occupy any places within a zone five Japanese ri wide beyond the boundaries of the occupied territory.

3. The civil administration of the occupied territory shall remain in the hands of the Chinese authorities. But such authorities shall at all times be obliged to conform to the orders which the commander of the Japanese army of occupation may deem it necessary to give in the interest of the health, maintenance, safety, distribution or discipline of the troops.

4. All military offenses committed within the occupied territory shall be subject to the jurisdiction of the Japanese military authorities.

5. The foregoing separate articles shall have the same force, value and effect as if they had been word for word inserted in the treaty of peace signed this day.

In witness whereof the respective plenipotentiaries have signed the same and have affixed thereto the seal of their arms.

Done at Shimonoseki, in duplicate, this 17th day of the 4th month of the 28th year of Meiji, corresponding to the 23d day of the 3d month of the 21st year of Kuang Hsu.

COUNT ITO HIROBUMI [L. S.],
Junii, Grand Cross of Imperial Order of Paullownia, Minister President of State, Plenipotentiary of His Majesty the Emperor of Japan.

VISCOUNT MUTSU MUNEMITSU [L. S.],
Junii, First Class of the Imperial Order of the Sacred Treasure, Minister of State for Foreign Affairs, Plenipotentiary of His Majesty the Emperor of Japan.

LI HUNG CHANG [L. S.],
Plenipotentiary of His Majesty the Emperor of China, Senior Tutor to the Heir Apparent, Senior Grand Secretary of State, Minister Superintendent of Trade for the Northern Ports of China, Viceroy of the Province of Chihli, and Earl of the First Rank.

LI CHING FONG [L. S.].
Plenipotentiary of His Majesty the Emperor of China, ex-Minister of the Diplomatic Service, of the Second Official Rank.

RATIFICATION.

Mutsu Hito, by the grace of heaven emperor of Japan, and seated on the throne occupied by the same dynasty from time immemorial.

To all to whom these presents shall come, greeting:

WHEREAS, We have seen and examined each and every clause of the treaty of peace and separate articles which were signed and sealed at Shimonoseki by the plenipotentiaries of Japan and China on the 17th day of the 4th month of the 28th year of Meiji; and whereas, we have found them satisfactory and agreeable to us, we do therefore hereby accept and ratify the said treaty and separate articles.

In witness whereof we have hereunto set our signature and caused the great seal of the empire to be fixed.

Done at Hiroshima this 20th day of the 4th month of the 28th year of Meiji, corresponding to the 2,555th year from the coronation of the Emperor Jimmu.

[Seal of the empire.] [Imperial sign manual.]

Countersigned:

VISCOUNT MUTSU MUNEMITSU,
Minister of Foreign Affairs.

IMPERIAL RESCRIPT.

We recently complied with the request of China, and in consequence appointed plenipotentiaries and caused them to confer with the plenipotentiaries appointed by China and to conclude a treaty of peace between the two empires.

Since then the governments of their majesties the emperors of Russia and Germany and of the republic of France have united in a recommendation to our government not to permanently possess the peninsula of Feng-Tien, our newly acquired territory, on the ground that such permanent possession would be detrimental to the lasting peace of the orient.

Devoted as we unalterably are, and ever have been, to the principles of peace, we were constrained to take up arms against China for no other reason than our desire to secure for the orient an enduring peace.

Now, the friendly recommendation of the three powers was equally prompted by the same desire. Consulting, therefore, the best interests of peace and animated by a desire not to bring upon our people added hardships or to impede the progress of national destiny by creating new complications and thereby making the situation difficult and retarding the restoration of peace, we do not hesitate to accept such recommendation.

By concluding the treaty of peace China has already shown her sincerity of regret for the violation of her engagements, and thereby the justice of our cause has been proclaimed to the world.

Under these circumstances we can find nothing to impair the honor and dignity of our empire if we now yield to the dictates of magnanimity and, taking into consideration the general situation, accept the advice of the friendly powers.

Accordingly we have commanded our government and have caused them to reply to the three powers in the above sense.

Regarding the arrangements by which we will renounce the permanent possession of the peninsula, we have specially commanded our government that the necessary measures shall be made the subject of future negotiations and adjustment with the government of China.

Now the exchange of ratifications of the treaty of peace has already been effected, the friendly relations between the two empires have been re-established and careful relations with all other powers are also strengthened.

We therefore command our subjects to respect our will, to take into careful consideration the general situation, to be circumspect in all things, to avoid erroneous tendencies and not to impair or thwart the high aspirations of our empire.

The 10th day, the 5th month of the 28th year of Meiji.

[L. S.] [Imperial sign manual.]

[Countersigned by all ministers of state.]

The treaty produced a commotion in Europe when its terms were made public. The great commercial interests of several European powers were deemed to be threatened by its ratification and Russia, France and Germany protested against the terms of the settlement. To France and Spain as well the growing power of Japan in Asia was by no means welcome. Germany was influenced more by sympathy for China than by colonial or commercial reasons, while Russia could not permit Japan to secure so strong a foothold on the shores of the Yellow sea, to which she was constructing a transcontinental line of railroad to connect Siberia with St. Petersburg. Russia, therefore, made a demand upon Japan, in which France and Germany joined, that the treaty be modified by re-ceding to China Port Arthur and the whole of the Liao-Tung peninsula. Notwithstanding the formal ratification of the treaty on the 19th of May, it was agreed that Japan should not make the occupation of the peninsula permanent, but insisted that the retrocession demanded should be arranged by China and Japan between themselves. The retrocession was made, and it was publicly but not officially reported that Japan received $50,000,000 additional indemnity from China for surrendering so valuable a part of its spoils of war. Thus ended one of the greatest wars of modern times. Its chief result has been that Japan has been admitted to the list of great naval and military powers, which position she has fairly won. Forty years ago Japan was a hermit nation, without trade and commerce, civilization or education. Since then she has become a naval power of the highest rank and fought battles on the seas, with all the appliances of modern naval warfare, that were the admiration of the world so far as the technique of modern naval warfare is concerned. She massed great armies of thoroughly disciplined troops, supplied with the most approved arms and officered by soldiers whose skill and ability won recognition from the great military commanders of the world. Japan is the miracle of modern history.

THE ALASKAN BOUNDARY.

Very unexpectedly the United States has been forced into a dispute with Great Britain over the location of the boundary line between Alaska and British Columbia. It has occasioned a good deal of interest in the west, and the value of the region or territory involved is so great that it is probable the claims of Canada, which are espoused by the British government, will be resisted by our government with more determination than has usually characterized such controversies. Owing to the importance of the points in issue, and from the fact also that the dispute is to be a long if not a bitter one, it will be of service to give a history of the case as it now stands.

On Feb. 28, 1825, Stratford Canning, British plenipotentiary, and Count de Nesselrode and Pierre de Poleticia, for Russia, signed a treaty whereby what is now Alaska became the property of Russia. Under this treaty the boundary was specifically set forth, as is shown in the two following sections from that instrument:

SEC. 3. The line of demarkation between the possessions of the high contracting parties upon the coast of the continent and the islands of America to the northwest shall be drawn in the following manner: Commencing with the southernmost point of the island called Prince of Wales island, which point lies in the parallel of 54 degrees 40 minutes north latitude, and between the 131st degree and the 133d degree of west longitude, the same line shall ascend to the north along the channel called Portland channel as far as the point of the continent where it strikes the 56th degree of nortb latitude; from this last-mentioned point the line of demarkation shall follow the summit of the mountains situated parallel to the coast as far as the point of intersection of the 141st degree of west longitude (of the same meridian), and finally from the said point of intersection, the said meridian line of the 141st degree, in its prolongation as far as the frozen ocean, shall form the limit between the Russian and British possessions on the continent of America to the northwest.

SEC. 4. That wherever the summit of the mountains, which extend in a direction parallel to the coast, from the 56th degree of north latitude to the point of intersection of the 141st degree of west longitude, shall prove to be at the distance of more than ten marine leagues from the ocean, the limit of the

British possessions and the line of the coast which is to belong to Russia, as above mentioned, shall be formed by a line parallel to the windings of the coast, and which shall never exceed the distance of ten marine leagues therefrom.

In 1867 the United States purchased Alaska in its entirety from Russia, paying for it $7,200,000. England did not then raise the question as to the boundary, but during all the time that Russia was the possessor of Alaska, and up to 1889, a term of fifty-nine years—forty-two years under Russian-British ownership and seventeen years under United States-British control—the Alaskan boundary, as above set forth, was never questioned, but in all maps charts and British official matters this boundary line was shown and represented as American maps and official documents still hold it, and as it came to this government from Russia. Between 1825 and 1867 the Russians had officially occupied all the territory west of Portland channel, and following the transfer of Alaska to the United States in 1867 our government did the same thing. From 1867 to 1887 United States troops were stationed at Fort Tongass, at the mouth of Portland channel, and customs officials were stationed there as late as 1889. All this was without any protest from either Great Britain or Canada, the boundary line established in 1825 being recognized by Great Britain, Canada and the United States. In 1884 the Dominion of Canada on its maps and territorial charts changed the Alaskan boundary line to suit its own purpose, but the dominion press was silent on this point till 1892. That the British government recognized what the Dominion of Canada makes claim to is proved by the fact that at the instigation of her majesty's government the United States on July 22, 1892, entertained Great Britain in a convention, resulting in the appointment of a commission for the purpose as set forth in article 1 of that convention: "Providing for the delimitation of the existing boundary between the United States and her majesty's possessions in North America in respect to such portions of said boundary line as may not in fact have been permanently marked in virtue of treaties heretofore concluded."

Under this agreement the time allowed to complete surveys and submit final reports was Nov. 28, 1894, but by an agreement between the two governments in March, 1894, the time limit was extended to Dec. 31, 1895.

The disputed lands are in the southeastern division of Alaska, in what is known as the panhandle of that vast territory, which division alone comprises about 29,000 square miles of territory. The claim set up by the British government, which now conforms to its maps, charts, etc., since 1884, in brief is that instead of Portland channel, Behm channel, the first inlet west of Portland channel, was meant; and, starting from this point, the line of demarkation as now extended by the British includes an area about 600 miles in length and of varying width up to 150 miles, including, as Mr. Begg, an English authority, reports, "about 100 miles of seacoast, with its harbors and the islands adjacent thereto." In pursuance of the international agreement, England and the United States have each had and now have engineering parties in the disputed territory.

It is the universal report of Americans fully conversant with this section of Alaska, many of whom have traversed it repeatedly, that there is no defined range of mountains, as there would appear to be by the treaty referred to, but that that particular section, ten marine leagues from the windings of the coast line, is a jumbled-up mountainous country of varying width, whereas, by photographic views skillfully arranged, a continuous range may be shown as actually existing in strict continuity, though such representation would be false.

Dr. Sheldon Jackson, United States general agent of education in Alaska, in a recent interview in answer to the question, "Is there enough of value in this disputed section to make a fuss about?" is reported to have said: "The funny part of it all is the cheek displayed by England in attempting to take in territory of which Russia and the United States have for sixty years had free and undisputed possession, and which our government now owns by right of purchase. No nation on the face of the earth that has self-respect would make such a claim. The value of the strip that the English government is now seeking to bring within its territorial limits is almost inestimable. Alaska last year in her fish canneries alone did a business of fully $3,000,000, the greater part of which business is in the disputed Alaskan territory. One of the famous gold mines of the world, valued in San Francisco at $13,000,000, is in this section. Besides this there are many other gold and silver properties there that are rapidly being developed, while the unvouched forests of this section are greater than any in the United States. Up to this time no timber has been shipped out of Alaska, the law of the United States preventing this, the forests being held under government control to prevent syndicates and speculators from getting in and taking up this vast extent of fine timber, and by this act we have held a forest reserve that will be of incalculable value to the United States in the future if she maintains her ownership thereto. Besides this, there are large deposits of copper, iron, coal and marble, which the British now claim. The population of Alaska is now 35,000, of which number about two-thirds are in this southeastern or disputed division. The United States government now has twenty-eight schools in Alaska, and the religious denominations are widely and liberally represented, and in no place in the world are they so systematically divided as to location as in Alaska, each different sect having located in separate districts throughout the great territory. The army of men who are working into the interior or main part of Alaska come by steamer to Chilkat, and thence follow a trail a distance of forty miles to Forty-Mile creek, where they build cheap rafts and float down the Yukon river a distance of 600 miles to the inland gold fields. If the English claims to territory are made good, these headwaters will become their possessions, and the harbors now in American hands will fly the British flag, and the great gateway to the interior of Alaska will be controlled by this would-be usurper."

Miner W. Bruce, the well-known Alaskan explorer, in discussing the claims Great Britain is making, is reported to have said: "The Canadians have always proceeded very cautiously and secretly in this matter. Although the Canadian maps have changed the Alaskan boundary according to Canadian ideas, still the press of the country has been singularly silent, which means no good for America or Americans. It has been said that Alaska was not very valuable, anyway, but why, then, should Canada be so anxious to secure it? Why should surveying parties be sent out at great expense in the dead of winter? The country which England is endeavoring to secure is the key to the gold mines of the Yukon and the interior, and for that reason is immensely valuable. Even the people at Washington city are supremely ignorant of the value of the resources of Alaska. A well-known American diplomat at

the national capital has said that Alaska has never produced enough to pay her original cost. The fact is that Alaska has produced more than $68,000,000 since her purchase by the United Stated in the fishing and seal industries, not including the output of her mines. The commerce and trade of the country have also been much greater than the casual observer could possibly conceive of."

The acquisition of the coal fields of Alaska by England is of far more importance than may be appreciated by our government. To make this matter plainer, it is well to call attention to the fact that the only coal supply station now open to the United States on the Pacific coast is on Puget sound. The Alaskan coal deposits have been proved to be very extensive, although not yet being opened up to the commercial world. England now, through the Dominion of Canada, has vast coal fields in British Columbia. The only ocean inlet to Puget sound is the strait of San Juan de Fuca, washing the shores of United States territory on the south and the British possessions on the north. It may be pertinent in this connection to say that the English government is now at work on strong fortifications on the shores of this strait, fortifications that will cost millions of dollars and will not be exceeded for impregnability by any fort on the continent. With these the strait of San Juan de Fuca will be practically under British control, and with the Alaskan coal fields owned by England the United States would not have a coaling station in the entire Pacific waters. Besides this, England at all times has a liberal fleet of warships at Esquimalt, Vancouver island, the point where the great fort is now being constructed.

The revenues now derived by the British from their inland possessions bordering on Alaska are of such extent that she is looking with jealous eye upon the rich country, the harbors, the lumber, the coal, the mineral wealth, the fishing and seal industry, all within the lands and waters now the property of the United States, and for the continued ownership of which the Americans on the North Pacific coast are exceedingly anxious that the government at Washington shall resist the claims of Great Britain with all its energy and power.

ALIEN LAND-OWNING.

The evils resulting from the large holdings of American real estate by alien landlords have been severely felt by many of the new and some of the older states of the union. These foreign land-owners impede the development of the states in which their holdings are located. They refuse to sell their lands, and prefer to establish a system of agencies and bailiffs detrimental to the state and the counties in which the lands are located.

Several state legislatures, notably in Illinois, Kansas, and Nebraska, have made efforts to deal with the question, but so far with only indifferent success.

The government of the United States has passed a law to restrict ownership of real estate in the territories to American citizens, and such law is still in force. The act of 1878 provided that "it shall be unlawful for any person or persons not citizens of the United States, or who have not lawfully declared their intention to become such citizens, or for any corporation not created by or under the laws of the United States or of some state or territory of the United States, to hereafter acquire, hold or own real estate so hereafter acquired, or any interest therein, in any of the territories of the United States or in the District of Columbia, except such as may be acquired by inheritance or in good faith in the ordinary course of justice in the collection of debts heretofore created." The second section provides that no corporation of which more than 20 per cent of the capital stock is held by aliens shall acquire or hold real estate in the territories. The third section regulates the holding of lands by railway, turnpike and canal companies, and the fourth provides that "all property acquired, held or owned in violation of the provisions of this act shall be forfeited to the United States."

In 1887 the state of Illinois passed a law to restrict the right of aliens to acquire and hold real property. The fact that Viscount Scully practically owns the best parts of the counties of Logan, Livingston and Tazewell, and is conducting a system of tenantry offensive to the people, was the cause of the law. The law provides that:

"A non-resident alien, firm of aliens, or corporation incorporated under the laws of any foreign country, shall not be capable of acquiring title to or taking or holding any land or real estate in this state, by descent, devise, purchase or otherwise, except that the heirs of aliens who have heretofore acquired lands in this state under the laws thereof, and the heirs of aliens who may acquire land under the provisions of this act, may take such lands by devise or descent and hold the same for the space of three years and no longer, if such alien at the time of so acquiring such land is of the age of twenty-one years, and if not twenty-one years of age, then for the term of five years from the time of so acquiring such lands; and if, at the end of the time herein limited, such lands so acquired by such alien heirs have not been sold to bona-fide purchasers for value or such alien heirs have not become actual residents of this state, the same shall revert and escheat to the state of Illinois the same as the lands of other aliens under the provisions of this act." Some of the other western states have similar laws.

All that has been done to limit alien landholding has been at the instance and through the influence of the organized associations of the tenantry on such estates in the several states, and their movements have always been attended with the utmost secrecy. Such an association exists in Illinois, Nebraska, Iowa and Kansas to resist to the utmost the demands of the English landlords. The organization is a secret one and is the first really agrarian agitation in American history. The association has already influenced legislation in a marked degree.

This development in the situation more than anything else has caused the English land-owners to form an alliance among themselves. The movement was first proposed in the interest of the Scully estate in Illinois. It is intended to have an agent in attendance at the meetings of the legislatures of all the states involved this winter. The matter was brought to the attention of the British ambassador to the United States in the fall of 1894, when he visited the London foreign office, but what is to be done in the matter no one cares to say. The English owners feel that they have not been fairly dealt with by their American tenantry, and it is likely that this year (1896) will witness a crisis in the entire western agrarian movement. The duke of Beaufort and the duke of Sutherland both assert that the meetings of the land-owners now periodically held at the Bank of England are meant entirely to effect economy in the collection of rents. At present each land-owner has his set of agents,

who work independently. By consolidating the collection systems the landlords hope to expedite business. The tenants profess to be alarmed by this new development. They see in it more rack-renting, and committees have been detailed to obtain legal redress if possible. At any event there is in prospect for the first time an open war between the British land-owners and their tenants in America.

It is impossible to give a strictly accurate list of the foreign land-owners and their real-estate holdings in this country, but the following comprises the names of the largest syndicates and individual holders, with the acreage under their control and their location. While not complete, it shows the extent of the evil against which so much complaint is made in many quarters:

The Texas Land Union (Syndicate No. 3) owns 3,000,000 acres. Interested peers: Baroness Burdett-Coutts, Earl Cadogan, H. C. Fitzroy Somerset (duke of Beaufort), William Alexander Lochiel Stephenson Douglas-Hamilton (duke of Beaudon), the duke of Rutland, U. J. Kay-Shuttleworth and Ethel Cadogan (maid in waiting to the queen). This syndicate owns whole counties in Texas and tens of thousands of persons pay it rentals.

Sir Edward Reid. 2,000,000 acres in Florida only. This syndicate includes the present duchess of Marlborough, Lady Randolph Churchill and Lady Lister-Kaye.

Viscount Scully, 3,000,000 acres in central Illinois. His lordship maintains an elaborate system of bailiffs.

Syndicate No. 4, 1,800,000 acres in Mississippi. It includes the marquis of Dalhousie, George Henry Howard Cholmondeley (Viscount Cholmondeley), Georgiania (Viscountess Cross), the Hon. Lady Hamilton Gordon and the Hon. Lady Biddulph.

Marquis of Tweedale, 1,750,000 acres. The marquis is William Montagu Hay, notorious in Scotland as the rack-rent lord.

Phillips, Marshall & Co., London, 1,300,000 acres. This firm has the whole peerage for its clients.

The Anglo-American Syndicate, London, 750,000 acres. The funds of widowed peeresses are largely invested here. The lands are in the south and west.

Bryan H. Evans, 700,000 acres in Mississippi. Mr. Evans resides in London.

The duke of Sutherland, 125,000 acres. The duke is widely known as a rack-rent nobleman of police court fame.

The British Land Company, 320,000 acres in Kansas.

William Whalley, 310,000 acres. Mr. Whalley is the squire of Peterboro, England.

The Missouri Land Company, 300,000 acres in Missouri. It has headquarters at Edinburgh.

Robert Tennant, 230,000 acres. This is all farming land. Mr. Tennant lives in London.

Dundee Land Company, 247,000 acres.

Lord Dunmore, 120,000 acres.

Benjamin Newgas, Liverpool, 100,000 acres.

Lord Houghton, 60,000 acres in Florida.

Lord Dunraven, 60,000 acres in Colorado.

English Land Company, 50,000 acres in California.

English Land Company, 50,000 acres in Arkansas.

Alexander Grant, London, 35,000 acres in Kansas.

Syndicate No. 6, 110,000 acres in Wisconsin. This syndicate includes the earl of Verulam and the earl of Lankeville.

M. Elfenhauser, Halifax, 600,000 acres in West Virginia.

Syndicate No. 1, 50,000 acres in Florida. This is a Scotch concern.

It is claimed that fully 20,000,000 acres of American land are thus owned by great land-owners in England and Scotland. This does not include the Holland Syndicate, which owns 5,000,000 acres of grazing land in western states, nor the German Syndicate, owning 2,000,000 acres in various states.

THE TORRENS SYSTEM.

Registration and transfer of title to real estate.

Illinois is the first state in the union to move in the direction of adopting the so-called Torrens system of registration and transfer of the title to real estate. The system is by no means a new one except on this continent. It has been in operation for over a century in Prussia, Bavaria and other European states, notably in Hamburg, where it has been used for upward of 600 years. It has been in use since 1858 in South Australia, since 1861 in Queensland, since 1862 in Victoria and New South Wales, since 1863 in Tasmania, since 1870 in New Zealand and British Columbia, since 1874 in parts of England and in Western Australia, since 1884 in Ontario (Canada) and since 1885 in Manitoba. It is therefore no untried system.

In 1891 the Real Estate Board of the city of Chicago invited Mr. Theodore Sheldon to explain the Torrens system, which invitation he accepted. Soon after the State Bar Association procured the adoption of a joint resolution by the XXXVIIth general assembly authorizing a commission to make an investigation of the system and report to the governor. The governor appointed as that commission James K. Edsall, Theodore Sheldon and Willis G. Jackson, of Chicago, George W. Prince of Galesburg and Frank H. Jones of Springfield. The death of Mr. Edsall made a vacancy which was filled by the appointment of H. B. Hurd. The report of the commission was made in December, 1892. The commission favored the adoption of the system and a bill carrying it into effect was presented to the legislature in 1893. It passed the senate by a vote of 28 yeas to 4 nays, but lacked 7 votes of a majority in the house and failed. At the session of the legislature in 1895 the bill was again presented, passed and became a law July 1, 1895. It does not, however, become operative until it is submitted to a vote of the people of a county and adopted by a majority of the votes cast.

The great purpose of the Torrens system is to free land titles of the expense of conveyance, the perils that have always attended real-estate transactions and the expense of investigating chains of title back through former owners. Judge Hurd, one of the commissioners of the state appointed to investigate the system, gives the following as to its details: "The first step is to provide an officer, or set of officers, experts who can make an examination of title once for all down to a given time—that is, down to the time of the application to have the title registered; and the title being found to be in the applicant, to certify that fact, entering the certificate in a book called the register, and delivering a copy to the owner, which certificate is conclusive as to ownership.

"This is called registering the title, and is quite a different thing from recording the instruments of conveyance or keeping an abstract of them. The title being thus registered, the next thing is to provide for subsequent dealings so that at each transfer of the title

all questions of form and substance must be conclusively settled so that the purchaser will get just what he buys. If he buys a fee-simple clear of all incumbrances he will get a fee-simple clear of all incumbrances; if he buys subject to incumbrance or any less interest than a fee it will appear upon the register and in the certificate that will be delivered to him, and there is no going back of the certificate. It is a matter of no consequence to him who owned the land before him, or how many owners there may have been, or what nice questions of law have been or might be raised upon the various conveyances through which it has come down to him; they have all been settled and dropped into oblivion.

"All this is made practicable and comparatively easy by the simple manner in which the register is kept. The first certificate is the first thing that will appear in the register, this being a new root of title, back of which it is not necessary to go; all that need be attended to is the subsequent dealings. If the registered owner mortgages it, the mortgage will be filed in the office of the registrar and a memorial of mortgage will be entered immediately under the certificate of title. When the mortgage is released the notation will be canceled. If an execution or attachment is levied upon the land the fact is certified to the registrar and he enters at the same place a memorial of the fact. When that is disposed of the memorial is disposed of, and so on as to everything that may affect the title up to the time of the next transfer.

"When the owner wishes to transfer the land he surrenders his certificate of title and it is canceled. A new one is issued to the transferee, which is registered upon a new page. The dealings under the old certificate are closed and thereafter will proceed under the new. Each successive certificate constitutes a new root of title. If the transfer is subject to incumbrances or outstanding interests of any kind the notation of them under the former certificate will be brought forward by entry under the new.

"When only a part of the land described in a certificate of title is transferred a new certificate is issued to the transferee for what he gets and another to the owner for the balance, I have not attempted to go into exceptions, as in case of frauds, etc., or into particulars beyond sufficient to give an understanding of the leading principles upon which the system proceeds, which may be summed up in a single line: Clear up everything as you go along and have no arrearages. Short accounts and frequent settlements avoid difficulties."

Sir Robert Torrens, after whom the system is named, because he more than any one else has systematized the various modes of procedure in vogue in various countries into the modern plan, says: "It is not necessary to examine abstracts of title—these no longer exist—they having been delivered up to the registrar, and that officer, when he grants a certificate of title, cancels all previous evidences of title. Accordingly, an investor runs no risk of blunder or any incompetency of the conveyancer or examining solicitor. Every transaction has its complete security and finality.

"In fine, the benefits which have attended this measure, wherever adopted in its integrity, may be summed up:

"1. It has substituted security for insecurity.

"2. It has reduced the cost of conveyancing from pounds to shillings and the time occupied from months to days.

"3. It has exchanged obscurity and verbiage for brevity and clearness.

"4. It has so simplified ordinary dealings that he who has mastered the 'three R's' can transact his own conveyancing.

"5. It affords protection against fraud.

"6. It has restored to their just value many estates, held under good holding titles, but depreciated in consequence of some blur or technical defect, and barred the recurrence of any similar fault.

"7. It has largely diminished the number of chancery suits by removing those conditions that afford grounds for them."

In a British province where the Torrens system has been in force for some time the registrar-general sums up its benefits as follows:

"1. The title to real property has been greatly simplified without radical changes in the general law.

"2. Stability of title, with safety to purchasers and mortgagees, has been secured.

"3. The ownership of property, either in town or country, is shown by the register at a glance, and whether it is incumbered or not.

"4. It increases the salable value of property.

"5. It enables both venders and purchasers to accurately ascertain the expenses of carrying out any sale or transfer.

"6. It protects trusts, estates and beneficiaries.

"7. It prevents fraud and protects purchasers and mortgagees from misrepresentations.

"8. It has secured the chief advantages of the old system of recording of deeds (of which notice is the most important principle) and has operated so as to almost entirely dispense with investigations of prior title."

The system has lately been considered by a number of states—New York, Massachusetts, Maryland, Minnesota, Tennessee, California, Ohio, Indiana, Iowa, Maine, Wisconsin and possibly some others.

IMPORTANT LEGISLATION.

The following is a synopsis of the last session of the LIIId Congress to March 4, 1895, when it expired by limit of law:

FOR RELIEF OF HOMESTEADERS.

WHEREAS, During the summer and autumn of 1891 extensive forest fires prevailed in northern Wisconsin, Minnesota and Michigan, resulting in the death of many homesteaders and their families, the destruction of their property and effects, and of much of the green timber growing upon them, which homesteads are valuable chiefly for the timber standing and growing on them; and,

WHEREAS, Under existing law homesteaders are not allowed to cut or sell green or burned timber, except for the purpose of clearing and improving, and all burned timber not cut within a short period will become worthless and a loss to the settler and the government; therefore,

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all such persons actually occupying homesteads in said states of Wisconsin, Minnesota and Michigan at the time of such fires, upon claims under the laws of the United States, on lands of the United States, whose property and buildings were destroyed by such fires, and the heirs of all such persons who perished by such fires, and all persons who by reason of such fires and loss of property were obliged to leave their homesteads, are hereby granted two years' additional time in which to make final proof. And temporary absence for any period within two years from the date of this act shall be deemed constructive possession and residence, but

shall not be deducted from the time required to make final proof.

SEC. 2. That all persons whose property was destroyed by such fires, and the heirs of all persons who were actual occupants of the homesteads at the time of the fire, and who lost their lives in and by that fire, may, by proving such actual occupancy at the date of such fires, make proof showing compliance with the law up to the date of the fire, and shall make payment at the minimum price under existing statues, in the same manner as if such claimants were alive, and upon receipt of such proof of loss of property by such fires, or death of the claimant, heirs surviving, and upon payment as aforesaid, a patent shall be issued to such claimant. or his or her heirs.

SEC. 3. That the claimant upon any homestead, who by reason of not having lived thereon the necessary length of time to enable him to commute under section 2301 of the revised statutes as amended by the act of March 3, 1891, his heirs, executor, administrator, or guardian of his minor heirs, may, when the quantity of timber destroyed upon his or her homestead shall not exceed 75,000 feet of merchantable green timber, file an estimate in the land office where such homestead was entered, with such reasonable proofs as the commissioner of public lands may prescribe, as to the quantity of timber destroyed upon any sectional subdivision, and thereupon the register and receiver may, under the direction of the commissioner of public lands, issue a license or permit to cut the burned timber on any homestead or sectional fraction thereof, upon payment of the sum of $1.25 per acre for such sectional subdivision, and the government shall issue a patent for the same to the claimant or his or her heirs.

Approved Jan. 19, 1895.

COMMERCIAL TRAVELERS' TICKETS.

An amendment to the interstate commerce law provided that nothing in this act shall prevent the issuance of joint interchangeable 5,000-mile tickets, with special privileges as to the amount of free baggage that may be carried under mileage tickets of 1,000 or more miles. But before any common carrier, subject to the provisions of this act, shall issue any such joint interchangeable mileage tickets with special privileges, as aforesaid, it shall file with the interstate commerce commission copies of the joint tariffs of rates, fares or charges on which such joint interchangeable mileage tickets are to be based, together with specifications of the amount of free baggage permitted to be carried under such tickets, in the same manner as common carriers are required to do with regard to other joint rates by section 6 of this act; and all the provisions of said section 6 relating to joint rates, fares and charges shall be observed by said common carriers and enforced by the interstate commerce commission as fully with regard to such joint interchangeable mileage tickets as with regard to other joint rates, fares and charges referred to in said section 6. It shall be unlawful for any common carrier that has issued or authorized to be issued any such joint interchangeable mileage tickets to demand, collect or receive from any person or persons a greater or less compensation for transportation of persons or baggage under such joint interchangeable mileage tickets than that required by the rate, fare or charge specified in the copies of the joint tariff of rates, fares or charges filed with the commission in force at the time. The provisions of section 10 of this act shall apply to any violation of the requirements of this proviso.

Approved Feb. 8, 1895.

GETTYSBURG MILITARY PARK.

That the secretary of war is hereby authorized to receive from the Gettysburg Battlefield Memorial Association, a corporation chartered by the state of Pennsylvania, a deed of conveyance to the United States of all the lands belonging to said association, embracing about 800 acres, more or less, and being a considerable part of the battlefield of Gettysburg, together with all rights of way over avenues through said lands acquired by said association, and all improvements made by it in and upon the same. Upon the due execution and delivery to the secretary of war of such deed of conveyance, the secretary of war is authorized to pay to the said Battlefield Memorial Association the sum of $2,000, or so much thereof as may be necessary to discharge the debts of said association, the amount of such debts to be verified by the officers thereof, and the sum of $2,000 is hereby appropriated, out of any money in the treasury not otherwise appropriated, to meet and defray such charges.

SEC. 2. That as soon as the lands aforesaid shall be conveyed to the United States the secretary of war shall take possession of the same, and such other lands on the battlefield as the United States have acquired, or shall hereafter acquire, by purchase or condemnation proceedings, and the lands aforesaid shall be designated and known as the "Gettysburg National Park."

SEC. 3. That the Gettysburg National Park shall, subject to the supervision and direction of the secretary of war, be in charge of the commissioners heretofore appointed by the secretary of war for the location and acquisition of lands at Gettysburg, and their successors; the said commissioners shall have their office at Gettysburg, and while on duty shall be paid such compensation out of the appropriation provided in this act as the secretary of war shall deem reasonable and just. And it shall be the duty of the said commissioners, under the direction of the secretary of war, to superintend the opening of such additional roads as may be necessary for the purposes of the park and for the improvement of the avenues heretofore laid out therein, and to properly mark the boundaries of the said park, and to ascertain and definitely mark the lines of battle of all troops engaged in the battle of Gettysburg, so far as the same shall fall within the limits of the park.

SEC. 4. That the secretary of war is hereby authorized and directed to acquire, at such times and in such manner as he may deem best calculated to serve the public interest, such lands in the vicinity of Gettysburg, Pa., not exceeding in area the parcels shown on the map prepared by Major-General Daniel E. Sickles, United States army, and now on file in the office of the secretary of war, which were occupied by the infantry, cavalry and artillery on the 1st, 2d and 3d days of July, 1863, and such other adjacent lands as he may deem necessary to preserve the important topographical features of the battlefield; *Provided*, That nothing contained in this act shall be deemed and held to prejudice the rights acquired by any state or by any military organization to the ground on which its monuments or markers are placed, nor the right of way to the same.

Section 8 of the bill provides for a bronze tablet containing Mr. Lincoln's speech at Gettysburg, Nov. 19, 1863, on the occasion of the dedication of the national cemetery. The speech was as follows:

"Four score and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

"Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

"But, in a larger sense, we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here, have consecrated it far above our poor power to add or detract. The world will little note, nor long remember, what we say here; but it can never forget what they did here. It is for us, the living, rather to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us; that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom, and that government of the people, by the people, for the people, shall not perish from the earth."

Approved Feb. 11, 1895.

PUBLIC BUILDING AT CHICAGO.

That the secretary of the treasury is hereby authorized and directed to cause to be erected upon the present postoffice site in the city of Chicago and state of Illinois, which site is bounded by Adams, Jackson, Clark and Dearborn streets, a commodious and sufficiently fireproof building for the use of the postoffice, United States courts, United States sub-treasury, United States collectors, and other necessary officers of the government; the building to be so erected as to occupy all the available area of the present site to the street lines on all sides, and the secretary of the treasury is authorized to contract with the lowest and best bidder, after reasonable notice by advertisement in two or more newspapers published in the city of Chicago, for the sale of the present building as hereinbefore described and the removal of the same from the site where it is now located, and the secretary of the treasury is further authorized and directed to have prepared by the supervising architect of the treasury department full and complete plans, specifications and detailed drawings of the building to be erected, the said plans to be approved by the secretary of the treasury, the postmaster-general and the secretary of the interior.

SEC. 2. That the secretary of the treasury is hereby further authorized in the specifications for the erection of said building to enter into contract for the construction of any portion thereof, and the several contracts for the different portions of said building shall be awarded, after public advertisement according to law for not less than one month, to the lowest responsible bidder or bidders. Said contracts shall be made at such times that the actual work of construction shall progress continuously, and no delay be caused in the erection of the building: *Provided*, That the entire cost of said building when completed shall not exceed the sum of $4,000,000.

Approved Feb. 13, 1895.

THE VENEZUELAN BOUNDARY.

That the president's suggestion, made in his last annual message to this body—namely, that Great Britain and Venezuela refer their dispute as to boundaries to friendly arbitration—be earnestly recommended to the favorable consideration of both the parties in interest.

Approved Feb. 20, 1895.

MEXICAN FREE ZONE.

That the secretary of the treasury be and is hereby authorized and directed to suspend the operation of section 3005 of the revised statutes, in so far as thes ame permits goods, wares and merchandise to be transported in bond through the United States into the free zone of Mexico, so long as the Mexican free-zone law exists: *Provided*, That nothing herein contained shall be construed so as to prevent the transportation of merchandise in bond to be delivered at points in the territory of Mexico beyond the limits of said free zone.

Approved March 1, 1895.

COPYRIGHT LAW.

If any person, after the recording of the title of any map, chart, dramatic or musical composition, print, cut, engraving, or photograph, or chromo, or of the description of any painting, drawing, statue, statuary, or model or design intended to be perfected and executed as a work of the fine arts, as provided by this act, shall, within the term limited, contrary to the provisions of this act, and without the consent of the proprietor of the copyright first obtained in writing, signed in presence of two or more witnesses, engrave, etch, work, copy, print, publish, dramatize, translate, or import, either in whole or in part, or by varying the main design, with intent to evade the law, or, knowing the same to be so printed, published, dramatized, translated, or imported, shall sell or expose to sale any copy of such map or other article, as aforesaid, he shall forfeit to the proprietor all the plates on which the same shall be copied and every sheet thereof, either copied or printed, and shall further forfeit $1 for every sheet of the same found in his possession, either printing, printed, copied, published, imported, or exposed for sale; and in case of a painting, statue, or statuary, he shall forfeit $10 for every copy of the same in his possession, or by him sold or exposed for sale: *Provided, however*, That in case of any such infringement of the copyright of a photograph made from any object not a work of fine arts, the sum to be recovered in any action brought under the provisions of this section shall be not less than $100, nor more than $5,000, and: *Provided, further*, That in case of any such infringement of the copyright of a painting, drawing, statue, engraving, etching, print, or model or design for a work of the fine arts or of a photograph of a work of the fine arts, the sum to be recovered in any action brought through the provisions of this section shall be not less than $250, and not more than $10,000. One-half of all the foregoing penalties shall go to the proprietors of the copyright and the other half to the use of the United States.

Approved March 2, 1895.

ACCRUED PENSIONS.

That from and after the 28th day of September, 1892, the accrued pension to the date of the death of any pensioner, or of any person entitled to a pension having an application therefor pending, and whether a certificate therefor shall issue prior or subsequent to the death of such person, shall, in the case of a person pensioned, or applying for pension, on account of his disabilities or service, be paid, first, to his widow; second, if there is no widow, to his child or children under the age of 16 years at his death; third, in case of a widow, to her minor children under the age of 16 years at her death. Such accrued pension shall not be considered a part of the assets of the estate of such deceased person, nor be

liable for the payment of the debts of said estate in any case whatsoever, but shall inure to the sole and exclusive benefit of the widow or children. And if no widow or child survive such pensioner, and in the case of his last surviving child who was such minor at his death, and in case of a dependent mother, father, sister or brother, no payment whatsoever of their accrued pension shall be made or allowed except so much as may be necessary to reimburse the person who bore the expense of their last sickness and burial, if they did not leave sufficient assets to meet such expense. And the mailing of a pension check, drawn by a pension agent in payment of a pension due, to the address of a pensioner, shall constitute payment in the event of the death of a pensioner subsequent to the execution of the voucher therefor. And all prior laws relating to the payment of accrued pension are hereby repealed.

Approved March 2, 1895.

SUPPRESSION OF LOTTERIES.

That any person who shall cause to be brought within the United States from abroad, for the purpose of disposing of the same, or deposited in or carried by the mails of the United States, or carried from one state to another in the United States, any paper, certificate or instrument purporting to be or represent a ticket, chance, share or interest in or dependent upon the event of a lottery, so-called gift concert or similar enterprise offering prizes dependent upon lot or chance, or shall cause any advertisement of such lottery, so-called gift concert or similar enterprise offering prizes dependent upon lot or chance, to be brought into the United States, or deposited in or carried by the mails of the United States, or transferred from one state to another in the same, shall be punishable in the first offense by imprisonment for not more than two years or by a fine of not more than $1,000, or both, and in the second and after offenses by such imprisonment only.

PENSION CHANGES.

That from and after the passage of this act all pensioners now on the rolls, who are pensioned at less than $6 per month, for any degree of pensionable disability, shall have their pensions increased to $6 per month, and that hereafter, whenever any applicant for pension would, under existing rates, be entitled to less than $6 for any single disability, or several combined disabilities, such pensioner shall be rated at not less than $6 per month: *Provided also*, That the provisions hereof shall not be held to cover any pensionable period prior to the passage of this act, nor authorize a re-rating of any claims for any part of such period, nor prevent the allowance of lower rates than $6 per month, according to the existing practice in the pension office in pending cases covering any pensionable period prior to the passage of this act.

Approved March 2, 1895.

VENEZUELA AND GREAT BRITAIN.

The controversy now going on between these two nations over the boundary line dividing Venezuela from British Guiana is quite likely to involve the United States before it is terminated. On the northeasterly coast of South America is a region lying between the deltas of the Amazon and Orinoco rivers, which early in the century was known as the Guayanas. In 1810 a very considerable portion of this territory became a part of Venezuela, that country having taken it as the inheritor of the Spanish title. In 1814 Holland ceded another portion of the Guayanas to Great Britain, but the boundary line between the Dutch and Spanish portions of the territory had never been established by any treaty. Shortly after the cession of British Guiana disputes as to the boundary line between Venezuela and the British cession arose, and they still remain unsettled. The Venezuelan claim includes all territory west of the Essequibo river and southward to the boundaries of Brazil. The British claim includes the Yuruary valley and west nearly to the Caroni river, in which very rich gold mines have recently been discovered, as far west as the mouth of the Orinoco river, being nearly one-third of the entire country. Great Britain made no attempt to occupy any portion of her claimed territory west of the Pomaron river until 1841, when she sent a commissioner, who, without the consent of Venezuela, ran a boundary line from the Orinoco delta southwest, which line has since become known as the Schomburgk boundary. The territory taken from Venezuela by this new line is nearly equal in area to the state of New York.

Although this line is now referred to by the British government as marking the limits between what is without question British territory and what may be considered territory in dispute, it was not so regarded by the British government at that time, for, upon a protest from Venezuela, Lord Aberdeen, then prime minister of England, distinctly disavowed any intention of occupying the territory within it, and directed the colonial authorities to obliterate the line and destroy the posts and marks by which it had been defined.

Lord Aberdeen subsequently proposed a conventional boundary line beginning near the mouth of the Orinoco, but carrying the British contention farther to the westward in the interior than had been proposed by the Schomburgk line. This line, though disadvantageous to Venezuela, might have been accepted but for the fact that Lord Aberdeen accompanied it by what Venezuela considered a humiliating condition. He proposed to "cede" to Venezuela the territory beyond this line and oblige her not to alienate any part of it to a third power.

The matter then remained unsettled until 1879, when Dr. Rojos, Venezuelan minister to London, opened negotiations with Lord Salisbury, who then set up a claim that far exceeded any theretofore made by Great Britain. He claimed not only the territory to the east of the old Schomburgk line but a vast tract beyond it. Lord Granville succeeded Lord Salisbury while the matter was under consideration, and he proposed a line which, while it did not lay any claim to the mouth of the Orinoco, was more favorable to Great Britain in the interior than any line which had previously been suggested. Dr. Rojos could not consider this and proposed the settlement of the question by arbitration. Great Britain did not agree to this and nothing more was done until 1884.

In that year Guzman Blanco, who had become Venezuelan minister at London, continued negotiations for a treaty of arbitration which came more nearly resulting in a settlement of the controversy than any of the negotiations before or since that time. A draft of a treaty was practically agreed upon which would have referred the boundary question to arbitration and settled all the pending questions between the two governments. By a

change in the ministry, however, the marquis of Salisbury became premier and he declined to carry out the agreements which had been made by Earl Granville.

Three years later, when Lord Rosebery was minister of foreign affairs in the Gladstone cabinet, the matter was again taken up and Lord Rosebery prepared a conventional line more favorable to Venezuela than any proposition that had come from the British side. He accompanied it, however, with a condition that the Orinoco would be declared open and free to the navigation of British vessels. This was rejected by Venezuela and arbitration was again proposed, but was not agreed to by Great Britain.

In the meantime the British authorities took formal possession of the territory within the old Schomburgk line and in 1886 established fortifications at Barima point and posted notices at the mouth of the Amacura river announcing that the territory was within British jurisdiction. Venezuela demanded the immediate evacuation of these points and the restoration of the status quo of 1850, preparatory to submitting the entire boundary dispute to arbitration. These demands were not complied with, and in February, 1887, Venezuela formally declared all diplomatic relations with England suspended.

This dispute created some anxiety in the United States, and on the 20th of February, 1895, the following joint resolution was passed by congress:

"*Resolved*, That the president's suggestion made in his last annual message to this body —namely, that Great Britain and Venezuela refer their dispute as to boundaries to friendly arbitration—be earnestly recommended to the favorable consideration of both parties in interest."

The Venezuelan government is willing and anxious to submit the whole question to arbitration. Great Britain declined to act upon the suggestion of the United States upon the following grounds:

1. That Venezuela once proposed arbitration, to which proposal, after careful consideration, Great Britain replied signifying her willingness to arbitrate certain definite subjects of controversy, but that Venezuela has never made any reply to this proposition, either accepting or rejecting the suggested basis of arbitration.

2. That in any event there are certain portions of territory to which Venezuela lays claim which under no circumstances will be made the subject of arbitration, as they are recognized and established portions of the British domain, and are not, therefore, a subject on which the judgment of arbitrators could be invoked.

3. That the subject-matter is one between Great Britain and Venezuela, so that the good offices of the United States are not regarded as essential to a settlement, as it is not understood that the United States has assumed a protectorate over Venezuela or has other interests than those of a friendly power.

In plain English, Great Britain does not, under any circumstances, propose to arbitrate any claim to the vast region east of the "Schomburgk line," and advises the United States to mind its own business in the matter. The truth is that the whole region between the Orinoco and the Essequibo is marked with British "boundary lines," dated 1814, 1840, 1843, 1844, 1881, 1886, 1890, 1893 and 1895, no two agreeing, and not one of them having any better excuse for existence than the demands of greed and the taste and fancy of the diplomatic surveyor or engineer who drew it.

As the controversy now stands Venezuela is ready and anxious to enter into a treaty with Great Britain, whereby the entire boundary controversy will be submitted to settlement by a court of arbitration, without any reservations whatever, while, on the other hand, Great Britain has declined to consider any proposition for arbitration which does not admit that all the territory east of the Schomburgk line is British territory. Venezuela will not concede this advantage to the British, as her contention is that her title to the territory east of the Schomburgk is as good as to that west of that line. Contending, as she does, that the territory east of the Schomburgk line, clear to the Essequibo river, is part of Venezuela, that government holds that it is powerless to concede any part of it to Great Britain until a duly constituted court of arbitration shall decide that it never properly belonged to the Venezuelan government.

MEN OF THE YEAR.

JUDSON HARMON.

Judson Harmon, the attorney-general appointed to succeed Mr. Olney, is a resident of Cincinnati; was born in Anderson township Feb. 3, 1846. His father, the Rev. B. F. Harmon, was a baptist minister well known throughout the Ohio valley. Mr. Harmon was graduated at Dennison university at Granville, O., in 1866, and began the practice of law in 1869. He was a republican till 1872, when he Greeleyized. He was elected superior judge in 1878, re-elected in 1883, and when ex-Gov. George Hoadly went to New York in 1887 Judge Harmon resigned from the bench to become the head of the firm of Harmon, Colston, Goldsmith & Headly, which represents several railways and other large corporations, and with which firm he will continue his connection. When Judge Harmon resigned in 1887 Gov. Foraker appointed Judge William Taft, now United States circuit judge and formerly solicitor-general, to the vacancy. Mrs. Harmon is the daughter of the late Dr. Scobey of Hamilton. They have three daughters—Mrs. Edman Wright, Jr., of Philadelphia, Miss Elizabeth, and Marjorie, the youngest of the family, who is 14 years old.

Ex-Judge Harmon has been a stanch democrat, though he has not taken a very active part in politics. He has devoted himself chiefly to the practice of law, but he has kept well posted about current events in the political world. He has affiliated with the Cleveland (or administration) wing of the democratic party. In Ohio politics he has been a friend of ex-Gov. Campbell, and in local affairs he has always been opposed to "the gang."

WILLIAM L. WILSON.

William L. Wilson, postmaster-general, was born in Jefferson county, West Virginia, May 3, 1843; was educated at Charlestown academy and at Columbian college, District of Columbia, where he was graduated in 1860, and at the University of Virginia; served in the confederate army; was for several years after the war professor in Columbian college, but on the overthrow of the lawyers' test oath in West Virginia resigned and entered upon the practice of law at Charlestown; was a delegate in 1880 to the national democratic convention at Cincinnati, and was chosen an elector for the state-at-large on the Hancock ticket; was permanent president of the national demo-

cratic convention at Chicago in 1892; was elected president of the West Virginia university in 1882 and entered upon the office Sept. 6, but on Sept. 20 was nominated as the democratic candidate for the XLVIIIth congress and elected; resigned the presidency of the State university in June, 1883; received the degree of LL.D. from Columbian university in 1883 and from Hampden-Sidney college, Virginia, in 1886; was appointed a regent of the Smithsonian Institution for two years in 1884, and reappointed in 1886; was elected to the XLVIIIth, XLIXth, Lth, LIst, LIId and LIIId congresses, but was defeated for election to the LIVth. Upon the resignation of Mr. Bissell of the office of postmaster-general Mr. Wilson was appointed as his successor.

MATT W. RANSOM.

Matt W. Ransom of North Carolina, minister to Mexico, was born in Warren county, North Carolina, in 1826, received an academic education; was graduated from the University of North Carolina in 1847; studied law and was admitted to the bar on graduating in 1847; is a lawyer and planter; was elected attorney-general of North Carolina in 1852 and resigned in 1855; was a member of the legislature of North Carolina in 1858, 1859 and 1860; was a peace commissioner from the state of North Carolina to the congress of southern states at Montgomery, Ala., in 1861; entered the confederate army, serving as lieutenant-colonel, colonel, brigadier-general and major-general and surrendered at Appomattox; was elected to the United States senate as a democrat in January, 1872, took his seat April 24, 1872, and was re-elected in 1876, 1883 and 1889. His term of service expired March 3, 1895, and in February he was appointed minister to Mexico to succeed Mr. Gray, deceased.

GEN. NELSON A. MILES.

Maj.-Gen. Nelson A. Miles, who has been in command of the department of the east, succeeded in October, 1895, Gen. Schofield in the command of the army, but without change of rank. Gen. Miles was born at Westminster, Mass., in 1839. He is not a West Point graduate, and because of this fact there has been, it is said, some opposition, at least among his brother officers, to his appointment to the command of the army. In 1861 he went out with a regiment of Massachusetts volunteers with the rank of captain. He was rapidly promoted, reaching the rank of brigadier-general of volunteers in 1864 and major-general of volunteers early in 1865. At the close of the war he entered the regular army and distinguished himself in numerous campaigns against the Indians, especially in the northwest and in capturing Geronimo and his Apache band in Arizona in 1886. He was made a brigadier-general in the regular army in 1880, and a major-general in 1890. He was in command of the department of the Missouri with headquarters at Chicago during the great strike of 1894, where he rendered most efficient service. Near the close of the year he was transferred to the department of the east, with headquarters at New York.

WILLIAM P. CRAIGHILL.

William Price Craighill, chief of engineers, U. S. A., was born in Charlestown, Jefferson county, W. Va., on the 1st of July, 1833, and was graduated at West Point, second in a class of fifty-two, in 1853. He was assigned to the engineer corps and superintended the building of Fort Delaware. For some years he was an instructor at the Military academy, but in 1863 he was engaged in the construction of defenses at Pittsburg, which was threatened by Morgan and other raiders. In March, 1865, he was brevetted lieutenant-colonel for his services in the defense of Cumberland gap, and a little later he served on the board appointed to superintend the defenses at New York. After this he was engaged in similar work at Baltimore. Since then he has been employed in many important works, including the improvement of the Potomac, Appomattox and Delaware rivers. In 1877 he was sent to Europe to examine movable dams and other works in France and Great Britain. Col. Craighill has compiled an "Army Officers' Pocket Companion," translated Dufour's "Cours de Tactiques," and, in collaboration with Capt. Mendell, Gen. Jomini's "Precis de l'Art de la Guerre."

GEN. G. N. LIEBER.

Gen. Guido Norman Lieber, judge-advocate general, U. S. A., was born March 21, 1837, in Columbia, S. C., where his father was serving as professor of history and political economy in the University of South Carolina. At this institution Gen. Lieber was graduated in 1856, and at the Harvard law school three years later. After a practice of two years at the New York bar he entered the army, May 14, 1861, receiving the brevet of captain for gallantry at the battle of Gaines' Mill, and the full grade later on, serving meanwhile as adjutant of his regiment, the 11th infantry. He saw war service also at Yorktown, Malvern Hill, the second battle of Bull Run and in the Teche and Red river campaigns of Louisiana, gaining a second brevet, that of major, for gallantry, and at the close of the war the brevet of lieutenant-colonel for "faithful and meritorious service during the war." Nov. 13, 1862, he was appointed major and judge advocate of volunteer service, serving as such on the staff of Gen. Banks.

Feb. 25, 1867, Maj. Lieber was transferred from the infantry to the judge-advocate general's department of the army, being on duty as professor of law at the United States Military academy from 1878 until his transfer to the bureau of military justice, Washington, in 1882. July 5, 1884, he was promoted to colonel and assistant judge-advocate general. His final promotion to the highest grade in his corps makes no change in his duties, as he has been at the head of the corps since the suspension of its chief, Gen. Swaim.

GEORGE C. PERKINS.

George Clement Perkins, senator from California, was born at Kennebunkport, Me., in 1839 and was reared on a farm, with limited educational advantages. At the age of 12 he went to sea as a cabin boy and followed the sea as sailor for several years. In 1855 he shipped "before the mast" for California, where he arrived in the autumn of that year and went on foot to Oroville and became a porter in a store. Subsequently he became a partner in the business and was very successful. He went into banking, milling, mining and sheep-raising, and in 1883 was elected to the state senate. He became largely interested in the Pacific Coast Steamship company. He was elected president of the merchants' exchange of San Francisco and in 1879 was elected governor of California, serving until 1883. Upon the death of Mr. Stanford he was elected his successor. His term will expire March 4, 1897.

GEORGE L. SHOUP.

George L. Shoup, senator from Idaho, was born in Kittanning, Armstrong county, Pa., June 15, 1836. He was educated in the public schools of Freeport and Slate Lick, and moved with his father to Illinois in June, 1852. He engaged in farming and stock-raising near Galesburg until 1858, when he removed to Colorado. Here he engaged in mining and mercantile business until 1861, and in September enlisted in Capt. Backus' independent com-

pany of scouts, being soon after commissioned second lieutenant. During the autumn and winter of 1861 he was engaged in scouting along the base of the Rocky mountains. He was ordered to Fort Union, New Mexico, in the early part of 1862, and was kept on scouting duty on the Canadian, Pecos and Red rivers until the spring of 1863. During this time he was promoted to a first lieutenancy. He was then ordered to the Arkansas river. He had been assigned in 1862 to the 2d Colorado regiment of volunteer infantry, but was retained on duty in the cavalry service, being assigned to the 1st Colorado regiment of cavalry in May, 1863.

In 1864 Mr. Shoup was elected to the constitutional convention to prepare a constitution for the proposed state of Colorado and obtained a leave of absence for thirty days to serve as a member. After performing this service he returned to active duty. He was commissioned colonel of the 3d Colorado cavalry in September, 1864, and was mustered out at Denver with the regiment at the expiration of his term of service.

Mr. Shoup engaged in the mercantile business in Virginia City, Mont., in 1866, and during the same year established a business at Salmon City, Idaho. Since 1866 he has been engaged in mining, stock-raising, mercantile and other business in Idaho. He was a member of the territorial legislature during the VIIIth and Xth sessions, was a delegate to the national republican convention in 1880, was a member of the republican national committee from 1880 to 1884, was United States commissioner for Idaho at the world's cotton centennial exposition at New Orleans, La., in 1884-5, and was again placed on the republican committee in 1888 and re-elected in 1892. Mr. Shoup was appointed governor of Idaho territory March, 1889, which position he held until elected governor of the state of Idaho Oct. 1, 1890. He was elected to the United States senate as a republican Dec. 18, 1890, and took his seat Dec. 29, 1890. His term will expire March 4, 1901.

LUCIEN BAKER.

Lucien Baker, senator from Kansas, was, when elected, a member of the state senate from the 3d senatorial district. He was born in Fulton county, Ohio, and is 46 years of age, more than twenty-five years of which have been passed in Kansas. Of methodist parentage, Mr. Baker secured a good general education and adopted the law as his profession. He went to Kansas from Michigan in 1869 and located at Leavenworth, where he has since resided. As a lawyer Mr. Baker was very successful and had but little time to devote to practical politics. He never held any office until he was elected to the state senate except that of city attorney for Leavenworth. But he was so well known as an ardent and patriotic republican that when he was nominated for the state senate no fears were felt by his friends as to the result. His majority over the populist candidate was over 1,500 and over the democratic nominee more than 2,000. By virtue of his ability as a logician and clear-headed thinker he was at once recognized as one of the republican leaders of the state senate. His term will expire March 4, 1899.

JULIUS C. BURROWS.

Julius Cæsar Burrows of Kalamazoo, senator from Michigan, was born at North East, Erie county, Pa., Jan. 9, 1837; received a common-school and academic education; by profession a lawyer; was an officer in the union army, 1862-4; prosecuting attorney of Kalamazoo county, 1865-7; appointed supervisor of internal revenue for the states of Michigan and Wisconsin in 1867, but declined the office; elected a representative to the XLIIId, XLVIth and XLVIIth congresses; appointed solicitor of the United States treasury department by President Arthur in 1884, but declined the office; elected a delegate-at-large from Michigan to the national republican convention at Chicago in 1884; elected to the XLIXth, Lth and LIst congresses; twice elected speaker pro tem. of the house of representatives during the LIst congress and was elected to the LIId congress and re-elected to the LIIId congress as a republican, receiving 21,287 votes, against 15,802 votes for Daniel Strange, democrat; 2,510 votes for P. T. Butler, prohibitionist, and 2,898 votes for L. C. Lockwood, people's. He was elected to succeed Senator McMillan and his term will expire March 4, 1901.

KNUTE NELSON.

Knute Nelson, senator from Minnesota, was born in the parish of Voss, near Bergen, Norway, Feb. 2, 1843. His father died while he was almost an infant, and his mother emigrated to this country, making her home in Chicago. They went there in 1849, remaining until 1850, when they moved to Wisconsin. Young Knute remained in the Badger state until 1871, when he moved to Douglas county, Minnesota, which has since been his home.

When the civil war broke out he entered the service as a private in company B of the 4th Wisconsin, and became a non-commissioned officer. He served over three years, and was taken prisoner while wounded at the siege of Port Hudson, La., in 1863. After the war he studied law and was admitted to the bar in Dane county, Wisconsin, in 1867, and was sent to the legislature as a member of the assembly in 1868 and 1869. In 1871, as stated, he moved to Alexandria, Minn., and a year later became county attorney of Douglas county.

He served in the state senate from 1875 to 1878, inclusive, and in 1880 was one of the presidental electors. Later than that he was one of the board of regents of the State university. A greater step was taken, however, when he was elected to the XLVIIIth congress from the old 5th district, defeating all comers, and he was subsequently elected to the XLIXth and Lth congresses by equally handsome figures over his opponents of all parties. In July, 1892, he was nominated by acclamation by the republican state convention for governor, to which high office he was elected by a plurality of nearly 15,000, and in 1894 he was renominated and was re-elected by a plurality of 60,000. His term will expire March 4, 1901.

THOMAS H. CARTER.

Thomas H. Carter, senator from Montana, was born in Scioto county, Ohio, Oct. 30, 1854, and removed with his parents in his 5th year to Illinois, locating at Pana, where he was educated in the public schools. His father was a farmer, and young Henry was taught to do all the work that is incidental to carrying on a farm in the central part of Illinois. At 20 years of age he studied law and was admitted to practice. In 1882 he went to Helena, where he has constantly engaged in practicing law. He was elected delegate to the XLth congress as a republican from the territory of Montana. He was nominated by the republicans in their first state convention and elected to the Lth congress.

Mr. Carter gained a national reputation in the LIst congress by his indefatigable work upon the floor of the house. He was chosen secretary of the republican national congressional committee for the campaign of 1900. In that year Mr. Carter was chosen by his party again as its candidate for congress, but was de-

feated by W. W. Dixon, democrat. In the spring of 1891, Mr. Carter was appointed by President Harrison to be commissioner of the general land office. In 1892 he was selected as chairman of the republican national committee, which position he still holds.

Mr. Carter ranks high throughout the entire northwest as a lawyer. He is regarded as one of the ablest trial lawyers in the country.

Mr. Carter is a member of the catholic church. It was on this point that the American Protective association made such great opposition to Mr. Carter's election. After it was announced through the press that Mr. Carter had been nominated the association undertook to prevent his election, as it was said that a majority of the members of the legislature that were republican belonged to this order. When the hour for election was called, however, it passed off in a quiet, orderly way, every member of the republican party casting his vote for Mr. Carter.

LEE MANTLE.

Lee Mantle, senator from Montana, was born in England Dec. 13, 1851, and came to this country when about 9 years of age. In 1868 he went to Utah and got a job driving team for a contractor who was furnishing railroad ties to the new Union Pacific railroad. When this work was completed in 1869 young Mantle found himself without work. He packed his blankets, however, and walked 125 miles to Malad City. There he got a job driving an ox team, hauling salt from the salt works of eastern Idaho to Virginia City and Boise. On one of his trips he chanced to meet a telegraph operator, with whom he arranged for instructions in telegraphy. He paid for this in labor, by keeping the lines in repair. He was quick to learn, prompt and reliable, and was soon promoted to the position of general repairer for the Western Union telegraph lines between Ogden and Green River. From this position Mr. Mantle was given the agency of the stage line between Corinne, Utah, and Helena, Mont. He continued his connection with stage and telegraph lines in that locality until 1877, when he moved to Butte City as agent of the Wells-Fargo express company. Two years later he was placed in charge of the first telegraph office opened in Butte and also opened the first insurance office there. In 1880 he took an active part in local politics, helped to incorporate the city and was one of Butte's first aldermen.

Soon after this Mr. Mantle organized the Inter-Mountain Publishing company and began the publication of the Butte Daily Inter-Mountain. He has held the position of manager of that paper ever since its publication and through it has done a great deal of work for the republican party.

In 1882 Mr. Mantle was elected to the lower house of the territorial legislature and in 1884 was one of Montana's delegates to the republican national convention. In 1886 he was again elected to the legislature. The following year, when the people of Montana organized a Mineral Land association to take steps to fight the Northern Pacific railroad company's efforts to secure large grants of valuable mineral lands, Mr. Mantle was elected president of this association and took an active part in the fight that saved the mineral lands from falling into the hands of the railroad.

In 1888 Mr. Mantle was elected for the third time to represent his county in the legislature, and in that year he nominated T. H. Carter, his present colleague, for congress in the republican convention. After Montana's admission as a state Mr. Mantle was a candidate for the United States senate before the first state legislature in 1889, but was defeated in the caucus by two votes by Senator T. C. Power.

JOHN M. THURSTON.

John M. Thurston, United States senator from Nebraska, has been a resident of three states during his 48 years of life. He was born in Montpelier, Vt., Aug. 21, 1847, and at the age of 7 accompanied his parents to their new home in Madison, Wis. He was educated in Madison, Beaver Dam and at Wayland college and was admitted to the bar in 1869.

At the age of 22 he removed to Omaha, hung out his shingle and began his by no means short career as a brieflless barrister. Omaha was then a city of about 15,000 inhabitants and contained more legal talent to the square inch than any other city of its size in the country. In the face of a most discouraging paucity of clients the young lawyer persevered in his attempts to build up a practice. He attended strictly to what business he had during the day and slept in the office at night, so that clients rarely tried his office door in vain. His larder was usually well supplied, however, for he would buy a box of crackers and a cheese and live on them till they were gone.

In 1872 he entered politics and was elected councilman. Two years later he was city attorney and in 1875 a member of the legislature. In 1880 he was a presidental elector and carried the vote of Nebraska to Washington to be counted for Garfield. He was chairman of the Nebraska delegation in the republican national convention of 1884 and seconded the nomination of John A. Logan. In 1888 he was temporary chairman of the republican national convention, and his speeches in these two great gatherings gave him wide fame as one of the most graceful, eloquent and convincing orators in the republican party.

The same year he was appointed to the office of general solicitor of the Union Pacific railroad at a salary of about $12.000 a year, which he resigned in favor of a salary of $5,000 a year (and mileage) when he entered the United States senate. His term will expire March 4, 1901.

MARION BUTLER.

Marion Butler, senator from North Carolina, was born in 1863 and is the youngest man in the senate. His great-grandfather, James Butler, came over from England and settled in Sampson county, North Carolina, in 1760, and was a soldier in the revolutionary war. One hundred years later his father, Wiley Butler, entered the confederate army and at the close of the four years' struggle the new senator was a child in his mother's arms. The family farm was distant from schools, so his mother taught him all that he learned until he entered the Salem high school to prepare for the University of North Carolina, where he was graduated in 1885. Then he studied law, became principal of an academy in a county adjoining his home, and there, in 1888, made the acquaintance of the state organizer of the Farmers' alliance, whose ideas he readily accepted and a week later became president of a county lodge. Then he bought a newspaper, the Clinton Caucasian, a small country weekly which shortly after was selected as the state organ of the alliance. This editorial prominence brought him into public notice and he was elected to the state senate, where he became the leader of the anti-monopoly faction and succeeded in securing the passage of the present law for the regulation of railroads.

In 1891 he was made president of the State Farmers' alliance and in 1893 was promoted to the presidency of the national organization before he was 30 years old. Then he commenced his fight for the United States senate. His ability as an organizer and a politician

accomplished a fusion between the populists and the republicans in his state, with the understanding that the two parties, if successful, should divide the offices evenly. This resulted in a fusion majority of over 30,000 and the gratification of his ambition was Mr. Butler's reward. He married Florence Livingston Faison of Faison, N. C., a member of one of the old aristocratic families of the state. The parents of the bride opposed the marriage because Mr. Butler's social position did not equal that of their daughter, and the course of true love did not run smooth. But the young woman had her way about it and she goes to Washington as the youngest member of the senatorial circle. His term will expire March 4, 1901.

JETER C. PRITCHARD.

Jeter C. Pritchard, senator from North Carolina, was born in 1843 in Tennessee. Mr. Pritchard is a native of East Tennessee, but has spent most of his days in the Old North state. He comes from the extreme southwest corner of North Carolina, his home being on the crest of the mountains, about twenty-five miles from Asheville. He is a finely formed man, about six feet tall, and has a manly and attractive manner. He was a mere boy at the outbreak of the war. His father was a union man, but was drafted into the confederate army. Senator Pritchard's last recollection of him is seeing him mounted on a horse, his feet and hands bound, on his way to the front, where he died, an unwilling conscript in a cause in which his sympathies were not enlisted. The new senator is a stanch republican, having been actively engaged in every campaign in his state since he was 18 years old. His term will expire March 4, 1897.

GEORGE W. McBRIDE.

George Washington McBride, senator from Oregon, was born in Yamhill, Ore., in 1854. He is a son of Dr. James McBride, who was well known as one of the earliest and sturdiest pioneers of the state. McBride was educated in the common schools and at Willamette university, Salem. In 1867 his parents left Yamhill county and located at St. Helen, Columbia county, at which place he has made his home ever since. In 1882 he was elected to the Oregon house of representatives and was subsequently chosen speaker of that body. In 1886 Mr. McBride was nominated by the republicans for secretary of state and was elected. His popularity is attested by the fact that two principal nominees on the ticket with him—governor and treasurer—were defeated. Mr. McBride performed the duties of his office so satisfactorily that he was renominated by acclamation in 1890 and re-elected by a handsome majority. He served out the full term and retired the first of the year, 1895, to give way to his successor. His term will expire March 4, 1901.

R. F. PETTIGREW.

Richard Franklin Pettigrew, senator from South Dakota, was born at Ludlow, Vt., July, 1848; removed with his parents to Evansville, Rock county, Wis., in 1854; was prepared for college at the Evansville academy and entered Beloit college in 1866, where he remained two years; was a member of the law class of 1870, University of Wisconsin; went to Dakota in July, 1869, in the employ of a United States deputy surveyor as a laborer; located in Sioux Falls, where he engaged in the surveying and real-estate business; opened a law office in 1872 and has been in the practice of his profession since; was elected to the Dakota legislature as a member of the council in 1877, and re-elected in 1879; was elected to the XLVIIth congress as delegate from Dakota territory; was elected to the territorial council in 1884-5; was a member of the South Dakota constitutional convention of 1883; chairman of the committee on public indebtedness, and framed the present provisions of the constitution on that subject; was elected United States senator Oct. 16, 1889, under the provisions of the act of congress admitting South Dakota into the union; was re-elected in 1895. His term will expire March 4, 1901.

JOHN L. WILSON.

John L. Wilson, senator from Washington, is only 44 years of age. He was born in Crawfordsville, Ind.; was graduated from Wabash college in 1874; was a representative in the Indiana legislature from Montgomery county in 1880, and in 1881 was appointed to a clerkship in the pension office at Washington. Being a man of nervous temperament, full of life, energy and ambition, he did not like the routine and confinement, so he resigned his position and went to Spokane Falls. Within a year President Arthur appointed him receiver of public moneys at Spokane, and with that office as a basis he went into politics. In 1884 he was chosen a delegate to the republican national convention. In 1890 he took his seat in congress as the first representative from the new state of Washington, and now is elected to the senate. His term of office will expire March 4, 1899.

STEPHEN B. ELKINS.

Stephen B. Elkins, senator from West Virginia, was born Sept. 26, 1841, in Perry county, Ohio, the son of a farmer. In early life his family removed to Missouri, where he was graduated from the State university in 1859. He then studied law and was admitted to the bar in 1864. He shortly afterward removed to New Mexico, and during the first year of his residence there was elected to the legislature. He was shortly afterward appointed by President Johnson to the position of United States attorney for the territory, an office which he held until 1872, when he was elected a member of the XLIIId congress, and was re-elected in 1874. While in congress he married a daughter of Senator Henry G. Davis of West Virginia. They have several children. Mr. Elkins was appointed secretary of war by President Harrison, and since the close of Harrison's term has been devoting his attention to his railroad and coal interests. The republican victory in West Virginia in 1894 was largely due to the energy and ability which he displayed in conducting the campaign. He has been successful in speculation in lands and railroad stocks in New Mexico and West Virginia and is several times a millionaire. His term will expire March 4, 1901.

CLARENCE D. CLARK.

Clarence D. Clark, senator from Wyoming, is only 43 years of age and looks younger. He is a man of muscular development and great energy. Born at Sandy Creek, N. Y., in 1852, he went to Iowa when a lad with his parents, and after receiving an education in the common schools and graduating from the Iowa State university he read law and was admitted to the bar in 1874. Six years later he removed to Evanston, Wyo., and has there been engaged in the practice of his profession ever since. Three terms he served as prosecuting attorney and declined an appointment as associate justice of the Supreme court of that territory, which was tendered him by President Harrison. He was the first representative elected to congress from Wyoming after its admission as a state; took his seat in the LIst congress and was re-elected to the LIId congress.

FRANCIS E. WARREN.

Francis E. Warren, senator from Wyoming, was born in Hinsdale, Mass., June 20, 1844; received a common-school and academic education; enlisted in 1862 in the 49th Massachusetts regiment and served as private and non-commissioned officer in that regiment until it was mustered out of the service; was afterward captain in the Massachusetts militia; was engaged in farming and stock-raising in Massachusetts until early in 1868, when he removed to Wyoming (then a part of Dakota); has also engaged in mercantile, live-stock and lighting business; was president of the council, Wyoming legislature, in 1873, and a member of the council in 1884; was mayor of Cheyenne and served as treasurer of Wyoming; was a delegate to the national republican convention at Chicago in 1888; was appointed governor of Wyoming by President Arthur and removed by President Cleveland; was again appointed governor of Wyoming by President Harrison and served till the territory was admitted as a state, when he was elected governor, Sept. 11, 1890; was elected to the United States senate as a republican, Nov. 18, 1890, and took his seat Dec. 1, 1890. His term of service expired March 3, 1893. In 1895 he was re-elected for the term expiring March 4, 1901.

IVAN N. WALKER.

Col. Ivan N. Walker of Indianapolis, commander-in-chief of the G. A. R., was born in Rush county, Indiana, in 1839. At the breaking out of the war, at the age of 21, he was holding an important office, which he resigned to raise a company for the 73d Indiana volunteers, of which he was chosen captain. He was with his regiment in all its engagements—Richmond, Perryville and Stone River—and for gallant conduct on that hotly contested field won the rank of major and was soon after promoted to lieutenant-colonel in March, 1863, and on the death of the colonel, in May following, became commander of the regiment. For more than a year he endured all the horrors of Libby prison, having been captured in a raid into the enemy's country, and escaped through the historic tunnel in February, 1864. Returning to his regiment, he rendered most important service in the army of the Cumberland in protecting the line of supplies between Stevenson and Decatur, on the Memphis & Charleston railroad and Tennessee river, during the advance on Atlanta. At the battle of Nashville he rendered valuable service as aid, and received the personal thanks of Gen. Thomas. He became a member of the G. A. R. in 1867, and, on the reorganization of the department of Indiana, served as commander of George H. Thomas post, the largest post in the department. He was assistant adjutant-general of the department in 1887. In 1891, declining a fifth term, he was chosen department commander. During his four years as executive officer the membership of the department was increased more than 6,000. His work in the national encampment and as chairman of the national pension committee was of inestimable value to the comradeship everywhere. He possesses first-class executive ability and is in every way fitted to fill the position of commander-in-chief. Col. Walker is state tax commissioner of Indiana.

JOHN L. PEAKE.

John L. Peake, appointed minister to Switzerland, went to Missouri from Kentucky in 1868. He was born in Scott county, Kentucky, in 1839, and was graduated from the law school at Louisville in 1860. He engaged in the practice of law and in the insurance and real-estate business, acquiring the nucleus of a fortune early in life. His popularity as a criminal lawyer won for him an enviable reputation throughout western Missouri. In 1872 he formed a partnership with Caldwell Yeaman, late member of the state judiciary of Colorado, which continued until 1876. In 1877 Mr. Peake was elected prosecuting attorney of Jackson county, Missouri, retaining the office three terms. Upon his retirement from this—the only political office he ever held—he engaged in the private practice of law. He is a leading member of the baptist church and a Sunday school worker of national reputation.

THE GOVERNORS ELECTED IN 1895.

FRANCIS MARION DRAKE, the successful republican candidate for governor of Iowa, was born in Rushville, Schuyler county, Ill., Dec. 30, 1820. In 1859 he removed to Iowa, where he has since made his home. He served with distinction during the war and was wounded at Mark's Mills, Ark., where he was left for dead. He was brevetted brigadier-general in February, 1865. Since the war Gen. Drake has been engaged in railroad projects. He was the first president of the Missouri, Iowa & Nebraska railway. He founded and endowed Drake university at Des Moines. From boyhood the life of Gen. Drake has been an active one and useful to the community in which he lives as well as to the state.

LLOYD LOWNDES, elected on the republican ticket governor of Maryland, was born in Clarksburg, Va., in 1845. He was educated at Washington college, Pennsylvania, Allegheny college, Meadville, Pa. and the University of Pennsylvania. He began the practice of law in Cumberland, the principal city of western Maryland and the center of its coal territory. In 1872 he was elected on the republican ticket to the XLIIId congress, reversing the usual democratic majority in the district. In 1874 he was renominated, but was defeated by 50 votes. Since then he has refused political honors. He is either president or director of about twenty corporations and is worth four or five millions.

FREDERICK THOMAS GREENHALGE, for a third time elected by the republicans governor of Massachusetts, is said to be the shrewdest, wittiest and most popular of all the republican politicians in Massachusetts. Mr. Greenhalge is an Englishman by birth, but came to this country when in early childhood and was educated in the public schools at Lowell and at Harvard university. He has held a great many public offices, has been twice elected mayor of Lowell, was city solicitor in 1888, and representative to the legislature in 1885. He was subsequently elected to congress. In 1893 Mr. Greenhalge was first elected governor of Massachusetts and in 1894 was re-elected by a substantial majority.

ANSELM JOSEPH MCLAURIN, chosen governor by the democrats of Mississippi, was born in Brandon, Rankin county, Mississippi, in 1848. He attended only such schools as the backwoods afforded, and afterward spent a short time at the Summerville (Miss.) Institute. He was admitted to the bar in 1868, at once assumed a front rank in his profession, and is to-day considered one of the finest criminal lawyers in the state. In 1871 he was elected district attorney and served four years. Mr. McLaurin was a member of the legislature of 1879 and of the constitutional convention of 1890. He was elected to succeed Senator Walthall for his unexpired term of thirteen months, when Mr. Walthall resigned in January, 1894.

EX-SENATOR JOHN W. GRIGGS, chosen governor of New Jersey on the republican ticket, was born in Newton, Sussex county, N. J., July 10, 1849. He was graduated from Lafayette college, Easton, Pa., and was subsequently admitted to the bar. He was elected to the assembly from one of the Paterson districts in 1875 and 1876. The following year he was renominated and defeated. In 1879 he was appointed city counsel of Paterson, an office he filled until 1882, when he was elected to the senate. Three years later he was reelected to the senate and in 1886 he was president of that body. Since retiring from the halls of legislation Mr. Griggs has devoted his energies to the practice of law.

ASA S. BUSHNELL, of Springfield, O., who succeeds William McKinley as the republican governor of that state, was born in Oneida county, New York, in 1834, and went to Springfield in 1851, where for three years he was a clerk in a dry-goods store. In 1867 he became a partner in the firm of Warder, Mitchell & Co., manufacturers of reapers, and has acquired a large fortune. During the war Gen. Bushnell raised a company and served as its captain in the Shenandoah valley. Gen. Bushnell has been chairman of the republican state committee and is extremely popular both in his own city and with the republicans of Ohio. In 1886 he was appointed quartermaster-general of Ohio and served four years.

HEBER M. WELLS, governor-elect of Utah, was born in Salt Lake City, Aug. 11, 1859. In 1882 Mr. Wells was elected recorder of Salt Lake City, which office he filled until 1890. In 1887 he was secretary of the sixth constitutional convention of Utah, and in 1892 received the republican nomination for mayor of Salt Lake City, but was defeated in the election by the liberal candidate. He has since worked untiringly for republican success in Utah. Mr. Wells has been cashier of the State Bank of Utah since the expiration of his term as city recorder in 1890. He has achieved some notoriety by his exploits on the amateur stage, and efforts have been made to induce him to go on the stage as a professional.

WILLIAM O'CONNELL BRADLEY, governor-elect of Kentucky, is a citizen of Lancaster, Garrard county, Ky., and was born March 18, 1847. He enlisted in the federal army at the age of 14, and three years later was admitted to the bar by a special act of the legislature. In 1870 he was elected prosecuting attorney, and in 1872 and 1876 made the race for congress, but was defeated. In 1880 he was a delegate-at-large to the Chicago convention and seconded the nomination of Grant. He was again a delegate in 1884 and a member of the national committee. President Arthur selected him to aid in prosecuting the star-route thieves, but a difference with the attorney-general caused him to give up the appointment. In 1887 he ran for governor against Gen. Buckner and cut down the democratic majority very largely, running about 3,000 votes ahead of his ticket. He was at the head of the Kentucky delegation to the national republican conventions of 1888 and 1892.

THE CUBAN REVOLT.

The island of Cuba, properly known as "the gem of the Antilles," has had a troublesome history almost from the day of its discovery by Columbus in October, 1492. Spain claimed and held the island by right of discovery, but it was not until 1511 that the Spaniards colonized it. From the advent of the Spaniards the extreme cruelty and injustice was inaugurated that has characterized their treatment of the people of Cuba ever since. Under Hernando the government was so rigorous that it resulted not only in greatly impairing the prosperity of the island but in the total extinction of the Indian population in 1533. In 1534, and again in 1554, Havana was destroyed by the French, but it was rebuilt, and in 1584 the city was so strongly fortified as to make it exempt from attacks by sea. In 1624 the Dutch captured the island, but only to surrender it again to Spain. For half a century following the prosperity of the island suffered from repeated incursions of filibusters. In 1762 Havana was taken by the English, but the year following it was surrendered to Spain in exchange for Florida. The commercial relations between Spain and Cuba grew stronger and more close, and the island became the center of the slave trade for all Spanish South America, and remained so until 1845, when the importation of slaves was forbidden. Through all its history, up to 1829, Cuba was loyal to the Spanish crown, and poured, with the utmost generosity and willingness, its wealth into the treasury of the mother country. As an evidence of this it may be said that in July, 1808, when the French had deposed the royal family of Spain, the Cuban cabildo met at once and every member took a solemn oath to preserve the island for the deposed sovereign, and war, without truce, was declared against Napoleon. Two years later, when Mexico threw off the Spanish yoke, Cuba remained loyal to the mother country. Upon the re-establishment of Spanish dominion over the island was inaugurated the form of government by governors or captains-general appointed by the crown, which has been continued to the present time. Under this form of government the last remnants of political, civil and religious liberty have been gradually destroyed, until for the last quarter-century the inhabitants of the island have been excluded from all public office and from all the affairs of the island; taxes have been multiplied, and the people have been robbed and plundered to supply the Spanish treasury with funds for the maintenance of the home government, its army and navy. Under such conditions discontent was created and spread rapidly. In 1829 this discontent showed itself in the uprising known as the conspiracy of the "Black Eagle." In 1844 there was an insurrection of the blacks. The first serious revolutionary attempt, however, was that of Narciso Lopez in 1848, a year red with revolutions and revolutionary movements. In May, 1850, he landed in the island with 600 men from the United States. He captured the city of Cardenas, but failed to receive support and withdrew. Again in August, 1851, he gathered a band of several hundred Kentuckians and made a descent upon the north coast. He was pursued by the Spaniards from place to place, his forces dispersed and 700 taken prisoners. Then began that system of horrible cruelty which Spain has since persistently followed in the treatment of Cuban insurgents. Lopez, Col. Crittenden and this great body of prisoners were all put to death by the garrote, their dead bodies horribly mutilated and portions of them openly sold in the city of Havana as relics. Soon after this abortive attempt the so-called

reformist party arose. It endeavored to secure Cuban rights without impairing Spanish interests. It finally succeeded in securing from the crown an official inquiry as to needed reforms in Cuba. The results of that inquiry, however, revealed sources of revenue unknown up to that time, and the only thing that followed was a new system of taxation more extensive and more oppressive than those which had preceded it.

The tyranny of Spain in Cuba excited the warmest sympathy for the Cubans from the people of the United States, and this, added to a desire at the south to acquire more slave territory, led to attempts to purchase the island by our government. In 1848 President Polk offered Spain $1,000,000 for the island, which was refused. In October, 1854, three United States ministers to various European courts signed what was known as the Ostend manifesto, which declared in case of Spain's refusal to sell the island of Cuba to the United States that our government had the right to take it by conquest and annex it to the union. The signers of that manifesto were Buchanan, Soule and Mason. In 1858 a proposal was made in the United States senate to offer Spain $30,000,000 for the island, but it was withdrawn after being debated.

In 1868 the Spanish revolution led to a rising of the friends of Cuban independence on the island and ten years' insurrection was inaugurated. The leader of that movement was Carlos Manuel Cespedes, who took the field with a force composed of his own liberated slaves. He soon had an army of 12,000 men. The uprising took place at Yara, in the district of Bayamo. Oct. 10 of that year in the city of Manzanillo independence was declared and a provisional republic established. Cespedes was elected president, and among the members of the first congress was Tomas Estrada Palma, second president of the provisional republic. Among the revolutionary leaders with Cespedes, besides Modesto Diaz and Ignacio Agramonte, were Maceo, Maximo Gomez, Carlos Roloff and Serafin Sanchez. These last names will be recognized as those of men now at the head of the actual revolutionary movement.

The whole eastern end of the island rapidly came into possession of the new republic. Oct. 18 Bayamo was captured. Ten days later Holguin joined the movement and early in November a strong Spanish force from Santiago de Cuba was signally defeated. A number of the Spanish-American republics at once accorded the revolutionists belligerent rights. For eight years Spain poured thousands of men and millions of money into the island in an unavailing attempt to crush out the insurrection. In November, 1876, in a debate in the Spanish cortes on the affairs of Cuba, it was stated that 145,000 soldiers had been sent to Cuba, and of them not enough remained or had returned to make a single regiment. In that year Spain determined to make a last gigantic effort, and Gen. Martinez Campos, the "Strong Man of Spain," was sent to Cuba with 36,000 fresh troops. While doing enormous damage to Spain, the revolutionists had not been able during all this time, owing to the peculiar character of the warfare, to do more than hold their own. Both sides were weary of the struggle, and by tactful promises, holding out the hope of autonomy for Cuba, Campos succeeded in effecting the treaty of Zanjon, and thus by diplomacy rather than by force of arms put an end to the ten years' revolution.

The main concession for which the unconquered insurgents accepted peace was the promise of constitutional reform. As a matter of fact, there promptly followed four royal decrees, as follows: June 9, 1878, entitling Cuba to elect deputies to the cortes, one for each 40,000 people; June 9, dividing the island into the present six provinces; June 21, instituting a system of provincial and municipal government, followed on Aug. 16 by the necessary electoral regulations. But the system was immediately seen to be the shadow without the substance of self-government. The provincial assembly could nominate only three candidates for presiding officer. It was the inevitable governor-general who had the power to appoint, not necessarily one of the three nominees but any member of the assembly he chose. But all this provincial machinery was in reality an empty form, since expressly by law the governor-general was given the power to prorogue the assemblies at will. The chief practical result of the long struggle was the wiping out of slavery in Cuba. The system of government which existed before the rebellion of 1868 is still in vogue. That system comprises: 1. A tariff which by differential duties forces Cuba to buy to Spanish advantage and her own disadvantage, and sell (with an export duty for Spain's benefit) where she can. 2. A scheme of internal taxation laid in crushing weight on every phase of industrial life. 3. A complete system of control and espionage over the details of business, with countless fees and explanations. The body of officers who execute this universal system of great and petty interference are too generally blackmailers who adroitly temper their exactions to the little wool left on the oft-shorn lamb. 4. The distribution and expenditure of practically the total collected revenues remains with Spain. The general result of this policy, besides imbittering the Cubans, has been to strain and drain every industry and to discourage new projects and embarrass old ones.

The population of the island is about 2,000,000. Upon that population has been fastened by Spain the enormous debt of $200,000,000. In addition to this crushing debt of $100 per capita is added a system of taxation inconceivable in its extent and oppressiveness. However exaggerated any statement of the wrongs of the Cubans may seem, the difficulty really is not how to magnify but how to give an adequate conception of them. Everything that a Cuban has or does, or may expect to have or do, is subject to two taxes at least.

Of the first class some examples may give an idea. The smallest retail stores are taxed $300, and for larger stores the tax is greater. Each and every article in those stores has paid customs duties at excessive rates. Every income is taxed. Even clerks in the stores must pay an income tax of 2½ per cent of their salaries, and in addition thereto must pay further 6 per cent on this income tax to cover the expense of collecting it. Every social gathering is taxed. There is a tax on marriages, on funerals, and even on a dinner party or dance. There is a tax on repairing houses. There is a tax on every servant kept. There is a tax for every letter in the signs of the stores. There are import and export duties. The duty on American flour is absolutely prohibitory, simply that Spain may dispose in Cuba of an inferior quality, produced in Spain, at enormous profit. Two years ago, when the Spanish crops were a failure, cheap brands of American flour were purchased and sent to Spain and reshipped to Cuba, the double freight thereon being added to the duties. The statement has been frequently made—and, however incredible it may seem, it is true—that the government banks, the officers of which are of course Spaniards, have passed out counterfeit money in making payments. Indeed, so far and to such an extent this was done that the long-suffering inhabitants of Havana once nearly rose in

riot against the abuse. The other class of taxes it is impossible to estimate, as it consists of extortions of the government officials, which are as barefaced as they are incredible.

No sooner had the peace of 1878 been concluded than plans were considered for the present rebellion. During the revolution of 1868-78 a boy of 15 was put in chains and kept at hard labor for alleged seditious writings. Later he was sent to Spain, but succeeded in escaping shortly after. He became a man of great genius in letters, of high intellectual attainments, a poet and a brilliant journalist. Every move in the great struggle for freedom in his native land, from which he was an exile, was watched by him with deepest interest. He foresaw the inevitable outcome of that struggle and resolved to devote his life to the perfection of plans which would result in the attainment of freedom. That man was Jose Marti.

In 1891 he began to put his well-thought plans into active execution. Knowing that the most energetic and patriotic of his fellow-countrymen had been forced to leave Cuba, he sought them out in the land of their refuge, the United States. Others had gone to the various Spanish-American republics—to Jamaica, to Haiti, and to Santo Domingo. Marti visited the principal cities in all of these countries, forming in each of them clubs of Cubans, which altogether made up the Cuban revolutionary party, of which Marti was president.

Enormous sums of money were collected and placed in his hands for disbursement. With this money he purchased immense quantities of arms and ammunition, which were secretly shipped to Cuba and there concealed until the time should be ripe to declare the new revolution. The time arrived early in 1895. Feb. 24 Marti gave the signal to proclaim once more the republic of Cuba. The old flag adopted in 1868, a triangular blue union, bearing a single star and five stripes, three of red and two of white, was again hoisted to the cry of "Cuba libre!" Unfortunately for his plans, accident had placed the Spaniards in possession of the knowledge that such an attempt was to be made. In the province of Matanza great stores of arms and ammunition were discovered and forfeited, and the suspected leaders were kept under strict espionage.

The captain-general, Calleja, put forth every effort to crush the movement in its inception. How unsuccessfully the columns of the daily newspapers during the last year, in spite of the difficulty of obtaining truthful information and the tremendous efforts made by Spain and still making to hide from the world any real knowledge of the condition of events, will show.

Toward the end of February, 1895, Marti arrived on the island and was nominated by the revolutionary junta to be the head of the new revolutionary government, and Gen. Maximo Gomez was appointed commander of the insurgent forces. The insurgents had two points of rally, one being Matanzas, in the province of Matanza, on the north coast of the island, the other being Santiago, in the province of Santiago de Cuba, on the extreme southeast coast. In March the government announced the capture of Matanzas. At this time the government forces on the island consisted of 18,000 regulars, while the insurgent forces were very closely estimated at about 6,000, and of these about 4,000 were well armed with modern rifles and revolvers. It is exceedingly difficult to give a chronology of the events of the war in Cuba, from the fact that most of the reports come through Spanish sources and are wholly unreliable, and also because the insurgents are not risking their cause in general engagements. The battles, as a rule, are more like skirmishes than general encounters. During March the insurgents were defeated near Bayamo, but later defeated the government troops. The rebels were defeated at Guantanamo and at Salis, where two of their leaders were killed. On the other hand, during March the rebels won signal successes at El Cobre and at Holguin. The rebellion was spreading rapidly in March and the number under arms was increasing. The extreme difficulty of policing so large an extent of coast rendered it possible for the insurgents to procure arms and ammunition in large quantities from their friends in the United States and in Mexico.

In April the rebels met defeat at Palmarito, Holguin and Palenque. The rebels won battles at Ramon de las Yaguas and at minor points in the east end of the island. Re-enforcements were weekly arriving from Spain. In May the rebels pushed the war toward the west, using the extreme eastern province of Santiago de Cuba as their base. The point of attack was Puerto Principe, the chief city of the province next west of Santiago de Cuba. In May in a battle near Camaguey the government forces were defeated and Gen. Echague was taken prisoner, and they were defeated May 12 in a battle at Jovito. May 20 occurred the battle near Dos Rios, in which the rebels were defeated and Marti was killed, the most severe loss sustained by the insurgent forces since the uprising. It is claimed with strong evidence in its favor that Marti was assassinated by a Cuban traitor.

Up to the first of June over 20,000 troops were sent to Cuba from Spain and 10,000 additional forces are under orders to sail. The troops, however, have been of the poorest kind, being Spanish conscripts, the larger proportion being boys under military age and without discipline, experience or acclimation. They are, however, fairly well armed and officered. In June the insurgents pushed the campaign westward into the province of Puerto Principe, and as the people of the province favored the Cuban cause the state fell into the rebels' hands without much fighting. So completely had the rebels acquired possession of the two eastern provinces that Gen. Maceo began the issuance of clearance papers to merchaut vessels from the port of Caimanera. The taking of the war to the west developed the strength of the insurgent forces. The town of Canasi, west of Matanzas, was attacked by the rebels early in June and the Spanish bands under Gen. Pratt deserted and went over to the rebels. At that time the insurgent forces were estimated to number 20,000 men of all arms. In June the cities of Saledad and Cienfuegos revolted against Spanish rule and it was reported that "all the artillery possessed by the Spanish forces in the eastern departments" had fallen into the hands of Gen. Maceo. In Spain a dispatch was received from the captain-general that 14,000 fresh troops were necessary to prosecute an offensive campaign in Cuba.

Through July and August the military operations on the island were confined to skirmishes between the opposing forces, success being usually with the insurgents. The insurgents used the time in perfecting their political organizations and in preparations for declaring their independence, in choosing government officials and in perfecting their constitution.

On the 23d of September a meeting of the Cuban provincial delegates was held at Anton de Puerto Principe, at which the report of the special committee appointed to draw a constitution was adopted without debate, the fundamental laws of the republic were formally

proclaimed, and the independence of the island from Spain solemnly declared.

The provisional government of Gen. Maceo gave way to this permanent organization:

President—Salvador Cisneros of Puerto Principe.

Vice-President—Bartolome Masso of Manzanillo.

Secretary of War—Carlos Roloff of Santa Clara.

Assistant Secretary of War—Mario Menocal of Matanzas.

Secretary of Foreign Affairs—Rafael Portuendo of Santiago de Cuba.

Assistant Secretary of Foreign Affairs—Fermin V. Dominguez of Havana.

Secretary of the Treasury—Severa Pina of Sancti Spiritus.

Assistant Secretary of the Treasury—Joaquin Castillo of Santiago de Cuba.

Secretary of the Interior—Santiago J. Sanin ares of Remedios.

Assistant Secretary of the Interior—Carlos Dubois of Baracoa.

General-in-Chief—Maximo Gomez.

Lieutenant-General—Antonio Maceo.

The provinces of Santa Clara, Santiago, Havana, Puerto Principe and Matanza were all represented in the new government, and the organization seemed to give general satisfaction to insurgents and to insurgent sympathizers throughout the island. Jose Maceo, Maso, Capote, Serapin Sanchez and Suerto Rodriguez were designated as major-generals.

Following this meeting the declaration of independence and the constitution adopted by the insurgents were publicly issued. They were as follows:

The revolution for the independence and creation in Cuba of a democratic republic, initiated on the 24th of February last, solemnly declares the separation of Cuba from the Spanish monarchy and its constitution as a free and independent state, under the name of Republica de Cuba.

The elected delegates of the revolution, in convention assembled, acting free from all violence, anger or prejudice, and inspired solely by the desire faithfully to interpret the popular vote in regard to the establishment of a provisional government, have now formed a compact between the world and Cuba, and pledge themselves to the following articles of the constitution of the new Cuban republic:

Article 1. The supreme power of the republic shall be vested in a council composed of a president, vice-president and four secretaries for the dispatch of business of war, of the interior, of foreign affairs and of the treasury.

Art. 2. Every secretary shall have a subsecretary, in order to supply any vacancy.

Art. 3. The council of government shall have power to dictate all measures and dispositions relative to the civil and political life of the revolution; to impose and collect taxes; to contract public loans; to issue paper money; to appropriate and expend the funds collected in the island from whatever source, and also the funds which may be raised abroad; to grant letters of marque; to raise troops and to maintain them; to declare reprisals with respect to the enemy, and to ratify treaties; to grant authorization, when deeming it convenient to do so, for the trial before the civil courts of the president or any member of the council of government who may be accused; to decide all matters which may be brought before them by any citizen, except those of a judicial character; to approve the law of military organization and the ordinances of the military service, as drawn up by the commander-in-chief; to grant military commissions from that of colonel upward, previously hearing and considering the report of the immediate superior officer, and of the general-in-chief or the lieutenant, and also to appoint the general-in-chief and the lieutenant in case of vacancy; to order the election of four representatives for each army corps whenever, in accordance with this constitution, an assembly shall be convened.

Art. 4. The council of government shall intervene in the direction of military operations only when in their judgment it shall be absolutely necessary to do so.

Art. 5. The decrees of the council of government shall be valid only when two-thirds of the members shall have concurred in them.

Art. 6. The office of councilor may not be held by one holding any other office under the republic, nor by any person under the age of 25 years.

Art. 7. The executive power is vested in the president, and in his default in the vice-president.

Art. 8. The decisions of the council of government shall be sanctioned and promulgated by the president, who shall take all necessary steps for their execution within ten days.

Art. 9. All treaties entered into by the president shall be ratified by the council of government in order to be valid.

Art. 10. The president shall receive all diplomatic representatives and issue the respective commissions to public functionaries.

Art. 11. The treaty of peace with Spain, which shall have for its basis the absolute independence of the island of Cuba, shall be ratified by the council of government and by the assembly of representatives convened expressly for this purpose.

Art. 12. The vice-president shall act for the president in the case of a vacancy.

Art. 13. In case of a vacancy of the offices of president and vice-president by resignation, deposition, death or any other cause, an assembly of representatives shall be convened, and meanwhile the duties of said offices shall be discharged by the oldest of the secretaries in age.

Art. 14. The secretaries shall have voice and vote in all deliberations and resolutions of the council.

Art. 15. The secretaries shall have the right to propose for appointment all the employes of their respective offices.

Art. 16. The sub-secretaries, in cases of vacancy, shall act for the secretaries and shall then have voice and vote in the deliberations.

Art. 17. All the armed forces of the republic and the direction of the military operations shall be under the control of the general-in-chief, or, in case of a vacancy, under the lieutenant-general.

Art. 18. All public functionaries, whatever their class, shall aid and support one another in the execution of the resolutions of the council of government.

Art. 19. All the Cubans are bound to serve the revolution with their persons and interests, each one according to his abilities.

Art. 20. Foreign property shall be subjected to the same taxes imposed upon the property belonging to Cubans, but an exception shall be made in favor of the property of foreigners whose governments recognize the rights of belligerency to Cuba, and no tax shall be imposed upon it during the revolution.

Art. 21. All debts contracted and obligations incurred since the beginning of the present revolutionary movement by the chief commanders of the army for the benefit of the revolution shall be held valid and due, and also those which henceforward the council of government may contract or incur.

Art. 22. The council of government shall have power to depose any of its members for just cause by a majority of two-thirds, and

shall report the fact to the assembly first convening after the occurrence.

Art. 23. The judicial power shall act with entire independence of all the others, and the council of government shall provide for its organization and regulation.

Art. 24. The present constitution shall remain in force for two years, unless the war should come to an end before that time. After the expiration of two years from the date hereof an assembly of representatives shall be convened for the purpose of electing a new government and amending this constitution, if necessary in their judgment to do so.

So has been agreed upon and resolved in the name of the republic of Cuba, by the constituent assembly at Jimaguayu, on the 16th of September, 1895, and in witness thereof, we, the delegates-representatives of the Cuban people, sign the present instrument.

The impossibility of obtaining reliable information of the military and political movements in Cuba obliges the closing of this record of events Oct. 1, 1895.

THE COTTON STATES EXPOSITION.

The idea of an International and Cotton States Exposition at Atlanta, Ga., originated with Col. W. A. Hemphill, Dec. 13, 1893, and was so favorably considered by the people of that city and state that on the 8th of January, 1894, the permanent organization of the enterprise was effected and work was begun upon a guaranteed subscription of $500,000, the capital stock being limited to $5,000,000. Piedmont park, embracing 189 acres of ground, was selected as the site of the exposition. Twelve buildings were erected by the company for exposition purposes.

The largest structure within the grounds was the manufactures and liberal arts building, 356 feet long, 206 feet wide and 90 feet high. A tower 60 feet square was situated at each corner. Galleries 20 feet in width ran around the interior walls.

One of the most imposing buildings on the ground was that devoted to agriculture. It was 300 feet long and the roof 100 feet high at the apex. The exhibits came from all parts of the earth and particularly from the southern states.

The minerals and forestry building was 110 feet wide and 350 feet long, constructed entirely of natural southern woods, all of which grew within the state of Georgia. Among the different varieties may be mentioned pine, hickory, poplar, black gum, willow, ironwood, oak, maple, ash, cherry, chestnut and cypress. Upon the roof was arranged a collection of tropical plants and foliage. The display of minerals was very extensive and complete.

Machinery hall, 118 feet by 500 feet and 60 feet high, was a finely proportioned building, the floor sustaining a weight of 200 pounds to the square inch. A railroad ran the entire length of the structure.

The transportation building was 450 feet long and two tracks laid for the entire length. At each end of the building were galleries 48 feet by 117 feet, fitted up as restaurants. On each side of the double tracks was ample space for carriages, wagons and everything on wheels which would naturally be found under the general heading of transportation.

The electric exhibit was one of the features of the exposition. The building devoted to the exhibit occupied a site on the east bank of the lake and was 245 feet by 79. The lighting of buildings and grounds was accomplished by means of plants located in this building.

The negro building, 276 feet by 112, was planned, executed and built by negroes. The idea was to show the advance of the black man under southern institutions. Two colored men contracted the work and carried it forward without white help. Every timber in the building was laid by negro hands, and the whole structure, from cellar to roof, is a monument of the progress of the African race in the south since the days of emancipation.

The auditorium, including police department and express offices, was 200 feet long, 135 feet deep and four stories high, with mezzanine stories.

The fire building was 205 feet long, 50 feet wide and two stories high.

The woman's building was 150 feet long, 128 feet deep and 90 feet to top of statue on central dome.

The fine arts was 100 feet wide, 245 feet long and 50 feet high.

The administration building, combining main entrance, fronting 240 feet on Piedmont avenue, was 50 feet wide at center and three stories high.

The highest point on the grounds was occupied by the United States government building, 180 by 260 feet, which was erected at a cost of $50,000. The government appropriated $200,000 to the exhibits and buildings, and, although the exhibits were smaller than those at Chicago in 1893, they were instructive.

State exhibits were made by New York, Massachusetts, Connecticut, Illinois, Georgia, Alabama, California, South Carolina, North Carolina, Florida and Arkansas, eight of which erected buildings on the grounds. Foreign government exhibits were made by Great Britain, France, Germany, Italy, Belgium, Russia, Mexico, Venezuela, Argentine Republic, Salvador, Chile, Honduras, Nicaragua and Costa Rica.

The officers and commissioners were:

C. A. Collier—President and director-general.
W. A. Hemphill—First vice-president.
H. H. Cabaniss—Second vice-president.
W. D. Grant—Third vice-president.
E. L. Tyler—Fourth vice-president.
A. L. Kontz—Treasurer.
J. J. Spalding—General counsel.
Alex. W. Smith—Auditor.
E. S. McCandless—Assistant auditor.
J. R. Lewis—Secretary.
E. F. Blodgett—Assistant secretary.
Grant Wilkins—Chief of construction and landscape engineer.
Bradford L. Gilbert—Supervising architect.
Charles F. Foster—Mechanical and electrical engineer.

Commissioners:

C. H. Redding—Commissioner to Mexico.
I. W. Avery—Commissioner to South America.
A. Macchi—Commissioner to Europe.
Alfonso Faber—Commissioner to Austria.

The chiefs of departments:

Grant Wilkins—Construction.
E. L. Tyler—Transportation.
W. S. Cooper—Publicity and promotion.
I. H. Allen—Machinery.
H. M. Atkinson—Electricity.
D. T. Day—Minerals.
B. E. Fernow—Forestry.
Horace Bradley—Fine arts.
A. W. Smith—Public comfort.
W. J Northen—Educational.
E. A. Felder—Admissions.
James R. Wylie—Agriculture and dairy.
E. P. Chamberlain—Manufactures and liberal arts.
H. L. Wilson—Live stock.

The exposition opened Sept. 18 and closed Dec. 31, 1895.

Religious.

STATISTICS OF CHURCHES.

[Compiled for the New York Independent.]

The following tables give for each denomination (1) the number of ministers, churches and communicants in the United States, according to the census of 1890 and the returns of 1894; (2) the net gains in the four years; (3) the number of ministers, churches and communicants which the larger denominations have in foreign lands.

It is necessary, in order to the proper understanding of these tables, to give attention to these explanations:

1. The census gives returns only for the United States; those for 1894 are, therefore, also confined to our own country.

2. The figures for 1894 represent the latest obtainable returns.

3. A number of denominations publish no statistics. For some of them careful estimates, made by the most competent persons, are given. In other cases, where there is no reason to believe there has been any change since 1890, the figures of the census are carried over into the columns for 1894.

4. In some instances, as the United Brethren and the German Evangelical Synod, part of the returns for 1894 are smaller than those for 1890. This is attributable to the fact that the reports are not so full as those of the census. The same fact explains why the apparent increase of Baptist members is so small.

5. Most of the denominations give returns for congregations or churches, but the Methodist bodies usually report church edifices. The census return of edifices is, therefore, given in the column headed "churches," instead of congregations. According to the census returns all Methodist bodies had, in 1890, 51,489 congregations or organizations and 46,138 church edifices, a difference of about 5,000. Supposing that the same difference still obtains, the total of Methodist congregations for 1894 would be about 60,500.

6. The figures in the column of communicants for the Roman Catholic church were obtained by taking 85 per cent of the latest returns (1893) for population. This is the Catholic rule.

7. The Evangelical Association has been in process of division for some years. The figures for the older branch are from the Year Book, edited by the Rev. Mr. Yost, on whose authority we deducted 30,000 from the total membership for recent withdrawals. Those for the United Evangelical branch are not official, as the body was only recently organized, but were obtained from the best sources.

8. The Rev. A. W. Pegues reports for the colored Baptists 10,971 ministers, 12,199 churches and 1,483,533 communicants. These figures are probably meant to embrace colored Baptists in the north as well as in the south. The returns for 1894 in the table below include only those colored associations which are reported separately in the southern states.

*The returns for 1894 do not include those of the Iowa German Synod, which is now classed in the independent list.

†Now included in Synodical Conference.

‡It is not likely that there has been any decrease in the number of members or of churches since 1890. Doubtless the census got fuller returns than the Universalist Register obtains.

NET GAINS IN FOUR YEARS.

Military Societies of the United States.

SOCIETY OF THE CINCINNATI.

General Officers.

President-General—Robert M. McLane (acting).
Vice-President-General—Hon. Robert M. McLane, Baltimore, Md.
Asst.-Treasurer-General—Mr. Henry T. Drowe, Rhode Island.
Secretary-General—Hon. Asa Bird Gardiner, LL. D., of Rhode Island, Garden City, N. Y.
Assistant Secretary-General—Thos. P. Lowndes Charleston, S. C.

State Societies.

Massachusetts—Organized June 9, 1783; Winslow Warren, president.
New York—Organized June 9, 1778; Hon. John Cochrane, president, New York city.
Pennsylvania—Organized Oct. 4, 1783; Hon. William Wayne, president, Paoli, Chester county, Pa.
Maryland—Organized Nov. 21, 1783; Hon. Robert M. McLane, president, Baltimore, Md.
Rhode Island—Organized June 24, 1783; Hon. Nathaniel Greene, president, Newport, R. I.
New Jersey—Organized June 11, 1783; Hon. Clifford Stanley Sims, president, Mount Holly, N. J.
Connecticut (revived 1893)—George B. Sanford, acting president.
South Carolina—Organized Aug. 29, 1783; Rev. Charles Cotesworth Pinckney, D. D., president, Charleston, S. C.
France—Organized at Paris Jan. 7, 1784; reinstituted July 1, 1887; Marquis de Rochambeau, president, 51 Rue de Naples, Paris.

The historic and patriotic Order of the Cincinnati was founded by the American and French officers at the cantonments of the continental army on the Hudson at the close of hostilities in the war of the revolution for American independence in May, 1783.

In forming the society it was declared that "To perpetuate, therefore, as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances, cemented by the blood of the parties, the officers of the American army do hereby, in the most solemn manner, associate, constitute and combine themselves into one society of friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof the collateral branches who may be judged worthy of becoming its supporters and members."

For convenience, thirteen state societies were formed, and one in France under the direct patronage of Louis XVI. Upon the roll of original members appeared the names of all the great historic military and naval characters of the revolution, and upon the roll of honorary members, elected for their own lives only, appeared many of the signers of the declaration of independence.

Several state societies became dormant because the members had to emigrate to the lands given them for their services, west of the Alleghanies, and with broken health and ruined fortunes begin life anew in failure of congress to keep its promises as to half-pay.

There now remain eight state societies—viz., those of Massachusetts, Rhode Island, Connecticut (revived 1893), New York, New Jersey, Pennsylvania, Maryland, and South Carolina, and the one in France, which was dispersed at the reign of terror in 1793, has been re-established under the acting presidency of M. le Marquis de Rochambeau.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants.

The general society is composed of the general officers and five delegates from each state society, and meets triennially. In 1854 it ruled that proper descendants of revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership, if found worthy, on due application.

The last triennial meeting of the general society was held in Boston, Mass., in May, 1893. The next triennial meeting will be held in Philadelphia, Pa., in May, 1896.

The number of living members of the Society of the Cincinnati, as reported at the triennial meeting May, 1893, was 499. President Cleveland and Maj.-Gen. Howard, U. S. A., are honorary members in the New York state society; ex-President Harrison is an honorary member of the Pennsylvania state society, and Gen. John M. Schofield is an honorary member of the New Jersey state society.

SOCIETY OF COLONIAL WARS.

Officers of the General Society.

Governor-General—Frederick J. de Peyster, New York.
Deputy Governors-General—Charles H. Murray, for New York; James Mifflin, for Pennsylvania; Gen. Joseph L. Brent, for Maryland; Gen. William F. Draper, for Massachusetts; Rear-Admiral Francis A. Roe, U. S. N., for the District of Columbia; Malcolm Macdonald, for New Jersey; William Hammersley, for Connecticut; Col. E. B. Chittenden, for Vermont; Henry Cadle, for Missouri; J. L. Lombard, for Illinois; Henry O. Kent, for New Hampshire, and R. T. W. Duke, for Virginia.
Secretary-General—Howland Pell, 4 Warren street, New York.
Deputy Secretary-General—Edward Trenchard, 56 Wall street, New York.
Treasurer-General—Satterlee Swartwout, Stamford, Conn.
Deputy Treasurer-General—S. Victor Constant, New York.
Registrar-General—George Norbury Mackenzie, Baltimore, Md.
Historian-General—Dr. Francis E. Abbott, Cambridge, Mass.
Chaplain-General—Rev C. Ellis Stevens, LL.D., D.C.L., Philadelphia, Pa.
Surgeon-General—Samuel Clagett Chew, M. D., Baltimore, Md.

The Society of Colonial Wars was instituted in 189? to "perpetuate the memory of these events and of the men who, in military, naval and civil positions of high trust and responsibility, by their acts of counsel assisted in the establishment, defense and preservation of the American colonies, and were in truth the founders of this nation. With this end in view it seeks to collect and preserve manuscripts, rolls and records; to provide suitable commemorations or memorials relating to the American colonial period, and to inspire in its members the paternal and patriotic spirit of their forefathers, and in the community respect and reverence for those whose public services made our freedom and unity possible." Eligibility is confined to an adult male descendant of an ancestor who fought in battle under colonial authority, from the settle-

ment of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as governor, deputy-governor, lieutenant-governor, member of the council, or as a military, naval or marine officer in the service of the colonies or under the banner of Great Britain, or was conspicuous in military, official or legislative life during that period. The New York society was the original society, and state societies have also been organized in Pennsylvania, Maryland, Massachusetts, New Jersey, New Hampshire, Connecticut, Vermont, Missouri, Illinois, Virginia and the District of Columbia.

SONS OF THE REVOLUTION.

[Organized 1875.]

General Officers.

General President—John Lee Carroll, Maryland.
General Vice-President—G. D. W. Vroom, New Jersey.
Second Vice-President—Col. J. Screven, Georgia
General Treasurer—R. M. Cadwalader, Pennsylvania.
General Secretary—J. M. Montgomery, New York.
General Asst.-Secretary—W. H. Harris, Maryland.
General Register—J. W. Jordan, Pennsylvania.
General Historian—T. B. M. Mason, U. S. A.
General Chaplain—Rev. Morgan Dix, D.D., New York.

State Societies.

Alabama—J. E. Webb, president, Birmingham.
California—H. O. Collins, president, Los Angeles.
Colorado—J. B. Grant, president, Denver.
Connecticut—M. G. Buckeley, president.
District of Columbia—L. J. Davis, president, Washington.
Florida—J. G. Bullock, president.
Georgia—John Screven, president, Savannah.
Illinois—Walter Delafield, president, Chicago.
Iowa—W. S. Perry, president, Davenport.
Kentucky—Leslie Combs, president.
Maryland—J. L. Carroll, president, Ellicott City.
Massachusetts—C. K. Fay, president.
Minnesota—C. P. Noyes, president, St. Paul.
Missouri—D. S. Tuttle, president, St. Louis.
Montana—C. H. Benton, president.
New Hampshire—H. E. Hovey, president, Portsmouth.
New Jersey—S. M. Dickinson, president, Trenton.
New York—F. S. Tallmadge, president, New York.
North Carolina—Elias Carr, president, Raleigh.
Ohio—F. J. Jones, president, Cincinnati.
Pennsylvania—William Wayne, president, Paoli.
South Carolina—C. S. Gadsden, president.
Tennessee—W. P. Washburn, president.
Texas—C. L. Harwood, president.
Virginia—J. A. Cabell, president.
West Virginia—J. M. Hagans, president, Morgantown.
Washington—Josiah Collins, president, Seattle.

The two societies (Sons of the American Revolution and Sons of the Revolution) are alike in their aims and objects. These are fostering among themselves and their descendants the patriotic spirit of the men who in the naval, military or civil service of the colonies assisted in advancing the independence of the United States, and to collect and preserve the history of the revolutionary war and to promote intercourse and fraternal feeling among the members. Eligibility to membership in each is confined to male descendants from an ancestor who as a soldier, sailor or civil official assisted in establishing American independence during the war of the revolution.

SOCIETY OF THE SONS OF THE AMERICAN REVOLUTION.

[Organized June 29, 1876.]

General Officers.

Elected April 30, 1894.

President-General—Gen. Horace Porter, LL.D., 15 Broad street, New York city.
Vice-Presidents-General—Gen. J. C. Breckinridge, U. S. A., Washington city; Col. T. M. Anderson, Vancouver Barracks, Wash.; Edwin S. Barrett, Concord, N. H.; John Whitehead, Morristown N. J.; Cushman K. Davis, St. Paul, Minn.
Secretary-General—Franklin Murphy, Newark, N. J.
Treasurer-General—C. W. Haskins, 2 Nassau street, New York city.
Registrar-General—A. Howard Clarke, Washington city.
Historian-General—Henry Hall, New York city.
Chaplain-General—Tho Rt.-Rev. Charles Edward Cheney, D. D., Chicago, Ill.

State Societies and Officers.

Arkansas—S. W. Williams, president, Little Rock.
California—Lieut.-Col. E. Hunter, president, San Francisco.
Connecticut—Jonathan Trumbull, president, Norwich.
Delaware—Hon. Thos. F. Bayard, president, Wilmington.
District of Columbia—G. Brown Goode, president, Washington.
Illinois—Vacant.
Indiana—S. B. Brown, president, Fort Wayne.
Iowa—L. B. Raymond, president, Hampton.
Kansas—George D. Hale, president, Topeka.
Kentucky—Thomas H. Taylor, president, Louisville.
Louisiana—Edwin H. Farrer, president, New Orleans.
Maine—George F. Talbot, president, Portland.
Maryland—W. R. Griffith, president, Rockville.
Massachusetts—E. S. Barrett, president, Concord.
Michigan—H. B. Ledyard, president, Detroit.
Minnesota—Albert Edgerton, president, St. Paul.
Missouri—G. E. Leighton, president, St. Louis.
Montana—D. S. Wade, president, Helena.
Nebraska—Luther M. Kuhns, president, Omaha.
New Hampshire—W. W. Bailey, president, Nashua.
New Jersey—John Whitehead, president, Morristown.
New York—Chauncey M. Depew, president, New York city.
Ohio—L. B. Wing, president, Newark.
Oregon and Washington—Col. Thomas M. Anderson, president, Vancouver Barracks, Wash.
Pennsylvania—W. A. Herron, president, Pittsburg.
Rhode Island—Edward Field, president, Providence.
South Carolina—T. W. Woodward, president.

Tennessee—T. C. Kelly, president, Nashville.
Utah—Gen. W. H. Penrose, Fort Douglas.
Vermont—Z. M. Mansur, president, Island Pond.
Virginia—W. W. Henry, president, Richmond.
West Virginia—Robert White, vice-president, Wheeling.
Wisconsin—Don J. Whittemore, president, Milwaukee.

The membership of the society was 5,878 at the annual meeting in Boston, May 1, 1895.

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

[Instituted 1865.]

Commander-in-Chief—Brig.-Gen. John Gibbon, U. S. A., retired.
Senior Vice-Commander-in-Chief—Rear-Admiral Bancroft Gherardi, U. S. N., Philadelphia, Pa.
Junior Vice-Commander-in-Chief—Brig.-Gen. Selden Conner, U. S. V., Portland, Me.
Recorder-in-Chief—Bvt. Lieut.-Col. J. P. Nicholson, U. S. V., Philadelphia, Pa.

Commanderies.

Pennsylvania—Bvt. Maj.-Gen. D. McM. Gregg, U. S. V., commander; Bvt. Lieut.-Col. John P. Nicholson, U. S. V., recorder, Philadelphia.
New York—Bvt. Brig.-Gen. Horace Porter, U. S. A., commander; Paymaster A. Noel Blakeman, U. S. N., recorder, New York.
Maine—Bvt. Brig.-Gen. Isaac S. Bangs, U. S. V., commander; Bvt. Maj. Henry S. Burrage, U. S. V., recorder, Portland.
Massachusetts—Bvt. Brig.-Gen. Charles L. Pierson, U. S. V., commander; Col. Arnold A. Rand, U. S. V., recorder, Boston.
California—Bvt. Maj. William B. Hooper, U. S. V., commander; Bvt. Lieut.-Col. William R. Smedberg, U. S. A. recorder, San Francisco.
Wisconsin—Lieut. Henry B. Harshaw, U. S. V., commander; Capt. A. Ross Houston, U. S. V., recorder, Milwaukee.
Illinois—Lieut.-Col. Aldace F. Walker, U. S. V., commander; Lieut.-Col. Charles W. Davis, U. S. V., recorder, Chicago.
District of Columbia—Bvt. Brig.-Gen. Albert Ordway, U. S. V., commander; Bvt. Maj. William P. Huxford, U. S. A., recorder, Washington.
Ohio—Maj.-Gen. Jacob D. Cox, U. S. V., commander; Maj. W. H. Chamberlin, U. S. V., recorder, Cincinnati.
Michigan—Bvt. Maj. Geo. W. Chandler, U. S. V., commander; Bvt. Col. James T. Sterling, U. S. V., recorder, Detroit.
Minnesota—Capt. Henry A. Castle, U. S. V., commander; Bvt. Maj. George Q. White, U. S. A., recorder, St. Paul.
Oregon—Capt. Joseph A. Sladden, U. S. A., commander; Maj. William M. Cake, U. S. V., recorder, Portland.
Missouri—Col. Welis A. Blodgett, U. S. V., commander; Capt. William R. Hodges, U. S. V., recorder, St. Louis.
Nebraska—Capt. Henry E. Palmer, U. S. V., commander; Maj. T. S. Clarkson, U. S. V., recorder, Omaha.
Kansas—Bvt. Col. James H. Gilpatrick, U. S. V., commander; Capt. Eben Swift, U. S. A., recorder, Fort Leavenworth.
Iowa—Lieut. Henry H. Rood, U. S. V., commander; Lieut. Joseph W. Muffly, U. S. V., recorder, Des Moines.
Colorado—Capt. Harper M. Orahood, U. S. V., commander; Bvt. Capt. James R. Saville, U. S. V., recorder, Denver.
Indiana—Maj.-Gen. Lew Wallace, U. S. V., commander; Capt. Will W. Dougherty, U. S. A., recorder, Indianapolis.
Washington—Maj. John N. Scott, U. S. V., commander; Capt. Henry L. Achilles, U. S. V., recorder, Tacoma.
Vermont—Maj.-Gen. Oliver O. Howard, U. S. A., commander; First Lieut. William L. Greenleaf, U. S. V., recorder, Burlington.

GRAND ARMY OF THE REPUBLIC.

Commander-in-Chief—I. N. Walker, Indianapolis, Ind.
Senior Vice-Commander—E. H. Hobson, Greensburg, Ky.
Junior Vice-Commander—S. G. Cosgrove, Pomeroy, Wash.
Surgeon-General—J. B. Whiting, Janesville, Wis.
Chaplain-in-Chief—T. C. Iliff, Salt Lake City Utah.

Official Staff.

Adjutant-General—Irvin Robbins, Indianapolis, Ind.
Quartermaster-General—A. J. Burbank, Chicago, Ill.
Inspector-General—Will Olin, Boston, Mass.
Judge-Advocate General—A. Darte, Wilkes-Barre, Pa.

The national council of administration has forty-five members, each department being represented by one member.

	Senor Manuel M. Poute, Jr	Secretary of Legation.

Party Platforms.

UTTERANCES OF STATE CONVENTIONS, 1895.

Iowa Republicans.

Adopted at Des Moines, July 10.

We, the representatives of the republican party of Iowa, in convention assembled, reaffirm our fealty to the great principles which our national party from its birth has steadfastly proclaimed in the face of an ever-shifting foe.

We congratulate the people of this country upon the fact of returning prosperity, and rejoice in each instance of labor re-employed, wages restored and industries re-established upon a prosperous basis. In regard to our industries under republican policies, their paralysis under democratic power, and their revival with the repudiation of the democratic party and the dissolution of the democratic house of representatives, succeeded by one elected on the platform of the republican party, the vindication of the policy of protection is complete.

The democratic party is convicted of obtaining power in 1892 under false pretenses. In its platform it declared the principle of protection to be unconstitutional and in its campaign denounced the policy as robbery. But with complete power in its hands its lawmakers failed to carry out the policy to which they were pledged. It is a farcical pretense for the democratic party to claim credit now for a measure of which nine months ago its president withheld his approval and denounced as a humiliating abandonment of their cardinal principles. The senate bill, substituted for the Wilson bill, is not a measure which the republican party would father; it reduces the revenue upon luxuries, a method of levying more effective than any income tax; it restores taxation to sugar, a necessity in every home; it reduces the wage rate in many industries in which labor is the chief element of cost; it maintains in many of its parts the principle which the democratic party declared to be unconstitutional. To claim credit under it is to claim credit for abandoning its own policy and adopting the principle which it had denounced.

We deplore the fact that the democratic party, while professing a special interest in the enlargement of our export trade, has destroyed the reciprocity arrangements established by a republican administration.

Its solicitude for foreign trade has been exhibited only in the admission of foreign goods to our market without obtaining any reciprocal favors from foreign nations. We believe in the policy of reciprocity as the policy of practical affairs, and the admission of foreign traders to the rich markets of the United States should obtain for our people equal privileges in foreign markets.

We believe that the compensation of our labor is the true gauge of civilization, and the welfare of the laborer has been the constant care of the republican party from its birth. We are unalterably opposed to reducing the American workman to open competition in our own market with the poorly paid worker of the old world. We denounce the doctrine that duties on imports should be levied with a view to revenue only, and reaffirm the doctrine which has wrought in America the most marvelous industrial development ever known in the civilized world—namely, a doctrine of protection to home industries.

We believe in maintaining not only the biggest wage rate for the laborer but the integrity of the money in which he is paid. We reaffirm the declaration of the republican national platform of 1892, adopted at Minneapolis, that the American people from tradition and interest favor bimetallism, and the party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of value of the two metals, so that the purchasing and debt-paying power of the dollar, whether of silver, gold or paper, shall be at all times equal. The interest of the producers of the country, with its farmers and the workingmen, demand that every dollar, paper or coin, issued by the government, shall be as good as any other.

We urge that the United States exert its influence to establish with the important commercial nations of the world such an international commerce as will enable this country to reopen its mints to the free, unlimited coinage of both metals, without the loss of one or the other from the volume of our money.

The honest and industrious immigrant who comes to our land with the intent to become in good faith an American citizen is always welcome. None others should be permitted to come. We favor the amendment and more stringent enforcement of the immigration laws so as to exclude criminals, paupers and all other undesirable classes whose presence tends to degrade American labor and incite disorder.

The republican party, ever mindful of the patriotic sacrifices of the veteran soldiers of the republic, reaffirms its position in favor of liberality to the nation's defenders. We favor the granting of pensions to all honorably discharged union soldiers and sailors whose disabilities or necessities justly entitle them thereto.

We congratulate the people upon the fact that the state of Iowa will be represented in the LIVth congress by two senators and eleven representatives who are zealous and fearless advocates of republican principles and whose services in the past we heartily commend. With especial pride do we remember the distinguished services of our senior senator, whose long and honorable record as a servant of the state entitles him to expression of our full confidence and our enduring affection. We hail with satisfaction the universal desire of the republicans of the state to continue him in his present field of usefulness until called to the larger service of the nation.

Iowa Democrats.

Adopted at Marshalltown, Aug. 7.

The democratic party of Iowa, in convention assembled, reaffirms the national platform of the party adopted in Chicago in 1892, and points with satisfaction to the evidences of the wisdom of that convention, in the results accomplished according to its promises, to the evidences of returning prosperity, the restoration of wages and the re-establishment of industry upon a prosperous basis—conditions which have extorted congratulations from even the republicans of Iowa.

We declare the rescue of the finances of the country from the baleful effects of the Sherman law, the repeal of the un-American federal election law and the uprooting of McKinleyism to be works worthy of the history and prestige of the great democratic party and of a courageous democratic convention.

We hold to the use of both gold and silver as the standard money of the country and to the coinage of both gold and silver without discrimination against either metal or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value or be adjusted by international agreement or by such safeguards of legislation as shall insure the maintenance of the parity of the two metals and the equal power of every dollar at all times in the market and in payment of debts, and we demand that all paper currency shall be kept at par with and redeemable in such coin. We insist upon this policy as especially necessary for the protection of the farmers and laboring classes, the first and most defenseless victims of unstable money and a fluctuating currency.

We condemn the cowardice and trickery of the republican party in Iowa in failing to meet in its last state platform any of the issues important and vital to the interests of our state, and we ask upon it the sober judgment of an intelligent people.

We believe that the mulct law fails to meet the requirements of a good excise statute. It is unfair as between communities and imposes hardships upon property-owners, and it compromises the honor of the state in declaring the sale of liquors a crime and condoning the offense for a money consideration.

We repeat our demand of the last five years for a local-option high-license law, and on behalf of the commercial interests of our state we favor a law permitting the manufacture of liquors, thus affording a market for the products of the farm and labor of the state and saving to our people the enormous sums now expended in other states.

We favor the election of United States senators by direct vote of the people.

We favor just and liberal pensions to all deserving veterans.

We reiterate our unflinching opposition to all monopolies and trusts and call for enactments which will abolish combines of all kinds.

We demand that our state institutions be governed by a single non-partisan board of control, which can intelligently comprehend their relative wants and economically and justly apportion among the whole that which their just requirements demand.

We favor the speedy completion of the Hennepin canal and the deepening of the waterways from the great lakes to the ocean so as to enable ocean vessels to pass through.

Iowa Populists.

Adopted at Des Moines, June 11.

1. The people's party of Iowa, in convention assembled, reaffirms the principles of the Omaha platform.

2. We denounce the late decision of the Supreme court on the income tax, the recent acts of the government by injunction in the interests of corporate wealth and the issue of interest-bearing bonds.

3. Recognizing with satisfaction the expression of individual opinions among citizens, irrespective of party, in favor of the restoration of silver to its constitutional place in the coinage of the country at the ratio of 16 to 1, we extend the right hand of fellowship to all men who are willing to join with us in the dethronement of the money power of Wall street and Europe and the emancipation of the producing classes of the world.

4. We declare for the adoption of the initiative and referendum.

5. We further demand that until such time as a government system of finances can be established all banking institutions, national, state and private, be required to give security to depositors for all moneys received for deposits.

6. We demand that the legislature of Iowa shall provide by adequate legislation for the inspection of all workshops and factories where more than ten persons are employed, that the physical and sanitary conditions may be improved and the lives, limbs, health and convenience of the employes be better guarded.

7. The salaries of our public officers being far in excess of the returns from productive industry, we demand of the next general assembly a readjustment of the salaries of all public officers on a basis to correspond with the reduced prices received for the products of labor.

8. We believe that the expenses of the government should be borne in proportion to the ability of the citizens to pay them, and to this end we favor a graduated state tax upon incomes: also a state inheritance tax similar to those of New York and Illinois.

9. We demand a state tax of 10 per cent upon all future contracts made payable in gold, the same to be paid by the holder.

Iowa Prohibitionists.

Adopted at Des Moines, June 19.

The prohibition party of Iowa, in convention assembled at the city of Des Moines, June 19, 1895, acknowledging Almighty God as the rightful sovereign of all men, and to whose laws all human enactments must conform to secure the blessings of peace and prosperity, presents the following declarations and principles:

We declare our sympathies, as a party of reform, to be in favor of whatever tends to make men intelligent and virtuous. We assert our purpose to be identical with that of the national constitution, to establish justice, to secure domestic tranquility, to promote the general welfare and to secure the blessings of liberty to ourselves and our posterity.

We reaffirm the liquor traffic is a foe to civilization and to popular government; that it promotes poverty and crime; that it thwarts the will of the people and destroys our homes, and we declare anew for the suppression of the manufacture and sale of alcoholic liquors as a beverage, and that the full power of the government should be asserted to secure this result.

We declare the so-called regulation by license, mulct or taxation, whereby a revenue is derived from this traffic, is contrary to good government, is complicity with the liquor crime and corrupting to public conscience.

We pledge our co-operation with all organizations endeavoring to suppress the evils of the saloon, but our experience of disappointments convinces us that any political party not openly opposing this traffic will court the favor of the liquor interests, and for party success will shape the legislation to secure or retain their support. We therefore declare for prohibition with the prohibition party behind it.

We demand that every citizen of the United States shall be allowed to cast a free and unrestricted ballot at all elections, and that such ballot shall be returned as cast; and that this sovereign right shall be denied no citizen on account of sex.

We declare for a tariff for revenue to defray the necessary expenses of the government economically administered, but discriminating with a special reference to the protection of our domestic labor.

We believe in the gold and silver coinage of the constitution and a national currency issued by the general government only.

We demand the return of the free coinage

of both silver and gold, without discrimination against either, at a ratio of 16 to 1, and at once, independent of the action of any other nation.

We affirm that railroads, telegraphs and all work now granted franchises, the right of eminent domain and other sovereign privileges should be owned or strictly controlled by the government for the people, and our opposition to all monopolies by legislation because they are violations of equal rights of the people.

This country has always been a refuge for all the oppressed and exiles for conscience' sake, but it is now becoming largely a refuge for the criminals and the home for the pauper population of other countries. We therefore declare for the revision of our immigrant laws that we may continue to receive the worthy and may be free from the burden of the vicious and indolent.

We stand for the American public school, taught in the English language, and opposed to any appropriations for sectarian purposes or for the perpetuation of foreign customs or languages, and declare that we can only thus hope to become and remain a homogeneous and harmonious people.

We defend the divine right of all to one day's rest in seven.

The armies of the republic are disbanded, we trust never to be marshaled again in battle array, but so long as patriotism exists we demand for the soldiers of the nation generous and liberal pensions, also for their widows and orphans.

We denounce in unmeasured terms the so-called muict law of this state, and we arraign the republican party, which enacted it, for perfidy and treachery to the vote of the sovereign people cast for prohibition June 27, 1882, and we declare that no one, layman or priest, is worthy of the public confidence of the people who aided or abetted the enactment of the infamous statute or who now palliates its continuance.

We demand that the revenue laws of Iowa shall be radically reconstructed, to the end that the wealth of the wealthy shall bear its just proportion of taxation; in other words, we demand legislation that shall cause each dollar to pay its own taxes.

We demand that the public institutions of Iowa shall be placed on a purely business foundation and their management divorced from partisan control.

We demand that legislation shall be had to control the charges for telephones, telegraphs and express companies, as well as to regulate transportation on railways.

We demand legislation reducing official salaries of the state so that officers shall be paid in proportion to compensations given similar talent in the other business affairs of the world.

We demand a reduction of legal rate of interest in this state to 6 per cent.

We declare in favor of arbitration as the wisest, most humane and economical method of settling all international as well as lesser differences in nation or state.

We declare the principle of taxation amplified in the income-tax law just and beneficent, and we greatly deplore the decision of the United States Supreme court by which that law was declared void; and so long as it is necessary to look for national revenues by tariff we declare for a tariff for revenue only that shall meet the expenses of the government, economically administered, but discriminating with special reference to the protection of our domestic labor.

We favor the adoption of a system of legislation by the people known as the initiative and referendum, with proportional representation.

Michigan Republicans.

Adopted at Detroit, Feb. 21.

Resolved, That we congratulate the people of Michigan and of the country at large upon the magnificent republican victories achieved at the election last November as indicating the return of the republican party to full control of national affairs and the consequent restoration of confidence and national prosperity.

Resolved, That we charge the democratic party with gross maladministration of national affairs, by which they have bankrupted the treasury of the United States, driven prosperity from our people by a mongrel tariff act, caused a shrinkage of revenue and forced a sale of bonds to supply the deficiency thereby created. We arraign the democratic administration for its un-American policy whereby home industry is paralyzed and national honor humiliated.

Resolved, That we denounce the unpatriotic and un-American action of the Cleveland administration regarding the young republic of Hawaii, the cowardly act of hauling down the American flag, and its arrogant disregard of public sentiment in the country relating thereto.

Resolved, That this convention approves and reaffirms the planks of the republican state platform of 1894 relating to tariff, currency, reciprocity, labor, immigration and the election laws, and expresses its full confidence in the ability of the republican party through its representatives in the national and state governments to settle to the advantage of the state and the country at large details of questions upon which there may be differences of individual opinion.

Resolved, That we indorse the action of the republican members of congress from Michigan in voting against the proposition to change the word "coin" to "gold" in bonds issued by the United States government.

Resolved, That we most heartily indorse the present able administration of state affairs.

Resolved, That we deeply lament the death of the Hon. F. B. Stockbridge, late United States senator from Michigan, whose republicanism was of the stalwart kind and whose services to his state entitled him to our gratitude, and we extend to his bereaved family assurances of our sincere sympathy.

Michigan Democrats.

Adopted at Saginaw, Feb. 28.

The democratic party of Michigan, in convention assembled, hails with delight the rapidly increasing sentiment in favor of the restoration of silver to the position it so long held in the monetary system of our country, and unqualifiedly declares in favor of the free and unlimited coinage of silver and gold with full legal-tender power and at a ratio of 16 to 1, and invites every patriotic citizen of Michigan, regardless of previous party affiliation, to join us in an imperative demand for immediate legislation to that end, and without regard to the position of any other nation in respect thereto.

Michigan Populists.

Adopted at Greenville, Feb. 6, 1895.

WHEREAS, The logic of events, the insolence of the corporate money powers of Europe and America, and the willing subservicncy of the present administration in power, aided by its leading republican allies, have forced the financial issue to the front as the supreme issue of the hour; and,

WHEREAS, The administration and its willing tools in both branches of congress have outlawed silver, the most plentiful metal money of the world, increased the bonded in-

debtedness of the country in times of profound peace, and are now attempting rather than restoring the money of the constitution to plunge the country hopelessly into debt by the issue of $500,000,000 of government bonds, and are further attempting to enlarge the privileges and powers of banking corporations; now, therefore, be it

Resolved, That, without attempting to change the Omaha platform in the least, we denounce the attitude and action of the administration concerning these matters as being an outrage upon the rights of a free people and as being little less than treasonable, and we denounce the action of the democrats and their republican allies of the administration as subversive of free government, tending to reduce the constitution of the American people to European serfdom in this period of universal distress, bankruptcy and suffering among the industrial classes. It is evident there is no hope or confidence to be placed in either the democratic or republican party. The aims and purposes of both are identical and their machinery and management are fatally and unalterably against the interests of the people.

The money power has placed industry upon the rack and is fully determined that no relief shall be had except it be through special grants favorable to the bondholding and corporate classes. Now, therefore, in view of the serious situation of the country, we, representatives of the people's party in convention assembled, accept the issue presented by the money power through the administration and its republican allies, and call upon all patriotic American citizens, without regard to past political affiliations, to join with us upon the tremendous issues presented. Let us make the struggle in defense of constitutional liberty, our families and our hearthstones.

The remedy for these atrocities is for the government to take control of the whole money question by restoring to the people the unrestricted coinage of both gold and silver at the ratio of 16 to 1 and the issue of an adequate supplemental volume of legal paper money without the intervention of banks of issue and by prohibiting for once and for all time any further issue of bank paper or government bonds.

Michigan Prohibitionists.

Adopted at Lansing, Feb. 21.

The prohibition party of Michigan, in state convention assembled at Lansing on the 21st of February, 1895, does hereby renew its allegiance to the national prohibition party and reaffirm the declaration of principles in the last state platform, and resolve that the declarations in such platform as to the prohibition of the liquor traffic and the currency question be especially emphasized and advocated in the present campaign.

The following resolutions were adopted, but not as part of the platform:

Resolved, That we favor the submission of a prohibitory amendment by the present legislature to the vote of the people, provided that at least one year be given in which to present the matter to the people.

Resolved, That in the death of Mary T. Lathrap the prohibitionists of the nation and the forces of righteousness everywhere have lost a wise worker and master builder, and we record our grateful appreciation of her work and her devotion to God's cause, and tender to Dr. C. C. Lathrap a hearty expression of condolence.

Resolved, That the prohibition party of Michigan needs and must have a more thorough local organization, including the formation of young men's prohibition clubs, volunteer lecture bureaus both in state and county, and a complete enrollment of the prohibitionists in each voting precinct; and,

Resolved, That this resolution be referred to the prohibition state convention with instructions to perfect plans to this end.

Nebraska Republicans.

Adopted at Lincoln, Oct 2.

We, the republicans of Nebraska, in convention assembled, declare our adherence to the statement of principles and policies adopted by the national republican convention of 1892. Governed in accordance with those principles and policies, the industries of the nation have prospered, the revenues were always sufficient for the ordinary expenses of the government, the veterans of the war for the union, disabled in the service, and the widows and orphans of the dead were liberally provided for, and a greater part of the national debt incurred in the defense of the flag had been paid out of the surplus. The national credit had been established, the currency of the country (amply secured by a treasury reserve never impaired) was beyond question, and a degree of prosperity attained unexampled in the history of the nations.

But the fallacies of so-called populism having temporarily demoralized the ranks of republicanism in its strongholds, the last national election restored the democratic party to power in the executive and legislative departments of the government, and the results of the "change" immediately appeared. The industries of the nation were paralyzed, financial panic followed, unprecedented for its duration and widespread disaster to our commercial and manufacturing interests, its impairment of values of all property and products and its reduction to a pauper level of the wages of labor. The fears of the people were finally justified by the passage of the Wilson tariff bill, a measure so obnoxious and indefensible that a democratic president pledged to free-trade measures denounced it as an act of perfidy and dishonor, but suffered it to become a law without his signature. This law, based upon no recognized principle, fathered by no party platform, that neither protects American industries nor raises a sufficient revenue to supply the ordinary necessities of the government, that has forced the borrowing of immense sums of money on the bonds of the government in a time of profound peace, and the farming out of the functions of the treasury department to a syndicate controlled by foreign capitalists, has once more proved the utter incapacity of the democratic party for administering the affairs of the government.

The election of a congress last November with an unparalleled republican majority immediately strengthened the national credit, restored in a great measure the confidence and courage of the people and revived our languishing industries, and has signally vindicated the republican policy of protection to home industries and a sound currency.

We therefore call upon all patriotic people, irrespective of former political affiliations, to join in assisting to bring back prosperity to the state and nation by re-enacting protection to American industries on the basis of that splendid law known as the "McKinley act," thereby securing an adequate revenue while guarding the American market for American products and furnishing steady and permanent employment of American labor at American wages, and returning to the beneficial system of commercial reciprocity with our sister American republics.

Favoring the use of both gold and silver standard money, we oppose all monetary legislation that would result in either gold or

silver monometallism, and demand the maintenance of a national currency every dollar of which, whether in gold, silver or paper, shall be of equal value and of equal debt-paying or purchasing power.

We denounce the democratic national administration for its supine neglect of American interests in its foreign policy and its cowardly abandonment of the doctrine of the fathers of the republic, that guarantees the friendly offices of this government in favor of the independent states of the American continent, threatened with spoliation or conquest by any European power. We most heartily sympathize with the people of Cuba in their desire to attain independence and self-government, and demand, in case of Spain attempting to make good its threat to wage a war of extermination against them, the prompt recognition of the belligerent rights of the Cuban republic by the United States.

The republican party, always foremost in the march of progress, recognizes the importance of irrigation to the people of the western part of the state, and we pledge the party to the same friendly spirit in the consideration of future legislation as it exhibited toward these interests in the enactment of the first general irrigation law in 1889 and again in 1895, upon its return to power in both houses of the legislature, when it greatly extended the features of the law of 1889 and included provisions for the organization of irrigation districts. And we hereby ask the congress of the United States to enact such laws as will determine the rights between citizens of several states in the use of water for irrigation purposes from streams flowing through two or more states.

To further aid in the development of irrigation, we would respectfully request our congressional delegation to urge the passage of a law granting to the state for this purpose the remaining public lands undisposed of within our borders.

We congratulate the people upon the restoration of the sugar bounty and the wonderful impetus given this industry on account thereof, but we demand that the books of those that receive the benefits of the bounty of state and nation should at all times be open to the inspection of lawful authority, and that sworn statements of costs of production should be furnished in order that justice may be done to the people as well as to the recipients.

Nebraska Administration Democrats.

Adopted at Lincoln, Sept. 5.

The democracy of Nebraska, in convention assembled, congratulates the country upon the sure signs of returning prosperity. In spite of the evil predictions alike of protectionists and silver inflationists, the country is steadily and surely gaining ground, thus justifying the wisdom of the reversal of the republican policies of protective tariff taxes and coinage of a redundant quality of token dollars. The fact that the wheels of industry, so long silenced in consequence of these policies by a long and depressing panic, have resumed their wonted motion, and that more than 300,000 laborers are receiving the large increase in wages of 12 per cent, proves this assertion.

We send hearty greeting and congratulations to Grover Cleveland and his cabinet, not only for their wise and prudent course, which has aided so much in bringing about the better financial condition, but also for their firm and fearless adherence throughout the depression to sound policies of economy and for their unswerving fidelity in upholding the honor and integrity of the nation against organized mob violence.

We indorse the national democratic platform of 1892 and the interpretation placed thereon by the president, and we declare ourselves unequivocally and unreservedly for that metallic money as the standard mintage the bullion and mint value of which are approximately the same, the purchasing power of which, regardless of government mintage, is the least fluctuating in all the markets of the civilized world.

We insist upon this policy as especially necessary for the protection of the farmers, laborers and property-owning debtors, the most defenseless victims of unstable money and fluctuating currency. Free coinage of silver at 16 to 1 means a poorer money and less of it; it means less wages for the laboring man and less actual money for the business man. It means bankruptcy for all save the mine-owner.

We recognize the issue and reissue of our treasury notes as a serious menace to the stability of our national finances, and we favor the retirement of all treasury notes at the soonest possible moment, with proper and safe guaranties for maintaining the necessary volume of currency, which shall be devised by a competent and non-partisan currency commission.

The constitution of this state provides that no religious test shall be made as a qualification for office. That provision we accept both in letter and spirit, and we condemn every attempt by secret societies or other bodies to proscribe any portion of our citizens on account of their religious beliefs or affiliations.

Nebraska Silver Democrats.

Adopted at Omaha, Aug. 22.

We, the democrats of Nebraska, in convention assembled, reaffirm our faith in those principles written in the declaration of American independence and emphasized by Jefferson and Jackson—namely, "that all men are created equal; that they are endowed by their Creator with certain inalienable rights, among which are life, liberty and the pursuit of happiness; that governments are instituted among men to secure these rights, and that governments derive their just powers from the consent of the governed"—and we demand that all of the departments of the government, legislative, executive and judicial, shall be administered in accordance with these principles.

We affirm the declaration made by the last democratic state convention held in Nebraska, Sept. 26, 1894.

We believe the restoration of the money of the constitution is now the paramount issue before the country, and insist that all parties shall plainly state their respective positions upon the question in order that the voters may intelligently express their preference.

We therefore declare ourselves in favor of the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1, as such coinage existed prior to 1873, without waiting for the aid or consent of any other nation, such gold and silver coin to be a full legal tender for all debts, public and private.

We send greeting to our democratic brethren throughout the union who are making such a gallant fight for the restoration of bimetallism, and congratulate them upon the progress made.

We deprecate and denounce as un-American and subversive of the principles of free government any attempt to control the action or policy of the political parties of this country by secret cabals or organizations of any character, and warn the people against the danger to our institutions which lurks under any such secret organization, whether

on religious, political or other differences of opinion.

Recognizing that the stability of our institutions must rest on the virtue and intelligence of the people, we stand, as in the past, in favor of the free common-school system of this state, and declare that the same must be perpetuated and receive liberal financial support, and that the management and control of said school system should be non-sectarian and non-partisan.

The democracy of Nebraska approves and commends the declaration of President Cleveland in the past in condemning the pernicious activity of incumbents of federal offices under the government in attempting to control the policy and nominations of their parties, and we hereby recommend the renewal of the policy of his first administration in that regard.

Nebraska Populists.

Adopted at Lincoln, Aug. 28.

We, the people's party of the state of Nebraska, in convention assembled, do put forth the following platform of principles:

We hereby reaffirm the principles of the Omaha platform.

We declare ourselves in favor of strict economy in conducting the affairs of the state government in all its branches.

We believe the judicial affairs of the state should be conducted on the principles of justice and honesty, without partisan bias and in the interests of the people.

Resolved, That we favor the principle of the initiative and referendum in matters of legislation.

Resolved, That we are opposed to any religious test for admission to office or for membership in this party.

We invite all reform and progressive organizations and persons to unite with us, and deprecate any act which tends to give prestige and continued existence to division of reform forces.

Resolved, That if the policy of the general government in reducing the volume of money is continued, we must in justice to the taxpayers demand the reduction of all salaries of state and county officers.

Resolved, That this convention most heartily indorses the position of Gov. Holcomb in reference to the penitentiary contracts and his efforts to administer the affairs of the state in an economical manner.

Resolved, That we express our sincere thanks to the mayor and citizens of Lincoln for their courtesy to the delegates and visitors at this convention.

Nebraska Prohibitionists.

Adopted at Lincoln, July 4.

The prohibitionists of Nebraska, conscious of their responsibility to God and their fellowmen for the proper use of the ballot, reaffirm their adherence to the national prohibition party. Constantly increasing political corruption and vicious class legislation, participated in alike by the republican and democratic parties, are evidence of their unfitness to longer administer the affairs of government. To establish justice, promote the general welfare and restore the government to the hands of the people for whom it was created should be the first concern of every good citizen, and the union of reform forces a political party pledged to the accomplishment of these purposes is an absolute and sent necessity.

We therefore invite the suffrages of the people upon the following declaration of principles, which we pledge ourselves to enact into effective legislation when intrusted with power to do so:

1. The manufacture, sale and supply of intoxicants for beverage purposes should be suppressed and no compromise therewith be tolerated, whether called license, taxation, local option or public control. The production and sale for other purposes should be conducted by the government under strict regulations.

2. Woman should have the same means of protecting herself, her home and her children, her property and her happiness, that man has; she is entitled to an equal voice in the government with man, and therefore the right to vote should not be withheld from her. No person should be allowed to vote who is not a citizen of the United States, and the general government should protect every elector in the right to vote and have that vote counted.

3. The money of the country should be issued by the general government only through government banks of loan and deposit directly to the people upon adequate security and at a uniform rate of interest. It should be a full legal tender for the payment of all debts, public and private, without exception in favor of contract stipulation. We favor a money composed of legal-tender treasury notes based upon the credit of the nation, coin being used for subsidiary purposes only.

4. Land is the common heritage of the people and should be preserved from monopoly and speculation. All unearned grants of land subject to forfeiture should be reclaimed by the government and no portion of the public domain should hereafter be granted except to actual settlers, use being essential to tenure.

5. Railroads, telegraphs and other natural monopolies should be owned and operated by the government, giving to the people the benefit of service and product therefrom at cost.

6. The national constitution should be so amended as to allow the national revenues to be raised by equitable adjustment of taxation on the properties and incomes of the people, and import duties should be levied only as a means of securing equitable commercial relations with other nations.

7. Trusts and combinations for the purpose of preventing competition, restraining production, arbitrarily advancing or depressing prices and interfering with the legitimate laws of business are conspiracies against the government, and those participating in such practices should be punished as conspirators.

8. The contract convict-labor system, through which speculators are enriched at the expense of the state, should be abolished.

9. All men should be protected in their right to one day of rest in seven.

10. We stand unequivocally for our public schools, taught in the English language, and are opposed to any appropriation of public money for sectarian purposes.

11. All official fees should be covered into the public treasury and officials paid reasonable salaries.

12. The United States constitution should be so amended that the president, vice-president and United States senators should be elected by direct vote of the people.

13. Believing that free expression of the popular will is essential in a representative government, we favor the adoption of the initiative and referendum.

DISTRIBUTION OF THE SURPLUS IN 1837.

The question has been raised whether, in view of the depleted condition of the treasury, the twenty-six states which in 1837 received from the general government deposits amounting to over $28,000,000 may not be made to refund.

Early in 1836, congress having refused to extend the charter of the Bank of the United States, found the government in possession of between $40,000,000 and $50,000,000, for which it had no immediate need nor suitable place for safe keeping. June 23 of that year an act was passed authorizing the secretary of the treasury to deposit, under certain specified conditions, all this money, except $5,000,000, with the states on their assuming the obligation of its payment on demand.

Section 14 provided that the deposits should be made on the 1st day of January, April, July and October, 1837. Only the first three deposits, however, were made, that of October having been withheld. Three deposits were actually made, and the amounts of money which each of the twenty-six states received were as follows: Maine, $955,838; New Hampshire, $669,086; Vermont, $669,086; Massachusetts, $1,338,173; Connecticut, $764,670; Rhode Island, $382,335; New York, $4,014,520; Pennsylvania, $2,867,514; New Jersey, $764,670; Ohio, $2,007,260; Indiana, $860,254; Illinois, $477,919; Michigan, $286,751; Delaware, $286,571; Maryland, $955,838; Virginia, $2,198,427; North Carolina, $1,433,757; South Carolina, $1,051,122; Georgia, $1,051,422; Alabama, $669,086; Louisiana, $177,919; Mississippi, $382,335; Tennessee, $1,433,757; Kentucky, $1,433,757; Missouri, $382,335; Arkansas, $286,751. Total, $28,101,633.

It is a very singular fact that the records of the treasury department do not show that any demand has ever been made on the states for the repayment of this money. It seems to be the general opinion that an act of congress would be necessary before steps could be taken to compel a repayment, but whether such an act will be passed is extremely doubtful in view of the fact that the representatives of the twenty-six states in both houses would be interested in its defeat.

THE PRESIDENT'S MESSAGE.

The following is the annual message of the president, delivered at the opening of the first session of the LIVth congress, Dec. 3, 1895:

To the Congress of the United States: The present assemblage of the legislative branch of our government occurs at a time when the interests of our people and the needs of the country give especial prominence to the condition of our foreign relations and the exigencies of our national finances. The reports of the heads of the several administrative departments of the government fully and plainly exhibit what has been accomplished within the scope of their respective duties, and present such recommendations for the betterment of our country's condition as patriotic and intelligent labor and observation suggest. I therefore deem my executive duty adequately performed at this time by presenting to congress the important phases of our situation as related to our intercourse with foreign nations, and a statement of the financial problems which confront us, omitting, except as they are related to these topics, any reference to departmental operations.

I earnestly invite, however, not only the careful consideration but the severely critical scrutiny of the congress and my fellow-countrymen to the reports concerning these departmental operations. If justly and fairly examined they will furnish proof of assiduous and painstaking care for the public welfare. I press the recommendations they contain upon the respectful attention of those charged with the duty of legislation, because I believe their adoption would promote the people's good.

By amendatory tariff legislation in January last the Argentine Republic, recognizing the value of the large market opened to the free importation of its wools under our last tariff act, has admitted certain products of the United States to entry at reduced duties. It is pleasing to note that the efforts we have made to enlarge the exchanges of trade on a sound basis of mutual benefit are in this instance appreciated by the country from which our woolen factories draw their needful supply of raw material.

The boundary dispute between the Argentine Republic and Brazil, referred to the president of the United States as arbitrator during the term of my predecessor, and which was submitted to me for determination, resulted in an award in favor of Brazil upon the historical and documentary evidence presented, thus ending a long-protracted controversy and again demonstrating the wisdom and desirability of settling international boundary disputes by recourse to friendly arbitration.

Negotiations are progressing for a revival of the United States and Chilean claims commission, whose work was abruptly terminated last year by the expiration of the stipulated time within which awards could be made. The resumption of specie payments by Chile is a step of great interest and importance both in its direct consequences upon her own welfare and as evincing the ascendency of sound financial principles in one of the most influential of the South American republics.

PROTECTION OF MISSIONARIES IN CHINA.

The close of the momentous struggle between China and Japan, while relieving the diplomatic agents of this government from the delicate duty they undertook at the request of both countries of rendering such service to the subjects of either belligerent within the territorial limits of the other as our neutral position permitted, developed a domestic condition in the Chinese empire which has caused much anxiety and called for prompt and careful attention. Either as a result of a weak control by the central government over the provincial administrations, following a diminution of traditional governmental authority under the stress of an overwhelming national disaster, or as a manifestation upon good opportunity of the aversion of the Chinese population to all foreign ways and undertakings, there have occurred in widely separated provinces of China serious outbreaks of the old fanatical spirit against foreigners, which, unchecked by the local authorities, if not actually connived at by them, have culminated in mob attacks on foreign missionary stations, causing much destruction of property and attended with personal injuries as well as loss of life.

Although but one American citizen was reported to have been actually wounded, and although the destruction of property may have fallen more heavily upon the missionaries of other nationalities than our own, it plainly behooved this government to take the most prompt and decided action to guard against similar or perhaps more dreadful calamities befalling the hundreds of American mission stations which have grown up throughout the interior of China under the temperate rule of toleration, custom and imperial edict. The demands of the United States and other powers for the degradation and punishment of the responsible officials of the respective cities and provinces, who, by neglect or otherwise, had permitted uprisings, and for the adoption of stern measures by the emperor's government for the protection of the life and property of foreigners, were followed by the disgrace and dismissal of certain provincial officials found derelict in duty and the punishment by death of a number of those adjudged guilty of actual participation in the outrages.

This government also insisted that a special American commission should visit the province where the first disturbances occurred, for the purpose of investigation. This latter commission, formed after much opposition, has gone overland from Tien-Tsin, accompanied by a suitable Chinese escort, and, by its demonstration of the readiness and ability of our government to protect its citizens, will act, it is believed, as a most influential deterrent of any similar outbreaks.

The energetic steps we have thus taken are all the more likely to result in future safety to our citizens in China, because the imperial government is, I am persuaded, entirely convinced that we desire only the liberty and protection of our own citizens and redress for any wrongs they may have suffered, and that we have no ulterior designs or objects, political or otherwise. China will not forget either our kindly service to her citizens during her late war, nor the further fact that, while furnishing all the facilities at our command to further the negotiation of a peace between her and Japan, we sought no advantages and interposed no counsel.

The governments of both China and Japan have, in special dispatches transmitted through their respective diplomatic representatives, expressed in the most pleasing manner their grateful appreciation of our assistance to their citizens during the unhappy struggle and of the value of our aid in paving the way to their resumption of peaceful relations.

THE CASE OF EX-CONSUL WALLER.

The customary cordial relations between this country and France have been undis-

turbed, with the exception that a full explanation of the treatment of John L. Waller by the expeditionary military authorities of France still remains to be given. Mr. Waller, formerly United States consul at Tamatave, remained in Madagascar after his term of office expired and was apparently successful in procuring business concessions from the Hovas of greater or less value. After the occupation of Tamatave and the declaration of martial law by the French he was arrested upon various charges, among them that of communicating military information to the enemies of France, was tried and convicted by a military tribunal and sentenced to twenty years' imprisonment. Following the course justified by abundant precedents, this government requested from that of France the record of the proceedings of the French tribunal which resulted in Mr. Waller's condemnation. This request has been complied with to the extent of supplying a copy of the official record, from which appear the constitution and organization of the court, the charges as formulated and the general course and result of the trial, and by which it is shown that the accused was tried in open court and was defended by counsel. But the evidence adduced in support of the charges—which was not received by the French minister for foreign affairs till the first week in October—has thus far been withheld, the French government taking the ground that its production in response to our demand would establish a precedent. The efforts of our ambassador to procure it, however, though impeded by recent changes in the French ministry, have not been relaxed, and it is confidently expected that some satisfactory solution of the matter will shortly be reached. Meanwhile it appears that Mr. Waller's confinement has every alleviation which the state of his health and all the other circumstances of the case demand or permit.

In agreeable contrast to the difference above noted respecting a matter of common concern, where nothing is sought except such a mutually satisfactory outcome as the true merits of the case require, is the recent resolution of the French chambers favoring the conclusion of a permanent treaty of arbitration between the two countries.

An invitation has been extended by France to the government and people of the United States to participate in a great international exposition at Paris in 1900, as a suitable commemoration of the close of this the world's marvelous century of progress. I heartily recommend its acceptance, together with such legislation as will adequately provide for a due representation of this government and its people on the occasion.

EXCLUSION OF AMERICAN FOOD PRODUCTS.

Our relations with the states of the German empire are, in some aspects, typical of a condition of things elsewhere found in countries whose productions and trade are similar to our own. The close rivalries of competing industries, the influence of the delusive doctrine that the internal development of a nation is promoted and its wealth increased by a policy which, in undertaking to reserve its home markets for the exclusive use of its own producers, necessarily obstructs their sales in foreign markets and prevents free access to the products of the world; the desire to retain trade in time-worn ruts, regardless of the inexorable laws of new needs and changed conditions of demand and supply, and our own halting tardiness in inviting a freer exchange of commodities, and by this means imperiling our footing in the external markets naturally open to us, have created a situation somewhat injurious to American export interests, not only in Germany—where they are, perhaps, most noticeable—but in adjacent countries.

The exports affected are largely American cattle and other food products, the reason assigned for unfavorable discrimination being that their consumption is deleterious to the public health. This is all the more irritating in view of the fact that no European state is as jealous of the excellence and wholesomeness of its exported food supplies as the United States, nor so easily able, on account of inherent soundness, to guarantee those qualities.

Nor are these difficulties confined to our food products designed for exportation. Our great insurance companies, for example, having built up a vast business abroad and invested a large share of their gains in foreign countries, in compliance with the local laws and regulations there existing, now find themselves within a narrowing circle of onerous and unforeseen conditions and are confronted by the necessity of retirement from a field thus made unprofitable, if indeed they are not summarily expelled, as some of them have lately been from Prussia.

It is not to be forgotten that international trade cannot be one-sided. Its currents are alternating and its movements should be honestly reciprocal. Without this it almost necessarily degenerates into a device to gain advantage or a contrivance to secure benefits with only the semblance of a return. In our dealings with other nations we ought to be open-handed and scrupulously fair. This should be our policy as a producing nation, and it plainly becomes us as a people who love generosity and the moral aspects of national good faith and reciprocal forbearance.

These considerations should not, however, constrain us to submit to unfair discrimination nor to silently acquiesce in vexatious hindrances to the enjoyment of our share of the legitimate advantages of proper trade relations. If an examination of the situation suggests such measures on our part as would involve restrictions similar to those from which we suffer, the way to such a course is easy. It should, however, by no means be lightly entered upon, since the necessity for the inauguration of such a policy would be regretted by the best sentiment of our people, and because it naturally and logically might lead to consequences of the gravest character.

I take pleasure in calling to your attention the encomiums bestowed on those vessels of our new navy which took part in the notable ceremony of the opening of the Kiel canal. It was fitting that this extraordinary achievement of the newer German nationality should be celebrated in the presence of America's exposition of the latest developments of the world's naval energy.

THE BERING SEA DIFFICULTY.

Our relations with Great Britain, always intimate and important, have demanded during the last year even a greater share of consideration than is usual. Several vexatious questions were left undetermined by the decision of the Bering sea arbitration tribunal. The application of the principles laid down by that august body has not been followed by the results they were intended to accomplish, either because the principles themselves lacked in breadth and definiteness or because their execution has been more or less imperfect. Much correspondence has been exchanged between the two governments on the subject of preventing the exterminating slaughter of seals. The insufficiency of the British patrol of Bering sea under the regulations agreed on by the two governments has been pointed out, and yet only two British ships have been on police duty during this sea-

son in those waters. The need of a more effective enforcement of existing regulations, as well as the adoption of such additional regulations as experience has shown to be absolutely necessary to carry out the intent of the award, has been earnestly urged upon the British government, but thus far without effective results. Meantime the depletion of the seal herds by means of pelagic hunting has so alarmingly progressed that unless their slaughter is at once effectively checked their extinction within a few years seems to be a matter of absolute certainty.

The understanding by which the United States was to pay and Great Britain to receive a lump sum of $425,000 in full settlement of all British claims for damages arising from our seizure of British sealing vessels unauthorized under the award of the Paris tribunal of arbitration was not confirmed by the last congress, which declined to make the necessary appropriation. I am still of the opinion that this arrangement was a judicious and advantageous one for the government, and I earnestly recommend that it be again considered and sanctioned. If, however, this does not meet with the favor of congress, it certainly will hardly dissent from the proposition that the government is bound by every consideration of honor and good faith to provide for the speedy adjustment of these claims by arbitration as the only other alternative. A treaty of arbitration has therefore been agreed upon and will be immediately laid before the senate, so that in one of the modes suggested a final settlement may be reached.

Notwithstanding that Great Britain originated the proposal to enforce international rules for the prevention of collisions at sea, based on the recommendations of the maritime conference of Washington, and concurred in suggesting March 1, 1895, as the date to be set by proclamation for carrying these rules into general effect, her majesty's government, having encountered opposition on the part of British shipping interests, announced its inability to accept that date, which was consequently canceled. The entire matter is still in abeyance, without prospect of a better condition in the near future.

The commissioners appointed to mark the international boundary in Passamaquoddy bay according to the description of the treaty of Ghent have not yet fully agreed.

THE ALASKAN BOUNDARY.

The completion of the preliminary survey of that Alaskan boundary which follows the contour of the coast from the southernmost point of Prince of Wales island until it strikes the 141st meridian at or near the summit of Mount St. Elias awaits further necessary appropriation, which is urgently recommended. This survey was undertaken under the provisions of the convention entered into by this country and Great Britain July 22, 1892, and the supplementary convention of Feb. 3, 1894. As to the remaining section of the Alaskan boundary, which follows the 141st meridian northwardly from Mount St. Elias to the frozen ocean, the settlement of which involves the physical location of the meridian mentioned, no conventional agreement has yet been made. The ascertainment of a given meridian at a particular point is a work requiring much time and careful observations and surveys. Such observations and surveys were undertaken by the United States coast and geodetic survey in 1890 and 1891, while similar work in the same quarters under British auspices is believed to give nearly coincident results, but these surveys have been independently conducted and no international agreement to mark those or any other parts of the 141st meridian by permanent monuments has yet been made. In the meantime the valley of the Yukon is becoming a highway through the hitherto unexplored wilds of Alaska, and abundant mineral wealth has been discovered in that region, especially at or near the junction of the boundary meridian with the Yukon and its tributaries. In these circumstances it is expedient—and, indeed, imperative—that the jurisdictional limits of the respective governments in this new region be speedily determined. Her Britannic majesty's government has proposed a joint delimitation of the 141st meridian by an international commission of experts, which, if congress will authorize it and make due provisions therefor, can be accomplished with no unreasonable delay. It is impossible to overlook the vital importance of continuing the work already entered upon and supplementing it by further effective measures looking to the exact location of this entire boundary line.

I call attention to the unsatisfactory delimitation of the respective jurisdictions of the United States and the Dominion of Canada in the great lakes at the approaches to the narrow waters that connect them. The waters in question are frequented by fishermen of both nationalities and their nets are there used. Owing to the uncertainty and ignorance as to the true boundary, vexatious disputes and injurious seizures of boats and nets by Canadian cruisers often occur, while any positive settlement thereof by an accepted standard is not easily to be reached. A joint commission to determine the line in those quarters on a practical basis by measured courses following range marks on shore is a necessity for which immediate provision should be made.

MONROE DOCTRINE MAINTAINED.

It being apparent that the boundary dispute between Great Britain and the republic of Venezuela, concerning the limits of British Guiana, was approaching an acute stage, a definite statement of the interest and policy of the United States as regards the controversy seemed to be required both on its own account and in view of its relations with the friendly powers directly concerned. In July last, therefore, a dispatch was addressed to our ambassador at London for communication to the British government, in which the attitude of the United States was fully and distinctly set forth. The general conclusions therein reached and formulated are in substance that the traditional and established policy of this government is firmly opposed to a forcible increase by any European power of its territorial possessions on this continent; that this policy is as well founded in principle as it is strongly supported by numerous precedents; that as a consequence the United States is bound to protest against the enlargement of the area of British Guiana in derogation of the rights and against the will of Venezuela; that, considering the disparity in strength of Great Britain and Venezuela, the territorial dispute between them can be reasonably settled only by friendly and impartial arbitration, and that the resort to such arbitration should include the whole controversy, and is not satisfied if one of the powers concerned is permitted to draw an arbitrary line through the territory in debate and to declare that it will submit to arbitration only the portion lying on one side of it. In view of these conclusions the dispatch in question called upon the British government for a definite answer to the question whether it would or would not submit the territorial controversy between itself and Venezuela in its entirety to impartial arbitration.

The answer of the British government has not yet been received, but is expected shortly, when further communication on the subject will probably be made to congress.

THE DIFFERENCES WITH HAWAII.

Early in January last an uprising against the government of Hawaii was promptly suppressed. Martial law was forthwith proclaimed and numerous arrests were made of persons suspected of being in sympathy with the royalist party. Among these were several citizens of the United States, who were either convicted by a military court and sentenced to death, imprisonment or fine, or were deported without trial. The United States, while denying protection to such as had taken the Hawaiian oath of allegiance, insisted that martial law, though altering the forms of justice, could not supersede justice itself, and demanded stay of execution until the proceedings had been submitted to this government and knowledge obtained therefrom that our citizens had received fair trial. The death sentences were subsequently commuted or were remitted on condition of leaving the islands. The cases of certain Americans arrested and expelled by arbitrary order without formal charge or trial have had attention and in some instances have been found to justify remonstrance and a claim for indemnity, which Hawaii has not thus far conceded. Mr. Thurston, the Hawaiian minister, having furnished this government abundant reason for asking that he be recalled, that course was pursued, and his successor has lately been received.

PADRONE SYSTEM CONDEMNED.

The deplorable lynching of several Italian laborers in Colorado was naturally followed by international representations, and I am happy to say that the best efforts of the state in which the outrages occurred have been put forth to discover and punish the authors of this atrocious crime. The dependent families of some of the unfortunate victims invite by their deplorable condition gracious provision for their needs.

These manifestations against helpless aliens may be traced through successive stages to the vicious padrone system, which, unchecked by our immigration and contract-labor statutes, controls these workers from the moment of landing on our shores, and farms them out in distant and often rude regions, where their cheapening competition in the fields of bread-winning toil brings them into collision with other labor interests. While welcoming, as we should, those who seek our shores to merge themselves in our body politic and win personal competence by honest effort, we cannot regard such assemblages of distinctly alien laborers, hired out in the mass to the profit of alien speculators and shipped hither and thither as the prospect of gain may dictate, as otherwise than repugnant to the spirit of our civilization, deterrent to individual advancement and hindrances to the building up of stable communities, resting upon the wholesome ambitions of the citizens and constituting the prime factor in the prosperity and progress of our nation. If legislation can reach this growing evil it certainly should be attempted.

MINOR FOREIGN AFFAIRS.

Japan has furnished abundant evidence of her vast gain in every trait and characteristic that constitute a nation's greatness. We have reason for congratulation in the fact that the government of the United States, by the exchange of liberal treaty stipulations with the new Japan, was first to recognize her wonderful advance and to extend to her the consideration and confidence due to her national enlightenment and progressive character.

The boundary dispute which lately threatened to embroil Guatemala and Mexico has happily yielded to pacific counsels, and its determination has, by the joint agreement of the parties, been submitted to the sole arbitration of the United States minister to Mexico.

The commission appointed under the convention of Feb. 18, 1889, to set new monuments along the boundary between the United States and Mexico has completed its task.

As a sequel to the failure of a scheme for the colonization in Mexico of negroes, mostly emigrants from Alabama, under contract, a great number of these helpless and suffering people, starving and smitten with contagious disease, made their way or were assisted to the frontier, where, in wretched plight, they were quarantined by the Texas authorities. Learning of their destitute condition, I directed rations to be temporarily furnished them through the war department. At the expiration of their quarantine they were conveyed by the railway companies, at comparatively nominal rates, to their homes in Alabama, upon my assurance, in the absence of any fund available for the cost of their transportation, that I would recommend to congress an appropriation for its payment. I now strongly urge upon congress the propriety of making such an appropriation. It should be remembered that the measures taken were dictated not only by sympathy and humanity, but by a conviction that it was not compatible with the dignity of this government that so large a body of our dependent citizens should be thrown for relief upon the charity of a neighboring state.

In last year's message I narrated at some length the jurisdictional questions then freshly arisen in the Mosquito Indian strip of Nicaragua. Since that time, by the voluntary act of the Mosquito nation, the territory reserved to them has been incorporated with Nicaragua, the Indians formally subjecting themselves to be governed by the general laws and regulations of the republic instead of by their own customs and regulations, and thus availing themselves of a privilege secured to them by the treaty between Nicaragua and Great Britain of Jan. 28, 1860.

After this extension of uniform Nicaraguan administration to the Mosquito strip the case of the British vice-consul, Hatch, and of several of his countrymen, who had been summarily expelled from Nicaragua and treated with considerable indignity, provoked a claim by Great Britain upon Nicaragua for pecuniary indemnity, which, upon Nicaragua's refusal to admit liability, was enforced by Great Britain. While the sovereignty and jurisdiction of Nicaragua were in no way questioned by Great Britain, the former's arbitrary conduct in regard to British subjects furnished the ground for this proceeding. A British naval force occupied without resistance the Pacific seaport of Corinto, but was soon after withdrawn upon the promise that the sum demanded would be paid.

Throughout this incident the kindly offices of the United States were invoked and were employed in favor of as peaceful a settlement and as much consideration and indulgence toward Nicaragua as were consistent with the nature of the case. Our efforts have since been made the subject of appreciative and grateful recognition by Nicaragua.

RUSSIA AND SAMOA.

The coronation of the czar of Russia at Moscow in May next invites the ceremonial participation of the United States, and in accordance with usage and diplomatic propriety our minister to the imperial court has been directed to represent our government on the occasion.

Correspondence is on foot touching the practice of Russian consuls within the jurisdiction of the United States to interrogate citizens as to their race and religious faith, and upon ascertainment thereof to deny to

Jews authentication of passports or legal documents for use in Russia. Inasmuch as such a proceeding imposes a disability which, in the case of succession to property in Russia, may be found to infringe the treaty rights of our citizens, and which is an obnoxious invasion of our territorial jurisdiction, it has elicited fitting remonstrance, the result of which, it is hoped, will remove the cause of complaint.

The pending claims of sealing vessels of the United States seized in Russian waters remain unadjusted. Our recent convention with Russia establishing a modus vivendi as to imperial jurisdiction in such cases has prevented further difficulty of this nature. The Russian government has welcomed in principle our suggestion for a modus vivendi, to embrace Great Britain and Japan, looking to the better preservation of seal life in the North Pacific and the Bering sea, and the extension of the protected area defined by the Paris tribunal to all Pacific waters north of the 35th parallel. It is especially noticeable that Russia favors prohibition of the use of firearms in seal-hunting throughout the proposed area and a longer closed season for pelagic sealing.

In my last two annual messages I called the attention of the congress to the position we occupied as one of the parties to a treaty or agreement by which we became jointly bound with England and Germany to so interfere with the government and control of Samoa as in effect to assume the management of its affairs. On the 9th day of May, 1894, I transmitted to the senate a special message, with accompanying documents, giving information on the subject, and emphasizing the opinion I have at all times entertained, that our situation in this matter was inconsistent with the mission and traditions of our government, in violation of the principles we profess and in all its phases mischievous and vexatious. I again press this subject upon the attention of the congress and ask for such legislative action or expression as will lead the way to our relief from obligations both irksome and unnatural.

INTERFERENCE WITH CUBA.

Cuba is again gravely disturbed. An insurrection, in some respects more active than the last preceding revolt, which continued from 1868 to 1878, now exists in a large part of the eastern interior of the island, menacing even some populations on the coast. Besides deranging the commercial exchanges of the island, of which our country takes the predominant share, this flagrant condition of hostilities, by arousing sentimental sympathy and inciting adventurous support among our people, has entailed earnest effort on the part of this government to enforce obedience to our neutrality laws and to prevent the territory of the United States from being abused as a vantage ground from which to aid those in arms against Spanish sovereignty.

Whatever may be the traditional sympathy of our countrymen as individuals with a people who seem to be struggling for larger autonomy and greater freedom, deepened as such sympathy naturally must be in behalf of our neighbors, yet the plain duty of their government is to observe in good faith the recognized obligations of international relationship. The performance of this duty should not be made more difficult by a disregard on the part of our citizens of the obligations growing out of their allegiance to their country, which should restrain them from violating as individuals the neutrality which the nation of which they are members is bound to observe in its relations to friendly sovereign states.

Though neither the warmth of our people's sympathy with the Cuban insurgents, nor our loss and material damage consequent upon the futile endeavors thus far made to restore peace and order, nor any shock our humane sensibilities may have received from the cruelties which appear to especially characterize this sanguinary and fiercely conducted war, has in the least shaken the determination of the government to honestly fulfill every international obligation, yet it is to be earnestly hoped on every ground that the devastation of armed conflict may speedily be stayed, and order and quiet restored to the distracted island, bringing in their train the activity and thrift of peaceful pursuits.

One notable instance of interference by Spain with passing American ships has occurred. On March 8 last the Allianca, while bound from Colon to New York, and following the customary track for vessels near the Cuban shore, but outside the three-mile limit, was fired upon by a Spanish gunboat. Protest was promptly made by the United States against this act as not being justified by a state of war, nor permissible in respect of vessels on the usual paths of commerce, nor tolerable in view of the wanton peril occasioned to innocent life and property. The act was disavowed, with full expression of regret and assurance of non-recurrence of such just cause of complant, while the offending officer was relieved of his command.

Military arrests of citizens of the United States in Cuba have occasioned frequent reclamations. Where held on criminal charges their delivery to the ordinary civil jurisdiction for trial has been demanded and obtained in conformity with treaty provisions, and where merely detained by way of military precaution under a proclaimed state of siege, without formulated accusation, their release or trial has been insisted upon. The right of American consular officers in the island to prefer protests and demands in such cases having been questioned by the insular authorities, their enjoyment of the privilege stipulated by treaty for the consuls of Germany was claimed under the most-favored-nation provision of our own convention and was promptly recognized.

The long-standing demand of Antonio Maximo Mora against Spain has at last been settled by the payment on Sept. 14 last of the sum originally agreed upon in liquidation of the claim. Its distribution among the parties entitled to receive it has proceeded as rapidly as the rights of those claiming the fund could be safely determined.

The enforcement of differential duties against products of this country exported to Cuba and Puerto Rico prompted the immediate claim on our part to the benefit of the minimum tariff of Spain in return for the most favorable treatment permitted by our laws as regards the production of Spanish territories. A commercial arrangement was concluded in January last securing the treatment so claimed.

Vigorous protests against excessive fines imposed on our ships and merchandise by the customs officers of these islands for trivial errors have resulted in the remission of such fines in instances where the equity of the complaint was apparent, though the vexatious practice has not been wholly discontinued.

MASSACRE OF CHRISTIANS IN ARMENIA.

Occurrences in Turkey have continued to excite concern. The reported massacres of Christians in Armenia and the development there and in other districts of a spirit of fanatic hostility to Christian influences naturally excited apprehension for the safety of the devoted men and women who as dependents of the foreign missionary societies in the United States reside in Turkey under the

guaranty of law and usage and in the legitimate performance of their educational and religious mission. No efforts have been spared in their behalf, and their protection in person and property has been earnestly and vigorously enforced by every means within our power. I regret, however, that an attempt on our part to obtain better information concerning the true condition of affairs in the disturbed quarter of the Ottoman empire by sending thither the United States consul at Sivas to make investigation and report was thwarted by the objections of the Turkish government. This movement on our part was in no sense meant as a gratuitous entanglement of the United States in the so-called eastern question nor as an officious interference with the right and duty which belong by treaty to certain great European powers calling for their intervention in political matters affecting the good government and religious freedom of the non-Mussulman subjects of the sultan, but it arose solely from our desire to have an accurate knowledge of the conditions in our efforts to care for those entitled to our protection.

The presence of our naval vessels, which are now in the vicinity of the disturbed localities, affords opportunities to acquire a measure of familiarity with the condition of affairs that will enable us to take suitable steps for the protection of any interests of our countrymen within reach of our ships that might be found imperiled.

The Ottoman government has lately issued an imperial irade exempting forever from taxation an American college for girls at Scutari. Repeated assurances have also been obtained by our envoy at Constantinople that similar institutions maintained and administered by our countrymen shall be secured in the enjoyment of all rights and that our citizens throughout the empire shall be protected. The government, however, in view of existing facts, is far from relying upon such assurances as the limit of its duty. Our minister has been vigilant and alert in affording all possible protection in individual cases where danger threatened or safety was imperiled. We have sent ships as far toward the points of actual disturbance as it is possible for them to go, where they offer refuge to those obliged to flee, and we have the promise of other powers which have ships in the neighborhood that our citizens as well as theirs will be received and protected on board their ships.

On the demand of our minister orders have been issued by the sultan that Turkish soldiers shall guard and escort to the coast American refugees. These orders have been carried out, and our latest intelligence gives assurance of the present personal safety of our citizens and missionaries. Though thus far no lives of American citizens have been sacrificed, there can be no doubt that serious loss and destruction of mission property have resulted from riotous conflicts and outrageous attacks.

By treaty several of the most powerful European powers have secured a right and have assumed a duty not only in behalf of their own citizens and in furtherance of their own interests but as agents of the Christian world. The right is to enforce such conduct of the Turkish government as will restrain fanatical brutality, and if this fails their duty is to so interfere as to insure against such dreadful occurrences in Turkey as have lately shocked civilization. The powers declare this right and this duty to be theirs alone, and it is earnestly hoped that prompt and effective action on their part will not be delayed.

The new consulates at Erzeroum and Harpoot, for which appropriation was made last session, have been provisionally filled by trusted employes of the department of state. These appointees, though now in Turkey, have not yet received their exequaturs.

The arbitration of the claims of the Venezuela Steam Transportation company under the treaty of Jan. 19, 1892, between the United States and Venezuela, resulted in an award in favor of the claimant.

The government has used its good offices toward composing the differences between Venezuela on the one hand and France and Belgium on the other, growing out of the dismissal of the representatives of those powers on the ground of a publication deemed offensive to Venezuela. Although that dismissal was coupled with a cordial request that other more personally agreeable envoys be sent in their stead, a rupture of intercourse ensued and still continues.

CONSULAR AND DIPLOMATIC SERVICE.

In view of the growth of our interests in foreign countries and the encouraging prospects for a general expansion of our commerce, the question of an improvement in the consular service has increased in importance and urgency. Though there is no doubt that the great body of consular officers is rendering valuable services to the trade and industries of the country, the need of some plan of appointment and control which would tend to secure a higher average of efficiency is not denied. The importance of the subject has led the executive to consider what steps might properly be taken without additional legislation to answer the need of a better system of consular appointment. The matter having been committed to the consideration of the secretary of state, in pursuance of his recommendations an executive order was issued on the 20th of September, 1895, by the terms of which it is provided that after that date any vacancy in a consulate or commercial agency, with an annual salary or compensation from official fees of not more than $2,500 or less than $1,000, should be filled either by transfer or promotion from some other position under the department of state of a character tending to qualify the incumbent for the position to be filled, or by the appointment of a person not under the department of state, but having previously served thereunder and shown his capacity and fitness for consular duty, or by the appointment of a person who, having been selected by the president and sent to a board for examination, is found, upon such examination, to be qualified for the position.

Posts which pay less than $1,000 being usually, on account of their small compensation, filled by selection from residents of the locality, it was not deemed practicable to put them under the new system. The compensation of $2,500 was adopted as the maximum limit in the classification for the reason that consular officers receiving more than that sum are often charged with functions and duties scarcely inferior in dignity and importance to those of diplomatic agents, and it was, therefore, thought best to continue their selection in the discretion of the executive without subjecting them to examination before a board. Excluding seventy-one places with compensation at present less than $1,000, and fifty-three places above the maximum in compensation, the number of positions remaining within the scope of the order is 196. This number will undoubtedly be increased by the inclusion of consular officers whose remuneration in fees, now less than $1,000, will be augmented with the growth of our foreign commerce and a return to more favorable business conditions.

In execution of the executive order referred to, the secretary of state has designated

as a board to conduct the prescribed examinations the third assistant secretary of state, the solicitor of the department of state, and the chief of the consular bureau, and has specified the subjects to which such examinations shall relate.

It is not assumed that this system will prove a full measure of consular reform. It is quite probable that actual experience will show particulars in which the order already issued may be amended, and demonstrate that, for the best results, appropriate legislation by congress is imperatively required. In any event these efforts to improve the consular service ought to be immediately supplemented by legislation providing for consular inspection. This has frequently been a subject of executive recommendation, and I again urge such action by congress as will permit the frequent and thorough inspection of consulates by officers appointed for that purpose or by persons already in the diplomatic or consular service. The expense attending such a plan would be insignificant compared with its usefulness, and I hope the legislation necessary to set it on foot will be speedily forthcoming.

I am thoroughly convinced that in addition to their salaries our ambassadors and ministers at foreign courts should be provided by the government with official residences. The salaries of these officers are comparatively small, and in most cases insufficient to pay, with other necessary expenses, the cost of maintaining household establishments in keeping with their important and delicate functions. The usefulness of a nation's diplomatic representative undeniably depends much upon the appropriateness of his surroundings, and a country like ours, while avoiding unnecessary glitter and show, should be certain that it does not suffer in its relations with foreign nations through parsimony and shabbiness in its diplomatic outfit. These considerations and the other advantages of having fixed and somewhat permanent locations for our embassies would abundantly justify the moderate expenditure necessary to carry out this suggestion.

THE NATIONAL FINANCES.

As we turn from a review of our foreign relations to the contemplation of our national financial situation we are immediately aware that we approach a subject of domestic concern more important than any other that can engage our attention, and one at present in such a perplexing and delicate predicament as to require prompt and wise treatment. We may well be encouraged to earnest effort in this direction when we recall the steps already taken toward improving our economic and financial situation, and when we appreciate how well the way has been prepared for further progress by an aroused and intelligent popular interest in these subjects.

By command of the people a customs revenue system designed for the protection and benefit of favored classes at the expense of the great mass of our countrymen, and which, while inefficient for the purpose of revenue, curtailed our trade relations and impeded our entrance to the markets of the world, has been superseded by a tariff policy which in principle is based upon a denial of the right of the government to obstruct the avenues to our people's cheap living or lessen their comfort and contentment for the sake of according especial advantages to favorites, and which, while encouraging our intercourse and trade with other nations, recognizes the fact that American self-reliance, thrift and ingenuity can build up our country's industries and develop its resources more surely than enervating paternalism.

The compulsory purchase and coinage of silver by the government, unchecked and unregulated by business conditions and heedless of our currency needs, which for more than fifteen years diluted our circulating medium, undermined confidence abroad in our financial ability and at last culminated in distress and panic at home, has been recently stopped by the repeal of the laws which forced this reckless scheme upon the country. The things thus accomplished, notwithstanding their extreme importance and beneficent effects, fall far short of curing the monetary evils from which we suffer as a result of long indulgence in ill-advised financial expedients.

OUTSTANDING UNITED STATES NOTES.

The currency denominated United States notes and commonly known as greenbacks was issued in large volume during the late civil war and was intended originally to meet the exigencies of that period. It will be seen by a reference to the debates in congress at the time the laws were passed authorizing the issue of these notes that their advocates declared they were intended for only temporary use and to meet the emergency of war. In almost if not all the laws relating to them some provision was made contemplating their voluntary or compulsory retirement. A large quantity of them, however, was kept on foot and mingled with the currency of the country, so that at the close of the year 1874 they amounted to $381,999,073. Immediately after that date and in January, 1875, a law was passed providing for the resumption of specie payments, by which the secretary of the treasury was required, whenever additional circulation was issued to national banks, to retire United States notes equal in amount to 80 per cent of such additional national-bank circulation until such notes were reduced to $300,000,000. This law further provided that on and after Jan. 1, 1879, the United States notes then outstanding should be redeemed in coin, and in order to provide and prepare for such redemption the secretary of the treasury was authorized not only to use any surplus revenues of the government but to issue bonds of the United States and to dispose of them for coin, and to use the proceeds for the purposes contemplated by the statute.

In May, 1878, and before the date thus appointed for the redemption and retirement of these notes, another statute was passed forbidding their further cancellation and retirement. Some of them had, however, been previously redeemed and canceled upon the issue of additional national-bank circulation as permitted by the law of 1875, so that the amount outstanding at the time of the passage of the act forbidding their further retirement was $346,681,016.

The law of 1878 did not stop at distinct prohibition, but contained in addition the following express provision:

"And when any of said notes may be redeemed or received into the treasury under any law, from any source whatever, and shall belong to the United States, they shall not be retired, canceled or destroyed, but they shall be reissued and paid out again and kept in circulation."

This was the condition of affairs on Jan. 1, 1879, which had been fixed upon four years before as the date for entering upon the redemption and retirement of all these notes, and for which such abundant means had been provided. The government was put in the anomalous situation of owing to the holders of its notes debts payable in gold on demand which could neither be retired by receiving such notes in discharge of obligations due the government nor canceled by actual payment in gold. It was forced to redeem without redemption and to pay without acquittance.

There had been issued and sold $495,500,000 of the bonds authorized by the resumption act of 1875, the proceeds of which, together with other gold in the treasury, created a gold fund deemed sufficient to meet the demands which might be made upon it for the redemption of the outstanding United States notes. This fund, together with such other gold as might be from time to time in the treasury available for the same purpose, has been since called our gold reserve, and $100,000,000 has been regarded as an adequate amount to accomplish its object. This fund amounted on the 1st day of January, 1879, to $114,193,360, and though thereafter constantly fluctuating it did not fall below that sum until July, 1892. In April, 1893 for the first time since its establishment, this reserve amounted to less than $100,000,000, containing at that date only $97,011,330.

Meantime, and in July, 1890, an act had been passed directing larger governmental monthly purchases of silver than had been required under previous laws, and providing that, in payment for such silver, treasury notes of the United States should be issued payable on demand in gold or silver coin at the discretion of the secretary of the treasury. It was, however, declared in the act to be "the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio, or such ratio as may be provided by law."

In view of this declaration it was not deemed permissible for the secretary of the treasury to exercise the discretion in terms conferred on him by refusing to pay gold on these notes when demanded, because by such discrimination in favor of the gold dollar the so-called parity of the two metals would be destroyed and grave and dangerous consequences would be precipitated by affirming or accentuating the constantly widening disparity between their actual values under the existing ratio. It thus resulted that the treasury notes issued in payment of silver purchases under the law of 1890 were necessarily treated as gold obligations at the option of the holder. These notes, on the 1st day of November, 1893, when the law compelling the monthly purchase of silver was repealed, amounted to more than $155,000,000. The notes of this description now outstanding, added to the United States notes still undiminished by redemption or cancellation, constitute a volume of gold obligations amounting to nearly $500,000,000. These obligations are the instruments which, ever since we have had a gold reserve, have been used to deplete it.

GOLD RESERVE AND BOND ISSUES.

This [gold] reserve, as has been stated, had fallen in April, 1893, to $97,011,330. It has from that time to the present, with very few and unimportant upward movements, steadily decreased, except as it has been temporarily replenished by the sale of bonds. Among the causes for this constant and uniform shrinkage in this fund may be mentioned the great falling off of exports under the operation of the tariff law until recently in force, which crippled our exchange of commodities with foreign nations and necessitated, to some extent, the payment of our balances in gold; the unnatural infusion of silver into our currency and the increasing agitation for its free and unlimited coinage, which have created apprehension as to our disposition or ability to continue gold payments; the consequent hoarding of gold at home and the stoppage of investments of foreign capital, as well as the return of our securities already sold abroad; and the high rate of foreign exchange, which induced the shipment of our gold to be drawn against as a matter of speculation.

In consequence of these conditions the gold reserve on the 1st day of February, 1894, was reduced to $65,438,377, having lost more than $31,000,000 during the preceding nine months, or since April, 1893. Its replenishment being necessary and no other manner of accomplishing it being possible, resort was had to the issue and sale of bonds provided for by the resumption act of 1875. Fifty millions of these bonds were sold, yielding $58,633,205.71, which was added to the reserve fund of gold then on hand. As a result of this operation this reserve, which had suffered constant and large withdrawals meantime, stood, on the 6th day of March, 1894, at the sum of $107,446,802. Its depletion was, however, immediately thereafter so accelerated that on the 30th day of June, 1894, it had fallen to $64,873,025, thus losing by withdrawals more than $42,000,000 in five months and dropping slightly below its situation when the sale of $50,000,000 in bonds was effected for its replenishment.

This depressed condition grew worse, and on the 24th day of November, 1894, our gold reserve being reduced to $57,669,701, it became necessary to again strengthen it. This was done by another sale of bonds amounting to $50,000,000, from which there was realized $58,538,500, with which the fund was increased to $111,142,021 on the 4th day of December, 1894.

Again disappointment awaited the anxious hope for relief. There was not even a lull in the exasperating withdrawals of gold. On the contrary, they grew larger and more persistent than ever. Between the 4th day of December, 1894, and early in February, 1895, a period of scarcely more than two months after the second re-enforcement of our gold reserve by the sale of bonds, it had lost by such withdrawals more than $69,000,000 and had fallen to $41,340,181. Nearly $43,000,000 had been withdrawn within the month immediately preceding this situation. In anticipation of impending trouble I had on the 28th day of January, 1895, addressed a communication to congress fully setting forth our difficulties and dangerous position and earnestly recommending that authority be given the secretary of the treasury to issue bonds bearing a low rate of interest payable by their terms in gold for the purpose of maintaining a sufficient gold reserve and also for the redemption and cancellation of outstanding United States notes and the treasury notes issued for purchase of silver under the law of 1890. This recommendation did not, however, meet with legislative approval.

A CRITICAL SITUATION.

In February, 1895, therefore, the situation was exceedingly critical. With a reserve perilously low and a refusal of congressional aid, everything indicated that the end of gold payments by the government was imminent. The results of prior bond issues had been exceedingly unsatisfactory, and the large withdrawals of gold immediately succeeding their public sale in open market gave rise to a reasonable suspicion that a large part of the gold paid into the treasury upon such sales was promptly drawn out again by the presentation of United States notes or treasury notes and found its way to the hands of those who had only temporarily parted with it in the purchase of bonds.

In this emergency and in view of its surrounding perplexities it became entirely apparent to those upon whom the struggle for safety was devolved not only that our gold reserve must for the third time in less than thirteen months be restored by another issue and sale of bonds bearing a high rate of interest and badly suited to the purpose, but that a plan must be adopted for their disposition promising better results than those realized on previous sales. An agreement was

therefore made with a number of financiers and bankers whereby it was stipulated that bonds described in the resumption act of 1875, payable in coin thirty years after their date, bearing interest at the rate of 4 per cent per annum and amounting to about $60,000,000, should be exchanged for gold, receivable by weight, amounting to a little more than $65,000,000. This gold was to be delivered in such installments as would complete its delivery within about six months from the date of the contract, and at least one-half of the amount was to be furnished from abroad.

It was also agreed by those supplying this gold that during the continuance of the contract they would by every means in their power protect the government against gold withdrawals. The contract also provided that if congress would authorize their issue bonds payable by their terms in gold and bearing interest at the rate of 3 per cent per annum might within ten days be substituted at par for the 4 per cent bonds described in the agreement.

On the day this contract was made its terms were communicated to congress by a special executive message, in which it was stated that more than $16,000,000 would be saved to the government if gold bonds bearing 3 per cent interest were authorized to be substituted for those mentioned in the contract.

The congress having declined to grant the necessary authority to secure this saving, the contract, unmodified, was carried out, resulting in a gold reserve amounting to $107,571,230 on July 8, 1895. The performance of this contract not only restored the reserve but checked for a time the withdrawals of gold and brought on a period of restored confidence and such peace and quiet in business circles as were of the greatest possible value to every interest that affects our people.

I have never had the slightest misgiving concerning the wisdom or propriety of this arrangement, and am quite willing to answer for my full share of responsibility for its promotion. I believe it averted a disaster the imminence of which was fortunately not at the time generally understood by our people.

Though the contract mentioned stayed for a time the tide of gold withdrawal, its good results could not be permanent. Recent withdrawals have reduced the reserve from $107,557,230 on July 8, 1895, to $79,333,966. How long it will remain large enough to render its increase unnecessary is only a matter of conjecture, though quite large withdrawals for shipment in the immediate future are predicted in well-informed quarters. About $16,000,000 has been withdrawn during the month of November.

RETIREMENT OF GREENBACKS.

The foregoing statement of events and conditions develops the fact that after increasing our interest-bearing bonded indebtedness more than $162,000,000 to save our gold reserve we are nearly where we started, having now in such reserve $79,333,966, as against $65,438,377 in February, 1894, when the first bonds were issued.

Though the amount of gold drawn from the treasury appears to be very large, as gathered from the facts and figures herein presented, it actually was much larger, considerable sums having been acquired by the treasury within the several periods stated without the issue of bonds. On Jan. 28, 1895, it was reported by the secretary of the treasury that more than $172,000,000 of gold had been withdrawn for hoarding or shipment during the year preceding. He now reports that from Jan. 1, 1879, to July 14, 1890, a period of more than eleven years, only a little over $28,000,000 was withdrawn, and that between July 14, 1890, the date of the passage of the law for an increased purchase of silver, and Dec. 1, 1895, or within less than five and a half years, there was withdrawn nearly $375,000,000, making a total of more than $403,000,000 drawn from the treasury in gold since Jan. 1, 1879, the date fixed in 1875 for the retirement of the United States notes. Nearly $327,000,000 of the gold thus withdrawn has been paid out on these United States notes, and yet every one of the $346,000,000 is still uncanceled and ready to do service in future gold depletions.

More than $76,000,000 in gold has, since their creation in 1890, been paid out from the treasury upon the notes given on the purchase of silver by the government, and yet the whole, amounting to $155,000,000, except a little more than $16,000,000 which has been retired by exchanges for silver at the request of the holders, remains outstanding and prepared to join their older and more experienced allies in future raids upon the treasury's gold reserve. In other words, the government has paid in gold more than nine-tenths of its United States notes and still owes them all. It has paid in gold about one-half of its notes given for silver purchases without extinguishing by such payment one dollar of these notes.

When added to all this, we are reminded that to carry on this astounding financial scheme the government has incurred a bonded indebtedness of $95,500,000 in establishing a gold reserve and of $162,315,400 in efforts to maintain it; that the annual interest charge on such bonded indebtedness is more than $11,000,000; that a continuance in our present course may result in further bond issues, and that we have suffered or are threatened with all this for the sake of supplying gold for foreign shipment or facilitating its hoarding at home, a situation is exhibited which certainly ought to arrest attention and provoke immediate legislative relief.

I am convinced the only thorough and practical remedy for our troubles is found in the retirement and cancellation of our United States notes, commonly called greenbacks, and the outstanding treasury notes issued by the government in payment of silver purchases under the act of 1890. I believe this could be quite readily accomplished by the exchange of these notes for United States bonds of small as well as large denominations, bearing a low rate of interest. They should be long-term bonds, thus increasing their desirability as investments and because their payment could be well postponed to a period far removed from present financial burdens and perplexities, when with increased prosperity and resources they would be more easily met.

To further insure the cancellation of these notes and also provide a way by which gold may be added to our currency in lieu of them, a feature in the plan should be an authority given to the secretary of the treasury to dispose of the bonds abroad for gold if necessary to complete the contemplated redemption and cancellation, permitting him to use the proceeds of such bonds to take up and cancel any of the notes that may be in the treasury or that may be received by the government on any account.

The increase of our bonded debt involved in this plan would be amply compensated by renewed activity and enterprise in all business circles, the restored confidence at home, the reinstated faith in our monetary strength abroad and the stimulation of every interest and industry that would follow the cancellation of the gold-demand obligations now afflicting us. In any event, the bonds proposed would stand for the extinguishment of a troublesome indebtedness, while in the path we now follow there lurks the menace of un-

ending bonds, with our indebtedness still undischarged and aggravated in every feature. The obligations necessary to fund this indebtedness would not equal in amount those from which we have been relieved since 1884 by anticipation and payment beyond the requirements of the sinking fund out of our surplus revenues.

NATIONAL-BANK CIRCULATION.

The currency withdrawn by the retirement of the United States notes and treasury notes, amounting to probably less than $486,000,000, might be supplied by such gold as would be used in their retirement or by an increase in the circulation of our national banks. Though the aggregate capital of those now in existence amounts to more than $664,000,000, their outstanding circulation, based on bond security, amounts to only about $190,000,000. They are authorized to issue notes amounting to 90 per cent of the bonds deposited to secure their circulation, but in no event beyond the amount of their capital stock, and they are obliged to pay 1 per cent tax on the circulation they issue.

I think they should be allowed to issue circulation equal to the par value of the bonds they deposit to secure it, and that the tax on their circulation should be reduced to one-fourth of 1 per cent, which would undoubtedly meet all the expense the government incurs on their account. In addition they should be allowed to substitute or deposit, in lieu of the bonds now required as security for their circulation, those which would be issued for the purpose of retiring the United States notes and treasury notes.

The banks already existing, if they desire to avail themselves of the provisions of law thus modified, could issue circulation in addition to that already outstanding, amounting to $178,000,000, which would nearly or quite equal the currency proposed to be canceled. At any rate, I should confidently expect to see the existing national banks, or others to be organized, avail themselves of the proposed encouragements to issue circulation and promptly fill any vacuum and supply every currency need.

It has always seemed to me that the provisions of law regarding the capital of national banks which operate as a limitation to their location fail to make proper compensation for the suppression of state banks, which came near to the people in all sections of the country and readily furnished them with banking accommodations and facilities. Any inconvenience or embarrassment arising from these restrictions on the location of national banks might well be remedied by better adapting the present system to the creation of banks in smaller communities, or by permitting banks of large capital to establish branches in such localities as would serve the people—so regulated and restrained as to secure their safe and conservative control and management.

But there might not be the necessity for such an addition to the currency by new issues of bank circulation as at first glance is indicated. If we should be relieved from maintaining a gold reserve under conditions that constitute it the barometer of our solvency, and if our treasury should no longer be the foolish purveyor of gold for nations abroad, or for speculation and hoarding by our citizens at home, I should expect to see gold resume its natural and normal functions in the business affairs of the country and cease to be an object attracting the timid watch of our people and exciting their sensitive imaginations.

I do not overlook the fact that the cancellation of the treasury notes issued under the silver-purchasing act of 1890 would leave the treasury in the actual ownership of sufficient silver, including seigniorage, to coin nearly 178,000,000 standard dollars. It is worthy of consideration whether this might not from time to time be converted into dollars or fractional coin and slowly put into circulation as in the judgment of the secretary of the treasury the necessities of the country should require.

MAINTAINING THE RESERVE.

Whatever is attempted should be entered upon fully appreciating the fact that by careless, easy descent we have reached a dangerous depth and that our ascent will not be accomplished without laborious toil and struggle. We shall be wise if we realize that we are financially ill and that our restoration to health may require heroic treatment and unpleasant remedies.

In the present stage of our difficulties it is not easy to understand how the amount of our revenue receipts directly affects it. The important question is not the quantity of money received in revenue payments but the kind of money we maintain and our ability to continue in sound financial condition. We are considering the government's holdings of gold as related to the soundness of our money and as affecting our national credit and monetary strength. If our gold reserve had never been impaired, if no bonds had ever been issued to replenish it, if there had been no fear and timidity concerning our ability to continue gold payments, if any part of our revenues were now paid in gold, and if we could look to our gold receipts as a means of maintaining a safe reserve, the amount of our revenues would be an influential factor in the problem. But unfortunately all the circumstances that might lend weight to this consideration are entirely lacking.

In our present predicament no gold is received by the government in payment of revenue charges, nor would there be if the revenues were increased. The receipts of the treasury, when not in silver certificates, consist of United States notes and treasury notes issued for silver purchases. These forms of money are only useful to the government in paying its current, ordinary expenses, and its quantity in government possession does not in the least contribute toward giving us that kind of safe financial standing or condition which is built on gold alone.

If it is said that these notes, if held by the government, can be used to obtain gold for our reserve, the answer is easy. The people draw gold from the treasury on demand upon United States notes and treasury notes, but the proposition that the treasury can on demand draw gold from the people upon them would be regarded in these days with wonder and amusement. And even if this could be done, there is nothing to prevent those thus parting with their gold from regaining it the next day or the next hour by the presentation of the notes they received in exchange for it. The secretary of the treasury might use such notes taken from a surplus revenue to buy gold in the market. Of course he could not do this without paying a premium. Private holders of gold, unlike the government, having no parity to maintain, would not be restrained from making the best bargain possible when they furnished gold to the treasury, but the moment the secretary of the treasury bought gold on any terms above par he would establish a general and universal premium upon it, thus breaking down the parity between gold and silver which the government is pledged to maintain and opening the way to new and serious complications. Meantime the premium would not remain stationary, and the absurd spectacle might be presented

of a dealer selling gold to the government, and with United States notes or treasury notes in his hand immediately clamoring for its return and a resale at a higher premium.

It may be claimed that a large revenue and redundant receipts might favorably affect the situation under discussion by affording an opportunity of retaining these notes in the treasury when received, and thus preventing their presentation for gold. Such retention to be useful ought to be at least measurably permanent, and this is precisely what is prohibited so far as United States notes are concerned by the law of 1878 forbidding their further retirement. That statute in so many words provides that these notes when received into the treasury and belonging to the United States shall be "paid out again and kept in circulation." It will, moreover, be readily seen that the government could not refuse to pay out United States notes and treasury notes in current transactions when demanded and insist on paying out silver alone and still maintain the parity between that metal and the currency representing gold. Besides, the accumulation in the treasury of currency of any kind exacted from the people through taxation is justly regarded as an evil, and it cannot proceed far without vigorous protest against an unjustifiable retention of money from the business of the country and a denunciation of a scheme of taxation which proves itself to be unjust when it takes from the earnings and income of the citizen money so much in excess of the needs of government support that large sums can be gathered and kept in the treasury. Such a condition has heretofore in times of surplus revenue led the government to restore currency to the people by the purchase of its unmatured bonds at a large premium and by a large increase of its deposits in national banks, and we easily remember that the abuse of treasury accumulation has furnished a most persuasive argument in favor of legislation radically reducing our tariff taxation.

INCREASE OF REVENUE NO REMEDY.

Perhaps it is supposed that sufficient revenue receipts would in a sentimental way improve the situation by inspiring confidence in our solvency and allaying the fear of pecuniary exhaustion. And yet through all our struggles to maintain our gold reserve there never has been any apprehension as to our ready ability to pay our way with such money as we had, and the question whether or not our current receipts met our current expenses has not entered into the estimate of our solvency. Of course the general state of our funds, exclusive of gold, was entirely immaterial to the foreign creditor and investor. His debt could only be paid in gold and his only concern was our ability to keep on hand that kind of money.

On July 1, 1892, more than a year and a half before the first bonds were issued to replenish the gold reserve, there was a net balance in the treasury, exclusive of such reserve, of less than $13,000,000, but the gold reserve amounted to more than $114,000,000, which was the quieting feature of the situation. It was when the stock of gold began rapidly to fall that fright supervened and our securities held abroad were returned for sale and debts owed abroad were pressed for payment. Meantime extensive shipments of gold and other unfavorable indications caused restlessness and fright among our people at home. Thereupon the general state of our funds, exclusive of gold, became also immaterial to them, and they, too, drew gold from the treasury for hoarding against all contingencies. This is plainly shown by the large increase in the proportion of gold withdrawn which was retained by our own people as time and threatening incidents progressed. During the fiscal year ending June 30, 1894, nearly $85,000,000 in gold was withdrawn from the treasury and about $77,000,000 was sent abroad, while during the fiscal year ending June 30, 1895, over $117,000,000 was drawn out, of which only about $66,000,000 was shipped, leaving the large balance of such withdrawals to be accounted for by domestic hoarding.

Inasmuch as the withdrawal of our gold has resulted largely from fright, there is nothing apparent that will prevent its continuance or recurrence, with its natural consequences, except such a change in our financial methods as will reassure the frightened and make the desire for gold less intense. It is not clear how an increase in revenue, unless it be in gold, can satisfy those whose only anxiety is to gain gold from the government's store. It cannot, therefore, be safe to rely upon increased revenues as a cure for our present troubles.

It is possible that the suggestion of increased revenue as a remedy for the difficulties we are considering may have originated in an intimation or distinct allegation that the bonds which have been issued ostensibly to replenish our gold reserve were really issued to supply insufficient revenue. Nothing can be further from the truth. Bonds were issued to obtain gold for the maintenance of our national credit. As has been shown, the gold thus obtained has been drawn again from the treasury upon United States notes and treasury notes. This operation would have been promptly prevented if possible, but these notes having thus been passed to the treasury they became the money of the government, like any other ordinary government funds, and there was nothidg to do but to use them in paying government expenses when needed.

At no time when bonds have been issued has there been any consideration of the question of paying the expenses of the government with their proceeds. There was no necessity to consider that question. At the time of each bond issue we had a safe surplus in the treasury for ordinary operations, exclusive of the gold in our reserve. In February, 1894, when the first issue of bonds was made, such surplus amounted to over $18,000,000; in November, when the second issue was made, it amounted to more than $42,000,000, and in February, 1895, when bonds for the third time were issued, such surplus amounted to more than $100,000,000. It now amounts to $98,072,420.30. Besides all this, the secretary of the treasury had no authority whatever to issue bonds to increase the ordinary revenues or pay current expenses.

I cannot but think there has been some confusion of ideas regarding the effects of the issue of bonds and the results of the withdrawal of gold. It was the latter process and not the former that, by substituting in the treasury United States notes and treasury notes for gold, increased by their amount the money which was in the first instance subject to ordinary government expenditures. Although the law compelling an increased purchase of silver by the government was passed on the 14th day of July, 1890, withdrawals of gold from the treasury upon the notes given in payment on such purchases did not begin until October, 1891. Immediately following that date the withdrawals upon both these notes and United States notes increased very largely, and have continued to such an extent that since the passage of that law there has been more than thirteen times as much gold taken out of the treasury upon United States notes and treasury notes issued for silver purchases as was thus withdrawn during the eleven and a half years immediately prior thereto and after the 1st day of January, 1879, when specie payments were resumed.

THE SILVER-PURCHASE LAWS.

It is neither unfair nor unjust to charge a large share of our present financial perplexities and dangers to the operation of the laws of 1878 and 1890, compelling the purchase of silver by the government, which not only furnished a new treasury obligation upon which its gold could be withdrawn, but so increased the fear of an overwhelming flood of silver and a forced descent to silver payments that even the repeal of these laws did not entirely cure the evils of their existence.

While I have endeavored to make a plain statement of the disordered condition of our currency and the present dangers menacing our prosperity, and to suggest a way which leads to a safer financial system, I have constantly had in mind the fact that many of my countrymen, whose sincerity I do not doubt, insist that the cure for the ills now threatening us may be found in the single and simple remedy of the free coinage of silver. They contend that our mints shall be at once thrown open to the free, unlimited and independent coinage of both gold and silver dollars, of full legal-tender quality, regardless of the action of any other government, and in full view of the fact that the ratio between the metals which they suggest calls for 100 cents worth of gold in the gold dollar at the present standard and only 50 cents in intrinsic worth of silver in the silver dollar.

Were there infinitely stronger reasons than can be adduced for hoping that such action would secure for us a bimetallic currency moving on lines of parity, an experiment so novel and hazardous as that proposed might well stagger those who believe that stability is an imperative condition of sound money. No government, no human contrivance or act of legislation, has ever been able to hold the two metals together in free coinage at a ratio appreciably different from that which is established in the markets of the world. Those who believe that our independent free coinage of silver at an artificial ratio with gold of 16 to 1 would restore the parity between the metals, and consequently between the coins, oppose an unsupported and improbable theory to the general belief and practice of other nations, and to the teachings of the wisest statesmen and economists of the world, both in the past and present—and, what is far more conclusive, they run counter to our own actual experiences.

Twice in our earlier history our lawmakers, in attempting to establish a bimetallic currency, undertook free coinage upon a ratio which accidentally varied from the actual relative values of the two metals not more than 3 per cent. In both cases, notwithstanding greater difficulties and cost of transportation than now exist, the coins whose intrinsic worth was undervalued in the ratio gradually and surely disappeared from our circulation and went to other countries where their real value was better recognized. Acts of congress were impotent to create equality where natural causes decreed even a slight inequality.

VALUE OF SILVER.

Twice in our recent history we have signally failed to raise by legislation the value of silver. Under an act of congress passed in 1878 the government was required for more than twelve years to expend annually at least $24,000,000 in the purchase of silver bullion for coinage. The act of July 14, 1890, in a still bolder effort, increased the amount of silver the government was compelled to purchase, and forced it to become the buyer annually of 54,000,000 ounces, or practically the entire product of our mines. Under both laws silver rapidly and steadily declined in value. The prophecy and the expressed hope and expectation of those in the congress who led in the passage of the last-mentioned act, that it would re-establish and maintain the former parity between the two metals, are still fresh in our memories.

In the light of these experiences, which accord with the experiences of other nations, there is certainly no secure ground for the belief that an act of congress could now bridge an inequality of 50 per cent between gold and silver at our present ratio; nor is there the least possibility that our country, which has less than one-seventh of the silver money in the world, could by its action alone raise not only our own but all silver to its lost ratio with gold. Our attempt to accomplish this by the free coinage of silver at a ratio differing widely from actual relative values would be the signal for the complete departure of gold from our circulation, the immediate and large contraction of our circulating medium and a shrinkage in the real value and monetary efficiency of all other forms of currency as they settled to the level of silver monometallism. Every one who receives a fixed salary and every worker for wages would find the dollar in his hand ruthlessly scaled down to the point of bitter disappointment if not to pinching privation.

A change in our standard to silver monometallism would also bring on a collapse of the entire system of credit, which, when based on a standard which is recognized and adopted by the world of business, is many times more potent and useful than the entire volume of currency and is safely capable of almost indefinite expansion to meet the growth of trade and enterprise. In a self-invited struggle through darkness and uncertainty our humiliation would be increased by the consciousness that we had parted company with all the enlightened and progressive nations of the world and were desperately and hopelessly striving to meet the stress of modern commerce and competition with a debased and unsuitable currency, and in association with the few weak and laggard nations which have silver alone as their standard of value.

DANGERS OF FREE SILVER COINAGE.

All history warns us against rash experiments which threaten violent changes in our monetary standard and the degradation of our currency. The past is full of lessons teaching not only the economic dangers but the national immorality that follows in the train of such experiments. I will not believe that the American people can be persuaded after sober deliberation to jeopardize their nation's prestige and proud standing by encouraging financial nostrums, nor that they will yield to the false allurements of cheap money when they realize that it must result in the weakening of that financial integrity and rectitude which thus far in our history has been so devotedly cherished as one of the traits of true Americanism.

Our country's indebtedness, whether owing by the government or existing between individuals, has been contracted with reference to our present standard. To decree by act of congress that these debts shall be payable in less-value dollars than those within the contemplation and intention of the parties when contracted would operate to transfer by the fiat of law and without compensation an amount of property and a volume of rights and interests almost incalculable.

Those who advocate a blind and headlong plunge to free coinage in the name of bimetallism, and professing the belief, contrary to all experience, that we could thus establish a double standard and a concurrent circulation of both metals in our coinage, are certainly reckoning from a cloudy standpoint.

Our present standard of value is the standard of the civilized world and permits the only bimetallism now possible, or at least that is within the independent reach of any single nation, however powerful that nation may be. While the value of gold as a standard is steadied by almost universal commercial and business use, it does not despise silver nor seek its banishment. Wherever this standard is maintained there is at its side in free and unquestioned circulation a volume of silver currency sometimes equaling and sometimes even exceeding it in amount, both maintained at a parity, notwithstanding a depreciation or fluctuation in the intrinsic value of silver.

STANDARDS OF VALUE.

There is a vast difference between a standard of value and a currency for monetary use. The standard must necessarily be fixed and certain. The currency may be in divers forms and of various kinds. No silver-standard country has a gold currency in circulation, but an enlightened and wise system of finance secures the benefits of both gold and silver as currency and circulating medium by keeping the standard stable and all other currency at par with it. Such a system and such a standard also give free scope for the use and expansion of safe and conservative credit, so indispensable to broad and growing commercial transactions and so well substituted for the actual use of money.

If a fixed and stable standard is maintained, such as the magnitude and safety of our commercial transactions and business require, the use of money itself is conveniently minimized. Every dollar of fixed and stable value has, through the agency of confident credit, an astonishing capacity of multiplying itself in financial work. Every unstable and fluctuating dollar fails as a basis of credit, and in its use begets gambling speculation and undermines the foundations of honest enterprise.

I have ventured to express myself on this subject with earnestness and plainness of speech because I cannot rid myself of the belief that there lurks in the proposition for the free coinage of silver, so strongly approved and so enthusiastically advocated by the multitude of my countrymen, a serious menace to our prosperity and an insidious temptation of our people to wander from the allegiance they owe to public and private integrity. It is because I do not distrust the good faith and sincerity of those who press this scheme that I have imperfectly but with zeal submitted my thoughts upon this momentous subject. I cannot refrain from begging them to re-examine their views and beliefs in the light of patriotic reason and familiar experience and to weigh again and again the consequence of such legislation as their efforts have invited. Even the continued agitation of the subject adds greatly to the difficulties of a dangerous financial situation already forced upon us.

In conclusion, I especially entreat the people's representatives in congress, who are charged with the responsibility of inaugurating measures for the safety and prosperity of our common country, to promptly and effectively consider the ills of our critical financial plight. I have suggested a remedy which my judgment approves. I desire, however, to assure the congress that I am prepared to cooperate with them in perfecting any other measure promising thorough and practical relief, and that I will gladly labor with them in every patriotic endeavor to further the interests and guard the welfare of our countrymen whom in our respective places of duty we have undertaken to serve.

GROVER CLEVELAND.

THE SILVER QUESTION.

A brief statement of the positions held by the various factions as to silver coinage.

The discussion of the silver or financial question that has been going on in the United States with increasing vigor since 1875 has developed many different sets of opinions regarding the use of silver as a money metal in this country. The advocates of these systems are known as the gold monometallists, who believe in a single gold standard for all money of full legal-tender power; the 16-to-1 bimetallists, who advocate the gratuitous and unlimited coinage of silver at a ratio of 16 parts of silver to 1 of gold, independently of the rest of the world; the international bimetallists, who believe in taking such a step only in concert and upon the joint agreement of the chief commercial nations of Europe; and the experimental bimetallists, who advocate the coinage of a limited amount of silver annually, at the present ratio, independently of other nations, to test the ability or power of the United States to maintain such independent position.

The attempt will be made in the following paragraphs to give briefly, and hence only partially, the relative claims of these different factions. The effort to show the main positions and claims on an issue that is considered by many to be the most commanding economic question of the age, in this limited space, must be merely an outline, and, therefore, cannot be entirely satisfactory.

It is necessary to define some of the terms constantly in use with more than ordinary precision, on account of the various constructions now given them. For instance, the phrase "free coinage" has a well-known technical meaning and is so used very generally by many of the standard financial authorities. In speaking of the coinage system of France, from 1803 to 1874, it is always referred to as a "free-coinage" system, yet on its establishment there was a mint charge of 3 francs for each kilogram of silver and 9 francs for each kilogram of gold. This was reduced by subsequent legislation, but the coinage was never gratuitous, although always unlimited in amount. We also hear constant allusion to the "free coinage" of silver in India, yet it is a well-known fact that a 2 per cent charge for coinage was made until the legislation against silver of June 26, 1893. We always refer to the period in our own history from 1853 to 1873 as a "free-coinage" era, yet it is known that there was a charge of one-half of 1 per cent for coining either gold or silver during that entire time. Thus, to avoid ambiguity, we will not use the term "free coinage," as, by some freak in the play of words, it has lately been generally understood to mean the gratuitous coinage of metal into full legal-tender money. Coinage can be unlimited in amount, or technically "free," with or without a mint charge for converting metal of the proper fineness into coins, so that, technically speaking, "free coinage" has to many precisely the same meaning as unlimited coinage. Misunderstandings can, however, be avoided and one can speak with precision by using the phrase "gratuitous and unlimited coinage" Thus we have both the gratuitous and unlimited coinage of gold in this

country at present, while silver is coined only on government account; that is, the government purchases the silver bullion at the market price and bears the expense of its coinage.

There are also undefinable shades of differences in the meaning of the terms "gold monometallism" and "bimetallism." But for general purposes gold monometallism may be defined as a system under which gold is declared, by statute law, to be the sole unit of value, or standard, for absolutely full legal-tender coin. This is the system that was established in this country in 1873, when the law was enacted that provided that the gold dollar "shall be the unit of value." This phrase still stands unrepealed. However, in 1878 a law was enacted providing that silver dollars "shall be a legal tender for all debts and dues, public and private, except where otherwise expressly stipulated in the contract." This phrase still stands in our statute. Hence it is left to the option of a creditor, under the provisions of the law of 1878, to make his contracts, or debts, payable in gold alone, and he can in this way do business on the gold monometallic system. If the creditor does not thus limit his contracts he is liable to receive silver dollars for the payment of a debt which he might desire to have paid in gold. Thus, practically, the country is, to a great extent, under the gold monometallic system. The government admits that when an individual owes it a coin debt he may, as the law distinctly permits, pay this obligation either in silver or gold, as may best suit him. This is the bimetallic system at least in one direction and has been named "limping bimetallism." But when the government owes a coin obligation to an individual it does not take advantage of this option which the statute law grants, but has, ever since 1878, paid all coin obligations in the kind of coin demanded by the creditor. The government has been liberal and generous toward its coin creditors, and they, by choosing gold, have given the government the opportunity to throw the weight of its powerful influence toward gold monometallism.

"Bimetallism" means the equal treatment, so far as coinage is concerned, of the two metals, and its advocates insist that if there is the gratuitous coinage of one metal the other should also be coined gratuitously; that if there is the unlimited coinage of the one the other should have the same right, and that coins of both metals should be "lawful tender in all payments whatsoever." Bimetallists generally (but not universally) hold that the coinage ratio of the United States of 15.988 of silver to 1 of gold is approximately fair and wise, without regard to the present wide divergence in their commercial value from this ratio.

As both the gold monometallists and bimetallists claim to be actuated by the highest sense of honor, and claim that they desire honest, sound money, these claims should be allowed until disproved. Each side claims to have the same earnest desire to have our full legal-tender money maintain the greatest possible stability in its purchasing power from generation to generation. They each acknowledge the momentous importance of the full legal-tender quality of money, not only as a medium of exchange but as a measure in the payment of debts often deferred for a long period of years.

Gold monometallists claim that gold has this desired requisite—that is, the greatest stability or fixedness in its purchasing power. They show that from the earliest historic records gold has always been more highly prized than silver. Going back for at least 200 years preceding 1873, they cite the undisputed record that an ounce of gold could always be exchanged for about fifteen and a half ounces of silver, and for this reason they say that gold has always had the preference in the commercial world in large monetary transactions. They declare that the activity of the commercial world and the volume of business have so greatly increased in modern times that it is now unwise to contend against this marked preference for gold. By reference to carefully prepared statistics, accepted as reliable by both sides, it is shown that there has been a heavy decline in the general prices of all commodities since about 1873, measured by gold. The gold monometallists claim that this decline can be logically and wholly accounted for by the progress in the arts and sciences and by the increased production of all commodities without a correspondingly increased demand. In short, they declare that there has been no appreciation of gold since 1873 when measured either by average wages or by a fair remuneration for the products of labor. They claim that there is no scarcity of gold, citing the statistics accepted by both sides; that the world's output of gold for forty-eight years since its discovery in 1848 in California has been about twice as great as it was in the long period between the discovery of America by Columbus in 1492 and 1848. They show that the world's output of gold was about $26,000,000 greater in 1894 than in 1853, which was the most prolific year in the joint gold production of California and Australia. They maintain that not only is the world's output of gold constantly increasing, but that, by the modern and more extensive use of bank clearing-house checks, drafts, telegraphic orders and other devices used as substitutes for money, the gold which is now used as money can do a far greater duty than formerly.

On the other hand, bimetallists claim that by the joint and concurrent use of gold and silver for absolute full legal-tender money (at about the coinage ratio established by the United States) we can secure a far more stable or steadier measure of valuation than by the use of gold alone. They admit the greater exchangeable value of gold as compared with silver previous to 1873, but claim that this was always equalized by the coinage ratio generally accepted before the demonetization of silver. They admit the commercial world's preference for gold, on account of the greater ease in transporting it, but claim that the modern facilities of transportation modify this advantage, since the cost of transporting the precious metals is usually based upon their value and not upon their weight. The use of paper representatives of money, redeemable in coin, removes, they say, nearly every objection based only on weight. They show that while a single silver dollar may be large and cumbersome, which are objections to its use, yet the smallness of the gold dollar makes it far more undesirable for a circulating coin. They claim that the modern increased preference for gold has been brought about wholly by the extended legislation depriving silver of its full legal-tender function, and claim that, as hostile legislation has encouraged this modern preference for gold, statute law favorable to silver can destroy it. By reference to carefully prepared statistics, accepted by both sides, bimetallists show that from 1848 to 1872, although the world's joint output of gold and silver was very large as compared with any previous period in the world's history, the average prices of commodities advanced, and, although rapid strides were then made in the arts and sciences and in the ease of production and of transportation and also in the use of paper representatives of money, that still the prodigious progress of commercial enterprises absorbed all

the metallic money in sight by encouraging a healthy rise in prices without any inconvenience or danger and with but little injustice. They claim that the decline in general prices and the world-wide commercial distress since 1873 dates from about that period, which is marked by the efforts of so many of the leading nations of the world in demonetizing silver, thus preventing it from performing its customary function as an absolute full legal-tender money metal. They point out that silver then constituted about one-half of the full legal-tender money of the world, and that its partial dethronement from doing this duty necessarily increased the importance and purchasing power of gold. They claim that the world's increased output of gold does not make amends for the crippled service that silver is now performing. Bimetallists claim that there is a world-wide demand for an increase in the price of labor and the products of labor; or, what is the same thing, a general demand for an increase in prices, and say that the straightforward way to reach this desired result is to give silver fair play and an increased use as a full legal-tender metal. Bimetallists admit that increased knowledge in the sciences and arts has a constant tendency to increase the ease of both production and transportation, and thus to fairly reduce prices, but they strenuously deny that the abnormally low prices of the present times can be logically accounted for solely by such reasons. The bimetallists concede that if the monometallists could demonstrate that there has been no fall in prices that has acted disastrously since the demonetization of silver in 1873, and no extraordinary world-wide distress and bankruptcy since that time, they would then be able to refute the position held by the bimetallists, which is that there has been since 1873 an appreciation of the purchasing power of gold which has brought about this commercial distress. Hence, on this one issue, the greater stability of gold as the sole agent of valuation rather than of gold and silver together, the complex problem seems to swing as a gate on its hinges.

Bimetallists do not admit the claim of their opponents that paper money of any kind, redeemable in gold alone, can ever do the duty of a credit money that has the world's joint fund of both gold and silver back of it for redemption. They claim that the purchasing power of a paper money based on gold alone will be greater than a paper money based on both metals; hence prices measured by the gold paper will be lower than those measured by paper redeemable in either metal at the option of the party who issues it. They contend that there is not gold enough in the world to do now the double duty of both silver and gold.

Gold monometallists claim that the world's production of silver since 1873 has been so great as to justify the wisdom of the commercial world in discarding it from its former place as the equal mate for gold. They point to the record of its fall in twenty-two years to about one-half of its former price measured by gold. They point out the fact that notwithstanding this drop in the price of silver, measured by gold, the world's output of silver continues to increase and that many of the mines are still being worked at a great profit. They refer to statistics showing that the world's output of silver is now about five times greater than it was in 1860, while the gold production is not quite twice as great as it was in that year. They ask: What will be the output of silver providing it is again received as it was previous to 1873?

Bimetallists claim that notwithstanding these facts in regard to the world's output of these precious metals there has always been an irregularity in the world's output of both gold and silver. They refer to the government statistics showing that for the first fifty years of this century the world's output of gold was 100 cents to 178 cents of silver, and that for twenty-two years, from 1851 to 1872, including both, the world produced 251 cents' worth of gold to 100 cents of silver, yet during this very wide fluctuation in the relative supply of these two metals there was no marked discrepancy between their commercial and coinage value. They point out the fact that they were then united by statute law and the mints of the world were generally open to the coinage of both. Bimetallists admit the great fall in the relative commercial value of silver compared to gold during the twenty years from 1873 to 1892, including both, but they claim that the relative overproduction of silver did not do the mischief as they show by statistics, accepted by both sides, that the world's output during these twenty years was only about 108 cents' worth of silver to 100 cents' worth of gold. All of these estimates are based on the United States coinage ratio of valuation. They claim that the breaking of the legal tie that bound gold and silver together was the sole cause of the relative fall in the value of silver, measured by gold, as this cannot be wholly accounted for by the difference in relative production of silver and gold as shown by the statistics of production. They point out the fact that the world's output of gold has been about $444,000,000 greater than silver since we first established our mint in 1792. Bimetallists claim that the world needs and can utilize for money all the gold and silver that can probably be produced, even under the present increased production of both metals, and that such use would add greatly to the welfare of mankind. They claim that the foundation of the credit money of the world is now very far from being too broad or too firm, and that if made broader the business of the world could be carried on with far more ease and safety than it is at present.

Gold monometallists assert that having two standards at the same time is an impossibility; that only one of them will be effective at any one time, and that the history of the attempt of the nation from 1792 to 1873 to maintain the bimetallic system has proved its absurdity. They say further that gold is an unvarying standard, while silver is not; in short, that we should not have two yards that vary in length.

On the other hand, bimetallists claim that the analogy between full legal-tender coin as a measure of value and the yard as the standard of length is defective; that a full legal-tender dollar has its weight, its fineness and its stamp fixed rigidly and precisely by statute law; that in this respect, as a measure of value, whether made of either gold or silver, it is, for debt-paying purposes, as precise and unvarying a measure as the standard yard at a fixed temperature is a precise measure of length, and that both are thus made stable by statute law—the coins for liquidating debts, the yard for measuring lengths.

Bimetallists claim that full legal-tender coin has another and a different function. This is its exchangeable value or its purchasing power. The stability or steadiness of this purchasing power is of the most vital importance, and they claim that this can be secured best by employing the world's entire production of gold and silver for this purpose. They do not claim that even then this purchasing power would be unvarying, but simply that it would be less variable. They point out that, as the debts and business of the civilized world up to about 1873 were based on this joint use of all the gold and silver in sight,

this attempt of gold monometallists to transfer this entire duty to gold alone has increased its purchasing power and has relatively diminished the purchasing power of silver. They claim that the demonetization of silver has destroyed the equilibrium in purchasing power maintained between gold and silver which has existed fairly well for at least twenty centuries. They admit that a bimetallic system may seem like measuring the purchasing power of two coin dollars alternately by one, for a time, and then by the other; but they claim that, although one of them for a time may have a marked advantage for debt-paying over the other on account of its cheapness, yet, the use of the cheaper one being always allowable by statute law, the constant tendency will be to advance the importance of and the demand for the cheaper one, and at the same time to decrease the dearer one, and that this will automatically tend to produce an equality and parity between the two. So far as silver is discarded, as an absolute full legal-tender coin, and gold alone is selected as the money metal, bimetallists claim that there will of necessity be an absorbing world-wide grasping for the gold of the world, and that gold will become dearer, or gain a greater purchasing power, than if the two metals were used together.

Bimetallists admit that they cannot demonstrate with mathematical precision where a certain line should be drawn which marks a disastrous fall in prices; that is, they admit that falling prices, when produced by the ease of production or transportation, are generally beneficial to the people, but when produced by an abnormal increase in the purchasing power of full legal-tender coin, brought about by a reduction in the volume of the coin so used, then they claim that such a decline in price is not beneficial but is hurtful to the great mass of the people. They willingly admit that such a fall in prices would be beneficial to the small and select class composed of those who have the most absolute command of money, and for this reason they protest on account of the injustice to the many who have small means at hand. Eminent political economists who are defenders of gold monometallism have written volumes tending to show that there has been no appreciation in the purchasing power of gold since 1873 that cannot be logically accounted for by the scientific and mechanical progress of mankind; while others, ranking equally high, but who believe in bimetallism, declare that this position is entirely untenable. Many bimetallists, while doubting the complex tables of some gold monometallic statisticians, as well as deductions therefrom, refer the question to the common sense of the plain people, and if the purchasing power of gold has not been appreciated, they seriously ask if something unexplainable has not happened in our own country to produce the financial disturbances between 1873 and 1893.

Gold monometallists point to the immense coinage of silver in the United States since 1878. About 420,000,000 dollars have been coined and are now in use, either in circulation as coin or in paper representatives or held in reserve in the treasury. The highest official authorities say that we have not demonetized silver, and cite these facts as proof. They also point to the treasury certificates, issued for the purchase of silver bullion under the law of 1890, as a further proof of the fair utilization of silver. Bimetallists reply that although the government has coined or issued this silver and its representatives the government is the leading offender against bimetallism by showing the entire world that it has no confidence in the honesty or expediency of this use of silver, and that, as a nation, we hold ourselves ready to treat silver either as unfit for coinage for full legal-tender purposes by our refusal to utilize any part of it to liquidate the coin obligations held against the government should our creditors demand gold coin. They adduce the fact that bonds have been sold at a great sacrifice to procure gold coin, while we had a fair amount of coined silver, ready for use, and a large amount uncoined bullion owned and controlled by the government in the treasury.

Gold monometallists make a large number of general and specific charges against the gratuitous and unlimited coinage of silver. They claim that we would be deluged by the silver of the world; that gold would go to a premium and leave the country; that it would raise prices, while wages and salaries would be slow to advance, and that our civilization would gradually decend to the level of that of Mexico or China.

Bimetallists, while they deny such charges, are equally profuse in prophetic utterances. They assert that there is only a very small surplus of silver in the world which is not in such use to-day as to be more valuable than it would be if sent to the United States mint to be coined in case we had their proposed system of gratuitous and unlimited coinage. They claim that under this system no gold would leave us without being replaced by something equally valuable. They say that unlimited coinage would raise prices and that wages and salaries would promptly advance. They profess to be willing and anxious to assume all the risks of our civilization being lowered by a return to bimetallism, and they urge that such a change would be the panacea for all our commercial and financial distresses.

There is a large and influential class of people who claim to be anxious for future bimetallism providing they can obtain the consent and co-operation of enough other nations to secure a practically universal acceptance of the system. They, too, assert and regret the alleged evils of gold monometallism just as earnestly as the uncompromising bimetallists, but seem to be content to wait entirely on the actions of other nations. On this question, they say, we cannot and dare not act as an independent nation with safety.

In conclusion, let us examine what seems to have been done since 1873 and what a certain class of experimental bimetallists declare may be done with little risk. Gold monometallists have been consistent, earnest and successful in casting discredit on the wisdom and expediency of the use of the present silver dollar ever since 1878. Its coinage was stopped in 1873, and the full legal-tender power of the few that may have been in existence was destroyed in 1874. Since the commencement of this coinage in 1878 there has been a constant open contest directed ostensibly against the gratuitous and unlimited coinage of silver, with the victory always resting on the gold monometallic side. However, in the opinion of many bimetallists, the most important part of that victory has been gained not so much by checking the actual coinage of silver dollars as by the official discarding of them for use as full legal-tender coins. A large majority of bimetallists have concentrated their efforts in trying to obtain the gratuitous and unlimited coinage of silver, without laying much stress or importance on the fair treatment of such as have been coined. They make the gratuitous and unlimited coinage of silver the first requisite, while demanding also the restoration of the full legal-tender power of silver, and then declare that to accept anything less than this triple demand is a base compromise of the

principles of bimetallism. They say there is no acceptable middle ground.

There is a respectable number of careful students of the situation who are fully committed against the principles of both gold monometallism and gratuitous and unlimited silver coinage, but who recognize that conditions are so modified as to require some changes in our present system. They recognize the fact that the leading nations of the world are both grasping for gold and distrustful of silver. These pronounced enemies of gold monometallism ask for the prompt annulment by the United States of every phrase in our statute law making gold our sole standard. They demand the re-enactment of the old phrase of the law of 1792 that declared that gold or silver dollars "shall be a lawful tender in all payments whatsoever." They demand that the execution of such a law shall be properly defended and carried out by suitable legislation in all contracts that may be made in future. They demand that all silver dollars actually owned by the government shall be used to protect our gold reserve against the demands of foreign nations. They demand that our mints shall be put to work to their full capacity, working overtime if necessary, and coin not less than 60,000,000 silver dollars per annum out of the 178,000,000 dollars which are now held as bullion in the treasury vaults. They say: "Let these things be done experimentally for a few years and let us calmly await the logic of events, which is always stronger than argument." These experimental bimetallists are not willing to wait until foreign nations agree to use silver, but, having perfect confidence in silver, they demand prompt and independent financial leadership by the United States, expecting by this method to gain international co-operation and thus see silver restored to its old position. They say we led the nations of the world to gold monometallism in 1873, without their consent or advice, and that we by the same leadership are able to pilot them out of this dangerous position.

This scheme of these experimental bimetallists is unsparingly condemned by gold monometallists as full of danger. They assert if the government should attempt to do as the law distinctly permits—that is, pay out silver dollars to liquidate coin obligations when our creditors demand gold—that the credit of the nation would be ruined. They prophesy panics, bankruptcy and universal distress. They say as we have used gold for paying coin obligations since 1834 that this custom has become stronger than written law.

THE FIRST MEMPHIS CONVENTION.

On the 23d of May a "sound-money" convention was held at Memphis, Tenn., composed of about 700 delegates, mostly from the southern states. T. C. Catchings of Mississippi presided. The following resolutions expressing the sense of the convention on the financial question were adopted:

"The people of the southern states, who believe the maintenance of a sound and stable currency to be essential to the prosperity of the whole country and the welfare of the people in all the vocations of life, do, through their representatives in convention assembled at Memphis on May 23, 1895, make the following declaration of their matured convictions:

"1. Believing a uniform and certain standard of value necessary to the agricultural, commercial and industrial development and prosperity of our common country, we favor the maintenance of all our money, whether gold, silver or paper, on a parity, to the end that each dollar, whatever may be its composition, shall have equal purchasing and debt-paying power with every other dollar.

"2. Profiting by the experience of Washington, Jefferson and Hamilton and the teachings of the great students of monetary science from the time when John Locke wrote to the discussion of the present day, we accept the truth of the principle, now universally recognized and applied in the commercial world, that the bimetallic standard cannot be maintained where the ratio fixed by law for the free coinage of gold and silver does not correspond with the market ratio of the two metals, and that whenever and wherever the legal or coinage ratio varies from the market or commercial ratio to any appreciable extent, the dollar, whether of gold or silver, which thereby becomes more valuable as bullion than as money will go to a premium and retire from circulation. We saw this principle applied in our own national experience when under the act of 1792, which fixed the coinage ratio at 15 to 1, gold retired from circulation because of a slight decline in the price of silver in the open market, whereby the bullion in a gold dollar became worth a few cents more than the bullion in a silver dollar, and was therefore sold as a commodity because it was worth more as bullion than as money; and again under the act of 1834, which fixed the ratio of 16 to 1, when the silver coin retired for a like reason. We are therefore opposed to the free, unlimited and independent coinage of silver at the ratio of 16 to 1 when the market or commercial ratio is more than 30 to 1, and the difference between the bullion value of a gold and a silver dollar is about 50 cents, on the ground that such action, instead of restoring the bimetallic standard, would inevitably result in silver monometallism.

"3. At this time there is no country in the world which maintains a bimetallic standard, and neither is there any country where the free coinage of silver obtains which is not on a silver basis. Each country, on account of its inability to adopt independently any bimetallic standard, must elect for itself which it prefers, the gold or the silver standard.

"We therefore favor, in the absence of international co-operation, the retention and maintenance of the existing gold standard, because a change from the gold to the silver standard would have the effect to repudiate all public and private obligations to the extent of the difference between the bullion value of the gold and silver dollars; because whenever such change should be seriously threatened it would cause an immediate attempt at a collection and liquidation of all debts in anticipation of the result it would produce; because such transition from the gold to the silver basis would destroy public and private confidence and would involve the country in such panic, confusion and distress that the products of agriculture and the wages of labor would be unremunerative; the business of commerce would become unprofitable and our people engaged in industrial occupations would be thrown out of employment; because there is not a progressive and enlightened country in the world which has not elected gold as the preferable standard; because gold-standard countries retain silver in their circulation on a parity with gold, whereas there is no silver-standard country which does or can utilize gold as money; because there is not a silver country on the globe where the wages of labor are sufficient to sustain the working classes in comfort and independence; and, finally, because the high duty of the United States demands for the use of the American people that money which experience has taught mankind to be the best suited for the promotion of commerce, the development of manufactures, the encouragement of labor and the advancement of civilization.

"4. We would rejoice over the adoption of real bimetallism, but in view of the continued fluctuations of the price of silver in the open market we realize that it is impossible for the United States independently to adopt a bimetallic standard, and we deem it unwise and hazardous to the best interests of the people for this country to attempt its establishment. We favor the policy of this country standing in the attitude of readiness at all times to cooperate with the other powers in any effort they may inaugurate looking to the adoption of true bimetallism; but, in the meantime, and until successful co-operation is insured, to maintain inviolate its existing standard of value.

"5. We favor the retention as part of our money the silver now coined, and in order to give a wider field for the use of silver we favor the funding of all money other than silver and silver certificates below the denomination of $10 into higher denominations, so as to make our entire circulation below the denomination of $10 either silver or silver certificates, and to this end the secretary of the treasury should be authorized by law to coin from time to time, as the people may require them, silver dollars until the demand of commerce for money below the denomination of $10 is at all times satisfied.

"6. We realize that our national banking system was adopted during a time of war and that it is not adapted to existing conditions. We therefore favor such legislation as will secure to the people a system of banking surrounded by such safeguards as will at all times furnish them a safe, elastic, sufficient currency for the transaction of their business.

"7. We cannot too highly commend the unflagging courage and sturdy patriotism of President Cleveland in his efforts to protect the national honor and maintain the public credit during a period of great financial distress and under conditions which threatened danger to both; we congratulate him and the entire country on the evidences of returning prosperity."

THE SECOND MEMPHIS CONVENTION.

This convention was followed immediately by a call for a "free-silver" or national bimetallic convention, which met in Memphis June 12, 1895. About 1,000 delegates were present, representing twenty-six states and territories, a majority of whom were from the region west of the Mississippi river. Pennsylvania, North Carolina, South Carolina and Ohio were also represented. The following resolutions were adopted by the convention:

"Silver and gold coin have in all ages constituted the money of the world; were the money of the fathers of the republic, the money of history and of the constitution.

"The universal experience of mankind has demonstrated that the joint use of both silver and gold coin as money constitutes the most stable standard of value, and that the full amount of both metals is necessary as a medium of exchange.

"The demonetization of either of these historic money metals means an appreciation in the value of money, a fall in the price of commodities, a diminution of the profits of legitimate business, a continuing increase in the burden of debts, withdrawal of money from the channels of trade and industry where it no longer yields a safe and sure return, and its idle accumulation in the banks and in the great money centers of the country.

"There is no health or soundness in a financial system under which a hoarded dollar is productive of increase to its possessor, while an invested dollar yields a constantly diminishing return, and under which fortunes are made by the accretions of idle capital or destroyed by a persistent fall in the price of commodities and a persistent dwindling in the margin of profits in almost every branch of useful industry.

"Such a system puts a premium upon sloth and a penalty upon industry, and such a system is that which the criminal legislation of 1873 has imposed upon this country.

"The bimetallists' standard of silver and gold has behind it the experience of ages and has been tested and approved by the enlightened and deliberate judgment of mankind. The gold standard is a departure from the established policy of the civilized world, with nothing to commend it but twenty-two years of depression and disaster to the people and extraordinary accumulation of wealth in the hands of the few.

"There are some facts bearing upon this question recognized and admitted by all candid men, whether advocates of bimetallism or of the single gold standard. Among these is the fact that the very year that marked the change from the bimetallic to the single gold standard is the very year that marked the change from a condition of rising prices, large profits, general contentment and great prosperity to a condition exactly the reverse. Under the operations of the beneficent law of bimetallism a stable relation was maintained between the two metals in spite of the most extreme changes in relative productions. From the earliest period of our history up to 1873 the right of the debtor to choose whether he should pay his debts in silver or gold coin was always recognized. The subsequent policy has been to transfer this right to the creditor, thus tending constantly to increase the value of the dearer metal and destroy the parity between them.

"Believing that it is absolutely necessary to reverse the iniquitous and ruinous policy, we therefore resolve:

"That we favor the immediate restoration of silver to its former place as a full legal-tender, standard money equal with gold, and the free and unlimited coinage of both silver and gold at the ratio of 16 to 1 and upon terms of exact equality.

"That while we should welcome the cooperation of other nations we believe the United States should not wait upon the cooperation of other governments or the pleasure of creditors, but should themselves proceed to reverse the 'grinding process' that is destroying the prosperity of the people, and should lead by their example the nations of the earth.

"That the rights of the American people, that the interests of American labor and the prosperity of American industry have a higher claim to the consideration of the people's lawmakers than the greed of foreign creditors or the avaricious demands by idle holders of idle capital.' The right to regulate its own monetary system in the interests of its own people is a right which no free government can barter, sell or surrender. This reserved right is a part of every bond, of every contract and of every obligation. No creditor or claimant can set up a right that can take precedence over a nation's obligations to promote the welfare of the masses of its own people. This is a debt higher and more binding than all other debts and one which it is not only dishonest but treasonable to ignore.

"Under the financial policy that now prevails we see the land filled with idle and discontented workingmen and an ever-growing army of tramps, men whom lack of work and opportunity has made outcasts and beggars. At the other end we find a few thousand families owning one-half the wealth of the country. The centralization of wealth has gone hand in hand with the spread of poverty. The pauper

and the plutocrat are twin children of the same vicious and unholy system. The situation is full of menace to the liberties of the people and the life of the republic. The issue is enfranchisement or hopeless servitude. Whatever the power of money can do by debauchery and corruption to maintain its grasp on the lawmaking power will be done. We therefore appeal to the plain people of the land, with perfect confidence in their patriotism and intelligence, to arouse themselves to a full sense of the peril that confronts them and defend the citadel of their liberties with a vigilance which shall neither slumber nor sleep."

PRODUCTION OF GOLD AND SILVER IN THE WORLD FROM 1792 TO 1893.

[From Mint Report 1894.]

CALENDAR YEARS.	*Gold.*	*Silver (coining value).*	CALENDAR YEARS.	*Gold.*	*Silver (coining value).*

RELATIVE PRODUCTION OF GOLD AND SILVER.

A table showing the remarkable irregularity in the relative production of the world's output of gold and silver in short periods of years as shown in groups. It is based on the common European coinage ratio of 1 to 15½. It has been rearranged and compiled from the table of Sir Louis Mallet, a member of the British royal commission on the depression of prices, of 1886-8, and published in its report. See republication of this report by the United States government of 1889, page 139. Additions have been made since 1886, calculated from data published by the United States government:

Including Both Years.	Gr'ps of Yrs.	Relative val. coined at ratio 1 to 15.5.		Relative market value by weight.	Including Both Years.	Gr'ps of Yrs.	Relative val. coined at ratio 1 to 15.5.		Relative market value by weight.

COINS OF THE UNITED STATES.

Authority for coining and changes in weight and fineness, total amount coined, legal-tender quality.

GOLD COINS.

Double Eagles—Authorized to be coined, act of March 3, 1849; weight, 516 grains; fineness, .900. Total amount coined to June 30, 1894, $1,200,980. Full legal tender.

Eagles—Authorized to be coined, act of April 2, 1792; weight, 270 grains; fineness, .916⅔; weight changed, act of June 28, 1834, to 258 grains; fineness changed, act of June 28, 1834, to .899225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1894, $252,662,960. Full legal tender.

Half-Eagles—Authorized to be coined, act of

April 2, 1792; weight, 135 grains; fineness, .916⅔; weight changed, act of June 28, 1834, to 129 grains; fineness changed, act of June 28, 1834, to .899225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1894, $208,820,515. Full legal tender.

Quarter-Eagle—Authorized to be coined, act of April 2, 1792; weight, 67.5 grains; fineness, .916⅔; weight changed, act of June 28, 1834, to 64.5 grains; fineness changed, act of June 28, 1834, to .899225; fineness changed, act of Jan. 18, 1837, to .900. Total amount coined to June 30, 1894, $28,670,820. Full legal tender.

Three-Dollar Piece—Authorized to be coined, act of Feb. 21, 1853; weight, 77.4 grains; fineness, .900; coinage discontinued, act of Sept. 26, 1890. Total amount coined, $1,619,376. Full legal tender.

One Dollar—Authorized to be coined, act March 3, 1849; weight, 25.8 grains: fineness, .900; coinage discontined, act of Sept. 26, 1890. Total amount coined, $19,499,337. Full legal tender.

SILVER COINS.

Dollar—Authorized to be coined, act of April 2, 1792; weight, 416 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 412½ grains; fineness changed, act of Jan. 18, 1837, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined to Feb. 12, 1873, $8,031,238. Coinage reauthorized, act of Feb. 28, 1878. Coinage discontinued after July 1, 1891, except for certain purposes, act July 14, 1890. Amount coined to Dec. 31, 1893, $427,364,446. Full legal tender except when otherwise provided in the contract.

Trade Dollar—Authorized to be coined, act of Feb. 12, 1873; weight, 420 grains; fineness, .900; legal tender limited to $5, act of June 22, 1874 (rev. stat.); coinage limited to export demand and legal-tender quality repealed, joint resolution, July 22, 1876; coinage discontinued, act Feb. 19. 1887. Total amount coined, $35,965,924.

Half-Dollar—Authorized to be coined, act of April 2, 1792; weight, 208 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 206¼ grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 192 grains; weight changed, act of Feb. 12, 1873, to 12½ grams, or 192.9 grains. Total amount coined to June 30, 1894, $130,512,383.50. Legal tender, $10.

Columbian Half-Dollar—Authorized to be coined, act of Aug. 5, 1892; weight, 192.9 grains; fineness, .900. Total amount coined, $2,501,052.50. Legal tender, $10.

Quarter-Dollar—Authorized to be coined, act of April 2, 1792; weight, 104 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 103⅗ grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 96 grains; weight changed, act of Feb. 12, 1873, to 6¼ grams, or 96.45 grains. Total amount coined to June 30, 1894, $47,198,044. Legal tender, $10.

Columbian Quarter-Dollar—Authorized to be coined, act of March 3, 1893; weight, 96.45 grains; fineness, .900. Total amount coined, $10,005.75. Legal tender, $10.

Twenty-Cent Piece—Authorized to be coined, act of March 3, 1875; weight, 5 grams, or 77.16 grains; fineness, .900; coinage prohibited, act of May 2, 1878. Total amount coined, $271,000.

Dime—Authorized to be coined, act of April 2, 1792; weight, 41.6 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 41¼ grains; fineness changed, act of Jan. 18, 1837, to .900; weight changed, act of Feb. 21, 1853, to 38.4 grains; weight changed, act of Feb. 12, 1873, to 2½ grams, or 38.58 grains. Total amount coined to June 30, 1894, $28,480,117.20. Legal tender, $10.

Half-Dime—Authorized to be coined, act of April 2, 1792; weight, 20.8 grains; fineness, .892.4; weight changed, act of Jan. 18, 1837, to 20⅝ grains; fineness changed, act of Jan. 18, 1857, to .900; weight changed, act of Feb. 21, 1853, to 19.2 grains; coinage discontinued, act of Feb. 12, 1873. Total amount coined, $4,880,219.40.

Three-Cent Piece—Authorized to be coined, act of March 3, 1851; weight, 12¾ grains; fineness, .750; weight changed, act of March 3, 1853, to 11.52 grains; fineness changed, act of March 3, 1853, to .900; coinage discontinued, act of Feb. 12, 1873. Total amount coined, $1,282,087.20.

MINOR COINS.

Five-Cent (*nickel*)—Authorized to be coined, act of May 16, 1866; weight, 77.16 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined to June 30, 1894, $13,432,450.95. Legal tender for $1, but reduced to 25 cents by act of Feb. 12, 1873.

Three-Cent (*nickel*)—Authorized to be coined, act of March 3, 1865; weight, 30 grains, composed of 75 per cent copper and 25 per cent nickel. Total amount coined, $941,349.48. Legal tender for 60 cents, but reduced to 25 cents by act Feb. 12, 1873. Coinage discontinued, act of Sept. 26, 1890.

Two-Cent (*bronze*)—Authorized to be coined, act of April 22, 1864; weight, 96 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Coinage discontinued, act of Feb. 12, 1873. Total amount coined, $912,020.

Cent (*copper*)—Authorized to be coined, act of April 2. 1792; weight, 264 grains; weight changed, act of Jan. 14, 1793, to 208 grains; weight changed by proclamation of the president, Jan. 26, 1796, in conformity with act of March 3, 1795, to 168 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, $1,562,687.44.

Cent (*nickel*)—Authorized to be coined, act of Feb. 21, 1857; weight, 72 grains, composed of 88 per cent copper and 12 per cent nickel. Coinage discontinued, act of April 22, 1864. Total amount coined, $2,007,720.

Cent (*bronze*)—Coinage authorized, act of April 22, 1864; weight, 48 grains, composed of 95 per cent copper and 5 per cent tin and zinc. Total amount coined to June 30, 1894, $7,351,783.35. Legal tender, 25 cents.

Half-Cent (*copper*)—Authorized to be coined, act of April 2, 1792; weight, 132 grains; weight changed, act of Jan. 14, 1793, to 104 grains; weight changed by proclamation of the president, Jan. 26, 1796, in conformity with act of March 3, 1795, to 84 grains; coinage discontinued, act of Feb. 21, 1857. Total amount coined, $39,926.11.

Total gold coinage	$1,711,880,288.00
Total silver coinage	675,954,221.30
Total minor coinage	26,248,117.33
Grand total	2,414,082,626.63

MONETARY SYSTEM OF THE UNITED STATES.

The difference between the amount of money in the country and the amount in circulation represents the money in the treasury.

Currency certificates, act of June 8, 1872, are included in the amount of United States notes in circulation in tables for years 1873 to 1891, inclusive; since 1891 they are reported separately.

COMMERCIAL RATIO OF SILVER TO GOLD EACH YEAR SINCE 1687.

From 1687 to 1832 the ratios are taken from Dr. A. Soetbeer; from 1833 to 1878 from Pixley and Abell's tables; and from 1879 to 1893 from daily cablegrams from London to the bureau of the mint:

YEAR.	*Ratio.*	YEAR.	*Ratio.*	YEAR.	*Ratio.*	YEAR.	*Ratio.*	YEAR.	*Ratio.*	YEAR.	*Ratio.*

WHAT POLITICAL PARTIES HAVE SAID.

CONVENTIONS OF 1872.

REPUBLICAN.—We denounce repudiation of the public debt, in any form or disguise, as a national crime. We witness with pride the reduction of the principal of the debt and rate of interest upon the balance, and confidently expect that our excellent national currency will be perfected by a speedy resumption of specie payment.

LIBERAL REPUBLICAN.—A speedy return to specie payment is demanded alike by the highest considerations of commercial morality and honest government.

LABOR REFORM.—That it is the duty of the government to establish a just standard of distribution of capital and labor by providing a purely national circulating medium based on the faith and resources of the nation, issued directly to the people without the intervention of any system of banking corporations, which money shall be legal tender in the payment of all debts, public and private, and interchangeable at the option of the holder for government bonds bearing a rate of interest not to exceed 3.65 per cent subject to future legislation by congress.

PROHIBITION.—That we are in favor of a sound national currency adequate to the demands of business and convertible into gold and silver at the will of the holder, and the adoption of every measure compatible with justice and public safety to appreciate our present currency to the gold standard.

DEMOCRATIC.—No declaration.

CONVENTIONS OF 1876.

REPUBLICAN.—In the first act of congress signed by President Grant the national government assumed to remove all doubts of its purpose to discharge all just obligations to the public creditors and "solemnly pledged its faith to make provision at the earliest practicable period for the redemption of the United States notes in coin." Commercial prosperity, public morals and national credit demand that this promise be fulfilled by a continuous and steady progress to specie payment.

DEMOCRATIC.—Reform is necessary to establish a sound currency, restore the public credit and maintain the national honor. We denounce the failure for all these eleven years of peace to make good the promise of the legal-tender notes, which are a changing standard of value in the hands of the people and a non-payment of which is a disregard of the plighted faith of the nation. We denounce the improvidence which in eleven years of peace has taken from the people in federal taxes thirteen times the whole amount of the legal-tender notes and squandered four times their sum in useless expenditures without accumulating any reserve for their redemption. We denounce the financial imbecility and immorality of that party which during eleven years of peace has made no advance toward resumption, no preparation for resumption, but instead has obstructed resumption by wasting our resources and exhausting all our surplus income, and while professing to intend a speedy return to specie payments has annually enacted fresh hindrances thereto. As such hindrance we denounce the resumption clause of the act of 1875 and we hereby demand its repeal.

PROHIBITION.—The separation of the money of government from all banking institutions. The national government only should exercise the high prerogative of issuing paper money, and that should be subject to prompt redemption, on demand, in gold and silver, the only equal standards of value recognized by the civilized world.

GREENBACK.—We believe that a United States note issued directly by the government and convertible on demand into United States obligations bearing a rate of interest not exceeding 1 cent a day on each $100, and exchangeable for United States notes at par, will afford the best circulating medium ever devised. Such United States notes should be full legal tenders for all purposes, except for the payment of such obligations as are, by existing contracts, made especially payable in coin; and we hold that it is the duty of the government to provide such a circulating medium and insist in the language of Thomas Jefferson that "bank paper must be suppressed and the circulation restored to the nation, to whom it belongs."

AMERICAN NATIONAL.—That the government should furnish the people with an ample and sound currency and a return to specie payment as soon as practicable.

CONVENTIONS OF 1880.

REPUBLICAN.—The convention adopted no resolution touching financial questions, but referred in the preamble to the resumption of specie payments and reduction of the debt.

DEMOCRATIC.—We pledge ourselves anew to home rule, honest money—the strict maintenance of the public faith—consisting of gold and silver, and paper convertible into coin on demand.

GREENBACK.—All money, whether metallic or paper, should be issued and its volume controlled by the government, and not by or through banking corporations, and when so issued should be a full legal tender for all debts, public and private.

PROHIBITION.—No notice was taken of financial questions in the party platform.

CONVENTIONS OF 1884.

REPUBLICAN.—We have always recommended the best money known to the civilized world, and we would urge that efforts should be made to unite all commercial nations in the establishment of an international standard which should fix for all the relative value of gold and silver coinage.

DEMOCRATIC.—We believe in honest money, the gold and silver coinage of the constitution, and a circulating medium convertible into such money without loss.

PROHIBITION.—That all money, coin or paper, shall be made, issued and regulated by the government and shall be a legal tender for all debts, public and private.

GREENBACK.—We demand the issue of such money [legal-tender notes] in sufficient quantities to supply the actual demands of trade and commerce, in accordance with the increase of population and the development of our industries. We demand the substitution of greenbacks for national-bank notes, and the prompt payment of the public debt. We want that money which saved our country in time of war and which has given prosperity and happiness in peace. We condemn the retirement of the fractional currency and the small denominations of greenbacks, and demand their restoration.

CONVENTIONS OF 1888.

REPUBLICAN.—The republican party is in favor of the use of both gold and silver as money and condemns the policy of the demo-

cratic administration in its efforts to demonetize silver.

DEMOCRATIC.—The national convention did not express itself directly on the financial question.

UNION LABOR.—While we have free coinage of gold we should have free coinage of silver.

UNITED LABOR.—We would do away with the present unjust and wasteful system of finance which piles up hundreds of millions of dollars in the treasury vaults while we are paying interest on an enormous debt, and we would establish in its stead a monetary system in which a legal-tender circulating medium should be issued by the government without the intervention of banks.

CONVENTIONS OF 1892.

REPUBLICAN.—The American people, from tradition and interest, favor bimetallism, and the republican party demands the use of both gold and silver as standard money, with such restrictions and under such provisions, to be determined by legislation, as will secure the maintenance of the parity of values of the two metals so that the purchasing and debt-paying power of the dollar, whether of gold, silver or paper, shall be at all times equal. The interests of the producers of the country, its farmers and its workingmen, demand that every dollar, paper or coin, issued by the government shall be as good as any other. We commend the wise and patriotic steps already taken by our government to secure an international conference to adopt such measures as will insure a parity of value between gold and silver for use as money throughout the world.

DEMOCRATIC.— We denounce the republican legislation known as the Sherman act of 1890 as a cowardly makeshift, fraught with possibilities of danger in the future which should make all of its supporters as well as its author anxious for its speedy repeal. We hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver without discriminating against either metal or charge for mintage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, or be adjusted through international agreement or by such safeguards of legislation as shall insure the maintenance of the parity of the two metals and the equal power of every dollar at all times in the market and in the payment of debts, and we demand that all paper currency shall be kept at par with and redeemable in such coin.

PROHIBITION.—The money of the country should consist of gold, silver and paper, and be issued by the general government only in sufficient quantities to meet the demands of business and give full opportunity for the employment of labor.

NATIONAL PEOPLE'S.—We demand a national currency safe, sound and flexible, issued by the general government only, a full legal tender for all debts, public and private, and without the use of banking corporations; a just, equitable and efficient means of distribution direct to the people at a tax not to exceed 2 per cent per annum, to be provided as set forth in the sub-treasury plan of the Farmers' alliance, or a better system; also by payments in discharge of its obligations for public improvements. We demand free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1. We demand that the amount of circulating medium be speedily increased to not less than $50 per capita.

GOLD AND SILVER COMMITTEES.

SOUND-CURRENCY ORGANIZATIONS (GOLD MONOMETALLIC).

Reform Club Sound-Currency Committee—Calvin Tomkins, secretary, 52 William street, New York city.

Sound-Money League of Pennsylvania—William R. Tucker, secretary, "The Bourse," Philadelphia, Pa.

Commercial Club of St. Louis Sound-Money Committee—George E. Leighton, chairman, 712 Rialto building, St. Louis, Mo.

Democratic Sound-Currency Club—George R. Lockwood, secretary 612 Rialto building, St. Louis, Mo.

Sound-Money Democratic League—Frederick W. Vaughan, secretary, Fremont, Neb.

Texas Sound-Money Executive Committee—Hon. Rufus Hardy, chairman; Robert Charlton, secretary, Corsicana, Tex.

Sound-Money League of Louisiana—John R. Ficklen, secretary, 137 Carondelet street, New Orleans, La.

Sound-Currency Club of Cincinnati—Morrison R. Waite, secretary, 44 St. Paul building, Cincinnati, O.

Honest-Money League of Illinois—J. W. Richards, secretary, rooms 35-39 Palmer house, Chicago, Ill.

Sound-Currency League—W. B Mitchell, secretary, Chattanooga, Tenn.

Democratic Sound-Money Club—A. R. Hallett, secretary, Wilmington, N. C.

Sound-Currency League—Walter R. Appling, secretary executive committee, Hamilton, Ala.

Sound-Currency Committee of Jacksonville—Charles H. Smith, secretary, Jacksonville, Fla.

Democratic Sound-Money Committee—Thomas S. Plowman, chairman, Talladega, Ala.

New York Chamber of Commerce Sound-Money Committee—Gustav H. Schwab, chairman, 2 Bowling Green, New York city.

AMERICAN BIMETALLIC LEAGUE.

President—A. J. Warner, Washington, D. C.

Secretary (acting)—J. M. Devine, Sun building, Washington, D. C.

Treasurer—Eugene Davis, Washington, D. C.

Executive Committee—Hon. John P. Jones, United States senate; I. L. Johnson, Culpeper, Va.; H. E. Taubeneck, Marshall, Ill.; J. B. Weaver, Council Bluffs, Iowa; Hon. H. M. Teller, United States senate; Hon. J. C. Sibley, Franklin, Pa.

Committee Appointed Feb. 22, 1895—William M. Stewart, United States senate; Hon. F G. Newlands, house of representatives; Hon. J. L. McLaurin, M. C., Washington, D. C.; Anson Wolcott, Wolcott, Ind.; George G. Merrick, Denver, Col.; J. C. Green, 401 California street, San Francisco, Cal.; Joseph Sheldon, New Haven, Conn.; C. J. Hillyer, 2121 Massachusetts avenue, Washington, D. C.; Byron E. Shear, Denver, Col.; Mortimer Whitehead, Middlebush, N. J.

NATIONAL BIMETALLIC UNION.

President—Hon. R. C. Chambers, Salt Lake City, Utah.

Vice-President—Hon. Thomas G. Merrill, Helena, Mont.

Secretary—Edward B. Light, 134 Monroe street, Chicago, Ill.

NATIONAL SILVER COMMITTEE.

Chairman—Hon. Henry G. Miller, Chicago, Ill.

Secretary—J. C. Acklen, Nashville, Tenn.

Executive Committee—Hon. A. J. Warner, Marietta, O.; Hon. Anson Wolcott, Wolcott, Ind.; Hon. J. C. Acklen, Nashville, Tenn.; Hon. A. W. Rucker, Denver, Col.; Hon. Joseph Battell, Ripton, Vt.; Hon. George S. Bowen, Elgin, Ill.

THE BOND SYNDICATE.

Few financial operations of the government, certainly none since the close of the war, have been more energetically discussed than the agreement entered into by the president and secretary of the treasury, on the one hand, with what became commonly known as the "bond syndicate," on the other, for the purpose of maintaining the gold reserve of the treasury between the 8th of February and the 30th of September, 1895. As the bond syndicate has no parallel in the financial history of this or any other country, the causes that led to its formation are worthy of record.

As far back as January, 1893, the condition of the United States treasury was such as to cause some uneasiness and an apprehension lest the government would be unable to maintain its gold reserve for the protection of its treasury notes. The expenditures of the government were in excess of its receipts, gold was being exported for various purposes, while the compulsory purchase of silver increased the volume of treasury notes in circulation, and at that time Secretary Foster became convinced that the only way by which the gold reserve could be kept intact was to issue bonds under the act of January, 1875. During the period which intervened between January, 1893, and the incoming of the new administration on the 4th of March, 1894, the volume of treasury gold fluctuated considerably, and at the close of the fiscal year it had decreased to $65,000,000, with a manifest tendency to a further shrinkage. One cause of distrust was the fact that owing to business disturbances the revenues of the government fell considerably below previous estimates, while the margin between receipts and expenditures was a very narrow one.

So grave had become the situation that the president called an extra session of congress, to meet Aug. 7, to consider the financial situation of the country. It was then believed that the repeal of the Sherman law, so called, providing for the compulsory purchase and coinage of silver, would be an ample measure of relief for the government. The president in his message urged the repeal of the Sherman law, and the repeal passed the house in August and the senate in October, 1893. The bill, besides repealing the compulsory purchase and coinage features of the law, contained a provision declaring it to be the policy of the United States to continue the use of both gold and silver as standard money, to coin both into money of equal value to be secured by international agreement or legislation, and that the efforts of the government should be steadily directed to the establishment of a safe system of bimetallism. This bill passed the senate by a vote of 43 to 32 and the house by a vote of 239 to 108. Upon the passage of the bill congress adjourned.

The depletion of the gold reserve went on, however, and when congress adjourned it had reached $84,000,000, and this reserve had to be drawn upon in the regular disbursements of the government. The failure of the revenues reduced the general cash balance of the treasury to $90,000,000, which left a margin of only $9,000,000 over and above the gold reserve, which had to be still further drawn on for government expenditures. The result was that at the end of January, 1894, the net gold reserve was $65,000,000 and the other available cash in the treasury was $19,000,000. Congress met in December, 1893, and the secretary of the treasury asked for legislation under which he would be able to borrow money on terms more favorable to the government than could be done under existing laws, but as congress did not move in the matter the secretary on the 17th day of January, 1894, issued a circular calling for proposals for $50,000,000 5 per cent bonds, to bear date Feb. 1, 1894, payable in coin at the option of the government after ten years. These bonds sold at a premium and produced $58,660,917. They were bought with gold, but the government failed to realize the whole amount in gold, owing to the fact that over $24,000,000 of the gold paid for the bonds was withdrawn from the treasury by the deposit of treasury notes, which left the net gold realized by the transaction about $34,000,000. But enough gold was realized from the transaction to bring the gold reserve up to $106,000,000. The exports of gold, however, increased through the spring and summer of 1894, and before the year had expired there was another depletion of the gold reserve, which declined in August to $52,200,000, and forced another resort to the expedient of a fresh loan of a similar amount. In both instances the subscription was a domestic one, the participating banks and bankers furnishing gold from their resources, which, owing to the continuance of specie exports, was promptly taken away from the treasury through the presentation of greenbacks for redemption, the amounts thus drawn being shipped to London or to the continent in conformity with an exchange market which involved the necessity of a settlement of adverse balances against this country in specie. During August the exports of gold declined, the gold in the treasury slowly increased and at the end of October it had reached $61,000,000.

A second issue of $50,000,000 of bonds was decided on in November of 1894, which were in all respects like those issued in January. The amount realized by the sale of this second issue of bonds was $58,444,900. This brought the gold reserve up to $105,424,000. By the end of December, 1894, however, the gold reserve had been depleted to $86,000,000.

When congress met in December it was appealed to by both the president in his message and the secretary of the treasury in his report to legislate so as to provide against the evils that surrounded the treasury, and nothing being done in this direction the president in a special message to congress, on the 28th of January, 1895, urged the passage of a law for the issuing of bonds upon more favorable terms to the government than any then on the statute books. No measures of relief were offered. On Nov. 30, 1894, when the second bond issue was completed, the specie reserve was $105,424,569, but by Jan. 31, 1895, it was again reduced to $49,000,000. An even more rapid depletion set in, and on Feb. 9, when the lowest point was reached, the amount of free gold held in the treasury for the redemption in specie of its legal-tender obligations was only $41,393,212.

On the 1st of February the president and secretary of the treasury opened negotiations for maintaining the gold reserve with a syndicate of foreign bankers, and on the 8th of February the following contract was signed:

CONTRACT.

This agreement, entered into this 8th day of February, 1895, between the secretary of the treasury of the United States, of the first part, and Messrs. August Belmont & Co., of New York, on behalf of Messrs. N. M. Rothschild & Sons, of London, England, and themselves, and Messrs. J. P. Morgan & Co., of New York, on behalf of Messrs. J. S. Morgan & Co., of London, and themselves, of the second part,

Witnesseth: Whereas, It is provided by the revised statutes of the United States (section

3700) that the secretary of the treasury may purchase coin with any of the bonds or notes of the United States authorized by law, at such rates and upon such terms as he may deem most advantageous to the public interests; and the secretary of the treasury now deems that an emergency exists in which the public interests require that, as hereinafter provided, coin shall be purchased with the bonds of the United States, of the description hereinafter mentioned, authorized to be issued under the act entitled "An act to provide for the resumption of specie payments," approved Jan. 14, 1875, being bonds of the United States described in an act of congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt."

Now, therefore, the said parties of the second part hereby agree to sell and deliver to the United States three million five hundred thousand ounces of standard gold coin of the United States at the rate of $17.8041 per ounce, payable in United States 4 per cent thirty-year coupon or registered bonds, said bonds to be dated Feb. 1, 1895, and payable at the pleasure of the United States after thirty years from date, issued under the acts of congress of July 14, 1870, Jan. 20, 1872, and Jan. 14, 1875, bearing interest at the rate of 4 per cent per annum, payable quarterly.

First—Such purchase and sale of gold being made under the following conditions:

1. At least one-half of all the coin deliverable hereinunder shall be obtained in and shipped from Europe, but the shipments shall not be required to exceed three hundred thousand ounces per month, unless the parties of the second part shall consent thereto.

2. All deliveries shall be made at any of the sub-treasuries or other legal depository of the United States.

3. All gold coins delivered shall be received on the basis of twenty-five and eight-tenths grains of standard gold per dollar, if within the limit of tolerance.

4. Bonds delivered under this contract are to be delivered free of accrued interest, which is to be assumed and paid by the parties of the second part at the time of their delivery to them.

Second—Should the secretary of the treasury desire to offer or sell any bonds of the United States on or before the 1st day of October, 1895, he shall first offer the same to the parties of the second part; but thereafter he shall be free from every such obligation to the parties of the second part.

Third—The secretary of the treasury hereby reserves the right, within ten days from the date hereof, in case he shall receive authority from congress therefor, to substitute any bonds of the United States, bearing 3 per cent interest, of which the principal and interest shall be specifically payable in United States gold coin of the present weight and fineness, for the bonds herein alluded to; such 3 per cent bonds to be accepted by the parties of the second part at par—i. e., at $18.60465 per ounce of standard gold.

Fourth—No bonds shall be delivered to the parties of the second part, or either of them, except in payment for coin from time to time received hereunder; whereupon the secretary of the treasury of the United States shall and will deliver the bonds as herein provided at such places as shall be designated by the parties of the second part. Any expense of delivery out of the United States shall be assumed and paid by the parties of the second part.

Fifth—In consideration of the purchase of such coin the parties of the second part and their associates hereunder assume and will bear all the expense and inevitable loss of bringing gold from Europe hereunder; and, as far as lies in their power, will exert all financial influence and will make all legitimate efforts to protect the treasury of the United States against the withdrawals of gold pending the complete performance of this contract. In witness whereof the parties hereto have hereunto set their hands in five parts this 8th day of February, 1895.

J. G. CARLISLE,
Secretary of the Treasury.
AUGUST BELMONT & CO.,
On behalf of Messrs. N. M. Rothschild & Sons, of London, and themselves.
J. P. MORGAN & CO.,
On behalf of Messrs. J. S. Morgan & Co., London, and themselves.
[Attest.] W. E. CURTIS,
FRANCIS LYNDE STETSON.

The arrangement was in effect the purchase by the government from the syndicate of 3,500,000 ounces of gold at $17.80½ per ounce, giving in payment therefor 4 per cent bonds to the amount of $62,317,500. As the government price for gold is $18.60½, the difference of 80c per ounce amounted to $2,500,000, being the premium paid by the syndicate for the bonds, and the total amount of gold to be turned over was $65,117,500. It was provided that at least one-half the gold was to be supplied from abroad. The most important feature, however, was the provision that the syndicate should exert all its financial influence and legitimate efforts to protect the treasury of the United States against withdrawals of gold pending the performance of the contract.

Under this contract the president requested congress to confer upon him the authority to sell a 3 per cent gold bond instead of the 4 per cent coin bond named in the contract, but the house, by a vote of 120 to 167, declined to grant the authority asked.

The delivery of gold under the terms of the contract began at once, imports being received almost weekly. Paying into the treasury from time to time the amounts of gold as they were procured, the net free gold holdings rose under these additions to $68,000,000 by Feb. 20, and to $87,000,000 by the 28th of the same month. On March 30 it was $90,000,000, and the highest figure after the syndicate began $107,523,162 on June 29, at which date, indeed, the total amount of $65,000,000 originally provided for had all been supplied and the real obligation of the syndicate terminated. Nevertheless further amounts were procured by the syndicate and turned in to protect the gold reserve from the unexpected depletion, so that the total amount supplied by the syndicate in excess of its actual obligations was $16,500,000, which was turned in in exchange for greenbacks.

The contract with the syndicate expired by its terms Sept. 30, 1895. In summing up the results of the syndicate's operations and its relations with the government, Bradstreet's, one of the leading financial reviews of the country, says: "During the eight months which have elapsed since the Belmont-Morgan syndicate commenced its operations the skill and persistency with which it has virtually controlled foreign exchanges between this country and Europe have commanded as much admiration as the faithfulness with which the syndicate and its members have fulfilled not only the letter but the spirit of the compact with the treasury. The difficulties of the task have been enormous. Adverse trade conditions, creating a debit balance, were aggravated by the enormous tide of American travel in Europe, which naturally necessitated the transfer of immense sums, while excessively low interest rates caused withdrawals of foreign capital employed in our money market, to say nothing of the continued disposition of foreign investors to sell American securities.

One of the most striking features of the success achieved by the leading members of the syndicate was their ability to place considerable amounts of new railroad and other securities in the London market, the total of such issues aggregating at least £60,000,000 to $75,000,000, all of which contributed to relieve the strain in exchange. At the same time the members of the syndicate, which embraced nearly every foreign exchange house of any note in this market, adhered loyally to the policy of refusing to ship specie, even though exchange rates advanced to the highest quotations on record, figures at which a large profit could have been reaped by exporting specie. It is true that the plans of the syndicate were disconcerted by the appearance of a number of commercial and bullion houses as shippers of gold, partly to meet their own obligations but to a large extent for the purpose of selling bills against such transactions. These shipments in all have amounted to about $25,000,000, and commenced in July last, at a time when the sale of securities in London through syndicate houses had slackened. But for this exceptional circumstance, to say nothing of the tardy appearance of the usual supply of commercial bills in the autumn, there is little doubt that the syndicate's operations would have resulted in an even more signal success. But even with this it remains one of the most unique, daring yet comprehensive operations in the annals of finance, furnishing as it did a basis for the reassertion of confidence in the stability of the United States treasury, and giving the signal for that revival of business which is now in progress throughout the length and breadth of the country."

BALANCE OF TRADE.

Statement of imports and exports from 1845 to 1895, showing the excess of each.

YEAR ENDED JUNE 30.	EXPORTS.			IMPORTS.			EXCESS OF TOTAL.

STRIKES AND LOCKOUTS.

The following tables give the results of strikes and lockouts by years from Jan. 1, 1881, to June 30, 1894. From the report of Carroll D. Wright, United States Commissioner of Labor:

STRIKES BY YEARS.

YEARS.	*Strikes.*	*Establishments.*	*Average establishments to a strike.*	*Employes thrown out of employment.*
1881	471	2,928	6.2	129,521
1882	454	2,105	4.6	154,671
1883	478	2,759	5.8	149,763
1884	443	2,367	5.3	147,054
1885	645	2,284	3.5	242,705
1886	1,432	10,053	7.0	508,044
1887	1,436	6,589	4.6	379,726
1888	906	3,506	3.9	147,704
1889	1,075	3,786	3.5	249,559
1890	1,833	9,424	5.1	351,944
1891	1,718	8,117	4.7	299,064
1892	1,298	5,540	4.3	206,671
1893	1,305	4,555	3.5	265,914
1894 (6 months)	896	5,154	5.8	482,066
Total	14,390	69,167	4.8	3,714,406

LEADING CAUSES OF STRIKES.

CAUSE OR OBJECT.	*Establishments.*	*Per cent.*
For increase of wages	12,041	25.69
For reduction of hours	6,199	13.23
Against reduction of wages	3,830	8.17
In sympathy with strike elsewhere	3,620	7.73
For increase of wages and reduction of hours	3,095	6.60
Against employment of non-union men	1,688	3.60
For adoption of new scale	1,559	3.33
For recognition of union	1,314	2.80
For adoption of union scale	844	1.80
For adoption of union rules and union scale	783	1.67
For increase of wages and recognition of union	686	1.46
To compel World's Fair directors to employ none but union men in building trades	472	1.01
For reinstatement of discharged employes	468	1.00
For payment of wages overdue	383	.82
For increase of wages and reduction of hours on Saturday	378	.81
Against being compelled to board with employer and for reduction of hours and recognition of union	366	.78
For fortnightly payment	342	.73
Total of 17 leading causes	38,068	81.23
All other causes (574)	8,795	18.77
Total for the United States	46,863	100.00

SUMMARY OF STRIKES IN THE PRINCIPAL CITIES.

In the case of many general strikes extending through different cities it was found impossible to subdivide the facts and credit them to the several cities involved. In such cases the whole strike has generally been tabulated against the city most largely affected.

CITIES.	*Total strikes.*	*Establishments.*	*Employes thrown out of employment.*	*Wage loss of employes.*	*Assistance to employes by labor organizations.*	*Loss of employers.*

NATIONS AND THEIR LANGUAGES.

COUNTRIES.	*Name of People.*	*Languages They Speak.*
Austria	Austrians	German, Hungarian, and Slavonic.
Arabia	Arabs, Arabians	Arabic.
Afghanistan	Afghans	Persian and Hindustanee.
Algeria	Algerines	Chiefly Arabic.
Abyssinia	Abyssinians	Abyssinian.
Australasia	Australasians	Dutch and English. Various others.
Brazil	Brazilians	Portuguese.
Bolivia	Bolivians	Spanish.
Belgium	Belgians	Flemish and French.
Beloochistan	Beloochees	Beloochee and Hindustanee.
Canada	Canadians	English and French.
Chile	Chileans	Spanish.
China	Chinese	Chinese.
Denmark	Danes	Danish.
Egypt	Egyptians	Chiefly Arabic and Italian.
England	English	English.
East Indies	East Indians	Hindustanee, Bengalee, Siamese, Malay, etc.
France	French	French.
Greenland	Greenlanders	Danish and Eskimo.
Germany	Germans	German.
Greece	Greeks	Greek.
Holland	Dutch	Dutch.
Hindustan	Hindus	Hindustanee and others.
Iceland	Icelanders	Icelandic.
Ireland	Irish	English and Irish.
Italy	Italians	Italian.
Japan	Japanese	Japanese.
Mexico	Mexicans	Spanish.
Norway	Norwegians	Danish.
Poland	Poles	Polish.
Peru	Peruvians	Spanish.
Paraguay	Paraguayans	Spanish.
Prussia	Prussians	German.
Portugal	Portuguese	Portuguese.
Persia	Persians	Persian.
Russia	Russians	Russian.
Sweden	Swedes	Swedish.
Switzerland	Swiss	German, French, and Italian
Spain	Spaniards	Spanish.
Siberia	Siberians	Russian (mostly).
Siam	Siamese	Siamese.
Scotland	Scotch	English and Gaelic.
Turkey	Turks	Turkish.
United States	Americans	English.
Venezuela	Venezuelans	Spanish.
West Indies	West Indians	Spanish.
Wales	Welsh	English and Welsh.

*This contract was made in 1892 with the Board of Home Missions of the Methodist Episcopal church. As that organization did not wish to make any contracts for 1893 the contract was renewed with Mrs. Daggett.

SALES OF MALT LIQUORS---1889-95.

The *Brewers' Journal* for November publishes the following statistics, compiled from the report of the Commissioner of Internal Revenue, of the sales of malt liquors in the various states and territories and in the leading cities of the country for the year 1895, as compared with the six preceding years. The states showing largest increase are California, Connecticut, Kentucky, Massachusetts and Pennsylvania. The six states in which there has been the largest decrease are Wisconsin, Illinois, Indiana, Louisiana, Missouri and New York. The net increase for 1895 as compared with 1894 is 191,428 barrels:

The average yield per bushel of grain was $\frac{78,172,512}{18,057,107} = 4.32+$ gallons of spirits. The average yield per gallon of molasses was $\frac{1,777,083}{2,219,547} = .800+$ of a gallon of rum.

Three million five hundred and eighty-three thousand two hundred and sixty-four gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

GAME AND FISH LAWS OF THE NORTHWESTERN STATES.

IDAHO.

Moose, caribou, mountain sheep, mountain goat or elk, protected until Sept. 1, 1897. Deer and antelopes, Sept. 1 to Dec. 1. Hounding prohibited. Mongolian pheasants protected until Aug. 1, 1897. Quails and prairie chickens, Oct. 15 to Dec. 15. Partridges, pheasants, grouse, sage hens and fool hens, Aug. 15 to Jan. 1. Ducks, geese and swans, Aug. 15 to April 15. Fish of all kinds, April 15 to Nov. 1.

ILLINOIS.

Deer and turkeys, Sept. 1 to Jan. 15. Pinnated grouse or prairie chickens, Sept. 15 to Nov. 1. Ruffed grouse or quails, Oct. 1 to Dec. 1. Woodcocks, July 15 to Sept. 15. Geese, brants, ducks or other water fowl, Sept. 15 to April 15. Gray, red, fox or black squirrels, June 1 to Dec. 15. Possession and sale of game prohibited in close season, except game brought in from other states, which may be sold from Oct. 1 to Feb. 1. The sale or exportation of quails, grouse, squirrels and turkeys killed within the state prohibited. Bounty of 2 cents per head paid on English sparrows during winter months. The law prohibits the taking of fish with any device other than hook and line, except minnows for bait, within one-half mile of any dam; prohibits fishing through the ice from Dec. 1 to March 1.

INDIANA.

Deer, Oct. 1 to Jan. 1; chasing or worrying at any time and trapping prohibited. Quails and pheasants (ruffed grouse), Oct. 15 to Dec. 20. Wild turkeys, Nov. 1 to Feb. 1. Prairie chickens, Sept. 1 to April 15. Woodcocks, July 1 to Jan. 1. Wild ducks, Sept. 1 to April 15. Squirrels, June 1 to Dec. 20. Wild pigeons protected from any kind of molestation within a half-mile of nesting. Exportation of game prohibited. Gigging and spearing fish allowed only from July 1 to Jan. 1. Artificially stocked waters protected for three years after planting fish. Hook and line fishing allowed at any time.

IOWA.

Prairie chickens, Sept. 1 to Dec. 1. Woodcocks, July 10 to Jan. 1. Ruffed grouse or pheasants, quails and wild turkeys, Oct. 1 to Jan. 1. Deer and elks, Sept. 1 to Jan. 1. Wild ducks, geese and brants, Aug. 15 to May 1. Not more than twenty-five each of grouse, woodcocks or quails to be killed in any one day by any one person. Beavers, minks, otters and muskrats, Nov. 1 to April 1 (for the protection

of private property at any time). Not to exceed one dozen game birds per day may be shipped to any person within the state. Exportation of game birds prohibited. Bass, wall-eyed pike and croppies, May 15 to Nov. 1. Salmon and trout, April 1 to Nov. 1.

MICHIGAN.

Deer in upper peninsula, Sept. 25 to Oct. 25; lower peninsula, Nov. 5 to Nov. 25. Killing deer or fawns in red and spotted coat, and in the water, or by means of pitfall or trap or artificial light, forbidden. Deer and elks protected on Bois Blanc island until Nov. 1, 1899. Woodcocks, Aug. 15 to Dec. 15. Ruffed grouse (partridge), pheasants, quails (colins or Virginia partridge), lower peninsula, Nov. 1 to Dec. 15. Ruffed grouse (partridge), upper peninsula, Oct. 1 to Jan. 1. Jacksnipes, wild geese, redheads, bluebills, canvasbacks, widgeons and pintail ducks, Sept. 1 to May 1. All other wild fowl, Sept. 1 to Jan. 1. Prairie chickens protected until Sept. 1, 1894. Mongolian pheasants protected. Exportation of game birds and fish and sale of either during close season prohibited. Speckled trout, grayling, California trout and landlocked salmon, with hook and line only, May 1 to Sept. 1; less than six inches in length protected; also protected in streams where they are not native for three years after first planting; brook trouts and graylings shall not be taken for sale or sold. Black, strawberry, green or white bass at any time, but by hook and line only; muscallonge, July 1 to March 1.

MINNESOTA.

Fawns, elks, moose and antelopes protected until January, 1898. Deer, Nov. 1 to Nov. 20. Hounding prohibited. Woodcocks and upland plovers, July 4 to Nov. 1. Prairie chickens and sharp-tailed grouse, Sept. 1 to Nov. 1. Ruffed grouse, pheasants, quails or partridges, Sept. 1 to Dec. 1. Geese, ducks, brants, snipe and all aquatic fowl, April 25 to Sept. 1, but no person shall be permitted to kill any such aquatic fowl while nesting or in localities where they are accustomed to build their nests, during the nesting period. Minks, muskrats, otters and beavers, Nov. 1 to May 1. Trespass prohibited; lands must be posted. Speckled, river or brook trout, April 1 to Oct. 1. Wall-eyed pike and other food fish, April 15 to Dec. 1. Hook and line fishing only allowed, and then not near a fishway, millrace or dam. Not more than twenty-five birds or fifty fish allowed to be caught by one person in one day. Exportation of game and fish prohibited, except that persons may convey from the state in person, the amount legally allowed.

MISSOURI.

Deer, Oct. 1 to Jan. 1; hounding prohibited. Turkeys, Sept. 15 to March 1. Prairie chickens (pinnated grouse), Aug. 15 to Feb. 1. Ruffed grouse (commonly called pheasants) and quails (Virginia partridges), Nov. 1 to Jan. 1. Woodcocks and Mongolian pheasants, July 1 to Jan. 10. Doves, meadowlarks and plovers, Aug. 1 to Feb. 1. Waterfowl not protected. Non-residents are not allowed to shoot or fish within the state. Exportation of quails and prairie chickens prohibited until March 30, 1898.

MONTANA.

Bisons or buffaloes, quails and Chinese pheasants protected until March, 1903. Moose, elks, otters and beavers protected until March 1899, except that beavers may be killed by owner of land to protect his water rights. Deer, antelopes, mountain sheep and mountain goats, Aug. 15 to Dec. 15. Hounding prohibited. Martens and fishers, Oct. 1 to April 1. Grouse, prairie chickens, pheasants, fool hens, sage hens, partridges and snipes, Aug. 15 to Nov. 15. Wild geese, ducks, brants, swans, Sept. 1 to Jan. 1. Speckled or mountain trout, July 1 to May 1. The sale of trout prohibited. Fishing with single rod, line and hook only allowed. All other devices prohibited. Shooting for market or for speculation or for hides or heads prohibited.

NEBRASKA.

Buffaloes, elks, mountain sheep, deer, antelopes, Oct. 1 to Jan 1. Grouse, quails and turkeys, Sept. 1 to Jan. 1. Transportation of game is prohibited. Minks and muskrats, Feb. 15 to April 15. Ducks, geese and all wild fowl may be shot at any time with a shoulder gun. Hounding deer is prohibited in Burt, Douglas, Cass, Sarpy, Saunders and Dodge counties. Fish can be taken with hook and line only.

NORTH DAKOTA.

Buffaloes, elks, deer, antelopes and mountain sheep, Sept. 1 to Jan. 1. Exportation of any of these animals prohibited. Hounding prohibited. Grouse of all kinds and wild ducks, Aug. 20 to Dec. 1. Snipe, geese, brants, plovers and curlews, Sept. 1 to May 1. Quails protected until March, 1895. Not more than twenty-five of any of the game birds or fowl mentioned allowed to be killed or had in possession at any one time. Exportation prohibited and not more than one dozen of either of said game birds allowed to be shipped or transported in any one day within the state by any one person, after making affidavit that said birds have been legally killed. Wasting game or leaving the same lying about prohibited. Pike, pickerel, perch, bass, muscallonge, May 1 to Feb. 1. Fishing with hook and line only allowed; all other devices prohibited.

SOUTH DAKOTA.

Prairie chickens, ruffed and sharp-tailed grouse. Sept. 1 to Jan. 1. Snipe, plovers, curlews, ducks, geese and brants, Sept. 1 to May 15. Quails protected until 1898. Shooting of more than twenty-five birds of one kind in a day, or the possession of the same, prohibited. Shipping out of state and the shipment of more than twelve birds within the state prohibited. Deer, buffaloes, elks, antelopes and mountain sheep protected until Sept. 1, 1896. Bass, muscallonge, pike, pickerel and perch, May 1 to Feb. 1. Those intended for breeding may be taken at any time. Netting prohibited except in the Missouri and Red rivers.

WISCONSIN.

Woodcocks, qualls, partridges, pheasants or ruffed grouse, prairie chickens, sharp-tailed grouse or grouse of any other variety, snipe, plovers, mallard, teal or wood ducks, Aug. 20 to Dec. 1. Wild ducks of any other variety, wild geese or brants of any variety, or any aquatic fowls whatever, Sept. 1 to May 1. Deer, Nov. 1 to Nov. 21. Hounding or worrying deer prohibited at all times; and the use of dogs with which to hunt rabbits during October prohibited. Otters, martens, minks, fishers, Oct. 1 to May 1. Beavers protected until 1898. Shooting wild fowl from any other than natural blinds prohibited. Pigeons protected within two miles of their roosts. Brook, rainbow or mountain trout, April 15 to Aug. 20. Lake trout, Jan. 15 to Oct. 1. Black, green and Oswego bass and wall-eyed pike, June 1 to March 1. Muscallonge, June 1 to March 1. Catching trout for sale prohibited. Exportation of deer and trout prohibited.

WYOMING.

Partridges, pheasants, prairie chickens, prairie hens or grouse, Aug. 15 to Nov. 1. Sage chickens, July 15 to Sept. 15. Snipe, green shanks, tattlers, godwits, curlews, avocets, or other waders, plovers and qualls, protected at

all times. Wild ducks, Aug. 1 to May 1. Deer, elks, moose, mountain sheep, mountain goats, antelopes, protected at all times, except that a bona-fide resident may at any time kill not more than three of any of said animals in any one week for the purpose only of supplying himself and family with food. Non-residents prohibited from hunting them at any time. Bison or buffaloes and beavers protected until March 15, 1900. Exportation of game, hides or heads prohibited. Any game brought into the state must be accompanied by an affidavit, to be recorded in the office of the county clerk and recorder of the county, to prove that said game was not killed in any other state or territory in violation of the laws of such state or territory. Fishing, June 1 to Oct. 1; trout less than six inches protected.

BANK CLEARANCES.

For eleven months ending with November of 1893-4-5, as reported by Bradstreet's Journal.

THE CIVIL SERVICE.

RULES OF THE NATIONAL GOVERNMENT.

[Prepared for the Daily News Almanac by the secretary of the United States civil-service commission.]

The civil-service act "to regulate and improve the civil service of the United States" was passed on Jan. 16, 1883. It provides for the appointment of three commissioners, a chief examiner, a secretary and other employes, and makes it the duty of the commission to aid the president as he may request in preparing suitable rules for carrying the act into effect; to make regulations for and control the examinations provided for. The main purpose of the act is to establish a system of examinations for ascertaining the fitness of applicants for doing the public work. In place of the machinery of patronage, largely based on official favor and social and political influence, it substitutes a merit system of competitive examinations for appointment and promotion in the civil service open to all citizens alike, and forbids discrimination for political or religious reasons.

The civil service of the United States, by whose labors the executive and administrative business of the federal government is carried on, is five times more extensive than the whole force of the army and navy combined. The whole number of persons regularly employed in the civil service is about 200,000, of whom 50,500 (or one-fourth) are classified subject to competitive examination under the civil-service act and rules. The classified service does not extend to mere laborers and workmen or to persons subject to confirmation by the senate. Of the 150,000 not classified about 5,000 are appointed by the president subject to confirmation by the senate, 22,000 are laborers, 67,000 fourth-class postmasters, 1,500 in the legislative and 2,666 in the judicial branch. One-half of the entire civil service is under the postoffice department. The 50,500 places to which appointments can only be made upon competitive examination under the civil-service rules, embracing the large departments and offices, comprise about one-half the entire civil service in point of importance. The classified service is divided into seven branches:

1. The departmental service at Washington, which includes the executive departments, together with the department of labor, fish commission, civil-service commission, weather observers, postoffice inspectors, clerks to postoffice inspectors, sea-post clerks, pension examiners, inspectors and assistant inspectors of the bureau of animal industry, fish-culturists and employes at pension agencies. In this branch there are 11,000 places.

2. The customs service, comprising the employes at the customs ports where there are more than twenty employes, with 3,600 places.

3. Free-delivery postoffices, 22,000.

4. The railway mail service, including steamboat clerks and transfer clerks, 7,500 places.

5. The Indian-school service, 700.

6. The internal-revenue service, 3,000.

7. The government printing office, 2,700.

The examinations cover a wide range of subjects and are practical in character, adapted to the duties of the places to be filled. Examinations are held twice a year in every state and territory at fixed times and places. Persons desiring information respecting the postal or customs service should make application to the local board of examiners at the classified office at which service is sought. For all other branches of the service application should be made to the civil-service commission at Washington.

Few women are appointed. During the year ended October, 1895, only one woman was appointed under the clerk-copyist examination in the departments at Washington. A few received appointments as stenographers and typewriters. In the customs service women are only employed as inspectresses. Women have the best chance of appointment as teachers and matrons in the Indian service, the salaries of which are from $500 to $720 a year. Men have the best chance of appointment as stenographers and typewriters, draughtsmen, meat inspectors, patent examiners, pension examiners, fish-culturists, etc. Except for places requiring technical qualifications the number of applicants is usually excessive and only those who attain high grades in the examinations have a good chance of appointment.

No applicant is admitted to an examination in any one of the different trades, such as those in the government printing office, unless he has had five years' experience in his trade, one year of which must have been as a journeyman. This information is brought out by personal questions relating to the applicant's experience at his trade and the certificates of persons who have employed him. For ordinary clerical places the examination is confined to orthography, penmanship, copying, letter-writing and simple arithmetic. Patent examiners are examined in physics, technics, mathematics, chemistry and mechanical drawing. Meat inspectors are examined in letter-writing, veterinary anatomy and physiology, veterinary pathology and meat inspection. One of the practical tests for postoffice clerks and railway mail clerks is an exercise in reading manuscript addresses. Specimen sets of questions will be furnished by the commission on request.

Examinations for the consular service are non-competitive and are conducted by a board of the state department outside the civil-service rules. Application should be made to the secretary of state.

CIVIL-SERVICE RULES OF THE CITY OF CHICAGO.

RULE I.—CLASSIFICATION.

1. Section 11 of said act [entitled "An Act to Regulate the Civil Service of Cities"] provides that the following offices and places of employment shall not be included in the classified service:

"Officers who are elected by the people, or who are elected by the city council pursuant to the city charter, or whose appointment is subject to confirmation by the city council; judges and clerks of election, members of any board of education, the superintendent and teachers of schools, heads of any principal department of the city, members of the law department, and one private secretary of the mayor."

The offices and places above named shall constitute the unclassified service.

2. All other offices and places of employment in said city, under the provisions of said act, whether permanent, temporary or substitute, shall constitute the classified service. With reference to the examinations hereinafter provided for, they are hereby classified under two general classes, to be known as class A and class B respectively. This classification is based mainly upon nature of employment. The positions embraced in class A will be

chiefly those of a permanent character, while those in class B will be more in the nature of temporary employments.

3. Class A shall be known as the official service and class B as the labor service.

4. For convenience in designation, in carrying on examinations, certifying for appointments and promotions, and in making removals, the official service shall be divided into divisions, based upon the character of the service to be performed, and each division shall be divided into grades, based upon amount of compensation.

The several divisions of the official service shall be as follows:

Division A—Medical service.
Division B—Civil engineering.
Division C—Clerical service.
Division D—Police service.
Division E—Electrical service.
Division F—Fire service.
Division G—Mechanical engineers.
Division H—Bridge service.
Division I—Inspection service.
Division J—Janitor and elevator service.
Division K—Library service.
Division L—Miscellaneous service.

The grades shall be uniform in all the divisions and based upon compensation, as follows:

First Grade—Compensation of which is less than $800 per annum.

Second Grade—$800 per annum and less than $1,000.

Third Grade—$1,000 per annum and less than $1,200.

Fourth Grade—$1,200 per annum and less than $1,400.

Fifth Grade—$1,400 per annum and less than $1,600.

Sixth Grade—$1,600 per annum and less than $1,800.

Seventh Grade—$1,800 per annum and less than $2,100.

Eighth Grade—$2,100 per annum and less than $2,500.

Ninth Grade—$2,500 per annum and less than $3,000.

Tenth Grade—$3,000 per annum or over.

5. In divisions D and F (police and fire departments) the rank and official designation, as established by ordinance or usage, may be recognized, and when promotions from rank to rank are not in conformity with the grading as herein established the commission may base examinations for promotion upon the system of rank as existing or as may be established by law in those two divisions.

CLASS A—OFFICIAL SERVICE.

RULE II.—1. No person shall be admitted to examination for any position in the official service who is not a citizen of the United States, and who has not been an actual resident of the city of Chicago for at least one year next preceding the date of examination, (2) who is less than 20 or more than 45 years of age at the date of the examination, except that applicants for positions of pages and messengers must be not less than 17 years of age at the date of examination.

3. In special examinations for any place requiring technical, professional, scientific knowledge or manual skill of a high order the commission may waive the requirement of residence in the city of Chicago fixed in section 1 of this rule.

RULE III.—Application. 1. Application for admission to examination shall be made on blanks in such form and manner and supported by such certificates of persons acquainted with the applicant as the commission may prescribe. These blanks will be furnished directly to applicants for examination.

2. Every applicant must be of good moral character, of temperate habits, of sound health, and must be physically able to perform the duties of the position applied for.

3. A good moral character is an essential qualification and is of paramount importance in determining an applicant's right to examination.

4. The burden of proof of good character shall in all cases be upon the applicant, who may be required to furnish evidence thereof, additional to the certificates required in the application.

5. Failure by the applicant to prove good character to the satisfaction of the commission shall exclude said applicant from examination. Proof at any time produced to the commission of the bad character or dissolute habits of an applicant or eligible, of any criminal or disgraceful act committed by him, or of dismissal for good cause from the public service, shall be deemed sufficient cause to exclude said applicant from examination, or for removal from a register of eligibles after examination.

6. A false statement knowingly made by any person in an application for examination, connivance at any false statement made in any certificate which may accompany such application, or complicity in any fraud touching the same, shall be regarded as good cause for exclusion from the register of eligibles, or for removal or discharge during probation or thereafter: but no person shall be removed from a register of eligibles, or from the service, under this section, until an opportunity has been given him to be heard by the commission. A record shall be kept of the finding of the commission, showing the vote thereon and the reason therefor.

7. A defective application will be returned to the applicant with a notice to amend the same, but not more than two opportunities for amendment need be given. Whenever the application shows that the applicant is not qualified for examination under these rules the applicant will be notified of the same and of the reason therefor.

8. Applications and accompanying certificates not returned for correction will remain on file in the office of the commission, and under no circumstances be returned to applicants.

9. The commission may limit the number of applications to be received for any examination or restrict the numbers to be examined, according to the needs of the service; but in all such cases applicants shall be admitted to examination in the order in which their applications have been filed in due form.

RULE IV.—Examination. 1. All examinations shall be absolutely impartial, practical in their character, and shall have paramount regard to matters which will fairly test the relative capacity and fitness of the persons examined for the service which they seek to enter.

2. No question in any examination shall relate to political or religious opinions or affiliations, and no appointment or selection to an office or for employment within the scope of these rules shall be in any manner affected or influenced by such opinions or affiliations.

3. Examinations shall be held at such times and places as the commission may designate, and two weeks' notice thereof shall be given, as provided by law.

4. The subjects of examination shall be designated from time to time by the commission, and shall be such as the needs of the service require and such as tend to prove the qualifications of the applicant for the office sought, and may include special tests of fitness for any particular place requiring technical, professional or scientific knowledge or manual skill.

5. Proficiency in any subject shall be credited in grading the standing of the person examined in proportion to the value of a knowledge of such subject in the branch or part of the service which the applicant seeks to enter and of physical qualifications and health. The relative weight of each subject shall be fixed by the commission for every examination.

6. The name of no person shall be entered on a register of eligibles whose standing upon a just grading in the examination shall average less than 70 per cent of complete proficiency in the subjects of the examination taken as a whole.

7. The commission will provide for examinations to determine the physical qualifications and health of all applicants. Such examinations shall be made by physicians in the service of the city, unless the commission shall appoint other physicians or competent experts for the purpose. The result of such examinations shall be certified on blanks furnished by the commission.

8. All questions used in any examination shall be first approved by the commission. All examinations shall be conducted under the supervision of, and examination papers shall be marked under the regulations of the commission. The same series of examination papers shall not be used a second time.

9. For the purpose of preparing and marking examination papers for original entrance to the official service, there shall be a general board of examiners, to consist of not less than three persons. Such board shall be composed of persons in the public service, who shall be detailed for duty at the office of the commission, or of such other persons not in the public service as the commission may from time to time designate. Under supervision of the commission, the general board shall prepare and mark the papers of such examinations as the commission shall direct. There may also be such special boards of examiners and such auxiliary members of the general board, for the preparation of questions and marking of candidates in technical subjects, as the commission may from time to time designate. The members of each of such boards shall not all be of the same political party. The commission will designate the chairman and secretary of each of such boards and make such change in the membership from time to time as it may deem proper. Each board shall keep such records and make such reports as the commission may require. Such records shall be open to the inspection of any member of the commission and of the chief examiner.

10. Each applicant will be notified of the general average he has obtained on examination.

11. No person who has failed to pass an examination shall be re-examined within six months from the date of such failure. An applicant who has passed an examination and been enrolled upon a register of eligibles shall not be again examined for the same branch of the service until one year from the date of such enrolment, and then only upon withdrawing his name from the register of eligibles and filing a new application.

RULE V.—Registers of eligibles. 1. All competitors who attain a general average of 70 per cent or over shall be eligible for appointment to the place for which they were examined, and their names shall be enrolled in the order of general average upon the proper register, which shall be in such form as the commission shall prescribe, and shall be called "Registers of Eligibles."

2. Priority of date in examination will give no advantage in position on the registers of eligibles.

3. Names shall remain upon the registers of eligibles for two years from the date of their enrollment, unless sooner removed under authority contained in these rules or by appointment. At the expiration of one year the eligible shall, upon a form prescribed by the commission, furnish new certificates of character.

4. Any person whose name is on a register of eligibles for the official service may accept a temporary appointment in the labor service without losing his position upon such register of eligibles.

RULE VI.—Requisition and certification. 1. Whenever a vacancy is to be filled in the official service, unless it is to be filled by promotion, the appointing officer shall make requisition, upon a form prescribed by the commission, for the certification to him of the name of an eligible. The commission shall certify to him the name of the person who stands highest on the appropriate register of eligibles and such person shall be appointed.

2. In case the requisition or any statute or ordinance shall specify sex, those of the sex specified shall be certified; otherwise sex shall be disregarded in certification.

3. An eligible may when his name is reached for appointment waive certification or decline an appointment tendered, upon giving reasons satisfactory to the commission, without losing his position upon the register. In the absence of such permission the effect of an appointment or of a refusal to accept an appointment tendered shall be to drop the name of the eligible from the register.

RULE VII.—Appointment. 1. No person shall be appointed to any office or place of employment in the official service except under the provisions of these rules.

2. In case there is no eligible on the appropriate register and the commission is unable to comply with a requisition, it may in its discretion, as provided in said act, to prevent the stoppage of public business or to meet extraordinary exigencies, allow a temporary appointment for a period not exceeding sixty days, and only until a regular appointment can be made through examination.

3. Vacancies in the classified service, if not filled by promotion, shall be filled by requisition and certification, as provided in rule VI. The appointing officer shall notify the person certified and fill the place by the appointment of that person. Such appointment shall be on probation for a period of six months. At the end of this period, if the conduct and capacity of the person appointed have been satisfactory, the appointment shall be deemed complete.

4. If any probationer shall, upon fair trial, be found incompetent or disqualified for the performance of the duties of the position he is filling, the appointing officer shall certify the same in writing to the commission. Upon the approval of the commission such probationer shall be dropped from the service.

5. All persons appointed to or promoted in the official service shall be assigned to and perform the duties of the position to which appointed or promoted.

RULE VIII.—Promotion. 1. All promotion in the classified service, unless herein otherwise provided, shall be from grade to grade and shall be made upon voluntary, open, competitive examination. Competition in such examinations shall be limited to the employes in the next lower grade of the department in which the position exists, unless the commission shall deem it for the interest of the service to admit to competition employes in the same grade and division in other departments. For a position in any grade above the lowest in any division of the service, the commission will decide as to the practicability

of filling the same through an examination for promotion, or whether the same shall be filled by an examination for original entrance to the service.

2. In each principal department a board of promotion will be appointed by the commission, upon consultation with the head of the department. Each board shall consist of not less than three members, not all of whom shall be of the same political party, and the commission will designate one of the members to act as chairman and another to act as secretary. The commission may, from time to time, change the membership of such boards.

3. It shall be the duty of such boards, under the supervision of the chief examiner, and by direction of the commission, to assist in preparing and marking the papers for the promotion examinations in the departments to which they belong, and to perform such other appropriate duties in connection therewith as may be assigned to them by the commission.

4. Regular examinations for promotion in all offices shall be held annually, commencing on the second Monday of January in each year. Application must be recorded by the applicant in person, in a book provided for that purpose in the office of the commission, at least twenty days before the date fixed for the examination. Special examinations may be held at other times when in the opinion of the commission the interests of the public service may require them. If held at other times, due notice thereof shall be given, stating the time and place of examination and the time when applications may be recorded.

5. No person shall be examined for promotion from any grade in the official service until he has served at least six months in such grade.

6. The examinations for promotion shall be practical in character, and shall embrace such subjects as will test the general intelligence of the applicants and their accuracy and knowledge of the business of the department and of the branch of service in which they are to be employed, and shall include tests of physical qualifications and health, and, when appropriate, of manual skill. Special examinations for positions requiring technical, professional or scientific knowledge, or special skill, will be provided by the commission, from time to time, as the needs of the service may demand; and auxiliary members of the boards of promotion may be appointed to serve for such special examinations.

7. In all examinations for promotion the physical qualifications and health, the length of previous service and the efficiency of the applicant shall be given due weight. The credit to be given for efficiency will depend upon the manner in which the records, showing the same, have been kept in the office in which the applicant has served. If so kept as to faithfully show a daily record of his punctuality, industry, ability, habits and aptitude for the service, maximum credit will be given such record. The mark for efficiency to be used in determining the general average of competitors in promotion examinations will, when based upon a proper record, be the general average of the marks shown by the record during the three months next preceding the examination. A credit of 5 in the subject of seniority will be given for each year of continuous service.

8. Each competitor shall be graded on a scale of 100, according to the general average determined by the markings, and no competitor who fails to attain a general average of 70 per cent shall be deemed eligible for promotion.

9. Registers of persons eligible for promotion in each department and bureau for which promotion examinations are held shall be kept by the commission.

10. Certification of eligibles for promotion shall be made by the commission upon requisition of an appointing officer in groups of three, in the order of standing. Each eligible shall be entitled to three certifications, and the appointing officer must choose at least one name from each certification, and the one so chosen shall receive the promotion.

11. In certifying from the registers for promotion, when two or more eligibles have the same general average, preference in certification shall be given in the order of seniority of service.

12. Increasing or diminishing the compensation of any position in the official service, whereby the grade of such position as established by the classification is changed, whether done by ordinance or otherwise, shall not affect the tenure of the incumbent of such office or place of employment, unless in the opinion of the commission such change shall involve a change in duties requiring a different examination.

RULE IX.—Removal. 1. The removal of an officer or an employe who has been appointed to the official service in accordance with these rules can only be made as provided in section 12 of said act.

2. Section 12 of said act provides that no officer or employe in the classified service who shall have been appointed under these rules and after examination shall be removed or discharged, except for cause, upon written charges and after an opportunity to be heard in his own defense. When a removal is deemed necessary the appointing officer shall immediately notify the commission in writing of the grounds therefor. Such grounds shall be investigated by the commission, and the accused person shall be given an opportunity to be heard in his own defense. The finding and decision of the commission shall be certified to the appointing officer, and shall be forthwith enforced by said officer. Pending such investigation the appointing officer may suspend the accused for a reasonable period, not exceeding thirty days. Nothing in this section shall be construed to require such charges or investigation in cases of laborers or persons having the custody of public money for the safe keeping of which another person has given bonds.

RULE X.—Reports to be made. 1. For the purpose of certification to the comptroller for the payment of salaries, as required by section 30 of said act, and in order that the commission may keep proper record of changes in the service, each appointing officer shall immediately report to the commission, as required by section 13 of said act:

(a) Every probational or temporary appointment made by him.

(b) Every refusal or neglect to accept an appointment under him by a person who has been duly certified.

(c) Every change in the compensation of any officer or employe serving under him.

(d) Every suspension made by him of any officer or employe.

(e) Every separation from the service under him, and whether the separation was caused by dismissal, resignation or death.

2. When any office or place of employment is created or abolished, or the compensation

attached thereto altered, the officer or board making such change shall immediately report it in writing to the commission.

3. A list to be known as the civil list of the city of Chicago shall be kept in the office of the commission, to contain the name of every person employed in, or receiving compensation in, the classified service. The list shall show respecting every officer and employe: The title of his office, the salary or compensation thereto attached, the time he has held such office, the time he has been in the service of the city of Chicago and the places in that service he has filled, a brief specification of the duties of the office, by whom the appointment thereto is made, and the term, if any, of the office.

4. As provided in section 31 of said act, no payment in compensation for services rendered, after the taking effect of these rules, can be made by the city, or any of its officers, to a person holding a position in the classified service, until it appears either that he was employed in such position before these rules took effect, or that he has been employed under the provisions of the same.

RULE XI.—Police department. All original appointments on the police force shall be as second-class patrolmen.

Every applicant for the uniformed police force, in addition to the requirements specified in section 1 of rule II., must at the time of such application be between 21 and 35 years of age, not less than 5 feet 8 inches in height in his bare feet, and of a weight which shall fall within the limits below prescribed, and have a quiescent chest measurement of not less than the figures below given; provided, however, that applicants who have had previous experience in said department and who were separated therefrom without fault or delinquency on their part may deduct from their actual age any time not exceeding five years during which they have continuously served in said department:

HEIGHT.	WEIGHT.		*Circumf. of Chest. Quiescent.*
	Minimum	*Maximum*	
5 feet 8 in....	145 pounds	185 pounds	35 inches.
5 " 9 " ...	150 "	190 "	35½ "
5 " 10 " ...	155 "	195 "	36 "
5 " 11 " ...	160 "	205 "	37 "
6 " ...	165 "	210 "	37½ "
6 " 1 " ...	170 "	215 "	38 "
6 " 2 " ...	175 "	225 "	39 "
6 " 3 " ...	180 "	230 "	40 "
6 " 4 " ...	185 "	235 "	41 "

The applicant must successfully pass such physical examination as shall be prescribed by the commission.

RULE XII.—Fire department. All original appointments to the uniformed force of the fire department shall be made to the lowest grade in the several branches of said service, and advancement to the higher grades shall be by promotion in accordance with the provisions of rule VIII.

Every applicant, in addition to the requirements specified in section 1 of rule II. must at the time of the examination be between the ages of 21 and 33 years, not less than 5 feet 7 inches in height (in bare feet), and his weight and circumference of chest must be in accordance with the following table; provided, however, that applicants who have had previous experience in said department and who were separated therefrom without fault or delinquency on their part may deduct from their actual age any time not exceeding five years during which they have continuously served in said department:

HEIGHT.	WEIGHT.		*Minimum Circumf. of Chest. Quiescent.*
	Minimum	*Maximum*	
5 feet 7 in....	140 pounds	180 pounds	34 inches.
5 " 8 " ...	145 "	185 "	35 "
5 " 9 " ...	150 "	190 "	35½ "
5 " 10 " ...	155 "	195 "	36 "
5 " 11 " ...	160 "	200 "	37 "
6 " ...	165 "	210 "	37½ "
6 " 1 " ...	170 "	215 "	38 "
6 " 2 " ...	175 "	225 "	39 "
6 " 3 " ...	180 "	230 "	40 "
6 " 4 " ...	185 "	235 "	41 "

There should be a difference of at least two inches between forced and full inspiration.

The applicant must successfully pass such physical examination as shall be prescribed by the commission.

CLASS B—LABOR SERVICE.

RULE XIII.—All places of employment requiring skilled or unskilled labor which are not included in either the unclassified or the official service, and coming under the provisions of said act, shall constitute the labor service.

RULE XIV.—Citizenship, residence, qualifications and age. 1. No person shall be admitted to examination for a position in the labor service who is not a citizen of the United States and who has not been an actual resident of the city of Chicago for at least one year next preceding the date of examination. Mechanics must have served not less than four years as journeymen at their respective trades.

2. No person will be admitted to examination who is less than 20 years or more than 55 years of age at the date of examination; except that for minor places, such as errand boys, water carriers, etc., applications may be received from persons between 15 and 20 years of age.

RULE XV.—Application, how made. Application for admission to the labor service must be made in form and manner and under the same restrictions as prescribed in rule III. for admission to the official service.

RULE XVI.—Examination of laborers. 1. Upon the return of the application blank duly filled out and signed by the applicant, with his name or mark, together with the required certificates of his habits as to industry and sobriety duly filled out and executed, the commission will number the application in the order of its receipt and notify the applicant of the time and place of his examination for registry as hereinafter provided. At the time and place so specified such examiner or examiners as may be selected by the commission shall in such manner as it shall prescribe make inquiry regarding the age, residence, citizenship, character, physical condition, family, previous occupation and experience of the applicant, and ascertain and determine whether he is qualified for the employment sought, and shall indorse a statement of the determination in that regard and the reasons for it upon his application, with a brief personal description of the applicant. Note will be made of superior physical qualifications. The applicants shall be graded: First, upon their physical qualifications; second, upon their own account of themselves, their occupation and experience; third, upon their

knowledge of the requirements of their work, the necessary tools, the manner of doing the work they seek, and like matters. Foremen shall also be examined upon the number of men who can be worked together and upon simple arithmetic and writing, to show a general intelligence sufficient to enable them to make written reports. No educational test of qualifications shall be required for common laborers. Any willfully false statement or fraudulent conduct on the part of the applicant shall disqualify him for registration.

2. For any service other than that of common laborer the applicant will be required to produce a certificate, from some competent person or persons in the same trade or occupation, of the applicant's ability to do the special kind of work in which he desires to be employed.

RULE XVII.—Registration of laborers. 1. Registers shall be kept in the office of the commission for each trade and the different branches of labor in the city service.

2. Applicants who have been found by the examiners qualified for the employment sought shall be entered upon the appropriate registers in the order of rating fixed by the examiners, but no person shall be enrolled upon more than two registers without the consent of the commission.

3. The commission may, if the needs of the service seem to require, divide the city into districts and make separate registers of laborers residing in each of such districts. The commission may change such districts at any time and such registers may be consolidated into one or more registers.

4. No employe whose employment is terminated by reason of failure or refusal to do the work assigned him, incompetency, drunkenness, physical or moral disqualification, shall be retained upon the register, or be again elegible for registration, until the expiration of six months from the date of such termination, and then only upon furnishing to the commission satisfactory reasons for his failure to do the work, and satisfactory evidence that incompetency or physical or moral disqualification for the employment for which he seeks to be registered does not exist.

5. The commission will make such regulations as it may deem necessary to identify the registered applicants and to preserve a record of their conduct.

RULE XVIII.—Requisition and certification. 1. When the services of laborers are required the appointing officer shall notify the commission, stating the number of men needed, the particular kind of labor for which they are wanted, and the time and place of employment. The commission shall thereupon certify to the appointing officer the names and residences of the number of men called for. In making certification, those names on the register of the division covering the particular kind of labor called for shall be given preference in the order of their rating, who, within one year next preceding, have satisfactorily served in the department or bureau from which the requisition is made. If there are no such persons, then certification shall be made in the order of general average, as fixed on examination, but regard may be had to a request by an appointing officer for preference to be given on account of age, physical qualification or residence in the district where the work is to be done. The persons thus certified shall thereupon be employed in the order of their rating.

2. An eligible on any register in the labor service to whom employment is tendered, who fails to report for duty when called upon, must, within ten days of such failure, present reasons satisfactory to the commission in explanation of the same; otherwise his name will be dropped from the register.

3. On being laid off from service in any department an eligible desiring further employment will return to the office of the commission with a card from the employing officer, stating the date and reason of being laid off, and whether the services have been satisfactory. The names of all whose services have been found satisfactory will be retained on the register of eligibles for further certification.

4. To prevent the stoppage of public business or to meet extraordinary exigencies, the appointing officer may, with the approval of the commission, make a temporary employment without requisition upon the commission; provided, however, that in no case shall such temporary employment continue for more than sixty days and only until regular employment can be made under these rules. No employment of the same person or of another to the same position at the end of such period shall be allowed under this rule.

RULE XIX.—Promotion of laborers. 1. Promotion may be made from one rate of compensation to another in the same kind of employment. Preference in promotion shall be given to those longest in the service who have been found faithful and efficient and who are qualified for such promotion. Helpers may be promoted to journeymen in the trade in which they are registered after four years' service in that trade, subject to the above restrictions. Such promotions shall depend only upon proficiency, industry, regularity of attendance, interest shown in the work, quality of work and good conduct.

2. Promotion may be made from the labor service to the official service upon application and examination in the same manner as provided for original entrance to the position sought. Credit will be given to such applicants for efficiency and seniority while serving in the temporary or labor service, as provided in rule VIII., section 7.

RULE XX.—Reports to be made. For the purpose of certification to the comptroller for the payment of wages, as required by section 30 of said act, and in order that the commission may keep proper record of changes in the service, each appointing officer will immediately report to the commission the names and registry numbers of the persons employed upon certification, with the date of such employment and the compensation, and upon the termination of the employment shall report the date of such termination, the reason thereof, and whether the service rendered has been satisfactory. These reports shall be made upon forms prescribed by the commission.

RULE XXI.—Reduction of force. When by reason of want of work reductions are made in the force of laborers or workmen, those least efficient shall first be laid off. Foremen shall be given priority for retention in some capacity and shall be among the last to be laid off, as an incentive to the proper and fearless performance of duty.

The foregoing rules as amended are adopted to take effect Tuesday, Oct. 22, 1895.

JOHN M. CLARK,
ROBERT A. WALLER,
CHRISTOPH HOTZ,
Commissioners.

THE CASE OF MR. WALLER.

The case of John L. Waller, an American citizen resident of Madagascar, who was arrested, tried by court-martial by the French officers in that country and sentenced to twenty years' imprisonment, has been the subject of a good deal of diplomatic correspondence between the United States and France and is yet unsettled. Mr. Waller, a colored man and a citizen of Kansas, was appointed by President Harrison to be United States consul at Tamatave, Madagascar, which position he filled until his successor was appointed by President Cleveland.

For some years France has been at war with the Hova government, attempting against the protest of that government and its people to establish a protectorate over Madagascar. The United States did not acknowledge the right of the French to establish such a protectorate, and naturally enough the representative of our government would be in sympathy with the Hovas. Upon his arrival at Madagascar Mr. Waller applied to the queen for his exequatur, which was granted, but the French claimed that the United States consul should have made his application for his exequatur through their own authorities. The state department approved of Mr. Waller's course in the whole matter, but it made him most obnoxious to the French authorities at Tamatave. In 1894 the French authorities learned that Mr. Waller had obtained a concession from the Hova government. The French authorities pronounced the grant worthless as in contravention of the treaty of 1885, although just such concessions are provided for in the treaties of 1867 and 1885 between the United States and Madagascar. The territory granted to him is near Fort Dauphin, in the southeastern part of the island. It is about fifteen miles square and contains about 225 square miles, or about 141,000 acres. It is described as lying within one of the richest rubber districts in the world, besides containing stores of ebony and other valuable woods. Its possession is declared to be equivalent to a fortune. It is not necessary to go into the legal questions involved in the discussion of the validity of the grant. What is interesting here is the cause of the virulent opposition of the French to Mr. Waller's holding it. One explanation is that France intends to turn the island into a colony and that no nation desires a considerable settlement of foreigners in one of its colonies—such a settlement of blacks as Mr. Waller proposed to establish.

Mr. Waller was attacked, his house was broken into, and his life was threatened by French man-of-war men from ships in the harbor. The French declared martial law at Tamatave and issued a set of postal regulations which provided that all letters must be mailed unsealed to permit an examination of the contents, and imposed a fine of from 5 to 25 francs upon any one caught smuggling a letter out of the country. In both acts the French, according to Mr. Waller's counsel, violated international law. In defiance of the regulations Mr. Waller dispatched a letter on board the British steamship Umlozi. It was addressed to a friend named Tessier at Antananarivo, the capital, and was to go via the English port of Natal and thence to Vatomandry, a part of Madagascar then in the hands of the Hovas. Unfortunately the steamship missed her connection at Natal, and the mail-bag, instead of going to Vatomandry, was sent back to Tamatave, where the French officials discovered Mr. Waller's letter. For this Mr. Waller was arrested March 5, 1895.

The letter had three inclosures. One, to Tessier, merely requested him to deliver one of the inclosed letters to Mrs. Waller, then at Antananarivo, and the other to a young Hova lad. To the latter Mr. Waller had promised a revolver, and the letter, a mere note, related to the fact. It was upon the letter to his wife that the charges against him were based chiefly. It was in the form of a diary covering three or four days. It worked to his disadvantage in three ways—it contained matter that may have incensed United States Consul Wetter, Mr. Waller's successor, against him; it added fuel to French hatred, and it supplied material for an accusation. It criticised severely the action of Consul Wetter in the case of Charles T. Lyons, which had come before him. This action may yet be made the subject of serious charges against Mr. Wetter before the state department. It said that two men, whose initials were given, had left Tamatave for the capital, that they were spies and should be watched. On this statement and on the letter to the Hova lad in relation to the revolver are based, so far as is known, the charges on which Mr. Waller was tried and on conviction of which he received the sentence of twenty years.

The third subject referred to as having added fuel to French hatred of Mr. Waller was the barbarities alleged to have been committed by French soldiers and sailors in Tamatave. He described spectacles he had witnessed. He told how native women were violated in public; how a young wife was torn from her husband; how girls were pursued by soldiers in the streets and dragged away. He described things too shocking to be printed here, atrocities supposed to be peculiar to Apache warfare. He asserted these things as of his own knowledge. The opinion has been advanced by some of his friends that one reason why the French government delayed producing the record of the trial demanded by our government is that it shrinks from exposing to the world such an indictment of the honor and gallantry of the French army. The opinion, furthermore, has been ventured that the letters may never be produced and that in any case parts of them may be omitted.

A fortnight after his arrest Mr. Waller was tried and convicted by a court-martial in a session lasting from 7 to 10:30 a. m. He was sent from Madagascar to France, chained by the feet to the lower deck of the steamship Djennah, manacled, with a couple of blankets to lie on.

An appeal was made to the United States by the friends of and counsel for Mr. Waller to demand his release by France. The grounds for making such demand were given by Mr. Waller's counsel as follows:

1. That treaties were entered into between Madagascar and the United States in 1867 and 1881. In both, the sovereignty of the queen over the whole extent of the island was again and again asserted on the one hand and acknowledged on the other.

2. That Mr. Waller, as a citizen of the United States, was bound to respect and observe those treaties, and also owed local allegiance to the queen's government while residing in her dominions.

3. That the pretectorate or paramount sovereignty of France over Madagascar, as asserted by the French government under the treaty of 1885, was and is denied and resisted by the queen's government and people, and has never been recognized by the United States.

4. That, not in the exercise of the rights of public war between France and Madagascar, but by virtue of the pretended protectorate or paramount sovereignty of France over

Madagascar, Mr. Waller was tried by a French military court at Tamatave and sentenced to imprisonment for twenty years at hard labor on a charge of "communicating with the enemy," the "enemy" being his own wife, living at Antananarivo, the capital, who, like her husband, owed local allegiance to the queen, under the treaty between her majesty and the United States, under which our commercial and friendly relations with Madagascar have so steadily increased.

5. That the attempts of the French officials in Madagascar to force the queen's government to cancel the concession granted by her to Mr. Waller were derogatory alike to the queen's authority and to the treaty of 1881 between her majesty and the United States, in accordance with article X., by which said concession was granted.

6. That the trial of a citizen of the United States by French military officers in a country with which France is not waging public war, and with which the people of the United States are in the exercise of friendly and commercial relations under the treaties of 1867 and 1881, is such a violation of the civil rights and liberties of an American citizen as cannot safely or honorably be tolerated by the United States government.

7. That, inasmuch as a movement for a permanent treaty of arbitration with the United States has lately been made by the French chamber, the French government should be invited, if unwilling to settle this case otherwise, to submit the questions rising out of the trial of Mr. Waller and the deportation of Paul Bray by French military officers in Madagascar to the final decision of arbitrators to be appointed by the two governments.

The United States government instructed its ambassador at Paris, Mr. Eustis, to call upon the French government for the papers in the case of Mr. Waller, upon which to base a claim for release and damages. The foreign office made various excuses for not at once complying with the demand, and up to the meeting of congress no papers had been submitted to our government except the charges upon which Mr. Waller was tried and the finding of the court. The French government seems to be either unable or unwilling to submit the evidence taken in the case in support of the charges made against Mr. Waller and upon which his conviction was had and sentence pronounced. The case is no nearer solution or settlement than it was in September, and in the meantime Mr. Waller remains confined in a French prison, while his family have been the objects of friendly charity. It has been unofficially reported that Mr. Waller is to be released, but there is no positive evidence of such intention.

THE EXCISE LAWS.

Synopsis of the laws, in the various states, regulating the liquor traffic:

ALABAMA.

Alabama has a local-option law, in which towns, townships and counties settle the matter of license. The law is in general terms very much like that of Georgia, which is given below.

ARKANSAS.

Arkansas has local option, and its laws are ideal in that at every general election the voters of each county decide whether or not the county shall grant a license to saloonkeepers. At the election of 1892 twenty-four counties out of seventy-two voted against license. License for a dramshop is denied if a majority of citizens within three miles of a church or a school remonstrate against it. The legislature also reserves the right to prohibit dramshops in a specific locality by special act. In addition to the twenty-four counties that have declared against license, there are fifty other "dry" localities, the limits ranging from three to ten miles.

CALIFORNIA.

In California the political code provides for three classes of licenses for the sale of liquor in quantities of less than one quart. The fee for the first class is $40 per month where the sales average $10,000 per month; $20 per month on $5,000 sales, and $5 per month on less than $5,000. Public officials who are interested forfeit their offices. Liquor cannot be sold in the auditorium or lobby of a place of amusement. A bill for liquor in excess of $5 cannot be collected at law. Under the constitution absolute local option is given to counties in excise matters. The law quoted is in force only when no local regulation exists. In San Francisco saloons are closed between midnight and 6 a. m. There are two prohibition counties in the state.

COLORADO.

Licenses in Colorado are issued by county commissioners, with absolute power to revoke for cause. The maximum license is $300 for state purposes. Towns and cities have exclusive right to regulate or prohibit the traffic, and may charge any amount for local license the common council may deem fit. Saloonkeepers are civilly responsible for damages resulting from the sale of liquor to any minor, idiot, apprentice or habitual drunkard after having been once warned in writing. It is a misdemeanor to sell liquor within one mile of a church.

CONNECTICUT.

Upon the petition of twenty-five legal voters a vote must be taken in any town at the following annual town meeting upon the question of granting licenses. The vote remains in force until annulled by a new election. Application for license must be indorsed by five taxpayers. The application must be published in a newspaper twice within two weeks. The license fee is from $100 to $500, as the commissioners may determine in each particular case. A license to sell wine and beer exclusively may be granted for $50. Licenses may be transferred with the consent of the commissioners. The penalty for selling without license ranges from $50 fine to $100 fine and six months in jail. Saloons must be closed from 11 p. m. to 5 a. m. and all of Sunday, under a maximum penalty of $100 and six months in jail. There is a penalty of $250 for the sale of adulterated liquors, one-half of which is paid to the person who prosecutes the offender. The liquor dealer is responsible for damage done by an intoxicated person. Prosecuting agents with special relations to excise laws are appointed in each county. Officers with warrants for excise violations may make violent entry upon premises to serve the same. A town agent is appointed in towns where the vote is for no license, for the purpose of buying and selling liquors in such town for sacramental, medicinal, chemical and mechanical uses only.

The state passed a prohibitory law in 1854, but it was repealed a few years later.

DELAWARE.

Licenses are issued to the keepers of taverns

or ale houses to sell at retail liquors to be drunk on the premises. The law prohibits the sale of liquors on Sunday and to minors or insane persons. A prohibitory law was passed in 1847 which was declared unconstitutional in 1848. In 1855 another such law was passed, which was replaced by the present law.

DISTRICT OF COLUMBIA.

Licenses are issued by district commissioners. All saloons close at midnight until 6 a. m. Sunday selling is absolutely prohibited. A saloon-keeper is civilly responsible for damages direct or indirect resulting from the sale of liquor to any one. He has the right to refuse to sell liquor to any person whatsoever, the civil-rights law being thus partially nullified. If a colored man obtrudes in a fashionable bar he may be told that he has had enough.

FLORIDA.

Local option. Licenses are granted by county commissioners. Local licenses are fixed by local authorities.

GEORGIA.

The Georgia plan is local option and high license. The laws of the state, somewhat complex as they are, are practically duplicated in the other gulf states. In the greater part of the state, outside of the more important cities, the sale of liquor is altogether prohibited. Atlanta, after a temporary experience of prohibition, has now a licensing law with special features, and one of the towns, Athens, is making an experiment with the Swedish system of municipal direction of the traffic. Local prohibition has been brought about in three distinct ways—by the general local-option law, by special prohibitory or local-option legislation affecting particular areas, and by corporation acts conferring power of local self-government upon individual municipalties. Under the general law a local-option election must be held upon petition of one-tenth of the qualified voters in any county. It must be distinct from any other election and cannot be held in the same month as a general election. Elections under this act are not to be held more frequently than once in two years, and no such election can be held for any county, city, town or other place having prohibition under a local law.

The general law for counties that are not under prohibition rule or special charter requires the licensee to take an oath not to sell to a minor; he must give a bond of $500, and pay an annual fee of $25. The official who issues licenses is known as an "ordinary." This official may appoint inspectors to examine liquors every month and destroy such as are adulterated.

The Atlanta law is peculiar. Licenses are of three kinds—wholesale, $25; retail, $1,000, and retail beer, $250. Licenses of the two first classes may be issued in a certain specified portion of the city known as the "fire limits." Beer licenses may not be issued within these limits, but may be issued outside of them, "on streets within practicable and efficient police supervision."

The mayor and general council may fix the price of a liquor license as high as $2,000. Saloons must be closed at 10 p. m. until 5 a. m. They must have no screens, blinds, painted glass windows or other obstruction to a view of the premises from the street. A person caught selling liquor under a beer license is fined and imprisoned for thirty days.

A license is forfeited when the saloon becomes a nuisance. Minors are not allowed to enter a bar-room for any purpose. Any one appearing on the street in an intoxicated condition may be fined $100 or imprisoned for thirty days, or both, but may avoid punishment by giving evidence against the saloon-keeper who furnished the liquor with which he became intoxicated.

IDAHO.

License fee is $50 a quarter, except in Boise City, where it is $25. If a mile outside of the limits of a city or town the fee is $15 a quarter.

ILLINOIS.

Liquor saloons are known in law as dramshops. High license prevails. The corporate authorities of cities, towns or villages may grant licenses for a fee of not less than $500 per annum or a malt-liquor license for $150. A county license may not cost less than $500. The county commission may grant as many licenses as the public good requires, upon petition of a majority of the legal voters of the election precinct in which the petitioner resides. The jurisdiction of county boards does not extend to incorporated cities, towns or villages. Licensees give a bond of $3,000, which may be sued against by any person suffering damages in person, property or means of support by reason of the sale of liquor by such licensee.

A vender causing the intoxication of any other person is liable for the support of that person, and he must pay something to any person who may take charge of and provide for such intoxicated person, and $2 per day in addition thereto for every day such intoxicated person may be kept in consequence of such intoxication. There is a fine of $1,000 for the adulteration of liquor, or a year's imprisonment, or both. Violation of the Sunday-closing law is penalized by a fine of $200. Habitual drunkenness for two years is a ground for divorce, and a habitual drunkard is classed as insane and may be placed in the care of a curator. The mayor of Chicago may revoke a license on complaint of two reputable persons. A prohibitory law was passed in 1855, but was defeated when submitted to a vote of the people.

INDIANA.

Licenses to retail liquors are obtained from boards of county commissioners. The applicant must give public notice of his application twenty days before applying for it, that voters may remonstrate against its issuance. The license fee is $100 per annum for spirituous liquors and $50 per annum for malt or vinous liquors, which goes to the school fund. Incorporated cities may charge $250 additional, and incorporated towns $150 additional. Screens are prohibited in saloons. The state passed a prohibitory law in 1855 which was declared void by the courts.

IOWA.

By constitutional provision the manufacture and sale of liquors of all kinds is prohibited except for medicinal purposes. Under the so-called "mulct law" of two years ago provision was made by which the inhabitants of a city by petition could secure a retail dramshop. The statute provides for a tax of $600 per annum against all persons engaged in the sale of intoxicants, but that nothing in the act shall be deemed to legalize the sale of intoxicants, except that in any city of 5,000 or more inhabitants the tax of $600 specified in the act may be paid quarterly, after a written statement of consent, signed by a majority of the voters, shall be filed with the auditor of the county, and such payment shall be a bar to proceedings under the statute prohibiting such business.

KANSAS.

The state has had a prohibitory law since 1866. In 1880 the manufacture and sale of liquors was prohibited by an amendment to the constitution.

KENTUCKY.

County courts grant licenses after ten days' public notice. The cost of a license is $50, $100 and $150 to sell malt, vinous or spirituous liquors singly, doubly or all together. Upon petition of twenty legal voters in any city, town or court district in a county the county judges must order an election upon the license question, but not oftener than once in two years. Liquor dealers are liable for civil damages resulting from the sale of liquor to inebriates. Sunday closing is imperative. Liquor cannot be sold in a billiard or pool-table room.

LOUISIANA.

The state has local option by parishes. Licenses are issued by commissioners. Saloons must close on Sunday. The law is generally observed in New Orleans.

MAINE.

Manufacture and sale of liquors prohibited since 1884 by constitutional provision. (By law since 1851.)

MARYLAND.

The state is unlike all others in that it has no general law with regard to the liquor traffic. The practice in the state is to legislate separately, according to the wishes and requirements of each separate locality. It is not an uncommon thing for the legislature in a single session to pass as many as thirty acts dealing in one way or the other with the liquor trade in as many separate cities, counties, districts and villages. In the city of Baltimore licenses are issued by a board of three license commissioners appointed by the governor, to citizens of the United States of good character and temperate habits, after a public hearing. The license fee is $250, whether for a hotel, restaurant, grocer, distiller, brewer or wholesale dealer. Persons selling liquor without a license are fined from $500 to $5,000, or imprisoned from three to twelve months, or both.

MASSACHUSETTS.

The state now has a system of high license, numerical limitation and local option. A proposed prohibition amendment to the state constitution was defeated in 1889 by a vote of 131,000 to 85,000. The existing local-option law requires that the question of license shall be submitted in every city and town once in every year. The state is divided into cities and towns, of which there are 30 and 321 respectively. The minimum cost of a liquor license is $1,000 if the liquor is drunk on the premises and $800 if drunk elsewhere. Beer and wine licenses are issued for $250 (to be drunk on the premises) and $150 (if drunk off). In Boston, liquor licenses cost $1,000, $1,200 and $1,500, and beer and wine licenses $500. Saloon-keepers are either inn-holders or common victualers. Each large city regulates the price of the license above the $1,000 minimum. The protest of a real-estate holder within twenty-five feet of a proposed saloon may prevent the issue of a license. The civil-damage liability of the saloon-keeper is similar to that of New York state. The establishment of a drinking club in a non-license town is declared a common nuisance and may be abated. The law requires that the effects of the use of alcoholic drinks shall be taught in the public schools. The number of drinking places licensed must not exceed one for each 1,000 of the population.

A prohibitory law was passed in 1855 which was repealed in 1868, restored in 1869 and replaced by the present license law in 1875.

MICHIGAN.

High license is in force. A retail liquor dealer pays $500, a wholesaler $500, a wholesaler and retailer $800, a vender of malt liquor only $300. All saloons must be closed between 9 p. m. and 7 a. m. and all day Sunday, except in cities, where the close hours are from 11 p. m. to 6 a. m. Local-option elections may be ordered in counties once in three years, upon both the sale and manufacture, upon petition of one-fifth of the voters of the county. During the hours when saloons are closed by law blinds must be drawn up and all obstructions to a view of the interior removed. The state has twice tried prohibition—in 1853, which was soon done away with, and again in 1855, which was in force until 1875.

MINNESOTA.

High license, with local option, is the distinguishing feature in Minnesota. The local-option feature is restricted to the rural portion of the state. An election may be ordered in a village or municipal township on petition of ten citizens, to take place at the next ensuing annual election. As the state has no share in the revenue from licenses, statistics as to the extent of prohibition communities are lacking.

An applicant for a license must have not been convicted of any offense against the law for five years previous. The license fee in cities of 10,000 inhabitants or more is $1,000, or such higher fee as the city council may prescribe. Saloons are to be closed from 11 p. m. to 5 a. m. Violation of this rule works forfeiture of license as well as a fine.

The penalties for becoming voluntarily intoxicated are: First offense, $10 to $40 or ten to forty days; second offense, imprisonment thirty to sixty days or fine of $20 to $50; all subsequent offenses, imprisonment sixty to ninety days. In Minneapolis the 280 saloons are confined to a well-defined section of the city, known as the "patrol limits." This system originated some years ago in a compact between the citizens of the 8th ward and the city—that if no saloons were allowed to enter the ward the citizens would care for their own poor.

The state had a prohibitory law, passed in 1852, but it was succeeded by the Graham law in 1874.

MISSISSIPPI.

Local option and high license. Local prohibition is enforced in a number of towns and counties under special acts of the legislature. Where licenses are permitted the fee charged is not less than $200 or over $1,000. Consent of a majority of the local residents is required, and a contrary petition prevents the issue of the license. The sale of adulterated liquor is a felony and punishable by five years' imprisonment.

MISSOURI.

Has high license and local option. The state license is $500. County or local licenses may not be issued for less than $50. Counties may vote to prohibit the traffic, once in four years at a special election, upon petition of 10 per cent of the voters. Licenses are granted for six months only. In cities or towns the consent of a majority of the taxpayers on the four sides of the block in which the dramshop is to be located must be secured. The Missouri law is the most elaborate of any on the statute books. The Sunday law is openly violated in St. Louis. About 40 per cent of the state is "dry." In one small town, Montgomery City, the combined state, county and city license is in excess of $7,500 per annum. Adulteration of liquor is a felony. A person whose license is once revoked can never go into the saloon business again. Musical instruments, billiard tables, cards or dice are prohibited in dramshops. Police indorsement is necessary to secure a license.

MONTANA.

Licenses are obtained from the county treasurers. The fee is, in cities, towns, villages and camps having a population of 10,000 or over, $300 semi-annually; having a population of 3,500 to 10,000, $250 semi-anually; having a population of 1,000 to 3,500, $240 semi-annually; having a population of 300 to 1,000, $206 semi-annually, and in smaller places $150 semi-annually.

NEBRASKA.

This was the first state to endeavor to solve the excise problem by high license. In Omaha licenses are issued by the board of fire and police commissioners. They are sole judges of the expediency of granting the license. The minimum fee is $1,000. The saloon-keeper is put under $5,000 bonds as security for civil or penal judgments. The civil law reads as follows: "The person so licensed shall pay all damages that the community or individuals may sustain in consequence of such traffic; he shall support all pauper widows or orphans and the expenses of all civil and criminal prosecutions growing out of or justly attributed to his traffic in intoxicating drinks." Screens and blinds in saloon windows are prohibited. "Treating" or giving away liquor in a saloon is a misdemeanor.

Nebraska had a prohibitory law from 1855 until 1880, when the present law came into force.

NEVADA.

The excise law is very loose, all power being vested in the county commissioners. The amount charged varies with the counties. Nevada has an anti-treating law which is a dead letter. A common drunkard is a vagrant and may be sent to jail for ninety days.

NEW HAMPSHIRE.

Sale of liquors prohibited by law of 1855, which was amended in 1870 and is still in force.

NEW YORK.

Licenses are issued by a county excise board or commissioners. The fee is not less than $30 or more than $150, but in a city the fee is not less than $50 or more than $250. A bond of $250 is required. The board of excise may revoke a license at any time for cause. Liquors cannot be sold on Sunday or on any day between 1 and 5 o'clock a. m. or on an election day within a quarter of a mile of the polling place, nor within 150 yards of an agricultural fair, nor to a child, intoxicated person, pauper or drunkard, nor to any person to whom the licensee may be forbidden to sell by notice in writing from the parent, guardian, husband, wife, or child over 16 years of age of such person, or, if such person be a pauper, from a magistrate or overseer of the poor of the town.

NEW JERSEY.

Licenses are obtained from the judges of the Court of Common Pleas. The court fixes the license fee, which shall not be less than $10 nor more than $50. The petition must be signed by ten freeholders who have signed no other petition. The licensee is required to give a bond of $100. The penalty for selling without a license is $50 for each offense. Saloons must be closed on Sunday. Liquor cannot be sold to minors or drunkards. In incorporated towns the governing body may impose a tax or license fee.

NORTH CAROLINA.

Local option prevails, and can be voted on at the request of one-fourth the qualified voters of any county, town or township. Licenses are granted by county commissioners.

NORTH DAKOTA.

Manufacture and sale of spirituous and malt liquors prohibited by the constitution of the state.

OHIO.

There has been much experimental legislation in the Buckeye state, and much that is good in the codes of other states had its birth at Columbus. Ohio affords an instance of the operation of free trade in liquor traffic, tempered only by taxation, by certain restrictions on the mode of carrying on the business, and by a power of absolute prohibition, which has been exercised in some parts of the state. There is no restriction on the number of places in which a liquor business may be established. Liquor dealers are not licensed in Ohio. They are taxed, on the principle that the traffic causes results which entail expenses on the state, which those responsible for should be forced to meet. The tax is $250, of which the state gets $50.

Any municipality has full prohibitive power. Local-option elections may be held in townships. The sale of liquor in a "dry" locality is punished by $500 fine and six months in prison. The Sunday-closing clause is ignored in Cincinnati and the cities. Public opinion does not support a strict observance of the laws, and juries will not convict. The civil responsibility of the liquor dealer is very clearly defined.

OREGON.

The license fee is $400 a year, but a saloon cannot be kept within one mile of a college or university, except in incorporated cities. The applicant must have a petition signed by a majority of the legal voters of the precinct in which the saloon is to be kept. Saloons must be closed on Sunday.

PENNSYLVANIA.

This is a high-license state. The existing law gives a large discretionary power to the licensing authorities to refuse applications for licenses, but there is no form of local option by a popular vote, nor is there any statutory limitation to the number of saloons. A prohibition amendment to the constitution was beaten by a heavy majority in 1889. The license fees are graded as follows: Townships, $75; boroughs, $150; cities of the third class, $500; Pittsburg and Philadelphia, $1,000; other cities, $300. The state takes no share of the license fee. Penalties for selling without license and violating the license laws are very heavy, with a maximum of $1,000 fine and a year's imprisonment. Police are required to keep the saloon census. In Philadelphia licenses are issued by the Court of Quarter Sessions, a body of the higher judiciary, elected for ten years.

RHODE ISLAND.

In 1852 the state declared for prohibition. In 1889, upon a resubmission of the question, prohibition was beaten by a vote of 9,956 for, 28,315 against; majority against, 18,359. Out of this action grew the present law, which is for modified high license and local option in a double form. License fees vary from $400 in Providence down to $200 in towns with less than 6,000 inhabitants. A license cannot be granted over the objection of the owners or occupants of premises within 200 feet of the proposed saloon. In addition to this the question of license may be subjected to a direct vote of the people of each city and town on petition of 15 per cent (10 per cent in cities) of the voters taking part in the preceding general election.

The sale of liquor to a woman or a minor for consumption on the premises is punished by a fine of $100 and imprisonment for ninety days to one year. Any one forcibly ejecting from his premises an intoxicated person to whom he has sold liquor is to be fined $20 and disqualified to engage in the liquor business for one year.

SOUTH CAROLINA.

It is impossible to define the provisions of the law in South Carolina, from the fact that the present law, under which the state carries on the business of retailing intoxicating liquors, is in the courts. The only dramshops now in the state are those operated by state authority.

SOUTH DAKOTA.

The manufacture and sale of spirituous and malt liquors are prohibited by the state constitution.

TENNESSEE.

The state has local option. Liquor cannot be retailed on Sunday, nor to students, minors or drunkards. Tax is paid to the state on the amount of liquor sold. The laws are very rigid and are well enforced with the exception of the city of Memphis.

TEXAS.

In Texas local option was made obligatory under the constitution of 1876. It has not been a success, except in limited areas. All the cities are wide open. Few local-option elections have been held, because the calling of such is left to the county commissioners when they shall deem it "expedient." A license costs $900 state tax, to which the county may add $150 and the town another $150. The saloon-keeper gives a bond of $5,000 to "keep an open, quiet and orderly house."

VERMONT.

Manufacture and sale of liquors have been prohibited since 1852.

VIRGINIA.

Local option has been in force since 1886, and the license law is quite elaborate. It costs from $75 to $125 annually to keep a saloon.

WASHINGTON.

Washington is almost a prohibition state, 70 per cent of her counties declaring against the liquor traffic, under a local-option law.

WEST VIRGINIA.

West Virginia has a local-option law. Retailers of liquor are liable to every husband, wife, child, parent, guardian or employer for damages and loss caused by selling liquor. Sunday closing is obligatory.

WISCONSIN.

Wisconsin has several peculiar features in her excise laws. Local option obtains in the municipalities and townships. Not only is the question of license submitted, but the amount of it. All revenue from liquor licenses goes to the support of the poor. The law fixes a minimum fee, and high license is thus made a question of local option. The minimum fee is $100 in the rural districts and $200 in the cities. The poor authorities undertake the task of warning saloon-keepers not to sell to paupers and habitual drunkards.

COPYRIGHT AND TRADE-MARKS.

Every applicant for a copyright must state distinctly the name and residence of the claimant and whether the right is claimed as author, designer or proprietor. No affidavit or formal application is required.

A printed copy of the title of the book, map, chart, dramatic or musical composition, engraving, cut, print or photograph, or a description of the painting, drawing, chromo, statue, statuary or model, or design for a work of the fine arts, for which copyright is desired, must be sent by mail or otherwise, prepaid, addressed "Librarian of Congress, Washington, D. C." This must be done before publication of the book or other article.

A fee of 50 cents for recording the title of each book or other article must be inclosed with the title as above, and 50 cents in addition (or $1 in all) for each certificate of copyright under seal of the librarian of congress, which will be transmitted by return mail.

Not later than the day of publication of each book or other article two complete copies of the best edition must be sent, prepaid, to perfect the copyright, with the address "Librarian of Congress, Washington, D. C."

In case of publications which are the production of persons not citizens or residents of the United States, the fee for recording title is $1, and 50 cents additional for a copy of the record. Books must be printed from type set or plates made in the United States; photographs from negatives made in the United States; chromos and lithographs from drawings on stone or transfers therefrom made in the United States.

Without the deposit of copies above required the copyright is void and a penalty of $25 is incurred.

The copyright law secures to authors and their assigns the exclusive right to translate or dramatize any of their works.

No copyright is valid unless notice is given by inserting in every copy published, whether a serial or a work in serial volumes:

"Entered according to act of congress in the year ——, by ———, in the office of the librarian of congress at Washington," or at the option of the person entering the copyright the words, "Copyright, 18—, by ———,"

The law imposes a penalty of $100 upon any person who has not obtained copyright who shall insert the notice, "Entered according to act of congress," or "copyright," or words of the same import, in or upon any book or other article.

Each copyright secures the exclusive right of publishing the book or article copyrighted for the term of twenty-eight years. Six months before the end of that time the author or designer, or his widow or children, may secure a renewal for the further term of fourteen years, making forty-two years in all.

Any copyright is assignable in law by any instrument of writing, but such assignment must be recorded in the office of the librarian of congress within sixty days from its date. The fee for this record and certificate is $1.

A copy of the record (or duplicate certificate) of any copyright entry will be furnished under seal at the rate of 50 cents.

To secure copyright for a painting, statue or model or design intended to be perfected as a work of art, definite description must be sent with a mounted photograph, cabinet size, to the librarian of congress with the fee.

As to copyright for foreign authors the provisions are the same as the foregoing, except the fee is $1.50 for entry and certificate.

International copyright agreements exist between the United States and Great Britain (and her possessions), France, Germany, Italy, Belgium, Portugal, Denmark and Switzerland. The fee in Great Britain is 5 shillings, to be paid at Stationers' hall, London, but the work must be published simultaneously in the United States and Great Britain and five copies of the publication must be deposited. In France no fee is required, but two copies must be deposited with the minister of the interior at Paris.

TRADE-MARKS.

Copyrights cannot be granted upon trade-marks, nor upon labels intended to be used with any article of manufacture. If protection for such prints or labels is desired, application must be made to the patent office, where they are registered at a fee of $6 for labels and $25 for trade-marks.

PATENT-OFFICE PROCEDURE.

Patents are issued in the name of the United States and under the seal of the patent office to any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof not known or used by others in this country and not patented or described in any printed publication in this or any foreign country before his invention or discovery thereof, and not in public use or on sale for more than two years prior to his application, unless the same is proved to have been abandoned, upon the payment of the fees required by law and other due proceedings had.

Application for a patent must be made in writing to the commissioner of patents. The applicant must also file in the patent office a written description of the same, and when the nature of the case admits of drawings the applicant must furnish one copy signed by the inventor or his attorney in fact, and attested by two witnesses, to be filed in the patent office. In all cases which admit of representation by model, the applicant, if required by the commissioner, shall furnish a model of convenient size to exhibit advantageously the several parts of his invention or discovery. A patent grants exclusive right for seventeen years.

Fees must be paid in advance and are as follows: On filing each original application for a patent, $15. On issuing each original patent, $20. In design cases: For three years and six months, $10; for seven years, $15; for fourteen years, $30. On filing each caveat, $10. On every application for the reissue of a patent, $30. On filing each disclaimer, $10. For certified copies of patents and other papers in manuscript, 10 cents each 100 words. For recording every agreement or assignment of 300 words or under, $1; of over 300 words and under 1,000 words, $2.

RATES OF POSTAGE.

DOMESTIC.

FIRST CLASS.—Letters and all written matter, whether sealed or unsealed, and all other matter sealed, nailed, sewed, tied or fastened in any manner so that it cannot be easily examined, 2 cents per ounce or fraction thereof. A "special delivery" 10-cent stamp when attached to a letter, in addition to the lawful postage, shall entitle the letter to immediate delivery at or within one mile of any postoffice.

Postal cards, 1 cent each.

SECOND CLASS.—All regular newspapers, magazines and other periodicals issued at intervals not exceeding three months; the postage is 1 cent for each pound. A special rate of 1 cent for four ounces is made for all second-class matter mailed by other than publishers or newsdealers.

THIRD CLASS.—Embraces printed books, pamphlets, circulars, engravings, lithographs, proof-sheets and manuscript accompanying the same, and all matter of the same general character, and not having the character of personal correspondence. Circulars produced by hektograph or similar process, or by electric pen, are rated as third class. The limit of weight for mail matter of the third class is four pounds, except in the case of single books exceeding that weight. The rate of postage on mail matter of the third class is 1 cent for each two ounces or fraction thereof.

FOURTH CLASS.—All mailable matter, like merchandise, not included in the three preceding classes, which is so prepared for mailing as to be easily taken from the wrapper and examined. Rate, 1 cent per ounce or fraction thereof, except seeds, roots, cuttings, bulbs, plants and scions, which are 1 cent per two ounces. Limit of weight, four pounds. Full prepayment compulsory. Liquids and other like injurious matter, not admitted, except some under conditions which may be learned at any postoffice.

SUGGESTIONS.—Direct your mail matter to a postoffice, writing the name of the state plainly; and if to a city, add the street and number or postoffice box of the person addressed. Matter not addressed to a postoffice cannot be forwarded. Write or print your name and address, and the contents, if a package, upon the upper left-hand corner of all mail matter. This will insure its immediate return to you for correction, if improperly addressed or insufficiently paid; and if it is not called for at destination, it can be returned to you without going to the dead-letter office. If a letter, it will be returned free. Register all valuable letters and packages. Registry fee, 8 cents, which, with the postage, must be fully prepaid.

MONEY-ORDER FEES.—For money orders in denominations of $100 or less, the following fees are charged:

For orders for sums not exceeding $2.50..... 3c
For over $2.50 and not exceeding $5. ..... 5c
For over $5 and not exceeding $10..... 8c
For over $10 and not exceeding $20,.....10c
For over $20 and not exceeding $30.....12c
For over $30 and not exceeding $40.....15c
For over $40 and not exceeding $50.....18c
For over $50 and not exceeding $60.....20c
For over $60 and not exceeding $75.....25c
For over $75 and not exceeding $100.....30c

FOREIGN.

To all parts of the Universal Postal Union, embracing Argentine Republic, Australia, Austria-Hungary, Belgium, Bolivia, Brazil, Bulgaria, Ceylon, China via Hong Kong, Chile, Cuba, Denmark and Danish colonies, Ecuador, Egypt, Falkland Islands, France and French colonies, Germany, Great Britain and British West Indies, Greece, Greenland, Guatemala, Haiti, Holland or Netherlands and Netherland colonies, Honduras, Hong Kong, India (British), Ireland, Italy, Japan, Liberia, Luxemburg, Malacca, Mauritius, Montenegro, Natal, Newfoundland, Norway, Paraguay, Patagonia, Penang, Persia, Peru, Portugal and Portuguese colonies, Roumania, Russia, St. Bartholomew, Salvador, Servia, Siam, Singapore, Spain and Spanish colonies, Straits settlements, Sweden, Switzerland, Transvaal, Trinidad, Turkey, United States of Colombia, Uruguay, Venezuela:

ON LETTERS.—Five cents for each half ounce or fraction thereof—prepayment optional. Double rates are collected on delivery of unpaid or short paid letters.

On newspapers, books, pamphlets, photographs, sheet music, maps, engravings and similar printed matter, 1 cent for each two ounces or fraction thereof.

TO CANADA.—(Including Nova Scotia, New Brunswick, Manitoba and Prince Edward Island): Letters, 2 cents for each ounce or fraction thereof; books, circulars and similar printed matter, 1 cent for each two ounces or fraction thereof; second-class matter, same as in the United States; samples and merchandise, 1 cent per ounce. Packages must not exceed four pounds six ounce in weight—prepayment compulsory.

TO MEXICO.—Letters, postal cards, and printed matter, same rates as in the United States; samples, 1 cent per ounce; merchandise other than samples can only be sent by parcel post.

TO AUSTRALIA.—(Except New South Wales, Queensland and Victoria) via San Francisco: On letters, 5 cents for each half ounce or fraction thereof; to places excepted above, 12 cents for each half ounce; on newspapers, 2 cents each—prepayment compulsory.

LIMITS OF SIZE AND WEIGHT.—Packages of samples of merchandise to the countries named above (except Great Britain, France, Belgium, and Switzerland) must not exceed eight and three-fourths ounces, nor measure more than eight inches in length, four in breadth and two in depth; and packages of printed matter must not exceed four pounds six ounces. Packages of merchandise samples to Great Britain, France, Belgium, Switzerland, and Argentine Republic are limited to twelve ounces in weight, twelve inches in length, eight in width and four in depth. Packages of printed matter to Germany and Great Britain are limited to two feet in length and one foot in each other dimension.

INTERNATIONAL MONEY-ORDER FEES.

On Algeria, Belgium, British India, Cape Colony, Constantinople, Denmark, Dominion of Canada, Egypt, England, France, German empire, Hong Kong, Ireland, Italy, Jamaica, Japan, Newfoundland, New South Wales, New Zealand, Portugal, Sandwich Islands, Scotland, Shanghai, Sweden, Switzerland, Tasmania, Victoria:

For sums not exceeding $10.....10c
Over $10 and not exceeding $20.....20c
Over $20 and not exceeding $30.....30c
Over $30 and not exceeding $40.....40c
Over $40 and not exceeding $50.....50c
Over $50 and not exceeding $60.....60c
Over $60 and not exceeding $70.....70c
Over $70 and not exceeding $80.....80c
Over $80 and not exceeding $90.....90c
Over $90 and not exceeding $100.....$1

Orders can also be obtained on Austria and East Indies, by remittance through the postal department of Switzerland, subject to the rates of the Swiss department to those countries. Also on Norway and the Netherlands, through the postal department of the German empire, subject to the rates of the German department to those countries.

HOW TO BECOME A CITIZEN.

Naturalization laws and procedure of the United States.

In 1790 congress passed an act requiring two years' residence before an alien could become a naturalized citizen. In 1795 the term was extended to five years, and in 1798 it was extended further to fourteen years; but in 1802 it was reduced to five years, which is the term now required. An alien seeking naturalization must declare upon oath before a Circuit or District court of the United States, or a District or Supreme court of the territories, or a court of record of any of the states having common-law jurisdiction and a seal and clerk, two years at least prior to his admission, that it is bona fide his intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince or state, and particularly to the one of which he may be at the time a citizen or subject.

He must, at the time of his application to be admitted, declare on oath, before one of the courts above specified, "that he will support the constitution of the United States, and that he absolutely and entirely renounces and abjures all allegiance and fidelity to every foreign prince, potentate, state or sovereignty, and particularly, by name, to the prince, potentate, state or sovereignty of which he was before a citizen or subject," which proceedings must be recorded by the clerk of the court.

If it shall appear to the satisfaction of the court to which the alien has applied that he has resided continuously within the United States for at least five years, and within the state or territory where such court is at the time held one year at least, and that during that time "he has behaved as a man of good moral character, attached to the principles of the constitution of the United States, and well disposed to the good order and happiness of the same," he will be admitted to citizenship.

If the applicant has borne any hereditary title or order of nobility he must make an express renunciation of the same at the time of his application.

Any alien of the age of 21 years and upward, who has been in the armies of the Unites States and has been honorably discharged therefrom, may become a citizen on his petition, without any previous declaration of intention, provided that he has resided in the United States at least one year previous to his application and is of good moral character. (It is judicially decided that residence of one year in a particular state is not requisite.)

Any alien under the age of 21 years, who has resided in the United States three years next preceding his arriving at that age, and who has continued to reside therein to the time he may make application to be admitted a citizen thereof, may, after he arrives at the age of 21 years and after he has resided five years within the United States, including the three years of his minority, be admitted a citizen; but he must make a declaration on oath and prove to the satisfaction of the court that for two years next preceding it has been his bona-fide intention to become a citizen.

The children of persons who have been duly naturalized, being under the age of 21 years at the time of the naturalization of their parents, shall, if dwelling in the United States, be considered as citizens thereof.

The children of persons who now are or have been citizens of the United States are, though born out of the limits and jurisdiction of the United States, considered as citizens thereof.

The naturalization of Chinamen is expressly prohibited by section 14, chapter 126, laws of 1882.

Section 2000 of the revised statutes of the United States declares that "all naturalized citizens of the United States while in foreign countries are entitled to and shall receive from this government the same protection of person and property which is accorded to native-born citizens."

The right to vote comes from the state and is a state gift. Naturalization is a federal right and is a gift of the union, not of any one state. In nearly one-half of the union aliens (who have declared intentions) vote and have the right to vote equally with naturalized or native-born citizens. In the other half only actual citizens may vote. (See table of qualifications for voting in each state on another page.) The federal naturalization laws apply to the whole union alike, and provide that no alien may be naturalized until after five years' residence. Even after five years' residence and due naturalization he is not entitled to vote unless the laws of the state confer the privilege upon him, and he may vote in Minnesota four months after landing, if he has immediately declared his intention, under the United States law, to become a citizen. The reason for permitting non-naturalized aliens to vote before they become citizens of the United States is to encourage immigration to those states giving such privileges.

Other state assemblies not reported at date of publication.

POPULAR VOTE.

For presidential candidates from 1824 to and including 1892. Prior to 1824 electors were chosen by the legislatures of the different states.

1824—J. Q. Adams had 105,321 to 155,872 for Jackson, 44,282 for Crawford, and 46,587 for Clay. Jackson over Adams, 50,551. Adams less than combined vote of others, 140,869. Of the whole vote Adams had 29.92 per cent, Jackson 44.27, Clay 13.23, Crawford 13.23. Adams elected by House of Representatives.

1828—Jackson had 647,231 to 509,097 for J. Q. Adams. Jackson's majority, 138,134. Of the whole vote Jackson had 55.97 per cent, Adams 44.03.

1832—Jackson had 687,502 to 530,189 for Clay, and 33,108 for Floyd and Wirt combined. Jackson's majority, 124,205. Of the whole vote Jackson had 54.96 per cent, Clay 42.39, and the others combined 2.65.

1836—Van Buren had 761,549 to 736,656, the combined vote for Harrison, White, Webster, and Mangum. Van Buren's majority, 24,893. Of the whole vote Van Buren had 50.83 per cent, and the others combined 49.17.

1840—Harrison had 1,275,017 to 1,128,702 for Van Buren, and 7,059 for Birney. Harrison's majority, 139,256. Of the whole vote Harrison had 52.89 per cent, Van Buren 46.82, and Birney .29.

1844—Polk had 1,337,243 to 1,299,068 for Clay and 62,300 for Birney. Polk over Clay, 38,175. Polk less than others combined, 24,125. Of the whole vote Polk had 49.55 per cent, Clay 48.14, and Birney 2.21.

1848—Taylor had 1,360,101 to 1,220,544 for Cass, and 291,263 for Van Buren. Taylor over Cass, 139,577. Taylor less than others combined, 151,706. Of the whole vote Taylor had 47.36 per cent, Cass 42.50, and Van Buren 10.14.

1852—Pierce had 1,601,474 to 1,386,578 for Scott, and 156,149 for Hale. Pierce over all, 58,747. Of the whole vote Pierce had 50.90 per cent, Scott 44.10, and Hale 4.97.

1856—Buchanan had 1,838,169 to 1,341,264 for Fremont, and 874,534 for Fillmore. Buchanan over Fremont, 496,905. Buchanan less than combined vote of others, 377,629. Of the whole vote Buchanan had 45.34 per cent, Fremont 33.09, and Fillmore 21.57.

1860—Lincoln had 1,866,352 to 1,375,157 for Douglas, 845,763 for Breckinridge, and 589,581 for Bell. Lincoln over Breckinridge, 491,195. Lincoln less than Douglas and Breckinridge combined, 354,568. Lincoln less than combined vote of all others, 944,149. Of the whole vote Lincoln had 39.91 per cent, Douglas 29.40, Breckinridge 18.08, and Bell 12.61.

1864—Lincoln had 2,216,067 to 1,808,725 for McClellan (eleven states not voting, viz.: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, and Virgina), Lincoln's majority, 408,342. Of the whole vote Lincoln had 55.06 per cent and McClellan 44.94.

1868—Grant had 3,015,071 to 2,709,613 for Seymour (three states not voting, viz.: Mississippi, Texas and Virginia). Grant's majority, 305,458. Of the whole vote Grant had 52.67 per cent and Seymour 47.33.

1872—Grant had 3,597,070 to 2,834,079 for Greeley, 29,408 for O'Conor, and 5,608 for Black. Grant's majority, 729,975. Of the whole vote Grant had 55.63 per cent, Greeley 43.83, O'Conor .15, Black .09.

1876—Hayes had 4,033,950 to 4,284,885 for Tilden, 81,740 for Cooper, 9,522 for Smith, and 2,636 scattering. Tilden's majority over Hayes, 250,935. Tilden's majority of the entire vote cast, 157,037. Hayes less than the combined vote of others, 344,833. Of the whole vote cast Hayes had 47.95 per cent, Tilden 50.94, Cooper .97, Smith .11, scattering .03.

1880—Garfield had 4,449,053 to 4,442,035 for Hancock, 307,306 for Weaver, and 12,576 scattering. Garfield over Hancock, 7,018. Garfield less than the combined vote for others, 313,864. Of the popular vote Garfield had 48.26 per cent, Hancock 48.25, Weaver 3.33, scattering .13.

1884—Cleveland had 4,874,986 to 4,851,981 for Blaine, 150,369 for St. John, 173,370 for Butler. Cleveland had over Blaine 23,006. Cleveland had 48.48 per cent, Blaine 48.22, St. John 1.49, Butler 1.74.

1888—Harrison had 5,441,902 to 5,538,560 for Cleveland, 249,937 for Fisk, 147,521 for Streeter, 3,073 for Cowdrey, 1,591 for Curtis, and 9,845 scattering. Harrison had 96,658 less than Cleveland. Of the whole vote Harrison had 47.83 per cent, Cleveland 48.63 per cent, Fisk 2.21 per cent, and Streeter 1.30 per cent.

1892—Cleveland had 5,556,562 to 5,162,874 for Harrison, 264,066 for Bidwell, 1,055,424 for Weaver and 22,613 for Wing. Of the whole vote Cleveland had 45.73 percentum, Harrison 42.49 percentum, Bidwell 2.17 percentum and Weaver 8.67 percentum.

Of the presidents, Adams, Federalist; Polk, Buchanan, and Cleveland, Democrats; Taylor, Whig; Lincoln, Hayes, Garfield, and Harrison, Republicans, did not, when elected, receive a majority of the popular vote. The highest percentage of popular vote received by any President was 55.97 for Jackson, Democrat, in 1828, and the lowest 39.91 for Lincoln, Republican, in 1860; Buchanan, Democrat, next lowest, with 45.34. Hayes and Harrison, with the exception of John Quincy Adams, who was chosen by the house of representatives, were the only Presidents ever elected who did not have a majority over their principal competitors, and Tilden and Cleveland the only defeated candidates who had a majority over the President-elect.

THE LEGAL HOLIDAYS.

Jan. 1—New Year's day: In all the states except Massachusetts, New Hampshire and Rhode Island.
Jan. 8—Anniversary of the battle of New Orleans: In Louisiana.
Jan. 19—Lee's birthday: In Georgia, North Carolina and Virginia.
Feb. 6—Mardi-Gras, Shrove Tuesday, the day before Ash Wednesday, the first day of Lent: In Alabama and Louisiana.
Feb. 12—Lincoln's birthday: In Illinois.
Feb. 22—Washington's birthday: In all the states except Arkansas, Iowa and Mississippi.
March 2—Anniversary of Texan independence: In Texas.
March 4—Firemen's anniversary: In New Orleans, La.
March—Good Friday (the Friday before Easter): In Alabama, Louisiana, Maryland, Pennsylvania and Tennessee.
April (first Wednesday)—State election day: In Rhode Island.
April 19—Patriots' day: In Massachusetts.
April 21—Anniversary of the battle of San Jacinto: In Texas.
April 26—Memorial day: In Alabama and Georgia.
May 10—Memorial day: In North Carolina.
May 20—Anniversary of the signing of the Mecklenburg Declaration of Independence: In North Carolina.
May 30—Decoration day: In Arizona, California, Colorado, Connecticut, Delaware, Iowa, Illinois, Indiana, Kansas, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, Tennessee, Utah, Vermont, Wisconsin, Washington and Wyoming.
June 3—Jefferson Davis' birthday: In Florida.
July 4—Independence day: In all the states.
July 24—Pioneers' day: In Utah.
*September (first Monday)—Labor day: In California, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Maine, Massachusetts, Michigan, Montana, Nebraska, New Hampshire, New Jersey, New York, Ohio, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia and Washington.
Sept. 9—Admission day: In California.
Sept. 12—Labor day: In Florida.
Oct. 31—Admission in the Union day: Nevada.
November (generally the Tuesday after the first Monday)—General election day: In Arizona, California, Florida, Idaho, Indiana, Kansas, Maryland, Minnesota, Missouri, Montana, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oregon, Pennsylvania, South Dakota, South Carolina, Tennessee, Texas, West Virginia, Washington, Wisconsin and Wyoming.
November, the last Thursday in—Thanksgiving day: It is observed in all the states, although in some it is not a statutory holiday.
Nov. 25—Labor day: In Louisiana.
Dec. 25—Christmas day: In all states, and in South Carolina the two succeeding days in addition.
Sundays and fast days (whenever appointed) are legal holidays in nearly all the states.
Arbor day is a legal holiday in Kansas, Rhode Island and Wyoming, the day being set by the governor—In Nebraska, April 22; California, Sept. 9; Colorado, on the third Friday in April; Montana, third Tuesday in April; Utah, first Saturday in April; and Idaho, on Friday after May 1.
Every Saturday after 12 o'clock noon is a legal holiday in New York, New Jersey, Pennsylvania and Maryland, and the city of New Orleans, and June 1 to Sept. 30 in Newcastle county, Delaware.
*Labor day was made a national holiday by congress. It is the only strictly national holiday we have, not excepting the Fourth of July. Congress has at various times appointed special holidays, and has recognized the existence of certain days as holidays, but there is no general statute on the subject. The proclamation of the president designating a day of thanksgiving only makes such day a holiday in those states which provide for it by law.

THE PENSION OFFICE.

NUMBER OF PENSIONERS ON THE ROLLS JUNE 30, 1895.

And the amount paid for pensions during the fiscal year 1894 in each state and territory and each foreign country:

Total number of children on the rolls: General law, 24,669; act June 27, 1890, 48,438.

This table does not include the cases which, during the year, were dropped from the roll under the general law and pensioned under the act of June 27, 1890, as "additional" cases.

The number of army invalids dropped "for other causes" does not include 8 army nurses who have been heretofore reported as army invalids, but who are now properly classified.

SURVIVING WIDOWS OF REVOLUTIONARY SOLDIERS

On the pension rolls June 30, 1895, with their ages and places of residence at that date:

NAME.	Age	Name of soldier.	Service.	Town.	State.
Aldrich, Lovey	95	Aldrich, Caleb	N. H. and R. I.	Los Angeles	California.
Cloud, Nancy	82	Cloud, William	Virginia	Chum	Virginia.
Chadwick, Susa'h*	80	Chadwick, Elihu	New York	Emporium	Pennsylvania.
Damon, Esther S.	81	Damon, Noah	Massachusetts.	Plymouth Union.	Vermont.
Hurlburt, SarahC.*	77	Weeks, Elijah	Massachusetts.	Chatham Valley.	Pennsylvania.
Jones, Nancy	81	Darling, James	North Carolina	Jonesboro	Tennessee.
Mayo, Rebecca	82	Mayo, Stephen	Virginia	Newbern	Virginia.
Richardson, Patty	94	Richardson, Godfrey	New York	East Bethel	Vermont.
Snead, Mary	79	Snead, Bowdoin	Virginia	Parksley	Virginia.
Slaughter, Ann M.*	85	Slaughter, Philip	Virginia	Mitchells Station	Virginia.
Turner, Asenath	90	Durham, Samuel	Connecticut	Manchester	New York.
Weatherman, N'ny	85	Glascock, Robert	Virginia	Lineback	Tennessee.

*Daughters pensioned by special acts.

SURVIVING SOLDIERS AND SAILORS OF THE WAR OF 1812

On the pension rolls June 30, 1895, with their ages and residences at that date:

NAME.	Age	Service (troops).	Town.	State.
Brown, Hosea	103	New York	Grants Pass	Oregon.
Coffman, Joseph	93	United States	Millsap	Texas.
Cronk, Hiram	95	New York	North Western	New York.
Curl, Jarrot	90	Tennessee	Pine Wood	Tennessee.

The Supreme Court.

The Supreme court consists of seven judges, elected for a term of nine years, one from each of the seven districts into which the state is divided. The election is held in June of the year in which any term expires.

The state is divided into three grand divisions—southern, central and northern—in which the terms of the court are held. One clerk for each of the three grand divisions is elected for a term of six years.

The court sits at Mount Vernon, Springfield and Ottawa.

* Unofficial. The entire state republican ticket was elected, the victory being so overwhelming that a compilation of the official vote is not possible. The vote will be canvassed by the legislature in January, and until that time it is impossible to secure official figures. The majorities range from 6,000 to 20,000.

STATE OFFICERS ELECTED IN 1894.

Governor—Albert W. McIntire.
Lieut.-Governor—Jared L. Brush.
Secretary of State—Albert B. McGaffey.
Treasurer—Harry Mulnix.
Auditor—Clifford C. Parks.
Attorney-General—Byron L. Carr.
Justice of the Supreme Court—John Campbell.
School Superintendent—Agennette Peavy.
Regents of the University—Sidney A. Griffin and Chas. Dudley.

FOR REPRESENTATIVES IN CONGRESS, 1894.

1. Counties of Arapahoe, Boulder, Jefferson, Lake, Larimer, Logan, Morgan, Park, Phillips, Sedgwick, Washington, Weld and Yuma.

There was no republican electoral ticket.

In October, 1894, the only candidate for a state office was B. S. Liddon, democrat, who was elected justice of the supreme court without opposition, receiving 24,819 votes.

In 1892 the republicans put no congressional or electoral ticket in the field, supporting in the main the populist candidates.

FOR GOVERNOR, 1892.

Mitchell, *Dem*.....32,068
Baskin, *Peo*..... 8,379
Hawley, *Pro*..... 302

FOR REPRESENTATIVES IN CONGRESS, 1894.

(Estimated by the secretary of state.)

VOTE FOR OTHER STATE OFFICERS, 1895.

Lieut.-Gov.—W. J. Worthington, *Rep.*.... 164,990
R. T. Tyler, *Dem.*..... 156,045
John G. Blair, *Pop*..... 15,957
Crit. G. Hughes, *Pro*..... 3,872

Secretary of State—Chas. Finley, *Rep.*... 164,695
H. S. Hale, *Dem*..... 155,555
Don Singletary, *Pop*..... 15,957
H. E. Beauchamp, *Pro*..... 3,895

Auditor of State—S. H. Stone, *Rep*..... 164,480
L. C. Norman, *Dem*..... 154,686
C. S. Deane, *Pop*..... 15,809
J. M. Ragsdale, *Pro*..... 3,888

Attorney-General—W. S. Taylor, *Rep*... 164,797
J. K. Hendrick, *Dem*..... 155,230
S. M. Payton, *Pop*..... 15,764
J. B. Finnell, *Pro*..... 3,843

Treasurer—Geo. W. Long, *Rep*..... 164,511
R. C. Ford, *Dem*..... 155,158
M. R. Gardner, *Pop*..... 15,969
M. B. Asbury, *Pro*..... 3,895

Reg. Land Office—C. O. Reynolds, *Rep*... 164,312
G. B. Swango, *Dem*..... 154,454
Turner Spencer, *Pop*..... 15,789
S. B. Simpson, *Pro*..... 3,779

Supt. Pub. Inst.—W. J. Davidson, *Rep*.. 164,049
E. Porter Thompson, *Dem*..... 155,165
H. H. Farmer, *Pop*..... 15,828
Josephine K. Henry, *Pro*..... 3,845

Com'r Agriculture—Lucius Moore, *Rep*.. 164,239
Ion B. Nall, *Dem*..... 154,752
William L. Scott, *Pop*..... 15,829
S. B. Weldon, *Pro*..... 3,827

Railroad Commissioners—
1st. Jerry Porter, *Rep*..... 48,249
J. F. Dempsey, *Dem*..... 48,316
2d. H. S. Irwin, *Rep*..... 53,587
Geo. H. Alexander, *Dem*..... 52,607
3d. John C. Wood, *Rep*..... 63,070
Green R. Kellar, *Dem*..... 52,957

FOR REPRESENTATIVES IN CONGRESS, 1894.

1. The counties of Ballard, Caldwell, Calloway, Carlisle, Crittenden, Fulton, Graves, Hickman, Livingston, Lyon, Marshall, McCracken and Trigg.
W. J. Chetwood, *Rep*..... 2,701
John K. Hendricks, *Dem*..... 13,912
B. C. Keys, *Pro*..... 10,794
J. Harris, *Pro*..... 510

2. The counties of Christian, Daviess, Hancock, Henderson, Hopkins, McLean, Union and Webster.

PRESIDENT CLEVELAND'S SECOND MESSAGE.

Recommendations to congress regarding the Venezuelan difficulty.

To the Congress: In my annual message addressed to the congress on the 3d inst. [see page 165] I called attention to the pending boundary controversy between Great Britain and the republic of Venezuela and recited the substance of a representation made by this government to her Britannic majesty's goverument suggesting reasons why such dispute should be submitted to arbitration for settlement and inquiring whether it would be so submitted. The answer of the British government, which was then awaited, has since been received, and, together with the dispatch to which it is a reply, is hereto appended. Such reply is embodied in two communications addressed by the British prime minister to Sir Julian Pauncefote, the British ambassador at this capital.

It will be seen that one of these communications is devoted exclusively to observations upon the Monroe doctrine and claims that in the present instance a new and strange extension and development of this doctrine is insisted on by the United States; that the reasons justifying an appeal to the doctrine enunciated by President Monroe are generally inapplicable to the state of things in which we live in the present day, and especially inapplicable to a controversy involving the boundary line between Great Britain and Venezuela.

THE MONROE DOCTRINE.

Without attempting extended arguments in reply to these positions, it may not be amiss to suggest that the doctrine upon which we stand is strong and sound because its enforcement is important to our peace and safety as a nation and is essential to the integrity of our free institutions and the tranquil maintenance of our distinctive form of government. It was intended to apply to every stage of our national life and cannot become obsolete while our republic endures. If the balance of power is justly a cause for jealous anxiety among the governments of the old world and a subject for our absolute non-interference, none the less is an observance of the Monroe doctrine of vital concern to our people and their government.

Assuming, therefore, that we may properly insist upon this doctrine without regard to the state of things in which we live, or any changed conditions here or elsewhere, it is not apparent why its application may not be invoked in the present controversy.

If a European power, by an extension of its boundaries, takes possession of the territory of one of our neighboring republics against its will and in derogation of its rights, it is difficult to see why, to that extent, such European power does not thereby attempt to extend its system of government to that portion of this continent which is thus taken. This is the precise action which President Monroe declared to be dangerous to our peace and safety, and it can make no difference whether the European system is extended by an advance of frontier or otherwise.

CONSENT OF NATIONS.

It is also suggested in the British reply that we should not seek to apply the Monroe doctrine to the pending dispute, because it does not embody any principle of international law, which "is founded on the general consent of nations," and that "no statesman, however eminent, and no nation, however powerful, are competent to insert into the code of international law a novel principle which was never recognized before and which has not since been accepted by the government of any other country."

Practically the principle for which we contend has peculiar, if not exclusive, relation to the United States. It may not have been admitted in so many words to the code of international law, but since in international councils every nation is entitled to the rights belonging to it, if the enforcement of the Monroe doctrine is something we may justly claim it has its place in the code of international law as certainly and as securely as if it were specifically mentioned, and when the United States is a suitor before the high tribunal that administers international law the question to be determined is whether or not we present claims which the justice of that code of law can find to be right and valid.

The Monroe doctrine finds its recognition in those principles of international law which are based upon the theory that every nation shall have its rights protected and its just claims enforced.

Of course, this government is entirely confident that under the sanction of this doctrine we have clear rights and undoubted claims. Nor is this ignored in the British reply. The prime minister, while not admitting that the Monroe doctrine is applicable to present conditions, states:

ENGLISH INDORSEMENT.

"In declaring that the United States would resist any such enterprise if it was contemplated, President Monroe adopted a policy which received the entire sympathy of the English government of that date."

He further declares: "Though the language of President Monroe is directed to the attainment of objects which most Englishmen would agree to be salutary, it is impossible to admit that they have been inscribed by any adequate authority in the code of international law."

Again he says: "They [her majesty's government] fully concur with the view which President Monroe apparently entertained that any disturbance of the existing territorial distribution in that hemisphere by any fresh acquisition on the part of any European state would be a highly inexpedient change."

In the belief that the doctrine for which we contend was clear and definite; that it was founded upon substantial considerations and involved our safety and welfare; that it was fully applicable to our present conditions and to the state of the world's progress and that it was directly related to the pending controversy, and without any conviction as to the final merits of the dispute, but anxious to learn in a satisfactory and conclusive manner whether Great Britain sought, under a claim of boundary, to extend her possessions on this continent without right, or whether she merely sought possession of territory fairly included within her lines of ownership, this government proposed to the government of Great Britain a resort to arbitration as the proper means of settling the question, to the end that a vexatious boundary dispute between the two contestants might be determined and our exact standing and relation in respect to the controversy might be made clear.

It will be seen from the correspondence herewith submitted that this proposition has been declined by the British government upon grounds which, under the circum-

stances, seem to be far from satisfactory. It is deeply disappointing that such an appeal, actuated by the most friendly feelings toward both nations directly concerned, addressed to the sense of justice and to the magnanimity of one of the great powers of the world and touching its relations to one comparatively weak and small, should have produced no better results.

OUR OWN COURSE.

The course to be pursued by this government in view of the present condition does not appear to admit of serious doubt. Having labored faithfully for many years to induce Great Britain to submit this dispute to impartial arbitration and having been now finally apprised of her refusal to do so, nothing remains but to accept the situation, to recognize its plain requirements and deal with it accordingly.

Great Britain's present proposition has never thus far been regarded as admissible by Venezuela, though any adjustment of the boundary line which that country may deem for her advantage and may enter into of her own free will cannot, of course, be objected to by the United States. Assuming, however, that the attitude of Venezuela will remain unchanged, the dispute has reached such a stage as to make it now incumbent upon the United States to take measures to determine with sufficient certainty for its justification what is the true division line between the republic of Venezuela and British Guiana.

The inquiry to that end should, of course, be conducted carefully and judicially, and due weight should be given to all available evidence, records and facts in support of the claims of both parties.

In order that such an examination should be prosecuted in a thorough and satisfactory manner, I suggest that the congress make an adequate appropriation for the expenses of a commission to be appointed by the executive, who shall make the necessary investigation and report upon the matter with the least possible delay.

When such report is made and accepted it will, in my opinion, be the duty of the United States to resist by every means in its power as a willful aggression upon its rights and interests the appropriation by Great Britain of any lands or the exercise of governmental jurisdiction over any territory which, after investigation, we have determined of right belongs to Venezuela.

In making these recommendations I am fully alive to the responsibility incurred and keenly realize all the consequences that may follow. I am nevertheless firm in my conviction that, while it is a grievous thing to contemplate the two great English-speaking peoples of the world as being otherwise than friendly competitors in the onward march of civilization and strenuous and worthy rivals in all the arts of peace, there is no calamity which a great nation can invite which equals that which follows a supine submission to wrong and injustice and the consequent loss of national self-respect and honor, beneath which are shielded and defended a people's safety and greatness.

GROVER CLEVELAND,
Executive Mansion, Dec. 17.

GREAT GOLD NUGGETS.

The largest piece of gold, free of quartz, in the world was taken from the Byer & Haltman gold mining claim, Hill End, New South Wales, Australia, on May 10, 1872, its weight being 640 pounds; height, 4 feet 9 inches; width, 3 feet 2 inches; average thickness, 4 inches, and was worth $148,800. It was found imbedded in a thick wall of blue slate, at a depth of 250 feet from the surface. The owners of the mine were living on charity when they found it.

The Welcome Stranger nugget was found on Mount Moliagel, Feb. 9, 1869; it weighed 190 pounds and was valued at $45,000. It was raffled for $46,000.

The Welcome nugget was found at Bakery Hill, June 9. 1859; it weighed 184 pounds 9 ounces 16 pennyweights and was worth $44,356. It was raffled for $50,000.

The Lady Hotham nugget was found in New South Wales, Canadian Gully. Sept. 8, 1854; it weighed 98 pounds 10 ounces 12 pennyweights and was sold for $23,557.

The Union Jack nugget was found Feb. 23, 1857; it weighed 23 pounds 5 ounces and was sold for $5,620.

No name nugget was found at Eureka, Dauttons Flat, Feb. 7, 1874, at a depth of thirty feet from the surface; it weighed 52 pounds 1 ounce and was sold for $12,500.

The Leg of Mutton nugget was found at Ballarat, Jan. 31, 1853, at a depth of 65 feet; it weighed 134 pounds 11 ounces and was sold at the bank for $32,380. This nugget was shaped like a leg of mutton, hence its name.

No name nugget was found at Bakery Hill, Ballarat, March 6, 1855, near the surface; it weighed 47 pounds 7 ounces and was sold for $11,420.

No name nugget was found in Canadian Gully, Ballarat, Jan. 22, 1853, near the surface: it weighed 84 pounds 3 ounces 15 pennyweights and was sold for $20,235.

The Kohinoor nugget was found at Ballarat, July 27, 1860, at a depth of 160 feet; it weighed 69 pounds and was sold for $16,686.

The Sir Dominic Daly nugget was found Feb. 27, 1862; it weighed 26 pounds and was sold for $6,240.

No name nugget was found at Ballarat, Feb. 28, 1855; it weighed 30 pounds 11 ounces 2 pennyweights and was sold for $7,395.

No name nugget was found Aug. 1, 1879; it weighed 12 pounds and was worth $2,280.

No name nugget was found at Ballarat, Feb. 3, 1853; it weighed 30 pounds and was sold for $7,360.

No name nugget was found in Canadian Gully, Jan. 20, 1853; it weighed 93 pounds 1 ounce 11 pennyweights and was sold for $22,350.

No name nugget was found at Bakery Hill, March 6, 1855; it weighed 40 pounds and was worth $9,600.

The Nil Desperandum nugget was found Nov. 29, 1859; it weighed 45 pounds and was sold for $10,800.

The Oats & Delson nugget was found at Donolly gold field in 1880 at the roots of a tree; it weighed 189 pounds and was sold for $50,000.

In addition to the above are the Huron nugnet, worth $20,000, and the Empress nugget, worth $27,661. A great number of smaller nuggets too numerous to mention have been found.

Many large nuggets or lumps of gold have been found in California during the era of placer mining, but Australia must claim the largest. The California lumps are as follows:

A piece of gold and quartz was found in Calaveras county, on Carson Hill, on the Mother Lode; it was valued at $42,000.

The Downieville lump of quartz and gold, of Sierra county, as stated by Louis Blanding, gave a value of nearly $90,000, but it was not a nugget.

The mass of gold and quartz found in the Bonanza mine, Sonora, Tuolumne county, gave a value of over $40,000.

The Australian statistics are obtained from government authority.

Events of the Year 1895.

DOMESTIC.

JANUARY.

1. Anderson Gray, a hypnotist, sentenced to be hanged at Washington, Kas., a jury having found him guilty for a murder committed by another man while under his influence.
4. The Illinois Southern Hospital for the Insane, at Anna, damaged by fire.
8. Eugene V. Debs and other officers of the American Railway union begin serving their sentences in Chicago jail.
9. State Treasurer Taylor of South Dakota found to be a defaulter.
12. A fierce storm of wind and snow prevailed throughout the west.
14. A strike of the Brooklyn (N. Y.) conductors and motormen ties up nearly fifty miles of surface electric street railroad.
16. Explosion of giant powder at Butte, Mont., causes the death of 53 persons and the serious injury of about 100 others, with the loss of nearly $1,000,000 worth of property.
17. In the Debs case before the United States Supreme court, writ of error was denied, but leave was granted to file a petition for habeas corpus, returnable Jan. 28. The "bread war" in Indianapolis causes reduction in price to 3 cents a loaf.
19. The Texas cotton palace at Waco burned; loss $60,000. Ohio river steamer State of Missouri sunk near Alton, Ind.
20. First brigade N. Y. N. G. called out in the Brooklyn strike.
21. Debs and his associates admitted to bail in the sum of $2,000 each.
24. Steamer Chicora foundered on Lake Michigan and all on board were lost.
25. A heavy snowstorm, with severe cold, prevailed throughout the northwest.
31. Masked robbers held up a Southern Pacific train near Wilcox, Arizona, and took $10,000 from the express safe.

FEBRUARY.

2. The Delaware Indians in the Indian territory vote to abandon tribal relations.
5. The Chicago Home Saloon association opens the first of its saloons in the city.
6. Extreme cold prevails throughout the whole country, with heavy snows and high winds in the west.
7. Fire destroys the Denison hotel at Indianapolis.
8. Three men drowned at the waterworks crib at Milwaukee.
9. Union depot at St. Joseph, Mo., burned; loss $40,000.
11. The French liner La Gascogne arrived at New York eight days overdue from Havre.
12. Jury in the Debs case discharged because of the illness of a juror, and new trial set for May 6.
14. Heavy snowstorm in Texas and the southwest.
15. A snowfall of unprecedented depth occurred throughout the southern states.
17. Two serious wrecks occurred on the Santa Fe road in Kansas and Oklahoma, and several lives were lost.
18. An explosion near Pottsville, Pa., kills six miners and injures four others.
24. Col. Robert G. Ingersoll forbidden by the authorities of Hoboken, N. J., to deliver his lecture on "The Bible," but he delivered it.
26. Fire destroys the cupola of the Brooklyn (N. Y.) city hall.
27. Postmaster-General Bissell resigns. Fire in the factory district of Chicago destroys $600,000 worth of property.
28. W. L. Wilson appointed postmaster-general. An express train on the Houston & Texas Central road held up and robbed near Dallas.

MARCH.

1. Four new tenement houses in New York collapse, in which five were killed and nineteen injured.
3. Steamer Venetian stranded in Boston harbor and lost her cargo, valued at $500,000. The Chicago Times purchased by the Chicago Herald and the two papers consolidated under the name of "The Times-Herald."
4. Last session of the LIIId congress ends.
5. The grand jury of Washington, D. C., indicts Charles A. Dana and W. M. Laffan of the New York Sun for criminal libel. A business block at Anderson, Ind., destroyed by an explosion of natural gas, the loss being $400,000.
6. The coal miners in Pittsburg district strike for 69 cents a ton for mining coal.
9. Several mine-owners accede to the demand of the Pittsburg miners.
10. Prize-fighting declared illegal by the courts of Louisiana.
11. The Indiana legislature adjourns, the house closing its final session in a riot over the governor's veto of a bill.
12. In a riot on the levees of New Orleans three were killed, and the purser of the English vessel Engineer was shot in the head. At the local elections in Minnesota license carried in nearly every town in which it was an issue.
13. Two Italians killed in a Denver jail by a mob.
14. The Illinois Supreme court decides the eight-hour or sweat-shop law to be unconstitutional.
17. Fire in a roundhouse in Toledo, O., causes the death of three and the injury of nine persons.
18. The National bank of Kansas City, Mo., suspends.
19. A party of 200 colored emigrants leaves Savannah, Ga., for Liberia.
20. Great damage done in northern Georgia by a tornado.
21. Twenty thousand bales of cotton burned in New Orleans. A $400,000 fire in Sioux City, Iowa. A mine explosion at Red Canyon, Wyo., kills 60 or more men.
23. St. James hotel at Denver burned.
24. Packing-house at Armourdale, near Kansas City, Mo., burned, with a loss of $700,000.
27. Great fire in Milwaukee, Wis., involving a loss of $1,000,000.
28. One hundred families made homeless by a fire in St. Augustine, Fla.

APRIL.

2. The Iowa Supreme court sustains the constitutionality of the mulct law of 1894.
5. Reports of thefts of $90,000 in the Carson City (Nev.) mint.
6. The Supreme court of Kansas confirms the conviction of a man charged with murder by hypnotizing the person who did the killing. Large starch factory at Columbus, Ind., burned.
9. Disastrous floods in the New England and middle states.

13. Fire damages the state capitol at Springfield, Ill.
14. Heavy rains cause freshets and washouts in New England. The bodies of two murdered women found in a church in San Francisco.
15. Railroad traffic impeded in Vermont and New Hampshire by heavy floods.
19. Strike of 500 garment-workers in St. Louis sweat-shops; struck for cleaner shops, fresh air and sanitary conveniences. Mrs. Delia T. S. Parnell, mother of the celebrated Irish leader, assaulted, robbed and seriously injured by footpads at Bordentown, N. J.

30. Antananarivo, capital of Madagascar, taken by the French and the queen makes peace.

OCTOBER.

1. The American ship Parthia, from Liverpool for San Francisco, burned at sea. The French minister of commerce announced that a contract had been signed for laying a cable between Brest and New York as a link in the French cable system to the West Indies.
7. Representatives of foreign governments at Constantinople demand of the porte an inquiry into the recent outrages.
10. France concluded a treaty of peace with the Hovas and will exercise a protectorate over Madagascar.
11. Three thousand engineers and their assistants in the Belfast shipyards strike for higher wages.
16. Turkey accepts the plan for reform in Armenia submitted by the powers.
17. Pope Leo XIII. issues a decree forbidding Roman catholics taking part in religious congresses.
21. The Hungarian chamber of magnates adopts the freedom-of-worship bill.
24. A hurricane carries off the roof of the cathedral at Lubin, in Poland, and many persons are crushed.
26. An eyewitness of recent massacres in Trebizond says at least 900 Armenians were slain. A fight between the Armenians and Turks at Bitlis and many are killed on both sides.
28. More than 150 Armenians massacred at Balburt, some being buried alive.
31. The first installment of the Chinese indemnity paid to Japan, amounting to $40,000,000.

NOVEMBER.

1. The public buildings and old palaces in Rome damaged by an earthquake.
5. The emperor of Austria grants amnesty to the political prisoners of Bohemia. Two thousand union workmen locked out of the Glasgow shipyards.
8. Five of the leaders in the massacres of missionaries at Hwasang, China, are beheaded at Foochow.
12 United States Minister Terrell expresses the belief that 10,000 Armenians have been massacred within the last thirty days.
14. The missions of the American board in Harpoot, Armenia, pillaged and burned by Turks; 500 persons slain.
15. Jose Maceo entered the Cuban province of Puerto Principe at the head of 3,000 troops.
16. The Christian missions at Kharput, Armenia, were pillaged and 800 prisoners massacred.
22. Thirty thousand Spanish troops embarked at Cadiz for Cuba.
23. Twelve thousand more troops sent from Spain to Cuba.
24. The Nicaragua government decides to abolish its Washington legation for financial reasons. Severe earthquake shocks in Mexico
25. The Cubans are reported to have defeated 10,000 Spanish troops in a battle Nov. 19. The Italian treasury has 1,270,000 lire surplus this year and a surplus next year of 8,020,000 lire is expected. About seventy people were killed by an explosion of cartridges at Barcelona.
26. The French mission at Luih Siang, China, destroyed by natives.

28. The Brazilian cruiser Uranus wrecked and the commander and five of the crew lost.
30. Herr Perczel, the Hungarian minister of the interior, severely wounded Herr Andreansky, a member of the diet, in a duel. Floods in southern Russia caused the loss of 500 lives and immense damage to property. The revolt of 45,000 Arabs in the Yemen, southeastern Arabia, is causing the sultan much worry of mind, as the outbreak is near Mecca. A dispatch from Havana says that Maximo Gomez was defeated with heavy loss on Nov. 20.

DECEMBER.

2. In a duel between Baron Bolossy d'Anglas and the viscount de Vogue, member of the French chamber of deputies, the viscount was wounded.
3. Baron von Koeller, Prussian minister of the interior, dismissed from office on account of his anti-socialistic measures.
4. Gen. Gonzales, the Cuban leader, was shot at Matanzas after a court-martial trial by the Spanish authorities.
5. Said Pasha, president of the Turkish council of ministers, took refuge at the British embassy in Constantinople, being in fear of his life. Terrific gales in the English channel.
6. The Cuban insurgent leader Ruiz sentenced to imprisonment for life at Havana.
7. Reports from consuls in Constantinople say that 500,000 people have been slain or are perishing from starvation in Armenia.
9. The sultan grants a conditional firman for the passage of the guardships through the Dardanelles. The German government desires reciprocity in trade with the United States.
10. From trustworthy sources it is reported that the Cuban insurgents are making rapid progress through the province of Santa Clara since the defeat of Cols. Eugara and Eugerrio. The forces commanded by Gomez, Maceo, Roloff, Sanchez, Carrillio, Guerra, Diaz and other insurgent leaders have united and are now encamped at Vajaca, fifteen miles from Placetas, an important town on the road to Santa Clara, and a point of great strategic value in its relation to the seaport of Caiberen. The sultan has issued an irade permitting the extra guardships demanded by the powers to enter the Bosporus.
11. The steamer Cumbrae sunk in a fog by a collision with the Germanic near Liverpool; no lives lost.
12. The Spanish ministry passes a resolution to resign.
14. Reported defeat of the Spanish troops at Iguara, Cuba.

1,000 glass balls broken in 1h. 1m. 54s., A. H. Bogardus, loading himself, changing barrels at end of every hundred, 15yds, two traps, 12 ft apart—New York city, Dec. 20, 1879. In 1h. 6m. 59s., A. H. Bogardus, three guns, two traps, 15 yds—London, England, June 26, 1878.

1,003 balls killed out of 1,200, in 1h. 11m., Dr. W. F. Carver, four guns, loading himself, bats thrown up in pairs—New Orleans, La., March 9, 1884.

5,500 glass balls broken in 7h. 19m. 2s. out of 5,854 shot at—A. H. Bogardus, 15yds, two traps, 12 ft apart, changing barrels about 54 times. He broke 1,500 balls in 1h. 37m. 20s., 2,000 in 2h. 14m. 43s., 3,000 in 3h. 34m. 40s., 3,500 in 4h. 10m. 16s., 4,000 in 4h. 48m. 43s., 4,500 in 5h. 32m. 45s., and 5,000 in 6h. 22m. 30s.—New York city, Dec. 20, 1879. In 7h. 30m. 30s., out of 6,222 shot at—W. F. Carver, Winchester repeating rifles, assistants loading—Brooklyn, N. Y., July 13, 1878.

64,017 balls broken with rifle between 6:30 a. m. Sept. 7 and 5:30 p. m. Sept. 12, 1889—B. A. Bartlett, International Fair, Buffalo, N. Y. 60,000 wooden balls hit out of 60,670 shot at—W. F. Carver, Minneapolis, Minn., Dec. 24 to 30, 1888.

SAFETY RECORDS.

The following are the bicycle records for 1895, as accepted by the League of American Wheelmen. John Green of Cheyenne has made a mile in 1:23, which is rejected. This is the fastest performance of its kind.

AMATEURS.

FLYING START, PACED, CLASS B.

¼ mile—:22 4-5; ⅓ mile, :30 3-5; ½ mile, :48, W. W. Windle, Chillicothe, O., Oct. 29, 1895.

⅔ mile—1:09 2-5, C. R. Coulter, Louisville, Ky., Oct. 25, 1895.

¾ mile—1:18 1-5, C. R. Coulter, Louisville, Ky., Oct. 4, 1895.

1 mile—1:42 2-5, Arthur Gardiner, Louisville, Ky., Oct. 5, 1895.

2 miles—3:48 1-5, S. C. Cox, Louisville, Ky., Nov. 7, 1895.

3 miles—5:55 3-5; 4 miles, 7:58 2-5; 5 miles, 9:58 1-5, Arthur Gardiner, Louisville, Ky., Oct. 14, 1895.

FLYING START, COMPETITION, CLASS B.

¼ mile—:25 4-5, H. C. Taylor, Hartford, Conn., Sept. 4, 1893.

FLYING START, PACED, CLASS A.

¼ mile—:25 1-5; ⅓ mile, :34 1-5; ½ mile, :53, A. W. Porter, Waltham, Mass., Nov. 2, 1894.

2-5 mile—1:18 1-5, F. H. Allen, Springfield, Mass., Sept. 5, 1894.

¾ mile—1:04; 1 mile, 1:52 3-5, A. W. Porter, Waltham, Mass., Oct. 20, 1894.

2 miles—4:07 2-5, N. H. Butler, Waltham, Mass., July 28, 1894.

STANDING START, PACED, CLASS B.

¼ mile—:28, John S. Johnson, Oct. 31, 1893.

⅓ mile—:39; ½ mile, :55 1-5, John S. Johnson, Minneapolis, Minn., Nov. 6, 1894.

⅔ mile—1:14 4-5, Otto Ziegler, Louisville, Ky., Nov. 1, 1895.

¾ mile—1:24 1-5, C. R. Coulter, Louisville, Ky., Nov. 18, 1895.

1 mile—1:50 2-5, Otto Ziegler, Louisville, Ky., Nov. 6, 1895.

2 miles—4:01; 3 miles, 6:09; 4 miles, 8:15 3-5, John S. Johnson, Minneapolis, Minn., Nov. 17, 1894.

5 miles—10:07 2-5, C. W. Miller, Louisville, Ky., Nov. 7, 1895.
6 miles—13:43 1-5, L. S. Meintjes, Springfield, Mass., Sept. 14, 1893.
7 miles—15:57; 8 miles, 18:15 3-5; 9 miles, 20:37 2-5, F. J. Titus, Springfield, Mass, Sept. 13, 1894.
10 miles, 20:45—W. DeCardy, Louisville, Ky., Nov. 6, 1895.
11 miles, 24:59; 12 miles, 27:18; 13 miles, 29:33 1-5; 14 miles, 31:50 4-5; 15 miles, 34:10 3-5; 16 miles, 36:19; 17 miles, 38:31; 18 miles, 40:43 2-5; 19 miles, 42:56 2-5; 20 miles, 45:8; 21 miles, 47:21; 22 miles, 49:26 3-5; 23 miles, 51:38; 24 miles, 53:54; 25 miles, 56:04; 26 miles, 58:15, F. J. Titus, Springfield, Mass., Sept. 13, 1894.
27 miles, 1:11:48 2-5; 28 miles, 1:14:24 4-5; 29 miles, 1:17:02 4-5; 30 miles, 1:19:41 4-5; 31 miles, 1:22:18; 32 miles, 1:24:53; 33 miles, 1:27:34 2-5; 34 miles, 1:30:23 4-5, 35 miles, 1:33:04; 36 miles, 1:35:39 4-5; 37 miles, 1:38:23 3-5; 38 miles, 1:41:07 3-5; 39 miles, 1:43:43 3-5; 40 miles, 1:46:27 3-5; 41 miles, 1:49:08; 42 miles, 1:51:49; 43 miles, 1:54:27 2-5; 44 miles, 1:57:06; 45 miles, 1:59:38 3-5; 46 miles, 2:02:16; 47 miles, 2:04:46 2-5; 48 miles, 2:07:26 2-5; 49 miles, 2:10:01 2-5; 50 miles, 2:12:45 3-5; 51 miles, 2:15:27 3-5; 52 miles, 2:18:12 2-5; 53 miles, 2:21:02 2-5; 54 miles, 2:23:59; 55 miles, 2:26:44; 56 miles, 2:29:26; 57 miles, 2:32:08 3-5; 58 miles, 2:35:00; 59 miles, 2:37:48 2-5; 60 miles, 2:40:35 4-5; 61 miles, 2:43:47; 62 miles, 2:46:20; 63 miles, 2:49:17 1-5; 64 miles, 2:52:21 1-5; 65 miles, 2:55:12 3-5; 66 miles, 2:57:57 3-5; 67 miles, 3:00:44 3-5; 68 miles, 3:03:56 1-5; 69 miles, 3:06:47 4-5; 70 miles, 3:09:40 3-5; 71 miles, 3:12:32 1-5; 72 miles, 3:15:22 1-5; 73 miles, 5:18:23¼; 74 miles, 3:21:53 4-5; 75 miles, 3:24:37 4-5; 76 miles, 3:27:32 1-5; 77 miles, 3:30:25 1-5; 78 miles, 3:33:32 1-5; 79 miles, 3:36:26 3-5; 80 miles, 3:39:21 3-5; 81 miles, 3:42:13 3-5; 82 miles, 3:45:03 4-5; 83 miles, 3:47:53 4-5; 84 miles, 3:51:08 4-5; 85 miles, 3:54:02 1-5; 86 miles, 3:56:54 2-5; 87 miles, 3:59:50 3-5; 88 miles, 4:02:45 3-5; 89 miles, 4:05:42 3-5; 90 miles, 4:08:37; 91 miles, 4:11:30; 92 miles, 4:14:35; 93 miles, 4:17:28; 94 miles, 4:20:21; 95 miles, 4:23:21; 96 miles, 4:26:18; 97 miles, 4:29:06 4-5; 98 miles, 4:32.06 1-5; 99 miles, 4:35:05 2-5; 100 miles, 4:37:56 4-5, A. G. Harding, St. Louis, Mo., Oct. 24, 1894. (Harding's records are all class A.)
100 miles—4:27:32; 200 miles, 10 hours; 300 miles, 16:26:23; 400 miles, 23:40:02, B. W. Twyman, Louisville, Ky.

STANDING START, COMPETITION.

¼ mile—:28 2-5, A. I. Brown, Decatur, Ill., Oct. 13, 1894.

Largest number of innings played—24, Harvard vs. Manchester, Boston, Mass., May 11, 1877; Grand Forks, N. D., vs. Fargo, 25 innings, 0 to 0, Devils Lake, N. D., July 18, 1891.
Quickest played game, 47m., Dayton vs. Ironton, Dayton, O., Sept. 19, 1884.
Greatest distance ball thrown, 133yds 1ft

7¼in. John Hatfield, Brooklyn, N. Y., Oct. 15, 1872.

Largest number of games played by a club in any one season, 188, by the Detroit club, from March 11 to Oct. 26 inclusive, 1887.

Largest number of games ever credited to a player in any one season, 184, by S. L. Thompson of the Detroit club in 1887.

FOOTBALL.

Yale and the University of Pennsylvania went through the season of 1895 without losing a game. Yale had two tie games, one with the Boston Athletic club and one with Brown University.

YALE.

Trinity, Hartford, Sept. 28	8 to 0
Brown, New Haven, Oct. 2	4 to 0
Union, Albany, N. Y., Oct. 5	26 to 0
Amherst, New Haven, Oct. 9	58 to 0
Crescent Athletic club, Br'klyn, Oct. 12	8 to 2
Dartmouth, New Haven, Oct. 16	26 to 0
Orange Athletic club, Orange N. J., Oct. 10	24 to 12
Williams, New Haven, Oct. 23	54 to 0
Boston Athletic association, New Haven, Oct. 26	0 to 0
West Point, West Point, Nov. 2	28 to 8
Carlisle school, New Haven, Nov. 6	18 to 0
Brown, Providence, Nov. 9	6 to 6
Orange Athletic club, New York, Nov. 16	28 to 0
Princeton, New York, Nov. 23	20 to 10
Total	318 to 38

PRINCETON.

Elizabeth Athletic club, Elizabeth, N. J., Oct. 2	23 to 0
Rutgers, Providence, Oct. 5	22 to 0
University of Virginia, Baltimore, Oct. 9	36 to 0
Lafayette, Princeton, Oct. 12	14 to 0
Princeton seminary, Princeton, Oct. 10	16 to 4
Lehigh, Philadelphia, Oct. 19	16 to 0

YALE-PRINCETON GAMES.

1876—Yale, 2 goals; Princeton, 0.
1877—Yale, 2 touchdowns; Princeton, 0.
1878—Princeton, 1 goal; Yale, 0.
1879—Yale, 2 safeties; Princeton, 5 safeties.
1880—Yale, 5 safeties; Princeton, 11 safeties.
1881—Yale, 0; Princeton, 0.
1882—Yale, 2 goals 1 safety; Princeton, 1 safety.
1883—Yale, 1 goal; Princeton, 0.
1884—Yale, 1 goal; Princeton, 1 touchdown.
1885—Princeton, 1 goal from touchdown; Yale, 1 goal from field.
1886—Yale, 1 touchdown; Princeton, 0.
1887—Yale, 2 goals; Princeton, 0.
1888—Princeton, 1 goal, 1 touchdown; Yale, 0.
1890—Yale, 32 points; Princeton, 0.
1891—Yale, 19 points 2 goals 2 touchdowns; Princeton, 0.
1892—Yale, 12 points, 2 goals; Princeton, 0.
1893—Princeton, 6 points, 1 goal; Yale, 0.
1894—Yale, 24; Princeton, 0.
1895—Yale, 20; Princeton, 10.

The record stands thus:

YEAR.	*Yale.*	*Harvard.*	YEAR.	*Yale.*	*Harvard.*
1875	0	18	1885	No game.	
1876	4	0	1886	29	4
1877	No game.		1887	17	8
1878	4	0	1888	Harv'd forftd	
1879	12	6	1889	6	0
1880	9	0	1890	6	12
1881	8	0	1891	10	0
1882	14	0	1892	6	0
1883	23	2	1893	6	0
1884	52	0	1894	12	4

Highest score—England: 17 goals to 0, Nottingham Foresters, match, Derbyshire, March 30, 1881. America: 158 points to 0, Harvard college, match with Exeter, Exeter, Mass., Nov. 3, 1886.

H. A. F. Chambers dribbled the ball around the hurdle forming the 120yds. hurdle course in 44⅘s., Finchley, England, May 18, 1878.

Place kick, with a run—*200ft. 8in., William P. Chadwick, Exeter, N. H., Nov. 29, 1886. *187ft. 10in, R. Young, Glasgow, Scotland, July 2, 1881. 174ft., S. Pritchard, Brisbane, Australia, October, 1882; S. Brutton, aged 14 years, placed 13 goals out of 14 attempts, Leatherhead, England, March, 1884.

Drop kick—172ft. 8in., F. Hardgrave, Queen's Park, Brisbane, Australia, October, 1882. *161 ft. 9in., M. Cooper, Cambridge university, Cambridge, England, Nov. 21, 1881. *168ft. 7¼in., J. E. Duffy, Ann Arbor, Mich., May 22, 1886.

RAILROADING.

All long-distance railway runs were broken in 1895 by both the Lake Shore and New York Central systems. The following table shows the best runs made in America and Europe. It can be seen that the best run was made by the Lake Shore:

	Lake Shore & Mich. South'rn	*N. Y. Central & H. R. R.*	*West Coast Route.*
	1895.	*1895.*	*1895.*
Date	Oct. 24.	Sept. 11.	Aug. 22-3.
Number of cars	3	4	3
Weight of cars	304,500lbs	361,310lbs	150,080 lbs.
Starting point.	100th st., Chicago.	New York.	London.
Finish	Buffalo Creek.	East Buffalo.	Aberdeen.
Total dist. in miles	510.1	436.32	539.75
Total time in minutes and seconds	481m. 7s.	411m. 56s.	512m.
Average speed in miles per hour	63.61	63.54	63.24
Total time in motion	470m. 20s.	407m. 41s.	505m.
Average speed, deducting stops.	65.07	64.22	63.93
Length of divis'n on which fastest average speed was made	86 miles.	145.6 miles.	141.25 miles.
Average speed on said division	72.91 miles.	65.75 miles.	67.50 miles.

Some of the remarkable features of the Lake Shore run are as follows:

	Miles per hour.
1 mile at the rate of	92.30
8 miles (Ripley to Westfield) at the rate of	85.44
33 miles (Moorehead to Van Buren) at the rate of	80.60

Prior to this the best runs were as follows:

May 9, 1893, the Empire State express on the New York Central & Hudson River railroad, consisting of engine 999, three coaches and a Wagner drawing-room car, made a run of 102 miles in 1h.

May 10, 1893, the same train ran 1 mile in 32s, a rate of 112½ miles in 1h.

The "Exposition Flyer," an engine and four Wagner coaches, repeatedly made the run from New York to Chicago, 976 miles, in 20h. The record noted on May 10—a mile in 32s—has been questioned by some railroad men.

1 mile—37s., Philadelphia & Reading railroad, Nov. 20, 1892; engine had 6½-foot drivers; train, one combination car, two day coaches and a Pullman car.

2 miles—1m. 15s., same train; second mile in 38s.

3 miles—1m. 54s., same train; third mile in 39s.

5 miles—3m., 25s, same train, five consecutive miles, an average of 87.8 miles an hour; this train also ran five miles on a section having a heavy grade in 4m., an average of 75 miles an hour.

1 mile—39 4-5s., Philadelphia & Reading railroad, Aug. 27, 1891; 50⅘s., during run of special train from West Philadelphia to Jersey City, Sept. 4, 1879.

2.1 miles—1m. 30s., engine 366 and an ordinary day coach, P. & R. R. R., Yardley to Trenton Junction, N. J., March 10, 1890.

2.9 miles—2m., engine 366 and an ordinary day coach, P. & R. R. R., Somerton to Neshoay Falls, N. J., March 10, 1890.

3.1 miles—2m., engine, two parlor cars and dining-room car, P. R. R., Aberdeen to Perryman's, N. J., March 10, 1890.

4.1 miles—3m., engine 366 and an ordinary day coach, P. & R. R. R., Skillman to Belle Mead, N. J., March 10, 1890.

6.1 miles—4m. 30s., engine 366 and an ordinary day coach, P. & R. R. R., Bethayres to Neshoay Falls, N. J., March 10, 1890.

10 miles—8m. 3s., Skillman to Weston, N. J., engine 366 and one ordinary day coach, P. & R. R. R., March 10, 18:0.

14 miles—11m., locomotive Hamilton Davis and six cars, N. Y. Central R. R., 1885.

18 miles—15m., special train conveying the duke of Wellington, Paddington to Slough, England.

27.1 miles—26m., special extra 953 and two cars, Pennsylvania R. R., Morrisville to Germantown Junction, Pa., May 6, 1885.

36.7 miles—34m., special extra 953 and two cars, Pennsylvania R. R., Rahway to Trenton, N. J., May 6, 1885.

44 miles—43m. 30s., special train conveying newspaper correspondents, last 16¾ miles in 14m., Washington Junction to Washington, D. C., June 10, 1884.

53¼ miles—47m., broad-gauge engine Great Britain, four carriages and vans, Paddington to Didcot, England, May 11, 1848.

54.9 miles—49m. 30s., engine 366 and one ordinary day coach, P. & R. R. R., Wayne Junction, Pa., to Bound Brook, N. J., March 10, 1890.

59.2 miles—56m., engine 366 and one ordinary day coach, P. & R. R. R., Philadelphia (9th and Green streets) to Bound Brook, N. J., March 10, 1890.

89.4 miles—91m. (actual running time 85m.), special train, engine 366 and one ordinary day coach, P. & R. R. R., 9th and Green streets, Philadelphia, to Jersey City, N. J., March 10, 1890.

90 miles—1h. 37m. (actual running time 90m.), special extra 953 and two cars, Pennsylvania R. R., Jersey City to Broad street station, Philadelphia, May 6, 1885; 1h. 47m., train 19, engine 733 and six cars, two regular stops, Jersey City, N. J., to Broad street, Philadelphia, Feb. 12, 1889.

111 miles—98m., Fontaine engine and two coaches, Amherstburg to St. Thomas, Canada, May 5, 1881; 109m., locomotive, baggage car, one coach and one Pullman palace car, St. Thomas to Amherstburg, Sept. 13, 1877.

118 miles—120m., engine No. 10, special palace car; 17 miles (Welland to Victoria) in 14¼m.; St. Thomas to Victoria, Canada, 153 miles, Fontaine engine and two coaches, in 251m., May 5, 1881. The schedule time from London to Bristol, England, 118¼m., by the train known as "The Flying Dutchman," is 120m.

157.74 miles—165m., special train, Niagara Falls to Syracuse, N. Y., March 1, 1876. 158 miles in 178m., West Coast Flyer, London to Crewe, England, Aug. 6, 1888.

228 miles—A Pennsylvania railway train consisting of one Pullman combination car, a parlor car and an observation car made the run from New York to Washington, Nov. 28, 1891, in 4h. 11m. The 11m. was consumed in stops and changing locomotives, making the actual running time 4h., an average of 57 miles an hour.

228.9 miles—4h, 18m., including stops, A. M. Palmer's special theater train, two parlor cars and a Pullman dining car, Pennsylvania R. R., Jersey City to Washington, D. C., March 10, 1890. Made return trip same day in 4h. 19m.

400 miles—7h. 25m., West Coast Flyer, London to Edinburgh, Scotland, Aug. 6, 1888.

436¼ miles—New York to Buffalo, New York Central & Hudson River railroad (actual running time), 7h. 49m., Sept. 14, 1891. The train consisted of engine No. 870, weight 100 tons; private car No. 347, weight 88,500 lbs.; Wagner Palace Car company's private cars Traveler, weight 77,900 lbs., and Mariquita, weight 93,600 lbs. Total weight of train, 230 tons, about equal to that of an ordinary passenger train of five cars. The run from New York to Albany, 143 miles, which was made without stop, occupied 140m.; the distance from Albany to Syracuse, 148 miles, was covered in 146m., and that from Syracuse to East Buffalo, 136 miles, in 147m. 44s. The change of engines at Albany reqired 3m. 28s., the change at Syracuse 2m. 58s., and a hot journal at Fairport occasioned a delay of 7m. 50s. The gross time of the trip from New York to East Buffalo, 436¾ miles, was 439¼m (7h. 49m.), including all stops, while the actual running time, exclusive of all stops, was 425m. 44s. (7h. 41m. 10s.) for the 436¼ miles. An accurate schedule of the time between stations was kept by a disinterested party. The 4.08 miles between Kirkville and Chittenango were made in 3m. 34s, or at the rate of 68.63 miles an hour. The 5.37 miles between West Batavia and Corfu were made in 4m. 20s., a speed of 74.35 miles an hour. The run from Forks to East Buffalo, 3.25 miles was made in 2m. 36s., a rate of 75 miles an hour.

486.7 miles—Council Bluffs to Chicago, April 22, 1891, Jay Gould's special train, including baggage car, one ordinary passenger coach, and Mr. Gould's private car. The entire distance was made in a little less than ten hours, including stops, an average of 49.6 miles per hour: actual running time averaged 52.9 miles per hour.

813 miles—23h. (actual running time 19h. 30m.), special train conveying Washington newspaper correspondents from convention, Chicago, Ill., to Washington, D. C., June 7 and 8, 1884.

Jersey City to San Francisco, Cal., 83h. 39 m. 16s. Jarrett & Palmer's train, combination passenger, mail and baggage car and Pullman hotel car, June 1 to 4, 1876. No stop between Jersey City and Pittsburg, Pa.

MISCELLANEOUS.

TYPEWRITING.

Charles H. McGurrin, memorized sentences, 208 correct words in one minute before the London Press club, London England, on No. 2 Remington, Sept. 15, 1892.

John S. Cass, memorized sentences, 145 words in one minute; same, blindfolded, 136 words in one minute; new matter from dictator, 136 words per minute; on Remington typewriter; accurate work; at Illinois state fair, Peoria, Sept. 29, 1892.

Miss Mae E. Orr, writing five minutes each on legal testimony and ordinary correspondence, wrote 987 words, averaging nearly 99 words per minute; Toronto, Canada, Aug. 13, 1888.

8,709 words in 1h. 30m.; 4,294,or 95.55 per minute from dictation, and 4,1.5, or 98.11 per minute from copy, 45 m. each; Frank E. McGurrin, Cincinnati, O., July 25, 1888.

SHORTHAND.

Isaac S. Dement, writing one minute on new matter, at Clear Lake, Iowa, on July 22, 1890. 309 words and read his notes accurately.

Same conditions, at Dayton, O., Aug. 26, 1890, 315 words.

In a private test at same place and same conditions, on Aug. 29, 1891, 347 words with perfect accuracy.

Same conditions at Chicago, Oct. 4, 1891, 350 words.

BILLIARDS.

Best run, 3-ball carrom rail game, 2,572; Harvey McKenna, Boston, Mass., Dec. 21, 1887; average, 416⅔. Best run, 4-ball carrom game, 1,433; J. McDevitt, New York, Jan. 8, 1888. Best at champions' game, 3-ball carrom, 14x28 lines—398, George Slosson, Paris, France, February, 1882; in America, 351, J. R. Helser, New York, Feb. 14, 1884. English spot stroke game, 3,304; W. J. Peall, London, England, Nov. 3 to 8, 1890, Fourteen-inch balk-line game, 566, Jacob Schaefer, in a match with Frank Ives and George Slosson, New York, Dec. 16, 1893; 456, Frank Ives, in a match with Jacob Schaefer, Chicago, Nov. 24, 1893. Both these runs made with the "anchor nurse"; 359, Frank C. Ives, Chicago, match with Jacob Schaefer, Dec. 6, 1894, "anchor nurse" barred.

OCEAN STEAMSHIPS.

No records were broken in 1895. The Cunarder Lucania still holds the record from Queenstown to New York—5d., 7h., 23m.; average speed per hour, 22.01 knots; greatest day's run, 560 knots, or average speed per day, 25.57 miles; greatest day's run, 645 miles. The Lucania also holds the record from New York to Queenstown—5d., 8h. and 48m. Both runs were made in 1894.

The best trips for 1895 are: Umbria—Fastest trip westward from Liverpool, 5d., 22h., 7m.; Etruria—Fastest trip eastward from New York, 6d., 40m. Both belong to the Cunard line.

THE TRANSATLANTIC RECORD BY YEARS.

1819—Eastward, Savannah, 22d.
1839—Westward, Great Western, 18d.
1845—Westward, Britannia, 14d.
1851—Westward, Persia, 9d. 20h.
1852—Westward, Baltic, 9d., 19h.
1866—Westward, Scotia, 8d., 2h., 48m.
1869—Eastward, City of Brussels, 7d., 18h., 2m.
1873—Eastward, Baltic, 7d., 20h., 9m.
1875—Eastward, City of Berlin, 7d., 15h., 48m.
1876—Westward, Germanic, 7d., 11h., 34m.
1877—Westward, Britannic, 7d., 10h., 53m.
1879—Westward, Arizona, 7d., 9h., 23m.
1882—Westward, Alaska, 6d., 22h., 10m.
1883—Westward, Oregon, 6d., 10h., 10m.
1884—Westward, America, 6d., 10h.
1885—Westward, Etruria, 6d., 5h., 31m.
1887—Westward, Umbria, 6d., 4h., 42m.
1888—Westward, Etruria, 6d., 1h., 55m.
1889—Westward, City of Paris, 5d., 23h., 7m.
1890—Westward, City of Paris, 5d., 19h., 18m.
1890—Westward, Teutonic, 5d., 19h., 5m.
1891—Westward, Majestic, 5d., 18h., 8m.
1891—Westward, Teutonic, 5d., 16h., 31m.
1891—Eastward, Teutonic, 5d., 21h., 3m.
1892—Eastward, City of New York, 5d., 19h., 57m.
1892—Westward, City of Paris, 5d., 14h., 24m.
1893—Westward, Lucania, 5d., 12h., 47m.
1893—Eastward, Campania, 5d., 12h. 7m.
1894—Eastward, Lucania, 5d., 7h., 48m.
1894—Westward, Lucania, 5d., 7h., 23m.

ROWING.

Performances by amateurs are designated by an *.

¼ mile—*0:57, Edwin Hedley, straightaway, Newark, N. J., July 19, 1891; *1:19, single-scull, straightaway, dead water, John F. Corbet, Iroquois Boat club, July 23, 1890.

¾ mile—*4:27⅘, six-oared barge, straightaway, Iroquois Boat club, Lake Calumet, Pullman, Ill., May 30, 1890.

1 mile—5:01, Ellis Ward, Savannah river, June 24, 1868.

1½ miles—*7:41, eight oars, straightaway, Atalanta Boat club, Lake Calumet, Pullman, Ill., Aug. 9, 1889. [The Cornell university crew rowed the distance in 7:03 at Philadelphia July 4, 1889, but the conditions were unfair, the current running very strong.] 8:01¼, four oars, straightaway, Fairmount Rowing association, Albany, N. Y., July 21, 1886. [The Watkins crew rowed the distance in 7:46¾ at Detroit, Mich., Aug. 15, 1887, but the current was very strong.] *7:59, double scull, straightaway, J. Buckley and W. O'Connell, Portland Boat club, Lachine, Canada, Aug 21, 1882. *8:36, single scull, straightaway, Joseph Laing, Lachine, Canada, Aug. 19, 1882. *8:30¾, four oars, turn, still water, Modoc Boat club, Salt Lake, Utah, Aug. 30, 1888. *8:41, pair-oared shell, straightaway, J. J., Sept. 8, 1875. *16:32 4-5, six oars, straightaway, Amherst university, G. E. Brewer, B. L. Brown, L. Bradley, Jr., F. M. Wilkins, A. J. Benedict, W. Negley, Springfield, Mass., July 24, 1872. *17:34¾, eight oars, straightaway, Cornell university crew, Owasco lake, N. Y., July 17, 1878.

INTERNATIONAL YACHTING.

FOR THE AMERICA CUP.

During the year 1851 the Royal Yacht squadron of Cowes, Isle of Wight, presented for competition open to all yachts of all nations a cup known as the "One Hundred Guineas Cup." It was won by the keel schooner yacht America at Cowes, Aug. 22, 1851, from a field of fourteen starters. The course was around the Isle of Wight and the America finished eight minutes ahead of the cutter Aurora. There was no time allowance. For nineteen years there was no challenger for the cup. The contest of 1893 was one of unusual interest on

both sides of the Atlantic. The terms of the contest were: Best three in five races from Scotland light or Sandy Hook light. First race to be sailed to windward or leeward and return; second race, along an equilateral triangle, the first side to windward if possible; third race, like the first; fourth race, like the second; fifth race, like the first.

The Royal Yacht squadron chose the Valkyrie to contest for the cup. Her measurements are: Length over all, 126ft.; beam, 20ft. 6in.; length on water line, 85ft. 6in. A keel cutter, designed by G. L. Watson, built by D. & W. Henderson & Co., Glasgow, Scotland, for the earl of Dunraven.

The Vigilant, chosen by competition as the cup defender, was designed by Capt. Nat Herreshoff of Bristol, R. I., where she was built.

The first race was sailed Oct. 7, 1893, and was won by the Vigilant. Corrected time: Vigilant, 4:05:47; Valkyrie, 4:11:35. The second race, on a triangular course, 10 miles to a leg, 30 miles in all, was sailed Oct. 9. The first leg was a beat to windward, the breeze stiff. The Vigilant won by 10 minutes and 35 seconds. Corrected time: Vigilant, 3:25:01; Valkyrie, 3:35:36. The third race was sailed finally Oct. 13, with the wind blowing a gale. The 15-mile beat to windward was very exciting. The English cutter rounded the turn almost two minutes ahead of the sloop, and the run for home began. The sloop's spinnaker, balloon jib and club topsail were broken out and half-way home she had gained to a point where her sails took the wind out of the cutter's sails, splitting the Valkyrie's spinnaker. The English skipper put up another spinnaker, which was blown away, and then set a balloon jib. The Vigilant crossed the line first, the Valkyrie being beaten by only 40 seconds. Corrected time: Vigilant, 3:24:39; Valkyrie, 3:25:19.

Defender won the ninth race for the cup, though in some respects the race was a fizzle. Lord Dunraven was the challenger and his yacht, designed by himself and built at Clyde by R. L. Watson, was Valkyrie III. Defender was owned by C. O. Iselin, of New York, built at Bristol, R. I., by the designer, Capt. Nat Herreshoff. The first race was Sept. 7, 1895, the course being from Point Seabright, N. J., 15 miles to windward, east by south and return. Defender won with an allowance of 29 seconds. Corrected time: Defender, 4:59:55; Valkyrie III., 5:08:44. Second race, Sept. 11. Start, Sandy Hook lighthouse, triangular course, 10 miles to each leg. This race was given Defender on account of a foul in which her starboard shroud spreader was broken. Valkyrie crossed the line first. Corrected time: Valkyrie III., 3:55:09; Defender, 3:55:56. Valkyrie won by 47 seconds; time allowance to Defender, 29 seconds. The New York Yacht club allowed the claim of foul filed by Defender's owner. The third race was to have taken place Sept. 13. Lord Dunraven crossed the starting line and made no contest. An investigation of the race was asked for and granted.

RECORD OF AMERICA CUP RACES.

1851—Aug. 22, around the Isle of Wight: America, 10:37:00; Aurora second.
1870—Aug. 8, New York Yacht club course: Magic, 3:58:21; Cambria, 4:37:38.
1871—Oct. 16, New York Yacht club course: Columbia, 6:19:41; Livonia, 6:46:45. Oct. 18, 20 miles to windward off Sandy Hook and return: Columbia, 3:07:41¾; Livonia, 3:18:15½. Columbia disabled in third race Oct. 19. Oct. 21, 20 miles to windward off Sandy Hook and return: Sappho, 5:39:02; Livonia, 6:09:23. Oct. 23, New York Yacht club course: Sappho, 4:16:17; Livonia, 5:11:55.
1876—Aug. 11, New York Yacht club course: Madeleine, 5:23:54; Countess of Dufferin, 5:34:53. Aug. 12, 20 miles to windward off Sandy Hook and return: Madeleine, 7:18:46; Countess of Dufferin, 7:46:00.
1881—Nov. 9, New York Yacht club course: Mischief, 4:17:00; Atalanta, 4:45:39¾. Nov. 10, 16 miles to leeward off Sandy Hook and return: Mischief, 4:54:53; Atalanta, 5:33:47.
1885—Sept. 14, New York Yacht club course: Puritan, 6:06:05; Genesta, 6:22:24. Sept. 16, 20 miles to leeward off Sandy Hook light and return: Puritan, 5:03:14; Genesta, 5:04:52.
1886—Sept. 9, New York Yacht club course: Mayflower, 5:25:41; Galatea, 5:38:43. Sept. 11, 20 miles to leeward off Sandy Hook light and return: Mayflower, 6:49:10; Galatea, 7:18:09.
1887—Sept. 27, New York Yacht club course: Volunteer, 4:53:18; Thistle, 5:12:41¾. Sept. 30, 20 miles to windward off Scotland light and return: Volunteer, 5:42:56¼; Thistle, 5:54:45.
1893—Oct. 7, 15 miles to windward off Sandy Hook light and return: Vigilant, 4:05:47; Valkyrie, 4:11:35. Oct. 9, triangular 30-mile course, first leg to windward: Vigilant, 3:25:01; Valkyrie, 3:35:36. Oct. 13, 15 miles to windward off Sandy Hook light and return: Vigilant, 3:24:39; Valkyrie, 3:25:19.
1895—Sept. 7, 15 miles to windward and return, east by south off Point Seabright, N. J.: Defender, 4:57:55; Valkyrie III., 5:08:44: Sept. 11, triangular course, 10 miles in each leg, Valkyrie, 3:55:09; Defender, 3:55:56; won by Defender on a foul. Sept. 13, Defender sailed over course and claimed cup and race; claim allowed.

NAVIES OF THE UNITED STATES AND GREAT BRITAIN.

UNITED STATES.

There are now sixty-four war vessels of all descriptions in commission. Including the naval militia the total available force amounts to 17,255 officers and men. The war vessels are divided into classes as follows:

Armored—Line-of-battle ships	3
Coast-defense vessels	16
Cruisers	1
Unarmored—Protected cruisers	13
Cruisers	20
Gun vessels	8
Torpedo vessel	1
Torpedo boats	2
Total (all descriptions)	64

In course of construction, 10 armored and 9 unarmored vessels and 7 torpedo boats.

The naval force—Officers and men	13,460
Marines stationed at navy yards	1,100
Naval militia (reserve)	2,695
Total	17,255

GREAT BRITAIN.

The British navy has 501 vessels of all kinds, about 50 per cent of which are ready for action, while from ten days to periods of greater length would be required to put the others in condition for active service.

Armored battleships	50
Armored coast-defense vessels	11
Armored cruisers	23
Cruisers (protected)	49
Cruisers (unprotected)	91
Gun vessels (unprotected)	14
Torpedo vessels	34
Torpedo boats (over 100 feet long)	130
Torpedo boats (under 100 feet long)	99
Total number of vessels	501
Total number of guns	6,790
Officers	2,719
Seamen	46,515
Marines, officers	361
Marines, soldiers	14,211

TRADE, COMMERCE AND MANUFACTURES IN 1895.

Following are brief reviews of the general conditions prevailing in various important lines of business in 1895:

WHEAT AND FLOUR.

Sharp advances in wheat prices in May and June last caused better quotations for flour, though sales of flour were comparatively low at the advanced rates. Lately when the abundance of the new wheat crop in the northwest became assured prices again fell lower than those ruling early in the year. From October, 1894, to April, 1895, the relative prices for wheat and flour yielded a margin for milling that was unprecedentedly low.

Since the middle of May there has been some improvement in this direction, but for the eleven months of the year, January to November, the average margin for milling was less than in any of the previous nine years.

*Averages for 1895 are for eleven months only.

PACKING.

The packing industry in the Union stock yards for the first eleven months of 1895, while perhaps not as satisfactory to the packers as it was two years ago, was larger in volume than in the corresponding period in 1894, excepting in cattle. Although the prices during the earlier months were higher than for many years, particularly on light or cutting cattle, the ranches did not send their usual quota of this grade. The receipts of cattle, hogs, sheep and calves from Jan. 1 to Nov. 30 of 1894 and 1895 were as follows:

YEAR	*Cattle.*	*Hogs.*	*Sheep.*	*Calves.*
1894..	2,758,538	6,748,146	2,819,754	153,385
1895..	2,363,186	7,104,317	3,153,721	161,782

These figures all show an increase excepting as to cattle, and they were of better quality and heavier weight. The prices on hogs and hog products steadily declined from the beginning of the year until in December they were lower than for some years. Collections were better than last year and things seem to be shaping themselves for a large and satisfactory business in 1896. Chicago still stands unrivaled as the market which at all times can use the live stock of the country with the best results to the producer and supply the consumers of this country and the world with the highest class of finished product, always at competing prices.

HIDES.

Chicago has the greatest hide market in the world and sells $16,000,000 worth a year. Native steers, which are the leading selection of packer hides, were quoted at 8 cents per pound in January and December, but during the year touched 14 cents, the highest point in the history of the trade. The boom to 14 cents in July, followed by the slump to 8 cents in December—an unprecedented movement of 60 per cent each way in twelve months—caused great excitement and fortunes were made and lost. The advance was caused by the heavy purchases of the United States Leather company, commonly called the trust, and the general belief that the world's supply of hides was short. The failure of business to revive as rapidly as expected and the determined resistance of the shoe manufacturers to paying higher prices for leather precipitated the decline. The year in hides closed with small stocks and a feeling that the trade in 1896 will be steadier and less adventurous.

LEATHER.

The increase of shoe manufacturing in the west caused the leather trade to expand. Several of the largest tanners have warehouses in Chicago and carry large stocks. In

sympathy with hides prices advanced rapidly but as quickly declined. The recovery of business from the depression was a disappointment. After a period of feverish animation and sensational advances the quotations fell because of the neglect of buyers. During the closing months of 1895 the tanners severely curtailed production and will enter the new year with leather in a very strong statistical position.

SHOES.

As a distributing point for shoes and rubbers Chicago stands first after Boston. Manufacturing is increasing, but the factories operated by Chicago capital are mainly in contiguous towns. In the number of pairs sold 1895 was equal to 1894, considerably in advance of 1893, but below the record of 1892. Shoes are 20 per cent higher, owing to the advance in leather, but jobbers say the old prices will prevail in 1896.

WOOL.

The year 1895 was an unsatisfactory one to most of those engaged in the wool business. It was quite generally thought that the sharp advance on many staple articles, notably hides and leather, early in the year, together with a brighter outlook for the whole commercial world, would certainly be reflected to wool. So alluring was the prospect that many outside the trade bought wool for speculation. This buoyant feeling existed just at clip time and the market became unduly excited. Much buying, not on the part of manufacturers but of speculators, caused prices to advance several cents. The boom was of short duration, but it lasted long enough to let the growers in Montana and the territories sell their product at the ranch for more money than the seaboard dealers were able to obtain for the same stock with the transportation, etc., amounting to about 3 cents, added.

Receipts in the Chicago market were heavy —probably larger than ever before—and stocks were large. Most of the mills were running late in the year and the consumption was about normal. While the season was a disappointment and prices reached the lowest point ever known, the outlook for next year was considered bright.

GROCERIES.

The grocery trade during 1895 was good. There were but few failures in this line of business, both wholesalers and retailers having done well, and most of them when they took an inventory and summed up the profits and losses of the year found a goodly amount to their credit on the right side of the ledger.

Sugar attracted the most attention, owing not only to tariff legislation but to the efforts made by the refiners to control the market. Several schemes were conceived by the trust for holding the dealers in line, but as certain wholesalers proved refractory none of the plans adopted or agreements made proved satisfactory or practicable. Sugar continued to be sold at a moderate price and is not likely to advance in the near future. In the west and on the Pacific coast there has been a large development of the beet-sugar industry and though adverse legislation and the unfriendly attitude of the sugar trust toward American products have been great obstacles to the promotion of domestic sugar production the output during 1895 was large and satisfactory.

The coffee market was unsatisfactory and while the consumption of this food product annually increases as an article of commerce it has fluctuated in value and many importers and dealers who are engaged in handling it are largely out of pocket. "Dull" is the word that characterizes this market at the close of the year, with no immediate prospect of improvement.

Teas were a drug on the market and holders were disappointed at not being able to dispose of their stocks in accordance with their desires. The great increase in the consumption of coffee causes a corresponding falling off in the market for teas, particularly China sorts. India, Ceylon and Japan teas are annually becoming more popular in this country as well as in England and continental Europe.

There was a good market for spices throughout the year. The supply never seems to exceed the demand for these goods.

Foreign and Pacific dried fruits were active, with the exception of midsummer and early fall dullness, and business was satisfactory. American dried fruits, particularly raisins and prunes, are driving European goods from the market. It is a fact that our best California raisins are superior to imported Malaga; as producers become more painstaking in curing and packing their goods they are appreciated by American consumers.

The consumption of rice is increasing, though prices ruled low during the past year, and Louisiana planters were much worried by foreign competition. The United States ought to produce enough rice for home consumption, as its resources are ample and the importation of the foreign article on a large scale increases the drain of gold from the treasury.

Canned goods are constantly growing in popularity and there was a disposition upon the part of packers to put up a good quality of goods the past season. The canning industry seems to be in a healthful condition. Packers as a rule did well and if they will discontinue the practice of putting up inferior goods, which has done much in past years to make their products discreditable, we may look for future prosperity in this line of business, which is becoming one of the most important in the country.

There were no very exciting episodes in the grocery trade this year. Both wholesalers and retailers conducted their affairs in a careful and conservative manner, and, while goods sold as a rule on narrow margins of profit, the losses of merchants were so inconsequential that most of them begin the new year with cheerful faces and hopeful expectations of better times.

WHOLESALE DRY GOODS.

The wholesale dry-goods trade opened with very low stocks in the hands of retailers and jobbers on account of the reductions in duty which took place Jan 1. This fact, together with the lower prices, led to an extraordinary demand for merchandise on the part of all merchants and all customers, the result being that for the first six months of this year a larger volume of business was done than during the same period in any previous year.

This increased demand, the action of the president in maintaining the gold payments, the adjournment of congress and the starting up of a great many factories in iron and other industries produced a revival of business and business confidence, the effect of which lasted until about Sept. 1. At that time the constantly increasing deficit in the government treasury began to make itself felt, and the low price of produce all through the western country added to the feeling of uncertainty and discouragement.

Business, however, has been done on an advancing market and at good profits, both to the retailer and to the jobber and manufacturer. Everything considered, it is be-

lieved that the results of the year have been most satisfactory to all concerned, and especially to those doing business in Chicago and the tributary territories. There have been comparatively few failures and, generally speaking, the condition of all dry-goods merchants is better than it has been for some years.

RETAIL DRY GOODS.

The general conditions governing the retail dry-goods business throughout the country during 1895 would justify the conclusion that, if there was not a marked increase in the demand for merchandise, there was—at least in the large cities—greater responsiveness to special efforts made to increase trade. This of itself is always an encouraging feature, as the condition a merchant most dreads is that in which specially low prices have no influence in attracting customers. The retail dry-goods business of the country, as a whole, showed an increase over 1894 of anywhere from 20 to 35 per cent during the first six months of the year, and during the last six months quite considerable gains in business were realized up to the last of November, when, for some reason or other, the demand weakened or purchasers became more conservative.

As to the profitableness of the business, it may be questioned whether, as a whole, there will be much gain to show for 1895; this may be accounted for by any or all of three causes: First—Most merchants have made vigorous efforts to reduce the amount of stock carried and to increase its activity, this desire leading them to freely knife slow stock. Second—Keener and sharper competition than usual has led to selling goods in all departments on closer margins than heretofore. Third—The extra efforts made to increase business have been attended by a sharp increase in the expense account.

The merchant who, at the end of 1895, finds himself with a smaller, cleaner and more active stock, and is able to show sales for the year considerably higher than those of 1894, may well feel satisfied even if his net profit is a very small one.

STATIONERY.

It was the general feeling at the beginning of the year that the slow but sure improvement in the stationery and printing lines, which had been apparent during the preceding few months, would continue and increase, and such was the case, the season proving much better than any other year since 1892. While the margin of profits was closer and it cost more to do the same amount of business, the general feeling in the trade has been that a very prosperous period is about to set in. Experts estimate, from a careful examination of figures, that there was an increase during 1895 of about 25 per cent over 1894. The outlook is that there will probably be a corresponding improvement in 1896 over 1895.

LAKE COMMERCE.

The commerce of the lakes had a great revival during the season of 1895. The depression in the lake carrying business caused by the panic of the two preceding years gave place to a state of business activity and prosperity which bids fair to continue far into the future. During the season of 1894 and the early months of 1895 freight rates were at the lowest figure ever reached in the history of the lake marine; but when the reaction came the prices for moving cargoes advanced with unprecedented rapidity. In the latter part of the season rates were nearly double those of 1894, and in place of vesselmen begging for loads, in many cases it was the shipper who ran after the agent who had a boat to charter. The volume of business done was never before equaled. With the close of the season all conditions point to a still further increase in the amount of freight to be carried in 1896.

There was one drawback to all this success that made large inroads into the profits of vessel-owners, and which, indeed, was a factor in the advance in freight rates. The stage of water throughout the great lakes was extremely low, all former "low water marks" being exceeded. This limited the carrying capacity of every large craft and caused numerous strandings, involving delay, damage and expense. These strandings also caused the insurance companies to lose heavily, especially on steel steamers, as the damage done them by grounding is always greater than it is in the case of a wooden boat. The earnings of the companies on the year's business were used up before the season was half over and they were compelled to go deep into the surplus fund. It is likely that the next season will usher in a new system of insuring vessels on the lakes.

Although the losses of property were large the loss of life in storms was unusually small, the fatalities aggregating a much smaller total than for many years past. It was all the more noticeable from the fact that several vessels of the old class became total wrecks under circumstances which seemingly would insure the death of all the crew, whereas in nearly every case all hands escaped.

The small loss of life is due principally to the increasing size and power of lake vessels. The winter work in the big shipyards around the lakes denotes the tendency of the lake business. While the number of craft is not large the total of tonnage on the stocks is exceptionally so. The day of the small steamer or sailing vessel has passed forever and the business boat of the lakes now carries from 3,000 to 5,000 tons of cargo.

FRUIT.

In the fruit trade the year 1895 was peculiar. Promising an almost entire failure, owing to the severe weather in January and February, with blighting frosts later in the season, everything pointed to a light supply and a comparatively high range of prices. While this proved correct to some extent, the vast area producing fruit supplied some articles in great abundance while others would be maturing in a different part of the country, filling the vacancies and evening up the general supply. While the amount was not great as a whole, favored localities sent large quantities and prevented any increase of prices.

A notable instance was the immense crop of apples grown in 1894 in New England that completely filled the markets at a reasonable figure during the first three months of 1895, although the rest of the country was comparatively bare. In 1895, on the other hand, there was an immense apple crop in the belt of country extending from the Missouri river on the west to the mountains of Virginia and Pennsylvania on the east and from about the 40th parallel of latitude, extending about 200 miles south. The crop in this portion of the country was so great that prices were kept on a very low basis, say about $1.75 to $2 for standard stock Dec. 1, though New York and Michigan produced crops much below the average.

One-half the orange crop of Florida and Louisiana remaining on the trees Jan. I, 1895, were frozen and the cold was so in-

tense that practically all of the orange and lemon trees of those states were killed at the same time. The cold also worked great damage to the California orange crop by preventing its transportation and sale until so late in the season that decay caused immense loss. The absence of the Florida and Louisiana orange crop was keenly felt and prices for the few reaching this country from Mexico and the West Indies sold freely at $4 a box, against an average price of about $2 under the normal conditions of previous years.

An abundant peach crop in Georgia and Michigan, with a moderate supply from Maryland and Delaware, kept the price on a low range throughout the season, and but little was made by those engaged in the business, either as producers or handlers.

The supply of deciduous fruits from California showed a marked decrease as compared with 1894, with a fairly profitable range of prices, and no marked season of depression such as the orange shipments experienced.

Taken as a whole the fruit business was not profitable in 1895. The shortened crop did not bring prices sufficient to compensate for the short supply, and grower and dealer alike, as a rule, were disappointed. In some sections drought was charged with the result, while in others frosts and extreme heat were held responsible, but above all the general business conditions of the country were such as to aid materially in producing the generally unfavorable result.

SHELF HARDWARE.

The conditions confronting the shelf-hardware business improved rapidly during the first six months of 1895. The general depression and lowering in prices not only stopped but quite a substantial advance took place in many lines. The volume of business increased rapidly and under the influence of the phenomenal crop prospects continued to grow larger until late in the fall, when it was checked by the low prices of all kinds of farm produce and the evident intention of the average farmer to hold his crops for higher prices. This check in the volume of trade developed a cautious spirit in manufacturer, jobber and retailer, and, while a few lines lost some of the early advances, the general market was firm in the matter of prices and there was an increase in the value of goods as compared with the previous year.

In many localities the encouraging prospects of an unusual yield in almost all kinds of farm products for 1895 induced country merchants to be more lenient regarding the collection of their outstanding accounts and notes than they otherwise would have been, but the refusal of the farmers to market their products at the unprecedentedly low prices added to the difficulty of making collections in the central, western and northern states. The percentage of collections during each month on amount outstanding averaged very nearly the same during 1895 as in 1894. The general condition of business induced greater caution in the placing of credits, and losses by failures were less than was anticipated both in number and amount. The indications are that collections will remain difficult until the farmers, abandoning the hope of an early advance in prices, will be compelled to sell their products and pay their debts.

AGRICULTURAL MACHINERY.

The agricultural-machinery trade in the west and northwest was fairly good in 1895. In the central states, such as Indiana, Illinois, eastern Iowa, Missouri and parts of Kansas and Wisconsin, the extreme drought prevailing during July greatly injured the small-grain crop, causing a great many orders, particularly for thrashers and engines, to be countermanded. The trade in consequence of this short grain crop in these states was necessarily curtailed, but the good crops in the far northwest and in Iowa and parts of Kansas and Nebraska, as well as in the extreme west, compensated for the loss in the central states, so that taking the agricultural trade as a whole for the season of 1895 it would be considered fair.

The great drawback which dealers had to contend with was slow collections. These were poorer than for a number of years past. On account of the extremely low price of corn and oats, as well as of wheat, perfectly responsible creditors asked indulgence on their obligations until after they had disposed of their grain crop, and they were loath to do this until better prices should prevail. This made collections hard, as it was a delicate matter to force collections against a perfectly solvent creditor who made a reasonable excuse why he should be carried. As soon as the prices of wheat, corn and oats advance—and it looks as if they will—better times will prevail among the farming classes and will decidedly improve the agricultural trade. The outlook for a large trade in 1896 is very good in all agricultural lines. In the last two years the farmer has been a scant buyer of tools on account of the prevailing conditions. His implements have been wearing out and if crop prospects are at all good there will be an unusually brisk trade in 1896.

PIG IRON AND IRON ORE.

The year 1895 opened with a very depressed feeling in the pig-iron and iron-ore markets and this continued without any apparent change until the early part of July, when more activity became manifest, and during August, September and October there was great activity in pig iron, with rapidly advancing prices. By the latter part of October a natural reaction took place and the year closed with more normal conditions existing. This will be fotunate for the coming year, as it will give steadier and more evenly balanced markets. The prospect for the year 1896 is favorable. The trade has passed through several years of depression, stocks have been largely reduced, equipment and materials of iron and steel have been wearing out without replacement, and with the generally favorable condition of the country there is likely to be a healthy business at fairly remunerative prices.

BICYCLES.

In the various branches of the bicycle business the year was one of unusual prosperity. Early in the spring the leading manufacturers reduced the price of wheels from $125 to $100. This, together with a rapid increase in the number of riders, caused an almost unprecedented demand—so great, in fact, that dealers had difficulty in meeting it. The stocks, especially of ladies' wheels, gave out and purchasers were frequently obliged to wait for months before their orders were filled. The outlook for next season is equally bright, as there seems to be no diminution in the interest taken in cycling either as a sport or a form of healthful exercise. Many cheap wheels will be put on the market, but the prices of standard wheels will probably remain the same as they were this season.

VALUE OF FOREIGN COINS OCT. 1, 1895.

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors on the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided between Cleveland, Harrison and Weaver.

ELECTIONS IN 1896.

All the states elect presidential electors and members of congress Nov. 3, 1896.

All the territories elect delegates in congress Nov. 3, 1896.

The following states elect governors and other state officers: Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Missouri, Montana, Nebraska, New Hampshire, New York, North Carolina, North Dakota, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, Wisconsin.

New Jersey elects secretary of state, attorney-general, comptroller and treasurer.

Ohio elects secretary of state and school commissioners.

CHICAGO AND COOK COUNTY.

VOTE FOR MAYOR BY PRECINCTS.

Election April 2, 1895.

REDUCTION IN PRICES

—OF—

Stereotype Papers

We beg to call your attention to the following reductions which we have made in the prices of our well-known Stereotype Papers:

Heavy Matrix Papers—

We shall be happy to execute your orders for our heavy Matrix Papers at the rate of

11 Cents Per Pound

in any quantity under 500 pounds at one purchase.

For 500 lbs and over at one purchase we will allow 5% discount.
For 1,000 lbs and over at one purchase we will allow 7½% discount.

West India Stereotype Tissue—

KNOWN AS "SUPERFINE CREAM TISSUE,"

19x24, Per Ream $1.60

for any quantity under 50 reams at one purchase.

In quantities of 50 reams at one purchase, 5% discount ($1.52 net).
In quantities of 100 reams at one purchase, 7½% discount ($1.48 net).

ALL OTHER SIZES AT PROPORTIONATE RATES.
ANY SPECIAL SIZE MADE TO ORDER AT SHORT NOTICE.

Our Stereotyping Papers have been so long and so favorably known throughout the country that we need only say that, in spite of reduced prices, we shall strictly maintain the standard of quality. We may add that the largest newspaper offices in the United States use our papers.

B. LAWRENCE STATIONERY CO.,
41 John-st., New York.

New York, Oct. 1st, 1895. P. O. BOX 661.

...BONNELL'S INKS...

USED BY

THE NEW YORK TRIBUNE.

NEW YORK TRIBUNE.

THE J. HARPER BONNELL CO., NEW YORK, April 17, 1894.
11-13 Vandewater Street, City.

GENTLEMEN: At your request, I am glad to say that your ink is giving satisfaction in this office and that we are taking our whole supply from your concern. The ink is black, works well and seems to be all right. Very truly,

HENRY HALL, Business Superintendent.

...BONNELL'S INKS...

USED BY

The Journal of Commerce and Commercial Bulletin.

J. HARPER BONNELL CO.,
11-13 Vandewater Street, New York City.

GENTLEMEN: We have used your news ink for the past several years and do not hesitate to state that it has given us the utmost satisfaction. We have tried several other makers, but have always found your ink makes less trouble and less work for our pressman than other inks which we have tried. We consider that it helps us largely to accomplish the high-class press-work which we now have the reputation of producing. Very respectfully,

THE JOURNAL OF COMMERCE and COMMERCIAL BULLETIN.
A. W. DODSWORTH, Secretary.

...BONNELL'S INKS...

USED BY

HARPER & BROTHERS.

HARPER BROTHERS,
J. HARPER BONNELL CO. Franklin Square, New York.

GENTLEMEN: In response to your favor of the 7th inst. we have pleasure in saying that we are now using your various inks on our periodicals and miscellaneous books, and that such inks are, in general, highly satisfactory. We can, therefore, unhesitatingly commend their use to the trade generally, and to such in particular as aim at art work from the printer's standpoint.

Yours very truly, HARPER & BROTHERS.

Bonnell's Inks USED BY

The New York Times.

J. HARPER BONNELL, ESQ.,
New York City.

My Dear Sir: "You will find Bonnell's ink satisfactory, I believe, and I would recommend that you give it a trial," said Mr. Childs when we were discussing the neat appearance of the Philadelphia Ledger. I have experimented with a number of inks during the past year, and finally reached the conclusion that the quality of your product was such as to justify our continuing as one of your regular customers. I may say, therefore, in reply to your inquiry that we are entirely satisfied with the ink you are now furnishing the Times.

Very truly yours, GEORGE F. SPINNEY.

Bonnell's Inks USED BY

The Inter Ocean.

THE INTER OCEAN, Chicago.

J. HARPER BONNELL, ESQ.,
New York City.

Dear Sir: The Inter Ocean has used your ink for a long time and we have recommended it to our friends. It has been very satisfactory to us and we have had fewer complaints from our press room on account of it than any ink we have ever used. If you keep it up to its present high standard we hope always to be able to use it. Yours truly,

WM. PENN NIXON, Publisher.

Bonnell's Inks USED BY

"Frank Leslie's."

Frank Leslie's Illustrated Weekly.
Frank Leslie's Illustrirte Zeitung.
Arkell Weekly Company, Proprietors.

Judge Building, Cor. Fifth Avenue and 16th Street, New York.

MR. J. HARPER BONNELL,
New York City.

Dear Sir: On March 17, 1892, we printed the following:
"Mr. J. Harper Bonnell has furnished all the ink for Frank Leslie's Illustrated Weekly for many years, to the entire satisfaction of the publishers, and since the formation of his new company he has excelled himself. The inks made by the J. Harper Bonnell Company are especially adapted for fine engraving and half-tone printing. This week's paper is a sample of the kind of work these inks can do, and give us the utmost satisfaction."

We can repeat same in stronger words, if possible.

Yours very truly, W. J. ARKELL.

Following are brief descriptions of some of the more important buildings begun, projected or completed in Chicago in 1895:

GREAT NORTHERN THEATER.

Work on an addition to the Great Northern hotel was begun late in the fall, some trouble having been experienced in clearing the lot. The property fronts 100 feet on Jackson street and extends 165 feet through to Quincy street. The plans as drawn by D. H. Burnham & Co. call for a building similar in general style and method of construction to the Great Northern hotel. A portion of it is to be used as a theater and a part for offices, while the hotel will occupy still another part of it. A large interior court will give a sufficiency of light. All the latest devices to make the structure thoroughly fireproof will be employed. The total cost is placed at $900,000. The Great Northern Theater and Hotel company is the owner.

FISHER BUILDING.

The Fisher building has a frontage of 100 feet on Dearborn street, the same on Plymouth place and 70 feet on the north side of Van Buren. It is eighteen stories high and will cost, compled, $615,000. The general design is French gothic. It is of steel construction, with exterior of semi-glazed terra cotta. The principal entrance, which is on Dearborn street, is 17 feet wide. There are four rows of bay windows on the Dearborn street front from the top of the first story to the top of the seventeenth story. There are two bays on Van Buren street and three on Plymouth place. The floors and partitions are of tile. Six high-speed elevators will give easy access to every part of the building. The interior finish is to be very elaborate, onyx, marble and bronze being largely used. There will be ten stores on the first floor. The rest of the building will be used for offices. D. H. Burnham & Co. are the architects and L. G. Fisher is the owner.

ATWOOD BUILDING.

Work on the Atwood building, on the northwest corner of Clark and Madison streets, was begun in May and by the 1st of October the structure was so far completed that the store on the ground floor could be occupied. It is ten stories, 130 feet—the full height allowed under the present building ordinance. Foundations are strong enough and the structure has been so planned that extension to the full height of thirteen or fourteen stories, as originally intended, can easily be made. A feature is the great size of the windows of the second (or banking) floor. In these the panes of plate glass are fourteen feet long. Mosaic tiling and Carrara marble for sidewalks and ceilings in the corridors add to the attractiveness of the structure. The building is of iron, steel, brick, terra cotta and granite. It is owned by F. M. Atwood. The architects were Holabird & Roche. The cost was about $250,000.

160 WASHINGTON STREET.

The office building at 160 Washington street, designed by Jarvis Hunt, will, when completed, be eleven stories high and will cost in the vicinity of $225,000. It has a frontage of 40 feet on Washington street and extends back 180 feet to Calhoun place. The architecture is of the classical and Italian renaissance type. The construction is of steel, with exterior of glazed terra cotta, tile floors and partitions and stairways of marble. It will be provided with three passenger elevators and all the other conveniences found in office buildings of the most modern style. The owner is a syndicate represented by Robert F. Shanklin.

STUDEBAKER BUILDING.

The Studebaker building, at 378 to 388 Wabash avenue, is ten stories high and has a frontage of 120 feet with a depth of 170 feet. It is fireproof, the interior being of steel construction, with tile arches and floors, and the front of plate glass set in an ornamental cast-iron frame. It has a fine central entrance finished in marble and iron. The Studebaker Bros.' Manufacturing company is the owner and S. S. Beman the architect. The cost is placed at $250,000.

APARTMENT HOUSE.

Work on a six-story and basement apartment house at the northwest corner of 22d street and Indiana avenue is in progress. The plans drawn by Pridmore & Stanhope, for Wm. C. Scott, the owner, call for a fireproof structure with steel skeleton frame, outer walls of Bedford buff stone and trimmings of polished granite up to the second story. Above that buff pressed brick will be used. There are to be two main entrances, one on each of the two fronts. Eleven stores will occupy the first floor, while the rest of the building will be arranged into apartments of from two to six rooms each. White oak and Italian marble will be used in the interior finish. The estimated cost is $200,000.

THE OCCIDENTAL.

The Occidental, a mercantile building in process of construction on the northeast corner of Market and Washington streets, will, when completed, be eight stories and basement in height. It has a frontage of 180 feet on Market street and 80 on Washington. The front will be of St. Louis pressed brick and plate glass. Above the second story on Market street will be a twenty-foot court open to the street, with a skylight over the space below. The construction is of steel-rolled I-beams and fireproofed steel and cast-iron columns. The L. C. Paine Freer estate is the owner and John M. Van Osdel the architect.

DAVIES BUILDING.

The Davies building, at 352 to 356 Dearborn street, is, according to the plans of Jenney & Mundie, to be eventually fifteen stories high, though under the present building ordinance only ten stories will be constructed. The foundations and walls are to be of sufficient strength to carry the additional stories when permission is obtained to put them on. The building will be of the usual steel, brick and terra-cotta construction and will be occupied chiefly by offices. There will be two rows of bay windows, extending from the top of the third story to the bottom of the twelfth. Thomas A. Davies is the owner. The cost will be about $150,000 for the ten stories.

LEWIS INSTITUTE.

The Lewis Institute building, on the southeast corner of West Madison and Robey streets, is five stories and basement in height. When finished it will have cost about $215,000. It has a frontage of 195 feet on Madison and 125½ feet on Robey street. The construction material is gray pressed Roman brick, blue Bedford stone trimmings, bronzed iron and plate glass. The basement is partitioned off into a large restaurant, storage-rooms and heating plant. There are two main entrances, one on Madison and one on Robey street. On the main floor is an assembly-room, with a seating capacity of 750 persons. On the Madison street side are seven stores. The second floor contains a lobby, the business office, rooms for trustees, library and an assembly hall large enough to hold 400 persons. The third and fourth floors are divided off into class and recitation rooms, while on the fifth floor are laboratory and lecture rooms and a photograph gallery, together with apartments for other uses. Henry Ives Cobb is the architect.

BONNELL'S INKS

USED BY

The Commercial Advertiser.

THE J. HARPER BONNELL CO.,
11-13 Vandewater street, New York.

Gentlemen: I take pleasure in stating in answer to your request that your ink, which for the past two weeks has been used in our establishment to the exclusion of all others, is working satisfactorily and well. The color is good and the thickness even. Yours truly.

ROBT. A. CORREGAN, Publisher.

BONNELL'S INKS

USED BY

The Chicago Daily News and Record.

The J. Harper Bonnell Company has been rewarded the order for supplying ink to the Chicago Daily News and Record. Mr. Lawson's order is perhaps the one most sought after by ink men generally, and Mr. Bonnell is receiving many congratulations accordingly.

Apart from the size of the contract, it is well known that these two papers are unexcelled in mechanical make-up, so that Mr. Lawson's preference for the Bonnell inks speaks volumes for their superiority.

BONNELL'S INKS

USED BY

The Illustrated American.

MESSRS. J. HARPER BONNELL CO.,
11-13 Vandewater street, New York.

Dear Sirs: We have now used your ink for about six months and it has proved entirely satisfactory to us. We recommend it for its brilliancy and also for its fine drying qualities. When we have used it on our Gallery of Players, which is printed on a coated paper, we have gotten results which equal the very highest-priced inks we have ever purchased. Yours truly,

THE ILLUSTRATED AMERICAN,
H. W. Berryman, Gen'l Mgr.

POLICE OF CHICAGO.

STRENGTH OF THE FORCE.

The total number of men constituting the force Dec. 31, 1894, was 3,187, assigned to duty as follows:

General superintendent	1
Assistant superintendent	1
Secretary	1
Inspectors	5
Superintendent's private secretary	1
Captains	16
Lieutenants	64
Patrol sergeants	104
Desk sergeants	107
Clerk of detectives	1
Sergeants of detectives	2
Clerk of detectives	1
Detective sergeants	63
Custodian	1
Clerks	5
Lock-up keepers	27
Patrolmen on patrol duty	1,860
Patrolmen on permanent post duty	417
Patrolmen detailed in plain dress	131
Patrolmen detailed in signal service	152
Patrolmen detailed in ambulance service	24
Patrolmen specially detailed	140
Patrolmen detailed on licenses	26
Patrolmen detailed as vehicle inspectors	5
Pawnshop inspectors	6
Bailiffs	13
Pound-keepers	3
Photographer	1
Veterinary surgeon	1
Printer	1
Assistant printer	1
Stenographers	3
Superintendent bureau of identification	1
Court clerks	4
Total	3,187

....THE BEST THOUGHT OF THE BEST MINDS....

THE IRVING SYNDICATE (Incorporated).

A Press Agency for the Circulation of High-Class Literature Only.
OUR SPECIALTIES: Home and Household Reading, Popular Science, Problems in Civics and Sociology, the Discussion of Religious Questions.

Among the regular contributors to the Irving Syndicate are the following:

Theodore Roosevelt,	Merrill Edwards Gates,	Helen Campbell,
David Starr Jordan,	Newman Hall,	Count Bernstorff,
Hon. James A. Beaver,	John H. Vincent,	Canon F. W. Farrar,
Prof. Charles F. Holder,	E. Benjamin Andrews,	Mary Lowe Dickinson,
Sir J. W. Dawson,	A. H. Sayce,	Theodore L. Cuyler,
Prof. W. Garden Blaikie,	J. P. Mahaffy,	Maud Ballington Booth.

Among the regular patrons of the Irving Syndicate are these: Chicago Daily News, The Chicago Record, Philadelphia Press, Christian Register, The Churchman, Boston Journal, Newark News, Lutheran Observer, Omaha Bee, Providence Journal, New Orleans Picayune, North and West, San Francisco Chronicle, Northwestern Christian Advocate.
For further particulars address The Irving Syndicate, 203 Broadway, New York City.
LA SALLE A. MAYNARD, President and General Manager.

Of the value of the Marquise de Fontenoy's daily letter as a special feature nothing further need be said than that at the present moment no less than five of the leading dailies throughout the United States are giving up three-quarters of a column thereto every day. The service, which began in a New York daily nearly five years ago, has through its own peculiar merit recommended itself to the editors of The Chicago Record, the Philadelphia Press, the New York World, the New Orleans Picayune and the San Francisco Examiner, all of which, with the exception of the latter journal, which began the service a year ago, have been publishing the letter daily for over three years.

Marquise de Fontenoy is the nom de plume of a titled foreigner who, by reason of years spent at the various courts of Europe, being brought into contact with the various royal and imperial personages and possessing unique means for keeping au courant with the innermost happenings in royal and aristocratic circles, is enabled to give the latest and most trustworthy information upon the subject.

The letters are mailed daily in ample time to reach subscribers twenty-four hours before publication, which is simultaneous. A limited number of newspapers may be accommodated with the service, only one paper in each state being accepted. Full particulars on application to the Marquise de Fontenoy, box 2493, General P.O., New York.

SCHOOL CENSUS OF THE CITY OF CHICAGO.

[Taken April, 1894.]

The PROVIDENT SAVINGS makes a specialty of Low-Priced Insurance and has lately added to its list of attractive forms a NEW WHOLE-LIFE POLICY.

LOW PREMIUMS. DIVIDENDS. CASH SURRENDER VALUES. PAID-UP INSURANCE.

NOTHING BETTER IN THE MARKET.

HOME OFFICE, - - - 29 Broadway, New York.

SANITARY DISTRICT OF CHICAGO.

Offices—Rialto building.

OFFICERS.

President—Bernard A. Eckhart.
Treasurer—Melville E. Stone.
Counsel—John P. Wilson.
Attorney—Charles S. Deneen.
Chief Clerk—James Reddick.
Chief of Police—Capt. Edward Williams.
Chief Engineer—Isham Randolph.
Board of Trustees—Bernard A. Eckhart, Frank Wenter, Thomas Kelly, William J. Boldenweck, Alexander J. Jones, James P. Mallette, Joseph C. Braden, Zina R. Carter and Thomas Smyth.

The following from ex-President Wenter's annual message, delivered Dec, 3, 1895, shows what has been done, with the amount expended: "Beginning four years ago, with but little information, with a pessimistic and critical public as a spectator, it required perseverance and nerve on the part of the trustees who were charged with the execution of the work and upon whose shoulders rested the responsibility. But perseverance and push mastered the situation.

"In place of the then wild and desolate valley, with a tortuous river covering its full width, we see to-day a mighty channel, twenty-eight miles long, with a river diversion of sixteen miles—a work toward the success of which any one connected with the district, be he trustee or officer, may be proud of having done a share.

"The first contracts, sections 1 to 14, were let in June, 1892, and bids for the last work on the main channel, the regulating works on section 15, were opened Nov. 20, 1895. The first shovel of earth was lifted on Sept. 3, 1892, in the presence of a mighty concourse of people, as a sign of the official inauguration of the work. The total amount of the contract work on the entire channel, not including bridges and masonry for same, is nearly $19,000.000.

"The first section in the rock was finished July 4, 1895. Sept. 3, 1895, the anniversary of 'shovel day,' section 10, one of the most gigantic rock sections on the line, was finished and on that auspicious occasion a tablet was placed in the wall of the channel and the board took official recognition of this event by inviting a large number of Chicago's representative citizens to be present to witness the setting of the tablet, Judge McConnell delivering the address.

"At the present time two rock and two earth sections are entirely finished, with six other sections nearly completed. The total work done on the entire channel to date amounts to over 75 per cent of the whole.

"The total receipts of the district from date of organization to Dec. 1, 1895, were $18,941,529.22, as follows:

RECEIPTS.

Engineering department	$3,795.07
Construction account	80,041.60
Loans	100,000.00
Tax account	5,403,513.73
Bonds	12,000,000.00
Bond interest and premium acct.	150,035.23
Law department	1,790.00
Land account	37,480.03
Interest acct. (December estimated)	177,333.86
General account	8,160.50
*Tax levy, 1895	981,379.31
Total	18,941,529.33

*Warrants, with interest coupons attached, drawn against the tax levy of 1895.

"The total expenditures for the entire work from its inception to Dec. 1, 1895, were $17,818,938.54, as follows:

EXPENDITURES.

Engineering department	$760,230.59
Construction account	12,401,164.11
Clerical department	49,522.17
Treasury department	7,922.75
Interest on loans	2,163.52
Loans repaid	100,000.00
Law department	216,995.05
Land account	2,524,599.10
General account	260,498.09
Bonds retired	690,000.00
Bond interest and premium	718,750.00
Police department	114,036.16
Total	17,818,938.54
Balance	*1,122,590.79
Total	18,941,529.33

*$855,000 of this balance is the remainder of the amount appropriated for the payment of bonds and interest on bonds and tax warrants.

"The sanitary district owns 6,563 acres of land, stretching over the territory from Robey street in Chicago down to the city of Joliet, a strip of land varying in width from 800 to 4,000 feet. While at present much cannot be realized on this land the time will come when with good business management this property will have an immense value and will yield a large revenue."

TREASURER'S REPORT.

Statement of the finances from Jan. 1 to Nov. 30, 1895, inclusive:

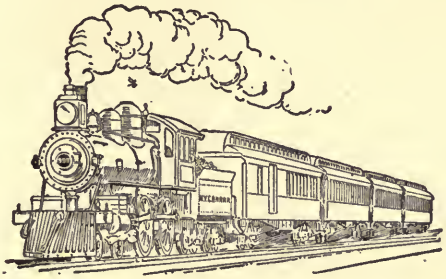
"THE NEW YORK CENTRAL LEADS THE WORLD."

—*LESLIE'S WEEKLY.*



The Famous Empire State Express of the New York Central. Fastest Train in the World. In Daily Service Between New York and Buffalo and Niagara Falls.

THE OLD RECORD

OF THE EMPIRE STATE EXPRESS,

440 MILES IN 520 MINUTES,

An average of 51 miles an hour, all day, has been the talk of the world for over four years.

That time having been exceeded on one of the English lines, the time of the Empire State Express has just been quickened, and

THE NEW RECORD

OF THIS WONDERFUL TRAIN IS

440 MILES IN 495 MINUTES,

An average speed of 53.33 miles an hour, including four stops and twenty-eight slow-downs.

The Empire State Express remains the banner train of the world for speed and a conspicuous example of the magnificent train service of

"AMERICA'S GREATEST RAILROAD."

Marshall Field.....	1,225,000	Total donations.....	11,625,000
C. T. Yerkes.....	500,000		
Ogden estate.....	250,000		
Silas B. Cobb.....	150,000		
S. A. Kent.....	225,000		

In his last donation of $3,000,000 Mr. Rockefeller gives $1,000,000 unconditionally and $2,000,000 when the same amount shall have been donated by others.

Cable Address:
ROMEIKE,
New York.

139 FIFTH-AV.,
New York.

HENRY ROMEIKE.

The First Established and
Most Complete Newspaper Cutting Bureau
in the World.

ESTABLISHED LONDON, 1881. ESTABLISHED NEW YORK, 1884.

Branches: London, Paris, Berlin, Sydney.

Why did the New York Herald ask ROMEIKE to send for one week every newspaper clipping containing the name of Smith?

To compile a very interesting two-column article for the Sunday Herald on the doings of the Smith family.

Why does the New York Tribune ask ROMEIKE to send everything about millionaires?

To publish annually one of the most valuable articles containing the names and addresses of people of large means whose names only rarely appear in the newspaper press.

Why does The Chicago Daily News ask ROMEIKE to send everything about the members of its staff?

Why don't you give ROMEIKE an order for clippings on any given subject?

We read every newspaper and periodical of importance in the United States and Canada, and my branches in London, Paris, Berlin and Sydney can send you clippings on any subject from all the principal papers published anywhere.

BITS OF EARLY CHICAGO HISTORY.

Fort Dearborn established, 1803.
First white settler, John Kinzie, 1804.
First masonic lodge, 1805.
First physician, John Cooper, 1810.
First teacher, 1811.
Settlers murdered at Lee's place, April 6, 1812.
First merchant brig put on the upper lakes, 1814.
First mention of a justice of the peace, 1821.
First baptism, Alexander Beaubien, 1822.
First marriage, Dr. Walcutt to Ellen M. Kinzie, July 20, 1823.
Chicago becomes a precinct of Peoria county, Sept. 6, 1825.
Isaac McCoy preaches the first protestant sermon, Oct. 9, 1825.
First election, Aug. 7, 1826.
First ferry established at Lake street, 1829.
City surveyed and platted by canal commissioners, 1830.
First bridge across south branch, near Randolph street crossing, 1830.
Cook county created, Jan. 15, 1831.
First county roads established (State street, Archer avenue, Madison street and Ogden avenue), June, 1831.
First methodist class formed, June 16, 1831.
First postoffice, 1831.
First street leading to the lake laid out, April, 1832.
First Sunday school organized, Aug. 19, 1832.
First frame business building erected, 1832.
First bridge over north branch, 1832.
First catholic church (St. Mary's) organized, May 5, 1833.
First presbyterian church organized, June 26, 1833.
School section 16 sold at public auction, October, 1833, for $6.72.
First issue of the Chicago Democrat, Nov. 26, 1833.
First shipment from the port of Chicago, 1833.
First episcopal service, 1834.
First drawbridge, Dearborn street, 1834.
First divorce suit and murder trial, 1834.
First piano, 1834.
First fire company formed, Pioneer, 1834.
Evacuation of Fort Dearborn as a military post, 1836.
First railroad chartered, Chicago & Galena Union, Jan. 16, 1836.
Construction of canal begun at Bridgeport, July 4, 1836.
First odd-fellows' lodge, Aug. 11, 1836.
Archer road laid out, 1836.
Rush Medical college incorporated, March 2, 1837.
Chicago incorporated as a city, March 4, 1837.
First city election, March 31, 1837.
First city census taken July 1, 1837, showing the population to be 4,170.
First theater opened, October, 1837.
First pamphlet printed, 1837.
First steam fire engine, February, 1838.
First Chicago steamer, James Allen, built 1838.
First invoice of wheat exported, 78 bushels, 1838.
Chicago Daily American issued April 9, 1839.
Regular steamboat line between Chicago and Buffalo established, July, 1839.
Permanent establishment of public free schools, 1840.
First Cook county murderer hanged July 10, 1840, three miles south of the city, on the lake shore. His name was John Stone. The crime was committed in the Town of Jefferson.
Clark street bridge built, 1840.
Wells street bridge built, 1841.
First propeller built on Lake Michigan, launched July, 1842.
Negro sold at auction Nov. 14, 1842.
First book compiled, printed and bound, the City Directory, 1843.
Chicago Daily Journal issued April 22, 1844.
First issue Gem of the Prairie, May 20, 1844.
Meat first packed for the English markets, 1844.
Dearborn school building erected on Madison street, opposite McVicker's theater, 1845. This was the first permanent public-school building.
First issue of a newspaper printed in a foreign language, Nov. 26, 1845.
First telegram received in Chicago from Milwaukee, Jan. 15, 1848.
Chicago & Galena Union railroad opened to Elgin, Feb. 1, 1849.
Chicago first lighted with gas, Sept. 4, 1850.
Main line of the Illinois Central railroad completed, Dec. 28, 1855.
First suburban trains, Chicago to Hyde Park, June 1, 1856.

1869	280,000	6,488	23.10	1843	7,580	141	18.60

NOTE.—The figures of population in this table are those of the United States census for the years 1850, 1860, 1870 and 1880; of the state census for 1845, 1855 and 1865; of the city census for the years 1843, 1846, 1847, 1848, 1849, 1853, 1856 and 1862; of the official census under the school law for every even-numbered year thereafter. For the intermediate (odd-numbered) years the population is estimated. Except for the year 1893 the estimated population of each intermediate year has been fully sustained by the official census of the next succeeding year; the exception was due to the exceptional increase of population during the World's-Fair year, not all of which was added to the permanent population.

NOTEWORTY FEATURES OF 1894.

Of the twenty principal causes of mortality in 1894 the diarrheal diseases claimed, as usual, the largest number of victims—2,936, or about one-eighth of the whole number. Then followed in the order here given the tubercular diseases—including 2,155 deaths from consumption—pneumonia, diphtheria, brain diseases, convulsions, bronchitis, heart diseases, smallpox, infantile marasmus, cancer, typhoid fever, acute nephritis, chronic nephritis, puerperal diseases, cerebro-spinal fever, septic diseases, whooping cough, scarlet fever and measles. These account for 17,993 deaths out of the total 23,892 recorded for the year. Of the remainder, 1,541 were from violence—a total greater than from any of the above-enumerated twenty principal causes of death except the diarrheal and tubercular diseases. According to the returns made to the department there were 256 deaths from railroad accidents and 45 from street-car accidents, but the police records and the books of the coroner's office show that there were 354 human lives thus crushed out in 1894 within the city limits and there is reason to believe that even this figure is much too low—the return of the cause of death to the department in many of these cases being given as "shock from surgical operation," "crushed," fracture" of skull, spine, etc., or some other euphemism to cover up the fact of railroad slaughter.

Commenting upon this sacrifice of human life, a leading medical journal since the close of the year 1894 has pronounced Chicago the "most blood-guilty city on earth" in this respect, and points out, as was done in the report of the commissioner for 1893, that the slaughter is due to the fact that there are over 2,000 miles of railroad tracks within the corporate limits of the city, with more than 3,000 street crossings at grade, over which 1,400 trains run daily, and cites the fact—also stated in that report—that in 1893 one of the railroads using the block system of signals carried nearly half a million passengers in a few weeks without injury to a single individual either on its tracks or its trains. It then adds: "And yet not only does the municipality neglect to enforce the use of the block signal system on the railroads within the city limits, but it does not even compel the companies to maintain gates or other safeguards at every crossing, nor to employ signal men to warn of the approach of these rapidly moving engines of death and destruction."

Another large factor of the total deaths from violence is that of suicide, and the fatal facility with which poisons may be procured is, no doubt, responsible to some extent for the large number of these deaths—234 during the year, a majority by poisons, chiefly morphine and carbolic acid. More stringent regulations concerning the sale of poisonous drugs are obviously necessary.

The death rate among the colored element of the population of Chicago is, relatively, much in excess of the mortality of the race in the country at large—which is about 50 per cent higher than that of the white population. The official census fixed the colored population of the city in 1894 at 24,889, among which number there were 664 deaths, being an actual death rate of 26.67 per thousand. The white death rate—colored excluded—was 15.05 per thousand, and the excess of the colored mortality is thus seen to be more than 77 per cent.

When You Advertise

The subject should be considered with the same degree of intelligence and efficiency as if you were about to open a bank account. If there is anything you wish to know about advertising in newspapers or magazines write to . . . . . .

TO PUBLISHERS AND EDITORS:

I can do any emergency or "rush" assignments day or night. Not only general correspondent's work, but assignments of a critical, professional, mechanical or religious, sporting, marine, scientific or any kind that only a specialist would be expected to do.

I do not ask any more than you now pay the individual members of your staff.

I have been employed to examine and buy printing presses, type-setting machines, etc., or report on same. No detail of the business or mechanical part of the publishers' department but what you can utilize me in in this section.

I have gotten estimates and bought wares for events and purposes for papers and have done some of the most unexpected lines of work for publishers for features that they wanted to make special displays of, such as souvenirs, etc.

N. B.—If you have no New York headquarters you are cordially invited to make my office the same. Furthermore, you can spread this invitation to and before your friends, acquaintances and constituents in any manner you choose; publicly in the columns of your paper or any other way.

CORRESPONDENT AND PRESS AND NEWS BUREAU. (Established 1886.)

GEO. A. COONEE,
STEWART BUILDING, N. Y. CITY.

Advertisements of Special Wants.

THE CHICAGO DAILY NEWS is the principal medium of Chicago and the Northwest for the publication of small "WANT" ADVERTISEMENTS.

THE DAILY NEWS publishes a larger number of advertisements of this character during the year than any other paper in the United States, the New York Herald and World alone excepted. It is therefore the well-recognized channel of communication in Chicago and throughout the tributary Northwest for the supplying of SPECIAL WANTS, such as Situations Wanted, Help Wanted, Agents Wanted, Boarding, Rooms to Rent, Real Estate for Sale or to Rent, Financial, Business Chances, to Exchange, Partners Wanted, Lost and Found, Information Wanted, Instruction, Personal Notices, to Buy or Sell Horses, Carriages, Machinery, Store and Office Fixtures, Household Furniture, etc.

MANUFACTURERS and all others throughout the Northwest employing labor will find the "Want" columns of THE DAILY NEWS especially efficient in supplying their needs. Those seeking employment will always find therein a large number and choice of offers from employers, while those who wish to make their own personal application for employment can through its columns most easily, cheaply and effectively address the largest possible number of employers. The "Want" columns of THE DAILY NEWS are, in fact, a BUREAU OF EXCHANGE where labor and capital most easily meet and execute their mutual exchange of value.

For ALL the various kinds of special "WANTS" THE CHICAGO DAILY NEWS is the leading and recognized medium of communication.

Advertising rates will be mailed upon application.

Mutual Reserve Fund Life Association

HOME OFFICE

Corner Broadway and Duane-st., New York.

E. B. HARPER, FOUNDER.

"And when the flood arose, the stream beat vehemently upon that house, and could not shake it, for it was founded upon a rock."

$40,000,000 SAVED IN PREMIUMS.

$10,000.00.

The total cost for the past 14 years for $10,000.00 of insurance in the Mutual Reserve amounts to less than Old System Companies charge for $4,500.00 at ordinary life rates—a saving in premiums which is equal to a CASH DIVIDEND of NEARLY 60 per cent.

60 Per Cent Dividend Saved in Premiums.

"A bird in hand is worth two in the bush."

$30,000.00.

The total cost for the past 14 years for $30,000.00 of insurance in the Mutual Reserve amounts to less than Old System Companies charge for $12,500.00 at ordinary life rates—a saving in premiums which is equal to a CASH DIVIDEND of NEARLY 60 per cent.

60 Per Cent Dividend Saved in Premiums.

"A bird in hand is worth two in the bush."

1881——THE ELOQUENCE OF RESULTS——1895
